HANDBOOK 1996

Principal dates for 1996

- Semester 1
- Semester 2
- Dates to Note:

Semester 1

26 February - 01 March	Orientation/Registration Week
04 - 08 March	Week 1
11 - 15 March	Week 2
19 - 22 March	Week 3
25 - 29 March	Week 4
01 - 04 April	Week 5
09 - 12 April	Week 6
15 - 19 April	Week 7
22 April - 3 May	Class free period
06 - 10 May	Week 10
13 - 17 May	Week 11
20 - 24 May	Week 12
27 - 31 May	Week 13
03 - 07 June	Week 14
11 - 14 June	Week 15
19 June - 06 July	Examination Period

Semester 2

15 - 19 July	Registration Week
22 - 26 July	Week 1
29 July - 02 August	Week 2
05 - 09 August	Week 3
12 - 16 August	Week 4
19 - 23 August	Week 5
26 - 30 August	Week 6
02 - 06 September	Week 7
09 - 13 September	Week 8
16 - 20 September	Week 9
23 September - 07 October	Class free period
08 - 11 October	Week 12
14 - 18 October	Week 13
21 - 25 October	Week 14
28 October - 1 November	Week 15
06 - 23 November	Examination Period

Dates to Note:

07 February	Commencement Day
18 March	Canberra Day Public Holiday
05 April	Good Friday
08 April	Easter Monday
25 April	Anzac Day Public Holiday
01- 03 May	Conferring of degrees ceremonies
01 June	Closing date for applications for Semester 2
10 June	Queen's Birthday Public Holiday
20 July	Examination Results released
01 October	Closing date for applications for 1997
07 October	Labour Day Public Holiday
25 October	Stone Day (Foundation Day) (no classes)
14 December	Examinations Results released

University of Canberra, AUSTRALIA

HANDBOOK 1996

How to use this Handbook

- Prospective Students
- New and Currently-Enrolled Students
- Staff Members

This Handbook has been divided into a number of sections to ensure that information is easily accessible.

Advice for prospective students, new and currently enrolled students and staff members follows. All users are directed to the Principal Dates listed eleswhere.

Prospective Students

Prospective students interested in information concerning courses available at the University of Canberra should refer, in order, to the following sections.

University. Course Enrolment Offered in 1996 listes all courses offered by the University of Canberra in 1996, with the name of the Faculty responsible for administering each course and a page reference. This section also provides information on the organisation, senior staff and research activities of the University; bursaries, scholarships and prizes; and services available to students such as accommodation, health and counselling, study skills facilities, and on-campus facilities.

Faculties. Having noted the name of the Faculty responsible for administering courses of study in which they are interested, and the relevant page references, prospective students can refer to the Faculty entry to gather detailed information on the academic requirements for completion of courses of study. Course charts listing units undertaken in "typical" full-time study patterns are provided for most courses of study.

Description of Units. This section provides prospective students with information on individual units - eg prerequisites (if any), course contact hours, credit point value, syllabus - in an alphabetical listing.

Electives. This section is divided into two parts - Single Electives and Elective Majors.

Single Electives

Some courses of study require that students undertake single elective units, usually stipulating the total value in credit points to be obtained at certain semester levels; for example, it might be required that students in a particular course undertake at least four elective units totalling 12 credit points, stipulating that at least one of these units must be at semester level 5/6 (meaning that the level of difficulty is set for a student undertaking the final year of a three-year course of study).

The list of single elective units, while not exhaustive, suggests units which students might undertake to add to their basic skills, for example: 1154 Writing 1: English Expression and 1519 Introduction to Exercise Science.

Elective Majors

Most courses require students to undertake an elective major which is a set of at least six sequential or related semester-long units (or fewer year-long units) within a particular field of study as part of the academic requirements of a course. These are listed, in alphabetical order, in the second part of the Electives section, along with the name of the administering Faculty. It is strongly recommended that students seek the advice of their course convener in the early stages of their studies on the appropriateness to their course of their chosen elective major.

Unit Availability Section. Students should be aware that not all units are offered every semester and that they need to determine each unit's availability when planning a study program.

Information for Students. Students need to read this section carefully. The section provides valuable information on topics such as admission and enrolment procedures, definition of University terms, academic progress requirements, credit transfer, and fees and charges.

New and Currently-Enrolled Students

New students and students currently enrolled in a course of study at the University of Canberra should use this Handbook to

- familiarise themselves with the academic requirements of the course in which they are enrolled by referring to the course entry in the section of the Faculty responsible for administering their course;
- refer to the "typical" study program of the course in which they are enrolled - again by referring to the entry of the Faculty administering the course;
- investigate single electives and elective majors available to them by referring to the Electives section;
- gain an idea of the content of particular units by referring to the alphabetical listing of all units in the Description of Units section;
- check the availability of the units in which they wish to enrol in the Unit Availability section remembering that not all units are offered each semester;
- refer to the Information for Students section for information on procedures for enrolment and re-enrolment, academic progress requirements, payment of fees and charges;
- refer to the University section for information on the organisation, senior staff and activities of the University; bursaries, scholarships and prizes; and services available to students such as accommodation, health and counselling, study skills facilities, and on-campus facilities.

New students will also find useful the campus map.

Staff Members

Members of the staff of the University of Canberra and other universities will find the Handbook useful in providing information on

- courses of study available at the University in 1996 (refer to the list of courses offered in 1996 in the University section and to individual faculty entries);
- course conveners: where possible, the name, location and phone number of staff responsible for particular areas of study have been listed in the faculty sections and in the Electives section. This information will be useful for course advisers in referring students to other staff responsible for elective majors;
- other staff members (refer to the University section); and
- administrative sections (areas of responsibility and telephone numbers are also given) (see the University section).

Single Electives/Service Units

The following units are available to undergraduate students in a number of courses as single electives, to develop their basic skills in certain areas.

Details of contact hours and syllabuses are available in the Description of Units section. Students should also refer to the Unit Availability List in this Handbook.

Further details are available from the Executive Officer/Assistant of the Faculty administering the unit/s.

HANDBOOK 1996

Elective Majors for Undergraduate Courses

A number of undergraduate courses of the University offer elective majors of units to students. An elective major can often be undertaken in a faculty other than the faculty administering a student's course.

Below are examples of some possible six- unit elective majors to be taken by students. Other combinations may be designed to suit the needs of particular courses.

Students should note that some units, particularly at the 5/6 level, have extensive prerequisite requirements that it may not be possible to satisfy within an elective sequence of only six units.

It is the responsibility of the student to determine the requirements of an elective major in his/her particular degree course of studies.

Students are strongly advised to obtain course advice from their course convener before selecting an elective major. Note that only students enrolled in courses in the Faculty of Education may take curriculum, teaching units, or professional units offered by that Faculty.

Aims

The principal aims of the University are to prepare students for professional careers through high quality courses at undergraduate and postgraduate levels, and to make a contribution to the intellectual development of Canberra and the south-east region, and of the nation, through the research and consultancy activities of its staff. The University accepts a responsibility to achieve these aims in the context of its equal opportunity policies.

Mission

The University of Canberra aims to:

- be known for the excellence of its scholarship and its contribution to the dissemination of academic and applied knowledge directed to socially valuable ends
- develop a distinctive academic character based on the provision of liberal and vocational education relevant to a wide range of occupations and on its contribution to research which will tend to be of an applied nature
- continue its special relationship with the ACT and surrounding communities and be responsive to their educational needs while making a significant contribution to teaching, research and consultancy at national and international levels
- encourage communication with its graduates, professional bodies and employer and employee organisations, both public and private sectors of employment, all levels of government and with other academic institutions
- offer its students an education which will inspire and assist them to high levels of achievement enabling them to fill a socially responsible role in the community and to contribute to the expertise, practice and influence of the specific areas to which their education has been directed
- provide a range of courses and other educational opportunities for students at all stages in their lives and to all groups in society and facilitate the participation of an equitable proportion of disadvantaged people
- encourage the academic staff to make a direct contribution to their disciplines and professions by undertaking consultancies and research work and to offer intellectual leadership and service to society at large
- have an organisational structure which enables all its members to contribute to the formulation of policy in the University; and to implement and develop the University's mission
- maintain social, educational, environmental and administrative frameworks which will allow its members an equal opportunity to participate in its activities, which will stimulate the University community and which will establish an atmosphere of academic freedom and intellectual activity.

History

The University of Canberra was established by the Commonwealth Government in 1967 as the Canberra College of Advanced Education. Students were enrolled on a part-time basis in 1968 and full- time teaching began the following year.

The Bill for an Act to establish and incorporate a University of Canberra under the sponsorship of Monash University and to repeal the Canberra College of Advanced Education Act 1967 was assented to by the Governor-General on 28 December 1989. The University of Canberra Act 1989 came into effect on 1 January 1990. Sponsorship by Monash University concluded at the end of 1993. The University is a member of the Unified National System, and of the Association of Commonwealth Universities.

Campus

The University of Canberra occupies a site of 119 hectares in the suburb of Bruce, adjacent to the Belconnen Town Centre and about eight kilometres from the central business district of Canberra. The Bruce precinct includes a technology park, the Australian Institute of Sport, a campus of the Canberra Institute of Technology, a major hospital and several government departments.

The current enrolment is 8655 students. Part-time students account for about 37 per cent of the student body, with around 20 per cent enrolled in postgraduate courses. At present about 57 per cent of the student population is aged under 25 years, and 55 per cent of the enrolments are women.

Courses are organised within the Faculties of Applied Science, Communication, Education, Environmental Design, Information Sciences and Engineering, and Management.

Residential accommodation on campus caters for about 1000 students, while some off-campus accommodation students is available nearby and in the city. College House, a separate building accommodating 28 persons in ensuit rooms, is available for visiting academic staff and for use by short course participants.

Extension Studies

In addition to those students enrolled in formal bachelor degree courses, and graduate level studies a large number of persons attend short courses offered at the University during the year. Short non-award courses for a variety of occupations such as public administration, human resources management, and management courses for local government are conducted as well.

In co-operation with the Australian International Development Assistance Bureau (AIDAB) and the Overseas Student Office of the Commonwealth Department of Employment Education and Training, the University enrols a number of international students each year. Most University courses have been approved for offering on a full-fee paying basis to international students.

The University of Canberra currently has in place exchange arrangements with overseas universities located in Canada, Mexico, People's Republic of China, Italy, Germany, Taiwan, Japan, USA, Vietnam and Malaysia.

Arrangement include staff and student exchanges, study abroad opportunities, and academic/research collaboration.

Equity Programs

The University of Canberra is committed to a policy of equal opportunity in education. The University affirms its continuing opposition to unfair discrimination on any grounds consistent with Commonwealth and ACT legislation. This commitment accords with the maintenance of academic standards, and supports the principle that students are selected and progress on merit. The University will continue to develop procedures and practices to ensure equitable treatment of all students and potential students concerning recruitment, admission and academic progress, as well as University facilities and services. A copy of the University's policy on equal opportunity in education is available on request from the Equity Office.

The University has taken positive action to implement initiatives aimed at increasing access and participation of under-represented or disadvantaged social groups.

Equity programs currently include:
assistance for students with disabilities; study skills assistance for students from non-English speaking backgrounds; Access Scheme for educationally disadvantaged school leavers; alternative admission schemes for adults; Equity Exemption Awards for postgraduate courses.

Refer to the Index in the Handbook for details of the location of each program.

Council

The governing authority of the University is the Council. Its membership comprises the Chancellor; the Vice-Chancellor; seven persons appointed by the Governor-General; two persons appointed by the Chief Minister of the Australian Capital Territory; one person (not being an employee or student of the University) elected by graduates of the University and of the College; three members of the academic staff elected by members of that staff; one member of the general staff elected by members of that staff; two students of the University elected by students of the University to represent undergraduate and postgraduate students; and the person or persons (if any) appointed under the following provision - where the Council considers that it is necessary to appoint one or two extra members of the Council to enable the Council to perform its functions efficiently, the Council may appoint a person or persons as a member or members of the Council.

Chancellor of the University

Emeritus Professor D.R. Horne, AO, Hon DLitt *UNSW*, Hon DUniv *Griffith*

The Council

Members as at 30 September 1995

Appointed by the Governor-General

Meredith Ann Edwards, AM, BCom (Hons) *Melb*, PhD *ANU* - appointed to Council 7 February 1990; re-appointed from 1 January 1993; present tenure expires 31 December 1996.

Collin William Martin Freeland, AO, BE (Hons) *UNSW* - appointed to Council 7 May 1992; present tenure expires 6 May 1996.

Wendy Joan Guest, BA Com *Mitchell CAE* - appointed to Council 7 May 1992; present tenure expires 6 May 1996.

Ian Mackintosh, BCom *Auck*, ACA, CPA - appointed to Council 7 February 1990; reappointed from 7 January 1993; present tenure expires 31 December 1996.

Wendy Elizabeth McCarthy, AO, BA, DipEd *NE* - appointed to Council 7 May 1992; present tenure expires 6 May 1996.

John Michael Penfold Radik, BSc *ANU*, Grad Dip Computing Studies *Canberra CAE* - appointed to Council 7 May 1992; present tenure expires 6 May 1996.

Appointed by the Council

Donald Richmond Horne, AO, Hon DLitt *UNSW*, Hon DUniv *Griffith* - appointed as Chancellor 1 January 1992; reappointed as Chancellor 1 January 1994; present tenure expires 31 December 1995.

Peter McGhie, MA (Hons) *Well* - appointed to Council 7 July 1993; reappointed 7 July 1995; present tenure expires 6 July 1997.

Cheryl Vardon, BA, DipT *Adel*, MACE, FAIM - appointed to Council on 28 September 1994; reappointed 1 June 1995; present tenure expires 31 May 1997.

Appointed by the Chief Minister of the Australian Capital Territory

Howard William Powell, AM, BSc *Syd* - appointed to Council 13 September 1994; present tenure expires 12 September 1998.

Kaye Price - appointed to Council 13 September 1994; present tenure expires 12 September 1998.

Elected by the Academic Staff

Belle Alderman BA *Georgia*, MLn *Emory*, DLS *Col* - elected to Council 27 September 1995; present tenure expires 26 September 1997.

Clementina Annice, BEd *WAIT*, MA *Reading*, EdD *W Virginia* - elected to Council 27 September 1986; re-elected 27 September 1988, 27 September 1990 and 27 September 1992; re-elected 27 September 1994; present tenure expires 26 September 1996.

James Robert Hanratty, BEc *Syd*, MSc(Econ) *Lond* - elected to Council 27 September 1986; re-elected 27 September 1988, 27 September 1990 and 27 September 1992; re-elected 27 September 1994; present tenure expires 26 September 1996.

Elected by the General Staff

Wendy Dunne - elected to Council 3 June 1993; re-elected 27 September 1993 and 27 September 1995; present tenure expires 26 September 1997.

Elected by the Graduates

Patricia Mary Cooper, MEd *Canberra CAE* - elected to Council 27 September 1991; re-elected 27 September 1992; re-elected 27 September 1994; present tenure expires 26 September 1996.

Elected by the Students

Lisa Mansbridge - elected to Council 27 September 1995; present tenure expires 26 September 1996.

Ruth Shrensky, BA (Hons) *N'cle,* Grad Dip TESOL *SthAustCAE* - elected to Council 27 September 1995; present tenure expires 26 September 1996.

Member Ex Officio

Donald Alexander Aitkin, MA *NE*, PhD *ANU*, FASSA, Vice-Chancellor

Committees of Council

Audit Committee

Chair:	Mr C Freeland
Members:	
External member of Council	Mr P McGhie
External member of Council	Mr J Radik
University staff member with relevant expertise	Professor B Andrew

The Deputy Vice-Chancellor (Administration) and the Manager, Administrative Services Division, attend all meetings.

Buildings and Site Committee

Chair:	Associate Professor J McMaster
Members:	
Vice-Chancellor	Professor D Aitkin
Deputy Vice-Chancellor (Administration)	Dr J Grant
a student	to be announced
external members of Council	Mr C Freeland Ms W Guest Ms W McCarthy Mr J Radik
an academic staff member of Council	to be announced
a staff member from the Faculty of Environmental Design	Ms K Wellman
Chair, Students with Disabilities Sub-Committee	Professor A Shaddock

Committee for Ethics in Human Research

Chair:	Ms A McMahon
Members:	Mrs S Bachelard Dr D Eager Dr B Furnass Dr A Hone Dr P Horn Dr F Long Mr B Pentony Ms M Proctor Associate Professor A Roberts Brigadier D Tier Dr T Webb The Reverend D Webster President of Students' Association, or nominee

In accordance with the *NHRMRC Act* 1992, this Committee monitors the use of human subjects in teaching and research experimentation.

Committee for Ethics in Animal Experimentation

Chair:	Dr Will Osborne (Chair)
Members:	Mrs S Bachelard Ms C Bellenger Dr L Hinds Dr P Horn Mr B Pentony Ms M Rauhala Mr S Thomson (student representative) The Reverend David Webster

In accordance with the *ACT Animal Welfare Act* 1992 and *The Australian Code of Practice for the Care and Use of Animals for Scientific Purposes*, this Committee monitors the use of animal subjects in teaching and research experimentation.

Equal Opportunity Committee

Vice-Chancellor (ex officio)	Professor D Aitkin
Equity Officer (ex officio)	Ms L J Haylings
one representative of the Ngunnawal Centre	Ms S O'Neil
one representative from the Vice-Chancellor's Advisory Committee	Associate Professor J McMaster
one nominee of the Vice-Chancellor	Vacant
one undergraduate student nominated by the Students' Association	to be announced
one postgraduate student nominated by the Canberra University Postgraduate Association	to be announced
an external member of Council	Ms W Guest
a staff member of Council	Associate Professor C Annice
one representative of the Association of Academic Staff	Dr G Singleton
one representative of the general staff	Ms C Best
Chair of the Students with Disabilities Committeeor nominee	Ms C Stokes (student)

Sub-committees:
Sexual Harassment Committee; People with Disabilities Committee

Finance Committee

an external member of Council as Chair	Mr I Mackintosh
Vice-Chancellor	Professor D Aitkin
external members of Council	Mr C Freeland Mr J Radik
two academic staff members of Council	Associate Professor C Annice Mr J Hanratty
a student member of Council	Ms R Brooks
the general staff member of Council	Ms W Dunne
Deputy Vice-Chancellor (Administration)	Dr J M Grant

Sub-committees: Academic Staff Committee; General Staff Committee.

Futures Committee

Chair:	Emeritus Professor D R Horne
Members:	Professor J M C Brine Dr M Edwards Mr J R Hanratty Ms W Dunne Professor P W Cullen Mrs L V Jennings Professor D Aitkin Student member of Council

Honorary Degrees Committee

Chair:	Emeritus Professor D R Horne
Secretary:	Mr G R Dennett
Members:	Vice-Chancellor Chair of Academic Board Chair of University Higher Degrees and Scholarships Committee A member of Council appointed by Council who is not a member of the Committee by virtue of any of the preceding paragraphs A member of the Academic Board appointed by Academic Board who is not a member of the Committee by virtue of any of the preceding paragraphs

Legislation Committee

Chair:	Mr C W M Freeland
Members:	Ms C Duggins (Office of the Parliamentary Counsel) Mr G Dennett (Secretary) Dr J M Grant Professor R Tomasic

Student Conduct Committee

Chair:	Professor B Andrew (a professorial member of the academic staff who is not a Dean)
Members:	Dr J Grant, the Registrar Vice-Chancellor or nominee A student member of Council Ms B Chambers (a member of the general or academic staff)

Student Conduct Appeals Board

Chair:	Mr C Freeland, a member of Council not a student or staff member
Members:	Two members of Council, names to be announced.

Student Services Committee

Chair:	Ms C Vardon (external member of Council)
Members:	Director of Student Support Services Dean of Students President of Students' Association (or nominee) President of CUPA (or nominee) Chair, Union Board of Management (or nominee) Chair, Learning and Academic Skills Sub-committee Chair, Welfare Services Sub-committee Director, University Residences

Sub-committees: Learning and Academic Skills; Welfare Services.

Council Representative on University Union Board of Management

Ms W Dunne

Academic Board

The University Act establishes the Academic Board which, subject to the Statutes, is responsible under the Council for all academic matters relating to the University; and may advise the Council on any matter relating to education, learning or research or the academic work of the University. The Board consists of the following members:
The Vice-Chancellor or his or her nominee; six Deans of Faculties; two heads of designated bodies; any member of the academic staff who has been appointed as Professor by the Council, and who is not a member of the Board; one academic staff member of each Faculty Board chosen by resolution of the Faculty Board; three members of the academic staff elected by members of that staff to be members of the Council; two members elected from among their number by the students of the University; two students of the University elected by students of the University to be members of the Council; the person or persons (if any) appointed by the Council after receiving the advice of the Board. The (elected) chair of the Board is currently Professor R.D. Traill; the Board has elected Professor R Tomanic as Deputy chair.

Faculty Boards

The University currently offers courses through six Faculties: Applied Science, Communication, Education, Environmental Design, Information Sciences and Engineering, Management. Under the authority of the Academic Board, each Faculty has a Board of Studies with staff and student members. Faculty Boards make decisions related to course and student matters.

Applied Ecology Research Centre

The Applied Ecology Research Centre aims to contribute to improved management of the flora, fauna an natural heritage of Australia.

The Centre has the following goals:

- to conduct research which contributes to the understanding and improved management of Australian plant and animal species and communities, with particular reference to the impact of human activity;
- to provide professional undergraduate, postgraduate and continuing education in biological resource science and management, especially management of vegetation, wildlife, parks and impacts of recreation;
- to provide consultancy services to both government and non-government agencies involved in biological resource management and visitor use management at all levels; and
- to promote the dissemination of information on environmental management issues among the general community and to encourage informed debate on these issues.

The major current areas of research are

- Ecology and control of introduced pest species and invasive native species
- Ecology and conservation strategies for native Australian species
- Habitat survey and management
- Natural heritage, parks and recreation management
- Environmental Chemistry

The work of the Centre is currently directed into four major programs dealing with control of pest species, biology and conservation of native species, resource survey and habitat dynamics and natural heritage, parks and recreation management and policy. The Centre is currently developing two new programs dealing with applications of Information technology in natural resource management and the application of molecular techniques to wildlife management.

Director: Dr Arthur Georges (06) 201 2523

Centre for Australian Regolith Studies

The Centre for Australian Regolith Studies is a joint venture between the University of Canberra and the Australian National University which undertakes graduate teaching and research aimed at contributing to an improved understanding of the Australian landscape and regolith. Research in the Centre is investigating the factors and processes important in regolith and soil formation and application of this knowledge to improved resource management and development.

The goals of the Centre are

- to extend basic research into regolith related topics;
- to develop and execute research programs of relevance to industry and the community;
- to provide postgraduate, undergraduate and continuing professional education that will equip students to work effectively with regolithic materials;
- to promote awareness within the community and amongst professionals of the value of understanding the regolith through publication, professional short courses, exchange programs and other means as appropriate.

Research in the Centre is currently focused in the following areas:

- Regolith geochemistry of resistate minerals
- The petrology of weathering
- Landscape evolution in Australia
- Regolith signatures of ore deposits
- Regolith resources
- Quaternary geology and pedology

The Centre for Australian Regolith Studies is a partner in the Cooperative Research Centre in Landscape Evolution and Mineral Exploration.

Director: Dr Ken McQueen (06) 201 2520

Cooperative Research Centre for Freshwater Ecology

Pressure on Australian rivers and streams has never been greater. To solve the major ecological problems facing our water managers, knowledge of the characteristics of Australia's unique freshwater systems is essential.

The Cooperative Research Centre for Freshwater Ecology is a joint venture which brings together research, government and water industry agencies to improve our knowledge and management of the Australia's waterways, wetlands and lakes.

Its partners include the University of Canberra, Monash University, Murray-Darling Freshwater Research Centre, Albury-Wodonga Development Corporation, Murray-Darling Basin Commission, CSIRO, the ACT Government, NSW Fisheries, Melbourne Water, ACT Electricity and Water, LA Trobe University and the Sydney Water Board.

Its main aims include:

- to improve our knowledge of freshwater ecosystems to allow the sustainable management of freshwater systems in Australia;
- to develop improved planning and management tools which address the identified needs of water resource managers;
- to ensure this knowledge is transferred to the water and resource managers so that they can manage a sustainable way;
- to contribute an ecological perspective to the development of water policy in Australia; and
- to provide opportunities for education in freshwater ecology at post-doctoral, postgraduate, undergraduate, professional and community levels.

There are six main research areas including Flowing Waters, Standing Waters and Eutropication, Floodplains and Wetlands, Water Quality and Ecological Assessment, Urban Water Management and Fish Ecology and Management, Education and Technology Transfer are other programs.

Professor Peter Cullen, of the University of Canberra, is the Director of the CRCFE. This dispersed organisation is located at sites in Canberra, Albury, Sydney, Melbourne and Narrandera and has an annual budget of $10 million. About 40 research scientists, 50 support staff and 75 graduate students are affiliated with the CRCFE. In addition to supporting visits from overseas scientists, the CRCFE also provides summer employment and scholarships to promising undergraduate students.

At the University of Canberra, the CRCFE offers a highly regarded undergraduate program in water science in the School of Resource, Environmental and Heritage Science within the Faculty of Applied Science. It also offers honours, masters and doctoral programs. Some scholarships are available within the CRCFE to support students with project work.

Director: Professor Peter Cullen (06) 201 5168

Education Program Leader: Associate Professor Richard Norris (06) 201 2543

Cooperative Research Centre in Landscape Evolution and Mineral Exploration

The Cooperative Research Centre in Landscape Evolution and Mineral Exploration is a collaborative venture between the Centre for Australian Regolith Studies (University of Canberra and The Australian National University), CSIRO Division of Exploration and Mining, and the Australian Geological Survey Organisation.

The Director, Dr Raymond E Smith of CSIRO, is based in Perth, WA. The Centre has about 55 scientists as well as support staff, and postgraduate students at the University of Canberra and the Australian National University. The CRC will support visiting scientists from Australia and overseas, and is developing a strong postgraduate and professional education and extension program.

The Centre brings together a major group of Australian researchers in the fields of landscape evolution, regolith studies and mineral exploration to translate these sciences into improved strategies for discovering world-class ore deposits and to train earth scientists to work with regolith materials. The Centre, through this major group of Australian earth scientists, aims to

- develop an enhanced understanding of the three-dimensional evolution of the Australian landscape in terms of its geomorphological, regolith geology, weathering, diagenesis and geochemistry; and,
- to translate this understanding into vastly improved methods for finding world-class mineral deposits, and into the training of earth scientists.

This will be achieved through four major programs:

- Landscapes and regolith on the Australian Shield: which includes the major cratonic areas of the Australian continent and which host most of the known major ore deposits of the nation;
- Landscapes and regolith on the Tasman Fold Belt: which will develop regionally specific exploration procedures that take into account the influences of past and present regolith processes;
- Basins and landscape evolution: which will focus projects in the areas of sedimentary cover and seek to establish a relationship between the regolith geology of the surrounding areas and the basin geology.

  Additionally regolith character of the basin areas will be used to detect the presence of major ore deposits in or beneath the basins; and,
- Australian regolith/landscape evolution - synthesis: which will overview the science of other programs and distil from it basic principles and areas like weathering studies, regolith dating, nomenclature and landscape evolution models.

The CRC has a large financial and in-kind contribution from industry and will develop these links through undertaking strategic projects, educating and training industry personnel and through its applications work.

University of Canberra contact: Associate Professor Graham Taylor, Education and Training Coordinator: (06) 201 2031, taylor@science.canberra.edu.au

Cultural Heritage Conservation Studies Research Centre

The Cultural Heritage Conservation Studies Research Centre consists of a multi-disciplinary group of staff from the Faculties of Environmental Design and Applied Science.

The Centre provides a focus for research into heritage places, buildings, museums and objects in Australia and overseas, utilising the individual and combined talents of Centre staff. Consultancies are also undertaken in these areas for Australian and international clients.

The Centre has four main areas of endeavour

- theoretical, historical and technical research into the development of historic values, aesthetic values, and social values in conservation studies; research into the associative value and interpretative value in understanding community interest in historic places and attachment to the past; the establishment of cultural importance through historical research; and the role of archaeological investigation.
- research into methodologies and techniques used in professional conservationpractice of places and objects.
- research into curriculum development through courses and workshops.
- research consultancy where the existing body of knowledge is re-ordered or expanded in the application to professional issues and case studies and where methodologies used in practice are extended and improved.

Directors: Professor Ken Taylor (06) 201 5148

Professor Colin Pearson (06) 201 2368

National Centre for Corporate Law and Policy Research

The National Centre for Corporate Law and Policy Research has a national and Asian Pacific regional focus, and conducts corporate research and contributes to national policy discussions regarding the administration and content of corporate law.

The Centre has the following goals

- to provide a national focus for policy related research into corporate law and policy in Australia and the Asia Pacific region;
- to have an interdisciplinary orientation and seek research funding from external sources to support research into corporate law and policy;
- to foster group research projects bringing together staff from a variety of disciplinary backgrounds;
- to contribute to corporate law policy making processes at the highest levels in Australia at both Commonwealth and State levels and in the private sector;
- to contribute to the development of research based degrees within the Faculty of Management and to make contributions to the development of teaching materials for both undergraduate and postgraduate students; and
- to emphasise, through the practical orientation of its research, the commitment of the University to professional education in disciplines relevent to corporate law and policy.

Director: Professor Roman Tomasic (06) 201 2559/2336

Deputy Directors: Professor Brian Andrew, Mr Brendon Pentony and Mr Graham Rogers.

National Centre for Social and Economic Modelling (NATSEM)

The National Centre for Social and Economic Modelling was established within the Faculty of Management in January 1993. The Centre receives core funding from the federal Department of Human Services and Health for five years under a

- to develop static, dynamic cohort and dynamic population microsimulation models and microsimulation techniques with the aim of becoming a national and international centre of knowledge and excellence in the field of microsimulation modelling;
- to undertake and publish research to highest academic standards, based upon such models and techniques, across the spectrum of social and economic policy;
- to facilitate access to the models and techniques, by government departments, academic and other organisations in accordance with the Centre's charging policy;
- to conduct intensive short courses, training courses, seminars and conferences about the development and use of microsimulation models and techniques; and
- to co-operate with international, federal, state and local government and non-government organisations working in the fields of economics, social policy and health and community services, to enhance and promote the research and

The Centre has an active research and publication program, which is currently focused on the following areas:

- measurement of poverty, inequality and income distribution;
- assessment of the distributional impact of government and possible policy changes;
- improvements in microsimulation modelling techniques and microdata analysis; and
- development of the static (STINMOD) and dynamic microsimulation modelling capability.

Director: Professor Ann Harding (06) 275 4900

Public Sector Management Research Centre

The Public Sector Management Research Centre was designated in July 1990 to provide a focus for research in public sector management within the University. The Centre is based on scholars from the two Faculties of Management and Education with national and international reputations. The members of the Centre bring to the study of public sector management skills from a range of disciplines, including education, geography, management, political science, psychology, public administration and sociology.

The Centre has the following goals

- to advance knowledge and develop skills in the field of public sector management;
- to provide a national focus for research in public sector management;
- to focus on problems of importance in public sector management;
- to obtain funding from external sources to support research;
- to contribute to the development of research based degrees within the Faculties; and
- to contribute to group/collaborative, cross-disciplinary and inter-Faculty projects.

The research of the Centre is currently focussed on the following areas -

- Education policy development and implementation
- Personnel management
- Public sector reform
- Urban and regional restructuring

Director: Professor John Halligan (06) 201 2714

HANDBOOK 1996

Other Centres

- ACT Innovation Centre
- Australian Centre for Regional and Local Government Studies
- Australian Network for Research and Technology Policy (NEXUS)
- Centre for the Enhancement of Learning, Teaching and Scholarship (CELTS)

ACT Innovation Centre

The ACT Innovation Centre is being established to foster commercialisation of knowledge. It is currently in its early project phase, with target availability scheduled for 1998. It is a partnership with public and private sector enterprises, and its participants include the University of Canberra, Canberra Institute of Technology, Canberra Business Centre, Commonwealth Bank, ACT Government, Lend Lease, ACTEW Corporation and Telstra.

The aims and objectives of the Centre are to:

- foster innovation and commercialisation by creating an environment where approximately thirty new or emerging SMEs (Small to Medium Enterprises) may base their first 3-5 years of operation in a "hot-house" environment and gain from synergy of co-location with like-minded companies and research specialists at the University.
- facilitate "networking" between tenant companies, the University, and local industry.
- provide shared facilities and resources to assist tenant companies, including telephone and secretarial services; marketing and business planning support; publicity and PR support; meeting rooms, demonstration rooms and workshops; access to staff and laboratories at the University and/or CIT campuses: and high speed communication links to the University and regional projects.
- facilitate commercialisation and technology transfer of University research projects.
- facilitate University and industry seminars on leading edge research and product/service innovations.
- arrange both regular and *adhoc* training courses for tenants and local industry.
- advise tenants on sources of funding for their respective projects.
- offer sales and marketing consultant access to tenants to expedite their product sales both nationally and internationally.
- arrange of regular educational tours from local schools to enable appreciation of the entrepreneurial process.
- offer student work experience with tenant companies.

Project Director: Mr Mario Rosi (06) 201 2182

Australian Centre for Regional and Local Government Studies

The Centre was established within the Faculty of Management in 1973, to offer a range of residential programs for elected members in local government. The functions of the Centre have expanded and now include

- the provision of non-award short courses for elected members and officers oflocal government and sub-national/regional administrative units in Australia, New Zealand, the Pacific and the Asian Region
- the development of a range of award units and/or courses within the Faculty of Management on local and regional government
- the stimulation of research into local and regional government and administration
- the development of a range of consultancy services for the three levels of Australian government and their regional organisations
- such other graduate and undergraduate teaching functions as may from time to time be determined by the Dean of Faculty.

Director: Professor Rolf Gerritsen (06) 201 2643

Australian Network for Research and Technology Policy (NEXUS)

The NEXUS network was formed following a meeting of a group of academics interested in national research and technology policy questions. They came together in 1993 at the University of Canberra at the invitation of the Vice-Chancellor.

The main purpose of NEXUS is to link those who study and evaluate research policy with those who originate the policy and put it into effect. NEXUS members have recognised the need for an understandable and well-articulated national policy for research and technology and the need to promote continuing national debate on the important national issues in research and technology policy. The network is essentially a loosely-knit band of those with a close interest in these questions, with a base at the University of Canberra.

NEXUS functions electronically (e-mail), through formal and informal meetings and through the publication of papers and comments. Its members are available, both individually and together, for consultative work. Recent areas of activity at Canberra have included:

- critique of Industry Commission Report on R + D
- science current understanding and uncertainties
- climate change
- energy research and technology in Australia in the era of greenhouse
- regionalism and competitiveness in Europe

Director: Professor W J McG (Greg) Tegart (06) 201 5230

Centre for the Enhancement of Learning, Teaching and Scholarship (CELTS)

The Centre for the Enhancement of Learning, Teaching and Scholarship (CELTS) aims to support academic staff of the University by assisting them to enhance the quality of their academic work. The Centre is housed in a specially designated area on level D of the Library building.

The functions of CELTS are to provide

- a consultancy service to individuals, course teams, schools and faculties on issues related to research or to teaching and learning in higher education
- courses and seminars on teaching, assessment and learning; on monitoring and documenting teaching performance; on supervision of research students; on preparing applications for teaching development and research grants
- opportunities for academic staff to collaborate with Centre staff on research and development projects into aspects of teaching and learning
- an evaluation or feedback service on teaching and units/courses using questionnaires to students and other methods
- support for special interest groups which focus on aspects of teaching and learning in the University
- access to research literature on teaching and learning
- advice on policy issues in higher education
- advice and assistance, in collaboration with other sections of the University, on the use of educational teachnology, including multimedia approaches
- supervision of research students undertaking topics relevant to teaching and learning in higher education
- a Graduate Certificate or Diploma in Higher Education in conjunction with the Faculty of Education

Director: Associate Professor Sue Johnston (06) 201 5176

Bursaries and Scholarships

- Bursaries
  - Lorna May Award
  - The John McMillan Award
- Scholarships
  - Commonwealth Bank Scholarship
  - CWA Scholarship for Nursing Students
  - Telecom Australia's Corporate Customer Division
  - University of Canberra Research Scholarship
  - The Vietnam Veterans Trust Education Assistance Scheme
  - International House Trust Fund Scholarships
  - W.J. Weeden Postgraduate Scholarship
  - Australian Commonwealth Scholarships:
  - Faculty of Applied Science
  - Faculty of Communication

Bursaries

Lorna May Award

A memorial bursary to the late Lorna May, a University graduate, will be awarded annually to a mature-aged woman student undertaking first degree studies.

Further details on the conditions of the award may be obtained from the Deputy Vice-Chancellor (Academic). Applications will be sought by 30 April each year.

The John McMillan Award

A bursary will be awarded annually to a mature-aged student undertaking studies in the adult education/human resource development fields. This bursary has been established in memory of the late John McMillan and his significant contribution to this field of study. Further details may be obtained from the Scholarships Officer (06) 201 2612.

Scholarships

Commonwealth Bank Scholarship:

Open to students currently undertaking the Bachelor of Commerce (Banking and Finance) course. To be eligible, a student must have successfully completed the first year of the course.

CWA Scholarship for Nursing Students:

Open to students currently enrolled in the undergraduate course in Nursing, and who have successfully completed second year. The scholarship is for one year.

Telecom Australia's Corporate Customer Division

offers an annual scholarship to a postgraduate or a shared award to postgraduates who have displayed special merit, to enable completion of a Master of Business Administration or a Master of Public Administration degree course.

University of Canberra Research Scholarship:

The scholarship is aimed at encouraging those who intend to enrol or are already enrolled in any PhD or Masters by research course of full-time study at the University of Canberra and who wish to explore the problems they have encountered as working professionals, or who want to further their professional development which includes research training. The award offers a fortnightly stipend.

The Vietnam Veterans Trust Education Assistance Scheme

is designed to financially assist the children of Vietnam veterans while they undertake full-time undergraduate study. A limited number of grants of $3500 per year will be given to selected students. Selection is based on a means test and grants may be available for the duration of a student's course. For more information telephone the Regional Office of the Australian Vietnam War Veterans Trust, NSW (02) 635 1429.

International House Trust Fund Scholarships:

Offered to third year students currently undertaking undergraduate study. Students must demonstrate an interest in becoming a resident of International House because of the opportunities it offers to meet people from other countries and take part in cross-cultural activities. Two awards are generally available each year, one to be awarded to an Australian permanent resident, one to a full-fee paying overseas student. Awardees will be exempt from the annual residential fees of International House.

W.J. Weeden Postgraduate Scholarship:

Awarded to the applicant with the highest prior academic achievement undertaking the first year of any PhD or Masters course of study at the University. The scholarship is for one calendar year and HECS exemption is also awarded. This scholarship has been made possible by a generous donation to the University from Mr W J Weeden, OBE, who was for many years a member of the Council of the institution.

The University administers the following

Australian Commonwealth Scholarships:

Australian Postgraduate Awards with Stipend
Australian Postgraduate Awards (Industry)
Australian Postgraduate Awards without Stipend (HECS exemption scholarship)

The University of Canberra actively encourages industry to support postgraduate research through provision of student stipend scholarships which are advertised as they become available. These awards comprise certain other benefits and are highly competitive.

Further details of these awards are available from the Scholarships Officer in Student Administration (06) 201 2612. Information about scholarships is also published from time to time in University newspaper *Monitor* and in student publications.

Faculty of Applied Science

The following awards maybe offered to postgraduate students who have displayed outstanding merit and are enrolled in the Faculty:

ACTEW Postgraduate Research Scholarship
ACTEW Postgraduate Research Scholarship (supplementary)
CRC Vertebrate Pest Research Scholarship
NSW Agriculture Postgraduate Scholarship (Rabbits)
NSW Agriculture Postgraduate Scholarship (Foxes)

For further information, telephone (06) 201 5199.

Faculty of Communication

Two foundation community and business supported scholarships may be available in the Faculty of Communication from time to time:

Catholic Communications Scholarship - sponsored by the Catholic Communications Commission, Archdiocese of Canberra and Goulburn.

Southern Cross Club Scholarship - sponsored by the Canberra Southern Cross Club.

Both scholarships are in the Faculty's Communications program and are open to full-time students enrolled in the final year of the Master of Arts in Communication. For further information, contact Dr Mark Balnaves, (06) 201 2402.

Prizes

- University Medals
- The Herbert Burton Medal
- Faculty of Applied Science
- Faculty of Communication
- Faculty of Education
- Faculty of Environmental Design
- Faculty of Information Sciences and Engineering
- Faculty of Management

University Medals

University Medals are awarded to graduating students at undergraduate level on the basis of outstanding academic merit only. Recommendations are made by Deans of Faculties to the Vice- Chancellor.

The Herbert Burton Medal

The Convocation (graduates of the University and of the former Canberra CAE) awards the Herbert Burton Medal annually to a final-year student who has completed an undergraduate degree course at the University of Canberra with academic merit and who has made a significant contribution as a student inside or outside the University community.

Faculty of Applied Science

The ACT Branch of the Royal Australian Chemical Institute offers an annual prize to the student whose performance in the level 5/6 Chemistry units is most outstanding.

The Glass Connection Prize offered by The Glass Connection Company is awarded annually to a student for the best project in the field of deterioration and conservation of stained glass.

The Commonwealth Territories Division of the Geological Society of Australia offers an annual prize to the most outstanding second-year student in Geology.

The ACT Regional Division of the Royal Australian Institute of Parks and Recreation offers an annual prize to the most outstanding student in the unit Parks and Recreation.

The ACT Branch of the Australian Society for Microbiology offers an annual prize to the most outstanding student in Microbiology.

The Australian Institute for the Conservation of Cultural Material offers an annual prize to be awarded to the best student in the Bachelor of Applied Science in Conservation of Cultural Materials course.

The Alethea Sandow Medal and Prize in Materials Conservation is offered annually to the outstanding student who has contributed most during the year in the field of conservation of cultural materials.

The NSW Branch of the Australian Institute of Medical Scientists offers an annual prize to the student demonstrating general excellence in the course leading to the degree of Bachelor of Applied Science Medical Laboratory Science or the specialisation in Medical Laboratory Science.

The Eric Best Memorial Medal Prize is awarded to the student with the best overall performance at undergraduate level in Resource and Environmental Science.

The ACT Division of the Australian Institute of Cartographers offers an annual prize to the best student in Geographic Information Systems (GIS) for outstanding achievement in cartographic excellence.

The CRA Exploration Pty Ltd prize is offered annually to the student who submits the best report in the unit Geological and Soil Mapping.

The ACT Chapter of the College of Nursing Australia offers an annual prize (the Margaret Guy Memorial Prize) to the most outstanding student who has completed the undergraduate course in Nursing.

The ACT Branch of the National Trust of Australia offers a prize to the best final year student undertaking the Cultural Heritage Management specialisation in the undergraduate degree course in Applied Science.

The Australian Institute of Sport offers an annual prize to a graduating student who has achieved the highest level of academic performance in the Sports Coaching course leading to the degree of Bachelor of Applied Science in Sports Studies, and who has made a significant contribution to sport in the community.

The Channel 9 National Television Network offers an annual prize The Wide World of Sports Prize to a graduating student who has achieved the highest level of academic performance in the Sports Journalism course leading to the degree of Bachelor of Arts in Sports Studies, and who has made a significant contribution to sport in the community.

Faculty of Communication

The Zonta Club (Canberra) offers an annual prize to the best final year student in the undergraduate Office Management course. The prize will be awarded on the results of the year's work.

The University Co- op Bookshop offers an annual prize to the best student enrolled in the undergraduate degree course in Communication, or to the postgraduate course in Professional Communication for the unit Freelance Writing.

The Sanchia Bolton Memorial prize will be awarded annually to the best second year student undertaking the undergraduate degree course in Modern Languages specialising in Japanese studies.

The Australian Tourism Industry Association offers an annual prize to the best graduating student in the undergraduate degree course in Tourism.

The firm of Drake International offers an annual prize to be awarded to an outstanding student for the best academic performance in the second year of the undergraduate Office Management course.

The Canberra Branch of the Australian Journalists' Association offers an annual prize to the best student in Journalism for the year. The award of the prize is restricted to persons 25 years or younger on January 1 of the year of the award, and once only to any one candidate.

The Phillip Hobbs Journalism Award offers an annual prize to a student in Journalism concerning some area of Canberra history, planning or administration.

Tektronix Australia Pty Ltd offers an annual prize known as the Tektronix Award to the student who achieves the best academic result in the unit Desktop Publishing 2.

The firm of William Heinemann Australia offers an annual prize to the most promising first- year student in the Professional Writing specialisation.

The Allen and Unwin prize for prose fiction will be awarded annually to the best student undertaking the final semester fiction project in the Professional Writing specialisation of the Bachelor of Arts in Communication course.

The ACT Branch of the Australian Library and Information Association offers two annual prizes, one to a student in the undergraduate degree course in Library and Information Studies and one to a student in the graduate diploma course in Library and Information Management, for the best academic performance overall.

The Con Kiriloff Memorial Prize is offered to the student completing the undergraduate degree course in Modern Languages with best results in Chinese Studies.

The John Balnaves Prize will be awarded annually to the student who completes the graduate diploma course in Library and Information Management or the undergraduate degree course in Library and Information Studies, with the most outstanding academic record in information retrieval.

The Public Relations Institute of Australia (ACT) offers an annual prize to the most outstanding student completing the Bachelor of Arts in Communication course with the highest score in the six Public Relations units undertaken during the previous three years.

The Records Management Association of Australia (ACT Education Committee) offers an annual prize to the most outstanding student for performance in formal studies in Information and Records Management.

The firm of Kodak (Australasia) Pty Ltd (ACT Branch) offers an annual prize for outstanding performance in the area of Information and Records Management.

The Bryan R Ward Foundation Prize for Tourism is awarded to the student completing the undergraduate degree course in Tourism for the best overall performance.

The ABC Radio Prize will be awarded to a third year Media student, enrolled in the undergraduate degree course in Communication for the best academic result.

The Leanne Harvey Ford Award prize is offered to a student in a Librarianship course for excellence in the service for young people specialisation.

The Quest Group Pty Ltd offers a prize, known as the Quest Solutions Award for Academic Excellence, to a graduating student who achieves the best results in the Graduate Diploma in Office Management course.

Faculty of Education

The Australian Federation of University Women (ACT) offers an annual prize to the most outstanding female student completing the Bachelor of Education course.

The Australian Psychological Society prize is awarded to the most outstanding student completing the Master of Education in Counselling course or the Graduate Diploma course in Psychology.

The Elsie Hope Solly prize is offered to the best female student who has completed the first year or equivalent of an undergraduate degree course in either the Faculty of Education or the Faculty of Information Sciences and Engineering for studies in the units Mathematics 1 and 2 or Engineering Mathematics 1 and 2.

Faculty of Environmental Design

The ACT Chapter of the Royal Australian Institute of Architects offers an annual prize (the John Redmond prize) for an outstanding performance by a student over the first three year tier of the Architecture course. It also offers an annual prize to the outstanding student in the final two- year tier of the Architecture course.

The Australian Institute of Landscape Architects (ACT Group) offers an annual prize to a final year student of outstanding performance in the Landscape Architecture course.

The Robwin and Sons Prize in Building Economics is awarded annually to the best student in Building Economics.

The ACT Chapter of the Australian Institute of Quantity Surveyors offers an annual prize to the best student completing the undergraduate degree course in Construction Management and Economics (Quantity Surveying).

The Ergonomics Society of Australia (ACT Branch) offers an annual prize to the student who, at the end of the year, has achieved the highest standard in an identified ergonomic unit or program.

The Roger Johnson Prize in Environmental Design will be awarded annually to the best student who completes a one- or two- day project.

The Mitchell/Giurgola & Thorp Travelling Scholarship Prize is offered to the outstanding student participating in a design competition undertaken as part of the course work in the unit Architectural Design and Technology 6.2.

The Australian Institute of Building (NSW Chapter) prize is awarded to the best student completing the undergraduate degree course in Construction Management and Economics.

Murray Northrop Consultants Pty Ltd offers a prize to be known as the Northrop Canberra Award, to be awarded biennially to the winning team in an inter- team competition to carry out a specified design brief.

The Australian Institute of Building offers an annual prize (the F.O. Watts Prize) to the best student in Construction Management in the final year of the undergraduate degree course in Construction Management and Economics.

The ACT Housing Trust Prize is offered to the outstanding student enrolled in one of the units Architectural Design 3, Human Environmental Studies 3A or Landscape Planning and Design 3.2, who has made a significant contribution to a topic relevant to ACT public housing.

The Building Science Forum of Australia ACT Regional Division Inc, offers the Building Science Forum Prize is awarded annually at the end of the penultimate year of study to the outstanding student in Architecture, for the Environmental Control component of units.

The Building Science Forum of Australia ACT Regional Division Inc, offers the Building Science Forum Prize to the outstanding student in Construction Management and Economics for the units Environmental Services 1 and 2.

Faculty of Information Sciences and Engineering

The firm of Aspect Computing Pty Ltd offers an annual prize to the best group of students completing the unit Computer Practice in the second semester of each year.

The Elsie Hope Solly prize is offered to the best female student who has completed the first year or equivalent of an undergraduate degree course in either the Faculty of Information Sciences and Engineering or the Faculty of Education for studies in the units Mathematics 1 and 2 or Engineering Mathematics 1 and 2.

The Canberra Branch of the Australian Computer Society offers a prize each semester to the most outstanding student in the unit Data Structures and Algorithms.

The Canberra Chapter of the EDP Auditors Association offers an annual prize to the best student completing the unit Computer Audit who has done outstanding work in the field of computer audit, having produced a paper on a selected topic.

The Statistical Society of Australia (Canberra Branch) offers an annual prize to the student who obtains the best results in third year Statistics units.

The ACT Branch of the Australian Institute of Physics offers an annual prize to the best student in the six credit point unit Applied Physics 2.

The Price Waterhouse Urwick Prize is offered to the student enrolled in either the Graduate Diploma in Information Systems or the Graduate Diploma in Computing Studies who achieves the greatest success in the unit Systems Analysis G2.

The Gordon Aitchison Prize is offered to the student with the best overall results in the units Engineering Physics 1 and Electronics Engineering 1.

The Institution of Radio and Electronics Engineers Australia offers an annual prize (known as the IREE Australia Prize) to a student who has completed the course leading to the Bachelor of Engineering in Electronics and Communications Engineering and has attained the highest level of proficiency in Communication Electronics during the third and fourth years of the course.

The Canberra Division of the Institution of Engineers, Australia offers an annual prize (the W.E. Sansum Medal) to the student who has attained the best all round performance in the fourth year of the undergraduate degree course in Electronics and Communications Engineering.

The Canberra Division of the Institution of Engineers, Australia offers an annual prize (the Jennifer Cox Memorial Prize) to a second year student who has achieved the best overall performances in the units Electronics Engineering 2A and Computer Organisation 2 in the undergraduate degree courses of Computer Engineering or Electronics and Communications Engineering.

Faculty of Management

The Australian Society of Certified Practising Accountants offers annual prizes to the best student completing a degree course with an Accounting major acceptable for admission to the Society, and a medallion and prize to the best first- year student and best second-year student enrolled in the Bachelor of Commerce in Accounting course.

The firm of Coopers & Lybrand, Chartered Accountants, offers an annual prize to the student who has the best performance in the unit Advanced Accounting Theory.

The firm of Ernst and Young, Chartered Accountants, offers an annual prize to the student with the best result in the unit Portfolio Theory and Management.

The Australian Institute of Bankers offers an annual prize to the best student completing the Bachelor of Commerce in Banking and Finance course.

The ACT Branch of the Community and Public Sector Union offers three prizes each year to be awarded to outstanding students undertaking the units Development Administration undergraduate or graduate, Public Policy 2 and Women and Organisations.

The Institute of Public Administration Australia (ACT Group) offers an annual prize to the best student in the unit Administration 4 (Australian Public Administration).

The Australian Institute of Management offers an annual prize to a graduating student who has attained a general high standard of excellence throughout the course leading to the degree of Bachelor of Arts in Administration, and who has displayed special merit in the final year.

The ACT Chapter of the Institute of Management Consultants in Australia offers an annual prize to be awarded to the most outstanding student completing the unit Strategic Management M in that year.

The Economic Society Prize will be awarded annually to the best student completing the undergraduate degree course in Applied Economics.

The Gaye Forrester Public Sector Accounting Award will be awarded annually to the best female student completing the undergraduate degree course in Accounting who is acceptable for admission to the Australian Society of Certified Practising Accountants (ASCPA).

The Lend Lease Fern Hill Technology Park Prize will be awarded annually to the student who attains the first place overall in the unit Intrapreneurship and Entrepreneurship.

The firm of Deloitte Touche Tohmatsu offers an annual prize to the student completing the undergraduate degree course in Accounting, who has the best results in the units Commercial Law 3 (Taxation Law) and Auditing and Accounting Systems.

Health and Counselling Services

Health Services

The aim of the Health Service is to provide comprehensive care for the students, staff and the children at the creche (only if they become ill whilst attending the creche).

The following services are provided -

General practitioner medical consultations
Sports medicine and treatment of sports injury
Medical treatment for International students
Diving medicals and advice on diving problems
Staff medicals
Contraceptive advice/Pap smears
Morning-after Pill
Pregnancy tests
STD screening
Condoms
Minor surgery (eg. removal of skin lesions and suturing)
Immunisations (eg. Hepatitis B, Tetanus boosters)
Overseas travel vaccinations and information
Skin/Mole Examinations
Dressings
Physiotherapy
First Aid - treatment of minor fractures, cuts and burns
Lung function tests
Hearing tests
Blood tests (eg cholesterol, HIV, Hepatitis B, blood group)
Dietitian
Haemoccult bowel cancer testing
Dental screening service for students

Counselling Services

Personal Counsellors

Personal counsellors provide a range of professional services to assist people to deal more effectively with their personal lives. Assistance is also available for study related issues such as exam stress and support in situations of harassment and discrimination.

International Student Counsellor

A counsellor is available to assist International students (private and sponsored) with any problems related to study or personal life.

Residential Student Counsellor

A counsellor is available to assist any student living in residences experiencing problems that are personal or may be related directly to difficulties with residential living.

General Information

Payment: Medical services for students are bulk-billed through Medicare. Dental screening, dietitian, counselling and nurses services are free. There is a $5 booking fee for physiotherapy consultations.

Staff pay a standard consultation fee for medical services. Staff are also seen in workers' compensation matters.

Health Insurance: Although most medical services at the Health Service are bulk-billed for students, it is essential to be clear about details of any private health insurance cover you may have. It is also essential that you have a Medicare number, or for International students, a Medibank Private number. If you are still on your parents' Medicare card you can apply for your own card through any Medicare office.

Students not dependent on their parents and earning low incomes may be eligible for a Health Care card. This card subsidies medical care and PBS prescriptions, and is available through the Department of Social Security.

Students with Disabilities: Students suffering from any chronic or recurrent illness such as asthma, epilepsy or diabetes, or any other disability such as hearing or sight impairment, mobility problems or any other conditions, which may affect their ability to study, are advised to make early contact with the Health and Counselling Services as well as the Equity Officer - Disabilities so assistance with study can be given if needed.

Confidentiality: All consultations with the Health and Counselling Services are confidential, and no report appears on a student's official record.

Appointments: Appointments are essential (except in emergencies). Referral from a doctor is necessary to see the physiotherapist. Appointments to see the dietitian and dentist may be made without seeing a doctor first.

Location: South end of Building 1, level B

Hours: 9am - 5pm Monday to Friday

Telephone: (06) 201 2351

Information Services

Audiovisual

Audiovisual equipment services to general teaching rooms include centralised video replay, audio recording, equipment set-up and assistance with operation of audiovisual equipment. These services are located in Building 10.

Enquiries: Information Services Division, telephone (06) 201 2675

Computer and Network

University computing services and facilities including central, micro and networking facilities, are located in Building 10 which houses the computer mainframes, computer terminal and microcomputer laboratories.

Academic computing facilities are provided as a resource for students to gain practical experience in the use of current computer technology. The equipment available includes multiple servers that support several laboratories of microcomputer workstations which form part of a single University computer network.

The campus network supports more than 1000 microcomputers located in the Faculties and the Administration. In addition there are over 150 Macintosh and PC microcomputers located in 10 terminal laboratories in Building 10. All of this equipment is available to students 24 hours a day, seven days a week during the semester. A technical advisory service is also provided to assist students in the use of these computer facilities.

The University computer network is connected to the Australian Academic and Research Network (AARNet) which provides a computer network communication facility to all Australian universities and many research networks in the USA and UK (Internet). Academic staff have access to AARNet and to a range of multi-media development facilities including document scanners, high resolution colour graphics system, colour printers and CDROM services for course development and personal research work.

All students have access to and use of the University computer network subject to registering at the Help Desk in Building 10 and being allocated a log-in and password.

A computer sales facility is available where students may purchase microcomputers, software and computer consumables or rent a microcomputer for short periods. The Information Services Division performs its own microcomputer and audiovisual maintenance and offers a repair service to staff and students for personally owned equipment on a fee basis.

CWIS (Campus-Wide Information Service)

Students and staff can make information accessible electronically on CWIS. Enquiries on this service can be made at the Help Desk, Building 10 or Information Desk, Building 8.

Library

Library and information services are available in Building 8. These services include planning assistance to staff in identifying and acquiring essential items for reading lists and for research; access for students to essential items on reading lists and for research; access to wider sources of information for staff and students using CDROM databases and electronic sources on the Australian Academic and Research Network (AARNet) and the Internet; selective access to tapes of some lectures; and document delivery services including interlibrary loans and electronic services such as CARL Uncover.

Library facilities including study carrels and tables, group discussion rooms, a serials reading room, photocopying machines and equipment for use with audiovisual resources, and public access terminals for library catalogues and network services. A Librarian is on duty at the Information Desk to assist during all opening hours (telephone (06) 201 2255 or 201 2282). Borrowing is available to all students who hold a current identification card and to all staff.

Photocopying

Public photocopying machines and colour photocopiers are located in Building 8. Laser printing, image screening and colour overhead production facilities are available in Building 10.

Training

General training sessions for students on the use of the online catalogue, CDROM databases and the Internet are offered during semester at advertised times. Specialised subject-oriented sessions are mounted by arrangement with academic staff.

General training sessions in the use of audiovisual and computer services are provided for staff and are offered in response to demand at advertised times. Customised training courses are available for a fee.

International Office

In conjunction with the Faculties the International Office identifies, develops and supports international opportunities for the University.

Specific activities include the strengthening of opportunities for international understanding through the development of international staff and student interchange programs, the fostering of relationships and common interests with universities abroad and the design and co-ordination of international marketing of University courses.

The office also administers applications for admission from international students, ensures that these students enjoy a high standard of support services during their study in Australia and assists in the operation of international alumni networks.

The University offers a wide range of courses to international students. Courses are offered at bachelor degree, graduate certificate and diploma, masters and doctoral levels. Details of courses on offer and application procedures can be found in the International Undergraduate and Postgraduate Guides. These guides should be read in conjunction with the University Handbook.

The International Office also has a role in delivering a range of services to international students, including:

- providing successful applicants with pre-departure information
- reception services for newly arrived students
- assistance in finding suitable accommodation
- orientation and assistance in course registration
- on-going support and assistance and referral to main stream support services as appropriate.

The Office has responsibility for applications received under various overseas scholarship programs, including

- scholarships for students from developing countries awarded under the Australian Government's foreign aid program and administered by AusAid.

For 1995 intake the following countries participated: Bangladesh, China, Cook Islands, Eritrea, Hong Kong, India, Indonesia, Federated States of Micronesia, Fiji, Kenya, Kiribati, Laos, Malaysia, Marshall Islands, Mauritius, Mongolia, Nauru, Nepal, New Caledonia, Nigeria, Niue, Pakistan, Papua New Guinea, Philippines, Palau, Seychelles, Solomon Islands, South Africa, Sri Lanka, Thailand, Tonga, Tuvalu, Uganda, Vanuatu, Western Samoa.

Please note that the eligible countries and eligibility criteria are reviewed yearly.

Interested persons should contact the AusAid office at the nearest Australian diplomatic mission by about February each year for information concerning study in the following year.

- Overseas Postgraduate Research Scheme (OPRS). This scheme is open to applicants from any country except Australia and New Zealand and no age restriction applies.

Competition for places is strong and only a small number of scholarships are awarded annually.

It pays for the tuition fees and health insurance of awardees undertaking masters by research degrees or PhD programs by full-time study.

The duration of the award is two years for masters degrees and three years for PhD programs.

The closing date is 30 September in any year for study in the following year.

For further information (including a free copy of the International Undergraduate or Postgraduate Guide) prospective students should contact: The Director, International Office, University of Canberra, PO Box 1, Belconnen, ACT, Australia 2616. Telephone: 616 201 5342, Facsimile: 616 201 5040. E-mail : iso @adminserver. canberra.edu.au

Ngunnawal Centre for Aboriginal and Torres Strait Islander Education

The academic leadership and overall responsibility for the Centre rests with the Dean of the Faculty of Applied Science. There are four academic staff to develop and teach the Foundation units and provide academic support for Aboriginal and Torres Strait Islander students on campus.

All Aboriginal and Torres Strait Islander students seeking admission to the University are interviewed and counselled by the staff of the Centre as to the most appropriate mode of entry into the University. Possible modes of entry include:

(a) applicant does not meet admission requirements for their chosen course and so enrols in the Foundation Program;
(b) conditional entry into a course supplemented with some units from the Foundation Program;
(c) direct entry into a degree program.

To help students adjust to the new environment of the University and to ensure that they are adequately prepared to undertake tertiary studies, the Ngunnawal Centre offers the following Foundation Units:

Foundation Communication Skills
Foundation Study Skills

Further information about the Centre can be obtained from Ms Suzanne O'Neil, Aboriginal Liaison Officer, or Ms Ros Homem, Executive Officer, telephone (06) 201 2998.

Students with Disabilities

Location: 1B24, telephone (06) 201 2990

The University of Canberra is committed to developing the independence of people with disabilities in the wider community through full and equitable participation in higher education. It is in the interest of people with a disability which may affect their studies to contact the Equity Officer - Disabilities. Intending new students should do this before September in the year prior to commencing study. Indication of the nature and extent of a disability prior to enrolling will allow appropriate support services to be considered. All information will remain confidential unless specific permission is given by the student concerned.

Study Skills Centre

Location: Concourse, North end of Building 1 (1B5), telephone (06) 201 2361

The Study Skills Centre assists students to adjust to study and manage study tasks to achieve the best possible academic outcomes in accordance with their potential. It also teaches specific study skills on a one-to-one or small group basis, presents seminars and workshops targeting particular groups or needs, and provides individual advice on study difficulties or other difficulties which impact on study performance. The Centre is open from 9am to 5pm, Monday to Friday including semester break.

Personal Support Services

Campus HIV/AIDS Educator

Telephone (06) 249 3604

Provides information and education on HIV/AIDS and related issues such as STDs, safe sex, drug use, occupational health and safety, infection control guidelines and treatments.

Careers and Student Employment

Location: 1B18, telephone (06) 201 5221

The service offers students assistance with part-time employment during their course of study, professional careers counselling for prospective and enrolled students, including the use of computer software to assist with career decisions. Assistance is also given in obtaining full-time employment for final-year students at the end of their course, including an on-campus employment interview program (the Employer Visits Program - EVP), which is run in May and August each year. Insurance coverage for course-related voluntary (unpaid) work experience and internships can be arranged. A Careers Library is also maintained.

Chaplaincy

Location: The Chapel, 1C75; Chaplaincy office : 1C75b, telephone (06) 201 2052

There are four chaplains on campus - Anglican, Roman Catholic, Uniting Church and Liberal Catholic who hold services throughout each week. A Prayer Room for Islamic worship (1C24), office for counselling and related interviews are also provided. Services for student of other faiths are available from time to time. Information is displayed on University notice boards, or consult the Chaplaincy team.

Child Care

Wiradjuri Pre-School Child Care Centre
Early application is essential, telephone (06) 201 2339. The centre provides early childhood education and care for 2-6 year olds. See also entry under General Facilities.

Kirinari Early Childhood Centre
Early application is essential, telephone (06) 201 2951. The centre provides child care for children from six weeks to five years. There are two type of care: permanent (50 weeks per year) and semester (18 weeks). See also entry under General Facilities.

Dean of Students

Location: 1C128, telephone (06) 201 2029/2334

The Dean of Students is a full-time member of the academic staff of the University who has additional responsibility for various aspects of student welfare. The Dean principally acts as general academic adviser for students and as advocate in their dealings with the University authorities, especially those dealings involved with grievances and appeals, and correspondence about unsatisfactory academic progress. The Dean is also concerned with the general welfare of students through membership of appropriate University committees. The Dean of Students is Ms Maureen Bettle, Faculty of Communication, and she may be contacted at all reasonable times. The Associate Dean of Students is Dr Van Le in the Faculty of Information Sciences and Engineering.

Dean of Student Residences

Location: 6D2, telephone (06) 201 2700

The Dean of Student Residences is a full-time member of the academic staff of the University who has additional responsibility for aspects of the welfare of student in residence on the University campus. The Dean of Student Residences is Ms Helen Coventry, Faculty of Management and she is available at all reasonable times. The Assistant Dean of Student Residences is Mr Desmond Woods, Faculty of Management.

Equity Office

Location: 1D120, telephone (06) 201 2148

The Equity Office raises awareness about equal opportunity rights and responsibilities and provides independent advice and a safe place for students to seek support and voice their concerns about issues such as sexual harassment.

Health and Counselling Service

Location: 1B124, telephone (06) 201 2351

See separate entry in this section - University Services and Facilities

Health Assessment Clinics

Location: School of Nursing 12B14, telephone (06) 201 5129

The services are provided by qualified staff are free of charge and include Eye Assessment Clinic, Skin, Hearing and Asthma Clinics.

International Office

Location: 1B142, telephone (06) 201 5040

See separate entry in this section - University Services and Facilities.

Ngunnawal Centre

Location: 7B6, telephone (06) 201 2998

The Centre provides social, cultural and academic support to all Aboriginal and Torres Strait Islander students on campus and promotes understanding of Aboriginal and Torres Strait Islander issues in the University and the wider community. This is achieved through developing contacts with government departments and private enterprise; providing opportunities for Aboriginal and Torres Strait Islander students to be involved with matters affecting their social and academic development, and promoting and providing university access for Aboriginal and Torres Strait Islander students for the academic mainstream and provides assistance to those already in the mainstream. The Aboriginal Liaison Officer is Ms Suzanne O'Neil.

Student Loans

Location: Level B, Building 1, telephone (06) 201 2135.

The University provides a loans service to those students who need a short term loan for accommodation on campus, books and other education expenses, with terms being determined in the light of individual needs. Appointment times for interviews and application forms are available from the Student Financial Assistance Officer.

University Residences

The University Residences are situated within easy walking distance of the Belconnen Town Centre and its large range of shops. Public transport provides regular bus services to the University from all suburbs through the Civic, Woden and Belconnen Interchange systems. A brochure describing each type of student accommodation can be forwarded on request, but prospective students are advised that the University cannot guarantee each student will be offered the accommodation desired.

On-Campus Accommodation

There are 1053 places available in the University Residences on campus. Accommodation is offered each year to new students, continuing students, Australian and international students.

A Residential Agreement is required to be entered into prior to occupancy of accommodation.

The accommodation comprises fully furnished single study-bedrooms. Common kitchen/dining and laundry facilities enable residents to do their own cooking and laundering. Kitchens and laundries are equipped with basic facilities but residents will need to supply their own bed linen, towels, cutlery, crockery and cooking utensils. Students may take advantage of the Iguana Cafe in The Hub and the Union Refectory for economical, wholesome meals if they prefer not to do their own cooking.

Eligibility for Residences

To be eligible for a room in a University Residence on campus a student must

- not have parents resident in the Canberra/Queanbeyan area; (Canberra residents may be eligible for a place after all interstate and overseas needs have been addressed;
- be enrolled as a full-time students at the University for the semester in which accommodation is required;
- accept the offer of accommodation accompanied by the accommodation semester fee, room deposit and signed Residential Agreement by the date advised.

In some instances students with special circumstances are given preference for accommodation. Students who believe they have special circumstances should set them out in a letter addressed to the Director, University Residences and include it with their application.

Accommodation Semester Fees

Accommodation fees for 1996 will be approximately $1,700.00 for International House and approximately $1,500.00 per semester for other areas. A small number of rooms at slightly cheaper rates is also available. Detailed information on room rates is available from the Accommodation Office. As well as accommodation fees, an activities fee of $7.00 per semester must be paid. Fee levels are reviewed annually. The residential calendar consists of 39 weeks per year.

There is also a room deposit charge of $150.00 which must be paid in addition to the accommodation semester fee. A $50.00 cancellation charge applies if a student cancels accommodation after payment of the semester accommodation fee has been made.

The room deposit will only be refunded by application after vacating at the end of the year and in compliance with the administrative requirements detailed in the Student Residences Booklet 1996.

The accommodation fee for the full semester and room deposit must be paid in advance and the Residential Agreement must be signed before occupancy of a room is allowed. Part payment of accommodation fees is not possible.

Cheques should be made payable to the University of Canberra. Applicants should note that Bankcard and other credit card facilities are available.

Applications New Students

To obtain an application form for University accommodation, apply direct to the Accommodation Office (from September 1995). Further information on fees and other details about accommodation available throughout the year are available from:

The Accommodation Office
University of Canberra
PO Box 1
BELCONNEN ACT 2616

Telephone (06) 201 2921

New students must submit applications for University accommodation by 8 December 1995. **Students should not wait until an Offer of Place in a course at the University is made.** Offers of on-campus accommodation to new students is made immediately after the Universities Admissions Centre (UAC) offers are made.

Allocation of Rooms New Students

New students who have been offered accommodation can secure the room by the payment of the full semester accommodation fee, room deposit charge and by signing the Residential Agreement no later than the closing date specified in the Offer of Room in Residences.

New students are expected to move into Residences on Saturday morning, 17 February 1996. Every effort will be made to meet room preferences; however, no guarantees can be given that the area preferred will be the area in which accommodation will be offered. Please note that room allocation information cannot be given over the telephone.

Residential Orientation Program

A Residential Orientation Program will be held on Saturday, 17 February and Sunday, 18 February 1996. This is a compulsory program for all first year students who accept an Offer of Accommodation. Students are welcomed by the Vice- Chancellor, the Director of University Residences and the Dean of Student Residences. A full weekend program of essential information relating to the wide network of residential support services, activities and settling-in assistance is provided.

'Late Offers of Accommodation' are often made. Students who receive a Late Offer should note that rooms will be retained for them only if the full semester accommodation fee has been paid and the Residential Agreement signed by 4.30 pm on Sunday, 18 February 1996 (Semester 1), and by 4.30 pm on Friday, 12 July 1996 (Semester 2).

Waiting List New Students

New students who are not successful in obtaining an offer of accommodation will have their names placed on a 'waiting list'. Students on the 'waiting list' should contact the Accommodation Office during Orientation/Registration Week in person to ascertain their position on the 'waiting list'. Late offers are often made and many students who were unsuccessful in the main round of offers are successful as a result of cancellations. Students who wish to submit late applications must complete a '1996 Application for Residential Accommodation' form and lodge it with the Accommodation Office. Late applicants will be placed on the 'waiting list' and must supply a local address and telephone number for contact. Students must also update their name on the waiting list to assist with keeping lists current. The dates for reapplying are 23 February and 14 June 1996.

Applications Continuing Students

Continuing students not already living on campus and who wish to do so, should contact the Accommodation Office in person from early September and complete an application form by the closing date of 4 October 1995.

Applications Returning Students

Returning students, that is those already living on campus and who wish to continue living on campus in 1996, should contact the Accommodation Office in person on Monday, 25 September 1995 to complete an application form. Applications for returning students close on 4 October 1995.

University Policy on Smoking

The University has adopted a policy of "no smoking" in University buildings, including University Residences. Students are advised that a contravention of this policy is in breach of the Student Conduct Rules and in breach of the Residences House Rules as set out in the Student Residences Booklet.

Private Accommodation

A private accommodation listing service will be available in 1996 to assist those students who are unsuccessful in securing a room on campus at the beginning of the year. The University does not enter into negotiation with householders on behalf of students.

Accommodation Office

The Accommodation Office is located in Cooinda Hut and is open from 8.30am to 4.30pm Monday to Friday, except on University and public holidays.

Mail for Students

Mail for students in the Residences must include the name and room number and should be addressed to the following:

PO Box 20
BELCONNEN ACT 2616

Students are advised that letters containing cheques and other valuables should not be sent to the address given above. Those receiving cheques from outside the University should have them directed to their bank account.

Parcels are kept in the Caretaker's Office and a notice is placed on the notice board by number. Students need to show their student ID card and sign for collection of the parcel.

Services for Residents

The Residences Management Team comprises a wide range of people including the Director of University Residences, the Dean of Student Residences, the Associate Dean of Student Residences, a Residential Counsellor, Accommodation Office staff, Residential Officers, Residential Assistants and Residential Assistants-in-Training. This large support network is located throughout the Residences and the University.

The Dean of Student Residences is responsible for student welfare and discipline.

The Residences Management Team provide guidance, support and pastoral care for the residents to help them adapt to the academic, residential and social life of the University.

The University provides a security service for the University Residences and a Pathfinder service to chaperone students from areas such as the Library, Computer Centre and other campus buildings to the Residences in the evenings.

Accommodation Refunds

On completion of your stay in Residences your room will be checked against an inventory and assessed for cleanliness and damages. If your room check is satisfactory a full refund will be provided. If, however, your room check shows discrepancies against the inventory and there is damage the amount will be deducted from your room deposit fee.

Please note that refunds cannot be processed without first lodging a refund application form. This procedure takes approximately 14 days during semester. However, all end of semester refunds, that is from week 17 onwards, can take 3-4 weeks due to the volume of work.

The Accounts Section will issue your refund in Australian currency. Please note there is no provision for early refunds or refunds in any overseas currency.

Cancellations

If, after payment of your full semester accommodation fee up-front, you decide to cancel and not move in to Residences, the following applies

- A $50.00 cancellation charge applies if a student pays for accommodation and then cancels, without moving in.
- If you decide to vacate your accommodation after moving in, then you are in breach of your Accommodation Residential Agreement.
- There are no accommodation fee refunds after week 12.
- As the Orientation Program is compulsory, this is a non-refundable fee.

Provision is made, however, to consider refunds for cases where special circumstances exist. Each case with special circumstances will be examined individually by the Director, University Residences.

Mid-semester breaks and vacation period between Semesters 1 and 2 1996

There is provision for students to remain in residences over these periods but conditions apply. As the University takes in conferences during this period, students may be required to vacate their room (including all their belongings) and move to designated vacation blocks for the duration of the break.

Storage facilities

The University offers a storage facility free of charge to residential students. The storage facility is operated by the Caretaker from Monday to Friday and conditions apply. For further information please contact the Accommodation Office.

- Telephones
- University Union

Childcare on campus

Kirinari Early Childhood Centre

Kirinari Early Childhood Centre, a co-operative run by and for the members, offers staff and students of the University of Canberra (UC) campus-based quality childcare for children aged from birth to six years.

- Semester care: Seventeen weeks each semester, plus the exam weeks, two sessions per day. Bookings are cancelled at the end of semester and re-booked according to your timetable. Priority is given to UC students.
- Permanent care: Fifty weeks per year. Designed for working parents, priority is given to UC staff. Hours of operation are; 8.00am - 6.00pm. Childcare assistance is available to qualifying families.

Location: Kirinari Street, adjacent to Sports ovals.

Telephone: (06) 201 2339 for booking information.

Wiradjuri Pre-school and Child Care Centre

The centre provides a high quality educational program and care for 29 children aged from 2-5 years. The staffing team consists of the Director and 4th year student teachers from the Bachelor of Education (Early Childhood) program. The centre is an integral part of the BEd course and conducts research on behalf of course lecturers in monitoring the theory and practice in Early Childhood Education. Further information can be obtained by telephoning the Director.

Location: Faculty of Education, Building 5 level B

Hours: 8.00am to 5.30pm, Monday to Friday, and closed 4-5 weeks over the Christmas break

Telephone: (06) 201 2087 or (06) 201 2494

Fax: (06) 201 5065

Mail Services

Thereare two public post boxes, cleared Monday to Friday on University working days throughout the year. One is located in The Hub near the Pharmacy and is cleared at 11.00am and 1.00pm and the other is on Level B, the passageway between the main entrance foyer and is cleared at 11.30am and 1.30pm. Stamps are sold at the Union Shop. A box for University internal mail is located on the concourse adjacent to the main entrance foyer in Building 1. A box for Student Administration mail only is located in the external lobby, Level B, Building 1 near the entrance to the Cashier's Office.

Parking

Parking areas for motor cycles and cars (including handicapped persons' vehicles) are located around the campus. A time limit applies in some areas, and other restrictions are in force as indicated. The parking areas are patrolled and those not observing the regulations may be fined under the appropriate traffic and parking ordinances for the ACT.

Telephones

Public telephones (Green - STD and IDD) are available at the following locations on campus:

Building 1 level B Union foyer
Building 1 telephone booth on concourse opposite the north lobby entrance
Building 1 main entrance foyer
Building 2 foyer
Building 3 foyer
Building 4 foyer
Building 5 level A foyer
Buildings 6 and 7 foyer between buildings 6 and 7 (north end)
Building 8 foyer
Building 9 foyer
Building 10 foyer
Building 11 B level

ISD phones (Gold) are available in the following locations:

Students Association, level B concourse building 1
entrance to Union, Building 1, level B.

Card/coin telephones are available in all residential blocks and

Building 11 A level
Building 14 Boiler/House lecture theatre

University Union

A student of the University of Canberra automatically becomes a Union member on payment of the Services & Amenities Fee. Members include staff from the University and categories of Life, Honorary and Associate. The Union operates under a Constitution approved by the University Council and is governed by a Board of Management of elected and ex. officio members.

The Union is the community centre of the University and is responsible for the provision of a wide range of services including food and beverage facilities, lounges, a theatre and general recreational areas, Union shops, Sports Centre, conference and catering facilities and a licensed Post Office.

It organises for its members a range of social, cultural and sporting activities throughout the year. Activities include dances, concerts, film nights, 'munch & mingle' occasions for mature age students, inter-university sports championships, lunchtime performances, debates, market days theme events, and photographic and art competitions.

There is an excellent variety of clubs and societies affiliated with the Union ranging from recreational to Faculty based to highly competitive sporting clubs. This year they include accounting, athletics, Aussie rules, cycling, engineering, landscape architects, theatre, hockey, international students, media, netball, outdoors, public relations, rugby union, scuba, skiing, skydiving, soccer, squash, touch, volleyball, water skiing and windsurfing. There are over thirty-five clubs presently operating, and new ones can be started if sufficient members support them.

The facilities provided by the Union include the refectory - hot food, salads, Asian food and sandwich bar; a coffee lounge; a bar with provision for entertainment; two shops with a second-hand book exchange; stationery and art supplies and a range of agency services, including Austudy Office; licensed restaurant; conference and meeting rooms; free legal advice; club house with barbecue area; playing and training fields, short sport recreation courses, fitness leader accredited training, a post office, a theatre, an exhibition gallery and the Sports Centre.

The Union seeks to provide opportunities for members of the campus community to relax, make new friends, extend and broaden their experience and support and facilitate their educational endeavours.

Location: For further information: Union Access, Building 1, off the Concourse

Telephone: (06) 201 5350

Commercial Facilities

- Banking Services
- Cooperative Bookshop Limited
- Credit Union
- Campus Pharmacy
- Hairdresser
- Travel Service
- Union Shop and Post Office

Banking Services

The Commonwealth Bank provides full banking services including investment and lending facilities and welcomes enquiries regarding campus loans.

Location: The Hub, lower ground floor between Buildings 1 and 8.

Hours: 10.00am to 3.00pm week days excluding public and University holidays. An Autobank terminal is available for transactions outside these hours.

Telephone: (06) 251 1874

Cooperative Bookshop Limited

The University Co-operative Bookshop Limited conducts a shop at the University. Anyone can buy books at the Bookshop without becoming a member of the Co-operative, but members receive discounts. Special discounts off recommended retail prices are announced during the year. Anyone may become a member of the Co-operative by purchasing a $15.00 share redeemable at any point after two years.

Prescribed texts for units will be displayed on boards outside the Co-op Bookshop, from the middle of February for Semester 1 and in July for Semester 2. Units will be listed in alphabetical order, by Faculty.

Location: The Hub, lower ground floor between Buildings 1 and 8.

Hours: 9.00am to 5.00pm Monday to Friday throughout the year, except public and University holidays, with extended trading hours during the first two weeks of each semester.

Telephone: (06) 201 2207

Credit Union

Membership is open to all staff, students and their families. The Credit Union offers a full range of financial products and services and competitive interest rates. The Credit Union is committed to excellence in member service.

Location: The Hub, lower ground floor between Buildings 1 and 8.

Hours: 9am - 4.30pm Monday - Friday, excluding public and University holidays

Telephone: (06) 201 2006 UC Branch, (06) 257 2511 ANU Branch or (06) 248 9480 CIT Reid Branch

Fax: (06) 251 4177

Campus Pharmacy

Campus Pharmacy provides all pharmaceutical needs - prescriptions, medications, surgical and sports dressing, cosmetics and beauty aids, perfumes, personal requisites, photographic supplies, gifts and soft toys, Australian T- shirts and sweat shirts, hat and scarves.

Location: The Hub, lower ground floor between Buildings 1 and 8.

Hours: 9am - 5pm Monday - Friday, excluding public and University holidays

Telephone: (06) 201 5331

Hairdresser

Leonardo's Uni Salon: Professional service in all aspects of hairdressing, catering for ladies and gents hairdressing.

Location: The Hub, lower ground floor between Buildings 1 and 8.

Hours: 9am - 5pm Monday to Friday, late nights by appointment to fit in with your need. 9am - 1pm Saturday, excluding public and University holidays.

Telephone: (06) 253 3056

Travel Service

STA TRAVEL handles all domestic and international travel arrangements except domestic rail bookings. Anyone can use STA plus we have special rates for staff and students on business and holiday travel.

Location: The Hub, lower ground floor between Buildings 1 and 8.

Hours: 9am - 5pm Monday - Friday including semester break but not public and University holidays

University of Canberra, AUSTRALIA

HANDBOOK 1996

Definition of University Terms

Academic Requirements means the matters relating to a course that a student, admitted to the course, is required to successfully complete in order to qualify for the grant of an award. This includes

(a) any bridging requirement;
(b) units of study that a student is required to pass; and
(c) any other requirements (of an academic nature or not) the student is required to complete.

Advanced Standing is the recognition, by the University, of prior studies undertaken by a student that may satisfy part of the academic requirements of a course in which the student is enrolled. The term advanced standing covers both status and credit.

Approved Study Program also called Course Approval means a pattern of units that has been approved by the Dean of the appropriate Faculty as satisfying the academic requirements of a course. Approved study programs are used by students to plan the structure of their course, including elective units and their future enrolment.

Award means a degree of doctor, master, graduate diploma, graduate certificate, degree of bachelor, undergraduate diploma or associate diploma that may be awarded by the University under the *Courses and Awards Statute* 1979 as amended. The current listing of awards available is shown earlier in this section of the Handbook.

Bridging Requirement means a unit or units, test, remedial work, or any similar requirement that a student is required to undertake if the appropriate Dean of Faculty thinks fit.

Conditional Admission refers to students commencing a course of study whom Admissions Committee requires to pass certain unit (s) in a certain time in order for them to continue with their course.

Conditional Exclusion refers to students whom the Faculty Board requires to pass certain unit(s) in a certain time in order for them to continue with their course.

Course means a course of study and instruction leading to an award. See the section on the University's academic program in this Handbook for a listing of courses currently available. Courses are undergraduate, graduate or postgraduate.

Credit is advanced standing based on prior studies undertaken at the University.

Credit Points, in relation to a unit in a course. means the number of points assigned to the unit as an indicator of the amount of work required in that unit. One credit point represents an average workload of four hours per week during the semester including class contact and time spent on other study associated with the unit. Credit points are used in the calculation of the amount of HECS students are liable for.

Cross- Institutional refers to studies undertaken at one institution to satisfy part of the academic requirements of a course in which the student is currently enrolled at another institution. See 'Concurrent Study at Other Tertiary Institutions' under Enrolments in this section of the Handbook.

Discipline means a field of study in which a number of units are offered.

Elective Unit means any unit which is listed in the Register.

Enrolment, see 'Finalisation of Enrolment under Enrolment in this section of the Handbook.

Exclusion, see 'Exclusion from Studies' under Academic Progress in this section of the Handbook.

Faculty Warning is a warning issued by a Faculty Board of Studies to a student whose progress is considered to be unsatisfactory. If the Faculty Board believes that the student's academic progress continues to be unsatisfactory it may issue a direction to Show Cause.

Full-time/Part-time means a student studying at the University is defined as a full-time student for a particular semester if the study program for that semester includes units to the value of nine credit points or more. Students with fewer credit points are defined as part-time. Full-time/Part-time is not a reflection of the time of day classes are held. Please note that AUSTUDY base their eligibility requirements on a student's HECS load and not on the total credit points of the study program.

Grade Point Average is an overall measure of academic achievement for a group of units and/or students, in which each unit result is given a grade point value (P = 3, CR = 4, DI = 5, HD = 6) and these values are averaged over the relevant units and/or students. (For details refer to Academic Board Resolution 93/1/15).

Graduate Courses are courses that are graduate in time but not in content, that is, undertaken after a Bachelor degree but in a different field of study to the Bachelor degree.

Major (a major sequence of units) means a set of sequential or related units, typically of at least 18 credit points with at least three credit points of at least level 3/6, and which may be required or approved as part of the academic requirements of a course.

Postgraduate Courses are courses that are graduate in time and content, that is undertaken after a Bachelor degree and in the same field of study as the Bachelor degree. In some cases appropriate work experience may also be required.

Quota Unit is a unit requiring permission to enrol from a lecturer-in-charge of that unit.

Register means the Register of Courses established under the *Courses of Study Rules* 1980 and includes the particulars of each course determined by University Council and descriptions of each unit approved by Academic Board.

Semester means a fifteen week period of instruction including a two week class free period. A three- week period of formal examination sessions follows each semester.

Semester Level, designated by arabic script, for example, 1, 1/2, 2, 3, 3/6, 7/8 indicating the level of difficulty of undergraduate units, and represents the semester in which a full-time student is likely to take a unit.

Show Cause is a direction, given by a Faculty Board under the Academic Progress Rules, that a student whose academic progress is found to be unsatisfactory should show cause why they should be permitted to continue their studies.

Status is advanced standing based on prior studies not undertaken at the University.

Study Program, in relation to a student admitted to a course, means the program in which the student is authorised to undertake the course and may include a program relating to a part only of that course, eg, a semester study program.

Theses
(a) Masters degree theses

A masters degree thesis shall

- display a sound knowledge of the field of the thesis including recent contributions to that field; and
- include a substantial critical review of the field.

A masters degree thesis may or may not include an original contribution. There are three types of masters thesis:

- Type 1 Thesis (Masters by Research) involves 100 per cent of the overall credit point value of the degree being devoted to a research project and thesis.
- Type 2 Thesis (Masters by Research) is the result of a Masters by Research course which involves a combination of coursework and thesis where 66 per cent or more of the overall credit point value of the degree is devoted to a research project and thesis.
- Type 3 Thesis (Masters by Coursework) is the result of a Masters by Coursework course which involves a combination of coursework and thesis where the research and thesis, or project component, will comprise less than 66 per cent of the degree program.

(b) PhD Thesis

A PhD thesis involves 100 per cent of the overall credit point value of the degree being devoted to a research project and thesis. A PhD thesis must make a distinct and significant contribution to knowledge or understanding in the area of the research and/or to the application of knowledge to the analysis of problems in the study area; and must afford evidence of originality shown either by the discovery of new facts or by the exercise of independent critical thinking.

(c) Professional Doctorate Thesis

A Professional Doctorate thesis or its equivalent in another medium occupies 66 per cent or more of the overall credit point value of the degree. A professional doctorate thesis or its equivalent in another medium must demonstrate a knowledge and understanding of its area of investigation comparable to a PhD. It must afford evidence of originality shown by creative work, either the discovery of new knowledge or the application of independent critical thinking to an existing body of knowledge. If the creative work is presented in a medium other than a thesis, the candidate shall also provide an explanatory treatise which

- explains the contextual and theoretical underprinning of the creative work; and
- analyses its content and/or offers reflection on its relevance in professional practice.

Undergraduate Courses are the initial types of tertiary level study and can lead to awards of Associate Diploma, Diploma and Bachelor.

Unit means a unit of study entered in the Unit Register and includes a unit of study or the equivalent undertaken by a student at another tertiary institution with the approval of the relevant Faculty Board.

Unit Level means the level of difficulty of a unit and includes

D for doctoral level;
M for master's level;
PG for postgraduate level;
G for graduate level; and
H for honours level

Undergraduate units do not have the level specified, see *Semester Level*.

Variation of Academic Requirements is a process whereby students may vary the Academic Requirements of their course of study with the approval of the appropriate Faculty Board of Studies and notification by the Registrar.

Advice and Information

Students seeking advice on academic matters should approach relevant members of Faculty staff such as the Executive Officer/Assistant, their course adviser or other designated members of the academic staff.

Student Administration

Students seeking advice on administrative matters relating to such things as enrolment procedures, registration of a study program, or liability for HECS payments, should seek advice initially from the Student Information Desk in Student Administration. If necessary, enquiries will then be referred to appropriate staff in the administration, or administrative staff in the Faculties.

Location: Level B, Building 1 Annexe

Graduate Studies Office

The Graduate Studies Office provides up-to-date and authoritative information relating to the policy and procedures governing postgraduate study at the University.

The Office receives applications for admission to postgraduate courses and enrolment and academic progress requests from Australian citizens, and administers the progress and examination of doctoral students.

Policy documents, a guide for postgraduates and information sheets on individual processes, like requirements of a thesis and the examination procedure, are available from the Office.

The University's undergraduate and postgraduate Australian scholarships program is also administered by this Office. For more information on scholarships available to permanent residents, please see "Bursaries and Scholarships".

Location: Level B, Building 1 Annex

Enquiries: Telephone: 616 201 2154/2085, Facsimile: 616 201 5999,

e-mail: mmc@adminserver.canberra.edu.au

For the purposes of the *Freedom of Information Act* 1982, requests for access to documents under the *Freedom of Information Act* should be directed in the first instance to the Deputy Vice- Chancellor (Administration).

Cancellation of Units

The University reserves the right to withdraw a unit of study indicated as available in a particular semester if the number of students enrolled for that unit in that semester is insufficient to justify its presentation, or if other circumstances make effective presentation impracticable.

Cashier's Office

The Cashier's Office is located in Room 1B103, level B of Building 1 in the University Accounts Section (near the Student Information Desk). The normal opening hours are Monday to Friday 9.00am to 4.30pm, except for Orientation Week in each semester when the hours are 8.30am to 4.30pm.

Common classfree period

There will be a common class-free period during semesters, from 12.30pm to 2.30pm each Wednesday. This allows staff and student activities such as cultural events, addresses, public lectures and seminars and similar functions to be held during that time.

Complaints and Grievances

The University encourages students to resolve any difficulties as early as possible by discussion with the other party. If the matter is not resolved, the following procedures apply:

Procedures for Review of Unit Results are described in the section on Academic Progress.

Procedures for Complaints about Sexual Harassment are described later in this section.

All other matters are handled under the Student Grievance Resolution Procedures, copies of which are available from the Dean of Students, Faculty Offices and Student Administration. Under these procedures, the student may ask the Dean of Students to arrange mediation and if necessary, a formal hearing.

Domestic animals/pets

The University does not allow any domestic animals or pets to be brought onto the campus, nor are they permitted in University buildings, vehicles or the student residences.

Human Research and Animal Experimentation Ethics

The University has two Ethics Committees (the Committee for Ethics in Human Research and the Committee for Ethics in Animal Experimentation) which examine and approve proposals for research involving human subjects and experiments that involve the use of vertebrate animals.

All research or teaching programs involving human or animal subjects are required to be approved by the relevant institutional ethics committee. Some units enable students to gain experience in animal dissection and experimentation. These experiences are designed to increase students' understanding of animals and their structure and function and may be optional should a student have reasonable grounds for not wishing to participate in them. Some units may require experiments involving animals or research with human subjects for professional training. In that event the unit outline distributed in Week 1 of the semester will outline any such requirements.

Insurance

The University maintains insurance covers against a variety of risks, including public liability.

Enquiries: Building 1 Room D113

Telephone: (06) 201 5048

Intellectual Property

The University has established a policy to clarify the rights and obligations of the University, its staff and its students with respect to intellectual property. The policy seeks to strike an equitable and workable balance between the rights of originators and the interests of the University. The policy is publicly available on the University network.

Ownership

Enrolled students of the University own the intellectual property created by them in pursuit of their studies but the University may assert an interest where:

- generation of the property has involved substantial use of institutional resources and/or services beyond that which is ordinarily provided to students; or
- generation of the property has resulted from use of pre-existing intellectual property owned by the University; or
- the property forms part of intellectual property generated by a team of staff and students of which the student is directly or indirectly a member; or
- the property has been generated as the result of project-specific funding provided by or obtained by the University.

Where the University asserts an interest under this section ownership will be negotiated on a case by case basis in accord with the principles of the policy.

Where the University makes a claim to ownership of intellectual property generated by students the University will ensure:

- that the claim will not be allowed to interfere with the assessment of the student's academic performance; and
- that the student is treated in accord with the provisions of the policy.

Normally the University would not consider assisting a student to patent an invention or protect intellectual property created by the student unless the student assigns the intellectual property rights to the University in exchange for a proportion of the returns expected from commercialisation of the property.

The student associations act as sources of independent advice for students concerning intellectual property matters, and students are advised to seek such independent advice before they agree to undertake activities that may spawn intellectual property.

Lost Property

Mutually convenient arrangements can be made to inspect (for purposes of identification) and recover lost and/or unclaimed items handed in to the Lost Property Office. Items will generally be held for a period of six months only.

Location: Bulk Store Building (in the Maintenance Workshops area), off Wilpena Street, adjacent to the Boiler House Lecture Theatre

Telephone: (06) 201 2068

Notice Boards

Other than by post, the main channel of communication from Student Administration to the students on campus is the official Student Administration Notice Board system. The major set of notice boards is located in the level B (ground floor) lobby of Building 2 (Lecture Theatres). Students are advised to consult these notice boards frequently during semester for notices on such matters as timetable changes for classes, examination timetables, and listings of non- fail results of assessment.

Orientation Programs

An integral part of the introduction to University life is the Orientation Program. A two- week program for overseas students is offered during the fortnight before the start of each semester. For other new and returning students a one- week orientation program is offered before first semester. Both programs include a wide variety of activities that are invaluable to new students at the University. They include discussions by students, staff and the University administration on the role of the University and individual faculties. Films, plays, displays by clubs, societies and faculties, and dances are also held. Included in the orientation are special programs for students whose first language is not English to assist them to adjust their learning styles to their new environment.

The University considers the Orientation Program an important part of the University year, and new students especially are encouraged to attend. Part- time students would benefit from attending as many activities as possible, especially the academic orientation and adjustment sessions. Orientation serves as an introduction to the University, and students and staff will be on hand to provide information on all aspects of University life.

An Orientation Program Handbook will be made available to all new students by the Students' Association and details of the academic orientation and adjustment program for overseas students will be available at the International Office.

Personal Details

A major responsibility of each student is to ensure that all information related to their involvement on campus and held by Student Administration is kept up-to-date, including addresses and telephone numbers. The importance of an emergency contact for the next-of-kin for each student is self-evident. The University cannot accept responsibility for information a student does not receive if the student has not registered their latest address with Student Administration.

Results of assessment are posted to a student's local address in Semester 1, and home address in Semester 2, unless the University is informed in writing of a different address (see Academic Progress, end-of-semester examinations).

A request for a change of name by which the student is registered on University records must be supported by appropriate documentary evidence, such as a copy of a marriage certificate or deed poll.

All of these details can be registered by a student completing a "Change of Personal Details" or "Change of Address" form available from the Student Information Desk located in Building 1.

Information held by the University about its students is confidential and the University is bound by the Privacy Act (Commonwealth) in handling this information. The University will not release information about its students to others without the permission of the student to whom the information relates unless required to do so by law.

Public Transport

Public transport to the University is provided by regular bus services from all suburbs through the Civic, Woden and Belconnen Interchange system. Bus stops are located in Bimbimbie Street. Timetables are available from the interchanges, some newsagencies, and the Students' Association. The University is also connected to the Canberra system of bicycle paths.

Quota Units

Some units have been designated by Faculty Boards as quota units. These are identified in the Descriptions of Units section of the Handbook. Students should enquire about their enrolment with lecturers in charge of these units.

Sexual Harassment

Sexual harassment, as described in the *Sex Discrimination Act* 1984, is a form of sexual discrimination which is illegal and formally opposed by the University.

The University has in place a set of procedures for dealing with complaints of sexual harassment. These procedures are designed to take account of the sensitive nature and unequal power structure which frequently characterise sexual harassment, and the consequent fears of victims about making complaints.

Initial contact should be with one of the nominated "contact persons" on campus. A list of these is available from the Dean of Students, the Equal Opportunity Office or the Health and Counselling Services. Such contact will be confidential and aimed at solving the problem rather than involving the parties in confrontation or controversy.

Smoke-free environment

The University of Canberra maintains a smoke- free environment. Smoking is not permitted in any University buildings and other structures owned or controlled by the University and in any part of the building or structure used by the University on a permanent, temporary or *ad hoc* basis. This policy covers all vehicles and other means of transport, which are owned, controlled or in use by the University. The policy is a directive from the Vice- Chancellor and is enforceable under the Regulation of Student Conduct Rules 1992.

Student Behaviour

With the Acceptance of an Offer of Place at the University students accept that they will be subject to the Statutes and Rules of the University and to the lawful directions of its officers. Under the Student Conduct Rules a student may be excluded from the University if the Student Conduct Committee is satisfied that there has been a breach of these rules. Copies of the Statutes and Rules are available for perusal at the Office of the Director of Student Administration, or the Secretariat.

Cheating, plagiarism and similar misconduct

The University of Canberra issues the following advice to its students in relation to cheating, plagiarism and similar misconduct in student work, especially in work submitted for assessment.

The advice is based on traditions of respect for knowledge, scholarship and scholars. Also, upon a conviction about the importance of educating students to have similar values and to acquire skills that will enable them to understand this heritage and begin to contribute to it.

All scholarship is based on the work of others and that debt must be explicitly acknowledged in every instance by stating from where facts, concepts and arguments are derived. Acknowledgement is appropriate whether or not an author's actual words, figures or images are quoted or whether the ideas are incorporated in the students own work in a different form.

The University will not tolerate appropriation of others' work without acknowledgment; it regards such appropriations as ethically unacceptable behaviour.

The most important function of a University education is to equip students to appreciate and practice scholarship. University degrees signify that students have attained a level of appreciation and skill acceptable to the University. It is in this context that work submitted by students must be their own. Work taken from others does not fulfil an educational function and it undermines the standards of the University. Therefore, the University cannot allow students to submit the work of others as their own.

Some examples of unacceptable conduct follow.

Plagiarism
The appropriation by reproducing, para-phrasing, summarising or otherwise presenting them in altered form, of another person's ideas or arguments without acknowledgment.

Plagiarism includes submitting work prepared by another author, including another student, as one's own.

Fake claims on work done
Only sources actually consulted should be included in references. Where they have been found in others' work the actual source read should be cited **not** the original work.

Others forms of deception and dishonesty
The breaking of any rules about which notes, books or other unauthorised materials may be taken into an examination is a form of cheating and is unacceptable. Students in any doubt about examination rules should inquire of their lecturers or examination supervisors.

The University regards cheating, which includes plagiarism, making false claims and other forms of dishonesty, as a serious academic offence. A severe penalty will be imposed on anyone found guilty of such conduct.

Penalties

The Student Conduct Statute 1992 defines examination to mean any task required to be undertaken by a student for the assessment of the student's performance in a unit of study.

The Misconduct in Examination Rules 1992 define misconduct to include

(a) cheating: and

(b) plagiarism; and

(c) reproducing in, or submitting for assessment for, any examination the work of another person, whether in whole or in part and whether with or without the knowledge of the other person; and

(d) except with the approval of a Dean of the Faculty that administers, or the Deans of the faculties that jointly administer, a unit of study, submitting for an examination any work previously submitted for an examination relating to that unit; and

(e) failing to comply with the University's instructions to students in relation to an examination; and

(f) acting, or assisting another person to act, dishonestly in, or in connection with, an examination.

Evidence of misconduct in an examination will be taken into account by the member or members of staff responsible for the assessment of any work submitted to the University. It is the view of the University that a piece of work in relation to which misconduct has occurred should be failed and that failure in the unit may also be appropriate.

The relevant Dean of the Faculty will be informed and, under rule 9 of the misconduct in Examination Rules 1992, the Dean will call the student in for an informal discussion, counselling and warning. If it appears that further action is necessary, the Dean will either recommend to the Faculty Board that the student be failed in the unit or decide that formal action should be taken at a Summary Inquiry under rule 11 of the Misconduct in Examination Rules.

Action under rule 11 of the Misconduct in Examination Rules is appropriate when, in the opinion of the Dean, the alleged offence is aggravated by repetition or by indication of a systematic attempt to deceive the examiners.

The Dean of Students, the Students' Association and CUPA are available to advise students who are concerned with possible breaches of the rules.

(Academic Board Resolution AB92/6/3).

Student Identification Card

Each student on campus is issued with a student registration number which is used to identify each student uniquely for the processing of certain student information. For example, changes to a semester program or to personal details, the borrowing of books and other materials from the Library, sitting for formal examinations, and the use of Computer Services Centre and Curriculum Resources Centre facilities are all dependent on a student's proof of identification. For these and other purposes students are required to carry a valid, up-to-date identification card while on campus. Failure to produce a valid student identity card may result in a student being excluded from an examination.

The identification card is produced in New Student enrolment week for new students in each semester. The card is valid for a period of one year. Continuing students have their cards updated each year. The issue of cards is undertaken by University staff and will be performed only on the proof of payment of the Registration and Acceptance fee as indicated by a valid fee receipt.

The procedure for issuing cards to new students is conveyed to them with the Offer of Place in their New Student Enrolment Pack. The procedure for updating cards for continuing students will be conveyed to them in the Vital Information Booklet posted with their Statement of Results.

A lost or damaged identity card can be replaced by completing the appropriate form at the Student Information Desk and submitting payment of the appropriate fee at the Accounts Office in Building 1.

Student Membership of University Committees

Student representatives are elected each year to the University Council and to the Academic Board, Faculty Boards of Study, the Admissions Committee and other University committees as determined from time to time.

Student members are elected to hold office for the period of one year, but generally are eligible for re-election.

Subject to confirmation, elections of student members of the University Council and of the other University Boards and Committees will usually be held in September. Notices calling for nominations will be posted in prominent positions around the University during August.

University of Canberra, AUSTRALIA

HANDBOOK 1996

Admission Procedures

- Admission Requirements
  - Undergraduate Courses
  - Graduate Courses
- Applying for Admission
  - Undergraduate and graduate courses
  - Research Higher Degrees
- Graduate and Postgraduate Level Courses Fee paying
- Semester 2 Intake
- Offer of Place
- Acceptance of Offer
- Deferment of Initial Enrolment
- Further Information
- Register of Course Articulation between University of Canberra and the Canberra Institute of Technology

The Admission Procedures are established by the Academic Board. The Admissions Committee, a sub-committee of Academic Board, considers applications for admission to undergraduate, graduate and some postgraduate courses using the Admission Rules and Procedures as its terms of reference. The Admission Rules are made by the University Council under the Admissions Statute.

Admission Requirements

Undergraduate Courses

Applicants may be considered admissible to an undergraduate course at the University if they can satisfy the Academic Board that they have a reasonable likelihood of success in that course at the University.

The current requirements are set out below, but if *further information and advice on any aspect of admission is necessary, you should contact the Admissions Office, telephone (06)201 2596*. Authoritative information can be given in writing only by the Registrar. The University will not accept responsibility for any consequences that may result if advice is sought from any other source.

Eligibility for admission to the University does not guarantee an offer of a place in a particular course.

Australian secondary studies

Current NSW HSC and ACT Year 12
If you are a current NSW HSC or ACT year 12 applicant (recent school leaver) assessment of admissibility will be based on your TER.

Previous NSW HSC and ACT year 12
If you have previously completed an ACT year 12 tertiary package, a NSW HSC or Leaving Certificate (after 1960), you will be considered for admission on the basis of a standardised score provided by the Universities Admission Centre.

Interstate year 12
Applicants from other states should have reached a level deemed by the University's Academic Board to be broadly comparable to that required of either ACT secondary college or NSW HSC candidates.

Previous Australian tertiary studies

You will be considered for admission if you:

(i)
have satisfied the requirements for a degree or equivalent award, as approved by UC's Academic Board; or

(ii)
have been admitted to, and achieved a reasonable rate of progress at, any Australian university or in any nationally accredited course at any nationally accredited higher education institution in Australia. Applicants for some courses may be granted advanced standing on the basis of studies completed at other approved institutions.

Exclusion: If you have previously been excluded from a tertiary institution you must provide a detailed supporting statement with your application, outlining reasons for such exclusion and why you believe you will be more successful in future studies if admitted.

Applicants who have been excluded from a course of study at a tertiary institution in the two years prior to their application may not use the results from a Special Tertiary Admissions test as the basis for readmission.

Previous University of Canberra (UC) students
Students applying to return after an absence:
If you were enrolled at UC (or the CCAE) in previous years but have withdrawn from the course, you must apply to return to this University through UAC if you wish to enrol in any undergraduate course except for the Human Resource Development courses, and the Education and Nursing degree conversion courses.

Students currently enrolled at University of Canberra:
If you are currently enrolled at UC until the end of semester 2, and wish to apply for admission to another UC course, you must apply directly to UC by the closing date, usually 1 October.

Access Scheme

As part of the University of Canberra's commitment to equity in access to university education, the Access Scheme assists immediate and recent school leavers of good academic potential whose education has been disrupted or disadvantaged and who, consequently, may not gain entrance to the degree course of their choice.

Examples of the types of education disadvantage include personal illness, trauma or physical disability, family problems, language difficulties, or inadequate or difficult home study conditions.

Some places have been set aside in each Faculty for students admitted under this Scheme. Also an adjustment may be made to the tertiary entrance ranks of eligible applicants, who then compete on academic merit for the places available. Offers of place will be notified at the same time as the UAC offers in late January and early February.

To be eligible under this scheme, applicants need to be

(a)
attempting or have attempted Year 12 examinations or assessment in NSW or in another State, and have no subsequent university enrolment; and

(b)
citizens or permanent residents of Australia.

For admission through the Access Scheme, it is necessary to complete the following steps:

1. Apply by the closing date for general admission through the Universities Admissions Centre (UAC), including at least one preference for a degree course at the University of Canberra.
2. Complete a University of Canberra Access Scheme application form which is available from the school principal, careers adviser or school counsellor, or can be obtained by telephoning the Admissions Office on (06) 201 2596.

Only applications that have school support will be considered under the Scheme. The closing date for applications under the Access Scheme is 31 October. All forms should be returned to: The Admissions Office, University of Canberra, PO Box 1, Belconnen, ACT 2616.

Special Admission

Applicants who have not successfully completed twelve years of schooling and who are 21 years old by 1 March of the academic year for which they are applying for admission may be considered under one of the following schemes:

(i)
Abridged Year 12 Programs
- ACT applicants must complete three tertiary accredited Year 12 courses including English and obtain a Year 12 Certificate in one year.
- NSW applicants must complete between five and nine HSC units of study including English in one year.

(ii)
University Preparation Scheme (conducted through the Centre for Continuing Education at the Australian National University). This program is designed to prepare mature age students in the various skills they will need in their proposed courses. Essays, tutorial presentations and numeracy are formally assessed, and a participation grade is also given. In addition, candidates may sit the University of Canberra's Special Tertiary Admissions Test if they wish to do so (see details below).

For more information, telephone the Centre for Continuing Education on (06) 249 2892 or the University of Canberra Admissions Office on (06) 201 2596.

(iii)
Canberra Institute of Technology Pre-Tertiary Studies Certificate. Applicants must satisfactorily complete three out of the four available subjects, including English; or

(iv)
The Special Tertiary Admissions Test (STAT). UC encourages all applicants who have not completed Year 12 and have not previously undertaken any appropriate study to sit the STAT. If you have previously undertaken the STAT test at UC, you must resit the test as UC now uses version G.

UC will be conducting this test on 18 November 1995 and 6 January 1996. You may reserve a place at a test by writing directly to the UC Admissions Office, enclosing the test fee of $45 and nominating one of the test dates. Sample questions and a letter confirming the date, time and venue will be forwarded to you. If you have been excluded from tertiary studies during the past two years, you are ineligible to apply through this scheme.

(v)
Successful completion of an approved pre-tertiary studies course conducted by a NSW or any other Australian state TAFE institution.

Although it is possible to gain admission to the University of Canberra using the results gained in the Special Tertiary Admissions Test, experience has shown that students who undertake tertiary preparatory programs, such as the Certificate in Pre-Tertiary Studies or the University Preparation Scheme, appear to have a higher rate of success in first year studies than those who do not.

Other Applicants

Applicants will be considered if they

(i)
have reached a level regarded by the Admissions Committee to be broadly comparable to that required of ACT secondary college candidates; or

(ii)
have satisfied the requirements for a degree or equivalent award, as approved by Academic Board; or

(iii)
have been admitted to, and achieved, a reasonable rate of progress at any Australian university or institution regarded by the Admissions Committee as comparable to an Australian university;

(iv)
are Aborigines and Torres Strait Islanders who have passed the University of Canberra's Foundation Program for Aborigines and Torres Strait Islanders and who do not meet other normal University entrance requirements.

Conditional Admission

If, in the opinion of the Admissions Committee on behalf of Academic Board, there is some concern about the likelihood of success of an applicant should he or she be admitted to a course at the University, conditional admission may be given. An Offer of Place will specify the conditions which apply. Usually these conditions state that successful results must be achieved in six units in the first year for a full-time student, or three units in the first year for a part-time student.

Assumed Knowledge

It will be assumed that applicants have attained a level of competence in English suitable for tertiary studies. In addition, some courses assume that applicants will have achieved satisfactory levels in particular subjects. Refer to Faculty entries for further details.

Overseas Qualifications

Applicants whose qualifications were obtained outside Australia may be required to show that they have sufficient knowledge of the English language to enable them to successfully undertake the course to which admission is being sought. Applicants who have not lived in an English-speaking country for two or more years must satisfy the University of their competence in English by:

(a)
scoring 550 or better in a TOEFL test, with 4.5 in the Test of Written English (TWE) component; or

(b)
obtaining an overall band score of 6.5 or better under the International English Language Testing System (IELTS). The IELTS may be undertaken at the University of Canberra; or

(c)
passing the Cambridge Certificate of Proficiency in English conducted by the ACT Institute of TAFE; or

(d)
scoring 75 or better in the Combined Universities Language Test (CULT); or

(e)
at least successful completion of an advanced certificate of at least 2 years full-time equivalent at an Australian TAFE; or

(f)
at least the full-time equivalent of 2 years of successful tertiary study in a non-science area at an overseas institution where the medium of instruction is English.

Graduate Courses

The requirement for admission to any graduate course of the University is possession of a degree or an award that in the opinion of Academic Board is the equivalent of a degree conferred by a tertiary institution recognised by Academic Board, provided that the qualification has been gained in a suitable area of study. Academic Board may, however, admit such other persons who, in the Board's opinion, have achieved a combination of sufficient professional experience and status in a relevant field and sufficient academic qualifications to enable them to undertake a proposed course of study with a reasonable likelihood of success.

Applicants should provide originals, or certified copies, of all their documents, or it may not be possible to process their applications for admission.

The University Higher Degrees and Scholarships Committee of the Academic Board is responsible for monitoring the administration of masters courses by research and is responsible for the administration of doctoral degree courses, subject to guidelines and procedures laid down by Academic Board and to the legislation of the University.

Intending applicants for research degrees may wish to discuss their research interests with the relevant Faculty prior to submitting an application for admission.

Master Degrees by Research

An applicant seeking admission to a masters degree by research program shall

- have achieved above average performance in a bachelor degree or in an award deemed to be its equivalent;
- meet any other academic requirements such as bridging studies;
- have had such practical or work experience as is specified by the Faculty concerned for admission to a particular program and published in the Handbook.

The policy of the University is to limit entry to those individuals whose academic background and experience indicates that they are likely to profit from the learning experiences involved and to complete the program.

Although the University does not offer masters qualifying courses, in some cases it provides a postgraduate diploma course which is designed as the entry point for a masters degree by research program. In these and other instances, the University may also provide graduate diplomas or bridging programs. These are intended to facilitate entry for international candidates or candidates whose initial tertiary qualifications are in a field other than that of the masters degree program concerned.

Where an applicant does not hold the necessary formal qualifications but

- holds a senior professional appointment; or
- has had a substantial period of suitable work experience and whose career may have included substantial short course training in an appropriate field;

the applicant may, on a case-by-case basis, be granted special entry by the Admissions Committee, in accordance with the Admission Rules.

The University offers degrees of master by research only, or by a combination of coursework and thesis.

Refer to the section on Definition of University Terms for details of thesis types and academic requirements.

Degree of Doctor of Philosophy (PhD)

Applicants seeking admission to a PhD program shall

- have a degree of bachelor with first or upper second class honours awarded by an Australian university or other recognised higher education institution; and
- provide evidence of research training and aptitude for research.

An applicant seeking admission to a PhD program who does not satisfy the requirements given above shall not be admitted to the program unless the University Higher Degrees and Scholarships Committee is satisfied that the applicant holds an award or has completed work that has honours equivalence as specified; and has attained significant research ability and professional performance in accordance. Further information on honours equivalence is available from the Faculty.

When an application for candidature is being considered by a Faculty, the degree on the basis of which any particular application is being made for admission to the doctoral degree course must be in a field of study which is regarded by the Faculty concerned as appropriate.

Special requirements for admission to a doctoral degree course that relate to a particular field of research may also apply. Such requirements may include a requirement for relevant professional experience.

Where an applicant is seeking admission to a PhD program on the basis of honours equivalence, the University Higher Degrees and Scholarships Committee, on the recommendation of the Dean of the relevant Faculty, shall determine whether the applicant has attained

- significant research ability - on the basis of evidence of research training and a significant research output demonstrated, for example, by the applicant's publications record; and
- significant professional performance - on the basis of evidence that the applicant had been required to work independently, exercising independent judgement.

Degree of Professional Doctor

Applicants seeking admission to a professional doctorate program normally shall

- have a degree of bachelor in the relevant professional field and five years professional practice in a relevant field; and
- provide evidence of
  (i)
  capacity for specialised coursework at doctorate level; and
  (ii)
  superior professional performance both intellectually and technically in the chosen field.

Special requirements for admission of an applicant to a professional doctorate program will vary depending upon the patterns of professional education applicable to the Faculty and will form part of the accreditation document for the course. The Faculty administering a professional doctorate program is responsible for recommending to the University Higher Degrees and Scholarships Committee any additional conditions of admission for a particular candidate.

Excluded Students

Applicants who have met the admission requirements set out above but who have been excluded from a course of study at this University or another tertiary institution will be required to satisfy the Admissions Committee, or the University Higher Degrees and Scholarships Committee, as appropriate, that they have an improved likelihood of success if they wish to be considered for the same or another course of study. Such applicants should set out their reasons in a letter accompanying their application form.

Non-Award Studies

The University has the following arrangements for non-award studies.

Cross-Institutional
Students wishing to complete an award course of another institution should apply for the "Cross Institutional Studies Program", providing a copy of the recommended units from the Registrar of their home institution. Students in this category of non-award studies incur a HECS liability.

Non-Award - (Examinable)
Students taking units towards a professional qualification or for career improvement should apply for "Non-Award Studies (Examinable)", and attach a detailed statement including a list of the units they are proposing to take at this University. Notification of the University's approval will accompany a subsequent Offer of Place.

Non-Award - (Non-Assessment)
People wishing to take individual units for interest only should apply for "Non-Award Studies (Non-Assessment)" and attach a detailed statement including the unit or units they wish to take in the coming semester and their reasons for doing so. Units taken in this category will not be assessed on a Pass/Fail basis and will not be considered as status or credit towards any award of the University. Enrolment will be for one semester only, unless the original Offer of Place package contained specific permission allowing the student to register for a future semester.

Commonwealth legislation states that Non-Award (Examinable) and Non-Award (Non-Assessment) students must pay fees at least equivalent to the amount of HECS that would accrue if they were in an award course. The fee for 1995 was $200 per credit point.

International Students

The University offers full-fee paying courses to international applicants. Persons interested in undergraduate and graduate level courses should request an "Application for Admission for Full-fee Paying International Students" form from the International Office at the University. Proof of educational qualifications such as certified copies with translations and English language competence should be submitted as early as possible.

For further information about admission to University courses for international students, see the section titled "International Office" in the University section of this Handbook.

Applying for Admission

Undergraduate and graduate courses

The University is a member of the NSW and ACT Universities Admissions Centre (UAC). Applications for admission to undergraduate courses (see exceptions below) should be directed to:

UAC
Locked Bag 500
Lidcombe NSW 2141

Applications must be received by 6pm on the last Friday in September. A late processing charge of $60 will be applied after that date until 31 October.

Applicants for the University of Canberra Access Scheme should lodge with the University a separate Access Scheme application by 31 October.

Exceptions
Applicants in one of the categories below should apply directly to the University of Canberra. Forms can be obtained from the Student Information Desk in Building 1 at the University or by writing to the Registrar.

- Full fee paying international students (not immediate school leavers or those currently at another Australian tertiary institution);
- Aboriginal and Torres Strait Islander applicants;
- University of Canberra internal transfers;
- Applications for cross-institutional studies, non-award studies, Human Resource Development and Conversion (Education and Nursing) courses;
- Applicants for graduate and postgraduate courses.

For admission in Semester 1, 1996, preferential consideration will be given to applications lodged with the Registrar before 1 October 1995. A late processing charge of $60 may be applied after that date. Offers of Place are subject to the number of vacancies and restrictions on the number of course choices will apply.

Where possible, applicants should attach a certified copy of evidence of academic qualifications on which eligibility for admission will be determined. Students seeking admission on the basis of examination results which will not be available until after the due date should still submit the application by that date and forward a copy of the results concerned as soon as they are obtained. Applicants for graduate courses should submit their latest transcript of academic record in addition to all other relevant documents (including certified copies of testamurs).

Research Higher Degrees

An applicant shall

- complete and sign the appropriate Application for Admission form;
- complete a research proposal or draft proposal or description of the desired area of research and;
- obtain certified copies of academic qualifications;
- obtain supporting documentation, including names of academic referees; and
- if the applicant is a member of the University staff - prepare a statement, endorsed by the Dean of the relevant Faculty, outlining the reasons why the applicant wishes to undertake the degree within the University;
- obtain any other information requested by the relevant Faculty.

Time of lodgment

The documents listed above should be lodged

for masters by research and professional doctorate applications
by 1 October of the year preceding the year of commencement (which is the 'on-time' closing date for applications according to the University's admissions period);

for PhD applicants

- if accompanied by a scholarship application - by 1 October of the year preceding the year of commencement;
- not accompanied by a scholarship application - at any time during the year.

Place of lodgment

The documents listed above should be lodged

- with Student Administration if the applicant is an Australian or New Zealand citizen or permanent resident; or
- with the International Office if the applicant is to be enrolled as a full fee-paying overseas student.

Research Proposal

Although a candidate for a higher degree by research has six months from commencement of the program to finalise the research proposal, it is important that enough information is provided initially to enable the appropriate Faculty and Dean, and, in the case of the doctoral programs, the University Higher Degrees and Scholarships Committee, to assess the nature of the topic proposed.

The research proposal should

- describe the proposed area of research and methodology; and
  describe, as far as practicable, the general nature of the research to be pursued, including expected resources and conditions required to complete the research (eg, field trips, specialised computer software);
- demonstrate the competence of the applicant to undertake research at a masters or doctoral level in the field to which the proposal relates by reference to either or both of the following
  (i)
  the educational and any professional achievements of the applicant;
  (ii)
  substantial publications by the applicant in recognised, refereed journals, texts, conference papers;
- be consistent with the following guidelines

  the aims of the study have been realistically assessed and well defined;

  the methods proposed are appropriate and ready for immediate application;

  research skills that will need to be acquired have been identified;

  the facilities and conditions expected to complete the research have been clarified with the Faculty; and

  the project budget has been thoroughly costed and the outcomes have been clearly defined.

Graduate and Postgraduate Level Courses Fee paying

The University will fill its quota of DEET funded places on merit, as in the past. However, those who meet the academic requirements but have missed out on a place through competitive ranking, will be given the opportunity to enrol in the course through a fee paying scheme.

In 1996, the fees for these "above quota" places will be set at 60 per cent of the full-fee rate for the course, with the fee level determined by the credit point level and number of units studied. Further information is available from Student Administration.

Some courses, identified in the listing of course options for 1996, are offered only as full-fee paying courses. Information on the level of fees applying is available from the Faculty offering the course.

Semester 2 Intake

There is usually no second semester intake for most courses; enquiries, however, may be directed to the Registrar. The closing date for applications to begin study in Semester 2 is 1 June.

Offer of Place

Applicants who have been selected to undertake a University course will receive an Offer of Place in that course. The Offer of Place will indicate the expiry date by which the offer must be accepted.

Acceptance of Offer

Any person accepting an Offer of Place in a course is required to accept by the expiry date and to pay an acceptance fee determined by Council and detailed on the Offer of Place.

If enrolment is not completed, the University of Canberra's current policy on fee refunds allows for a refund of the acceptance fee less a cancellation charge. Applications for a refund of the acceptance fee must be forwarded before the HECS Census date each semester. On the completion of enrolment, the money paid as the acceptance fee is converted to the Amenities & Services and Students Association Membership Fee paid by all students on campus each semester. See information on Registration Fee and Charges.

Deferment of Initial Enrolment

No deferment of a course of studies will be granted to an applicant who has not yet commenced studies in that course at the University. The only exception will be those applicants who, upon accepting their Offer of Place, provide evidence of their acceptance into the Ready Reserve Program.

Further Information

Persons seeking further information concerning admission should contact the Student Information Desk, telephone (06) 201 2225, or write to the Registrar, PO Box 1, Belconnen, ACT 2616.

Specific queries on particular courses should be directed to the Executive Assistant/Officer/Administrative Assistant of the Faculty which offers the course concerned.

Register of Course Articulation between University of Canberra and the Canberra Institute of Technology

Students who have completed certain Associate Diploma courses from the Canberra Institute of Technology (formerly ACT Institute of TAFE) may be granted advanced standing towards nominated University of Canberra degree courses.

The granting of advanced standing may depend on the electives or units successfully completed in an Associate Diploma. Advanced standing may be granted as well on a unit- by- unit basis. As this process is currently under review, further details must be obtained from the Executive Officer/Assistant of the relevant Faculty.

University of Canberra, AUSTRALIA

HANDBOOK 1996

Enrolment Procedures

- New Students
- Continuing Students
- Honours Students
- Masters Degree and Doctoral Students
- Course Advice
- Course Approval
- Concurrent Study at Other Tertiary Institutions
- Finalisation of Enrolment
- Confirming Unit Enrolment

New Students

Students will receive enrolment information with their Offer of Place. This information will contain instructions on how to complete enrolment. In brief, this covers discussion of a study program with the student's course adviser, submission of a year's study program to Student Administration, registration in relevant tutorials and laboratory sessions, completion of details related to the Higher Education Contribution Scheme (HECS) and the production of a University student identification card. It is necessary to register units for both Semesters 1 and 2.

Continuing Students

Each year, all students on campus, together with those returning from deferment, should register a study program for Semesters 1 and 2. The registration form, and a listing of all the units available in the various faculties, together with other general information on whom to contact with specific queries on re-enrolment, will be available from the Student Information Desk in Building 1. Confirmation of the registration of a semester 2 program will be contained in a Statement of Results that will be mailed to the student's local address at the end of Semester 1. Students may also confirm their enrolment by visiting Student Administration. All students receive a HECS liability notice during each semester which confirms the student's enrolment for the current semester.

Students not qualified for re-enrolment are those undertaking studies in Non-Award (Non-Assessment), Non-Award (Examinable) courses (unless the original Offer of Place package contained specific permission allowing the student to register for a future semester), students who have voluntarily withdrawn from their course, students who have been excluded and students whose course completion has been certified by the appropriate Faculty Board. Any student in one of these groups who wishes to pursue further study at the University will need to seek readmission by lodging an application for admission as detailed in this Handbook.

Honours Students

Students wishing to undertake honours level studies should, in the first instance, consult with the Executive Assistant/ Officer of their Faculty, or the Students Information Desk.

The University offers two forms of honours level studies:

(a) A bachelor honours degree may be awarded following the completion of a one year stand-alone bachelor honours degree course. Such courses are only be available for students who have completed a three year bachelor pass degree in a similar field of study. The course would predominantly be spent on research or on a project.

(b) A degree with honours may be awarded following the completion of a four year or longer course, or a graduate bachelor degree course, to a student who has shown outstanding performance from an early stage of the course and who has undertaken a more demanding academic program than that required of a student undertaking the course as leading to a pass degree.

Students seeking to undertake studies described in category (a) above need to lodge an application for admission to honours level studies by the closing dates specified by Academic Board. If an Offer of Place in an honours degree program is made by the University the successful students should accept the offer and register a study program according to the procedures for new students described in the section on Enrolment.

The procedures for awarding honours in category (b) programs are administered by the relevant Faculty.

Masters Degree and Doctoral Students

Students enrolled for masters degree and doctoral degree courses, *including those undertaking their programs by thesis only*, should note that they must have a study program registered and pay the Amenities and Services/CUPA membership fees by the due dates for each semester of their course. Students accepted for candidature for doctoral programs and masters degrees by research will be sent a guide to postgraduate study at the University of Canberra. For further information please contact Student Administration.

Course Advice

The selection of a particular study program in relation to a course is the responsibility of the student concerned. University policy distinguishes two distinct areas in the process of this selection, namely course advice and course approval. Course advice includes information available from many sources on which the student makes choices about a course of study and selects options which may exist within it. Course approval means the formal confirmation that successful completion of a particular program of study has satisfied, or will satisfy, the academic requirements for a particular award. A student may seek an approved study program from the Dean of Faculty administering his/her course.

A student is admitted to a course of study. At the time of initial enrolment, the student can request from the Faculty concerned a statement that gives details of the requirements of that particular course. This Determination of Course Particulars constitutes the principal advice of the requirements of the course.

This Handbook is the principal collection of information of importance to potential and continuing students. Supplementary information may be authorised by either the Registrar or Academic Board and issued by Student Administration or by particular Faculties.

Course Approval

Responsibility for course approval rests with the Dean of Faculty responsible for the particular course. A student who has been admitted to a course and who wishes to determine that a particular study program would, when successfully completed, satisfy the academic requirements of an award of the course, may submit such a request in writing to the appropriate Dean of Faculty (or delegate). Any study program subsequently approved by the Dean of Faculty (or delegate) is dependent on the student maintaining continuity of studies (inclusive of approved periods of deferment) and pursuing the approved program with due regard to matters such as unit prerequisites. In the event of changes in unit availability a student may find it necessary to submit a revised study program for approval.

It should be noted that approval for registering in particular units does not constitute approval to count the unit or units as part of an approved study program.

Concurrent Study at Other Tertiary Institutions

Students admitted to a course at the University may be permitted to include in their course certain units offered by the Australian National University or other tertiary institutions subject to the following conditions.

Firstly, the student must apply and be acceptable to the other institution under its general requirements for admission and for entry to the particular unit or units to be taken. Secondly, the student must have the prior approval of this University, which will normally be given only for study in subject areas which are not available within the University.

Students who are currently enrolled, postponed or deferred and who wish to undertake concurrent studies at another institution should, in the first instance, consult their Dean of Faculty. The Dean of Faculty responsible for the course concerned may recommend to the Faculty Board that approval be granted for the student to vary his/her course requirements to include the appropriate unit or units from the other institution.

The Registrar will notify the student in writing of the decision of Faculty Board.

On completion of each stage of the studies involved at the other institution, it is the responsibility of the student to notify the Registrar of the outcome of assessment for the unit or units taken for the appropriate recognition to be given towards the award of their course at the University of Canberra.

Finalisation of Enrolment

The University requires all students to finalise their enrolment before the first teaching week of Semester 1, and by the end of week 1 in Semester 2. Finalisation of enrolment entails:

(i) payment of the Amenities and Services/SA or CUPA membership fee; and

(ii) registration of a study program for the academic year comprising one or more units for each semester (for Semester 1 not later than the last working day in January for continuing students); and

(iii) confirmation of tutorial, workshop, seminar, laboratory classes for each unit as appropriate; and

(iv) registering their option intentions under the Higher Education Contribution Scheme. Note that the option already registered will be assumed to apply unless the student changes it by submitting another option form or by changing course.

(v) Payment of the HECS up-front liability, if this option is chosen, by the end of the first week of semester.

Continuing students seeking to register (or add units to) a study program for Semester 1 on or after 1 February will be liable to pay a late charge.

A student seeking to finalise enrolment by registering a study program after the commencement of semester, must obtain approval from the Dean of the Faculty or delegate in charge of the units concerned. Under these circumstances the student will also be liable to pay a late penalty charge.

A late penalty charge will be imposed on any student wishing to add units to or change units in his/her study program from the first day of semester for Semester 1. The Registrar is empowered to waive or reduce this late charge where the Dean of Faculty certifies that such an addition or change was necessary on academic grounds.

No applications to add units to a study program can be accepted after 31 March for Semester 1, or 31 August for Semester 2.

Confirming Unit Enrolment

It is vital that students ensure that they are correctly enrolled. This can be done by checking their computer record at the Student Information Desk in Building 1. Note that after a certain time in the semester it is not possible to alter a student's units because of government and HECS legislative requirements.

Credit Points for Units

A credit point is an indicator of the amount of work required in a unit and represents a workload of about four hours per week throughout the semester for an average student. This means that a three credit point unit, for example, carries with it the expectation that twelve hours of work per week will be done by an average student in the subject throughout the semester. These twelve hours include both class contact hours and time spent on study associated with the unit. A full- time student will normally undertake a 12 credit point workload per semester.

Students are advised that their enrolment in any unit may be refused or declared invalid by the Dean of Faculty offering the course in which the student is enrolled if the student is concurrently enrolled in units totalling more than 14 credit points.

The relationship between the number of credit points and the workload refers to the average student. Students' work habits and capabilities vary widely, and there will inevitably be many students who choose to do more or less than the average. The provision of such a means for gauging workloads is helpful to all students, but particularly to part- time students, to avoid them being faced with excessive workloads in the later years of their courses. The use of a credit point system aims to make it easier for students to plan a workload within their ability.

Withdrawal or Change of Units

Students wishing to remove units from, or add units to, their current or future semester study programs should lodge a Change of Units form at the Student Information Desk. From the first day of semester until the date gazetted as the census date, students may withdraw without having a financial liability under HECS. From this date, which for 1996 is 31 March for Semester 1 and 31 August for Semester 2, the University cannot alter a student's HECS liability; therefore it is not possible to add a unit after the census date.

However, it is possible, until 4.30pm on the last Friday of the class free period, to withdraw from a unit of a semester program and receive a result of Withdrawn (W) for that unit, (though the HECS liability will remain unchanged). Where a student withdraws from a unit within the first four weeks of semester, the student's academic transcript will not reflect that unit.

After 4.30pm on the last Friday of the class free period and up to 4.30pm on the last day of classes in a semester, students withdrawing from a unit of their semester program will receive a result of Fail (N) for that unit. In the latter case a student may apply for the Fail (N) result to be converted to a Withdrawn (W) result, but only on the grounds of illness or some other valid reason. A form, Unit Withdrawal - Conversion of Fail Result, is available from the Student Information Desk and evidence such as a medical certificate, in support of a request for fail conversion, must be attached for consideration by the Dean of Faculty concerned.

Year-long Units

If a student removes a year- long unit between the first and last day of Semester 1 the unit will be withdrawn from Semester 1 and deleted from Semester 2. If a student removes a year- long unit between the end of Semester 1 and the end of the class free period for Semester 2 the unit will record a KU (continuing) result for Semester 1 and a W (withdrawn) result for Semester 2. If a student removes a year- long unit between the first day following the end of the class free period for Semester 2, and the end of Semester 2 the unit will record a KU (continuing) result for Semester 1 and a Fail (NW) result for Semester 2.

Postponement/deferment

Students may voluntarily suspend studies by applying for postponement, which is available to currently enrolled (that is fees paid, units registered, HECS obligations finalised) students from day 1 of the semester and permits the student to resume study in the same course in the next semester.

To apply for postponement, a student should complete the Postponement/Deferment Application Form and lodge it at the Student Information Desk. Students undertaking a higher degree by research course require the endorsement of their Dean of Faculty to postpone studies.

Students who postpone their studies will have unit plans for the following semester and any other notified intentions, such as course completion, deleted from their records. The University of Canberra's current refund policy allows for a full refund of the Amenities and Services Fee less a cancellation charge where notification of postponement and application for a fee refund are received before the HECS Census date for the semester.

A student returning from postponement must complete enrolment by registering a study program, lodging a HECS Payment Options form, and paying the fees and charges as appropriate by the due date. If these enrolment procedures are not completed by that date, the student will be considered as withdrawn from the course.

Students who are conditionally admitted to a course should seek advice from the Executive Assistant/Officer of the Faculty offering their course prior to applying for postponement.

Eligible students may also apply for a deferment of studies for a minimum of one complete semester, subject to Faculty approval. PhD students require permission from the Higher Degrees and Scholarships Committee to defer. Details are given on the Postponement/ Deferment Application form.

Withdrawal from a Course

Students withdrawing from a course will be regarded as withdrawn from all units in current or future semesters. Notification of course withdrawal should be submitted on the Total Course Withdrawal form available from the Student Information Desk. Students who withdraw from their course will have to apply for readmission in order to continue studies at the University. The University of Canberra's current refund policy allows for a full refund of the Amenities and Services Fee less a cancellation charge where notification of course withdrawal and application for a fee refund are received before the HECS Census date for the semester.

Changing to a New Course

Any student currently undertaking a course of study at the University wishing to apply for admission to another course of study should complete the Application for Admission form available from the Student Information Desk. Applications submitted by the due date will be given priority. Applications from current University students are considered together with all other applications for admission to that course.

Status for Previous Studies completed at another Institution

The granting of status in a unit is based on previously completed studies which are judged to be substantially similar in standard and content to the unit in which status is being sought. Status is equivalent to the achievement of a satisfactory pass result in the unit offered by the University.

A student applying for status must submit a completed "Application for Advanced Standing" form to the Student Information Desk, together with all pertinent documentary evidence, as early as possible and not later than the fourth week of their initial semester for status to be awarded in that semester. Advice should be obtained from the student's course adviser, particularly if the granting of status will affect a current semester's study program, as the matter needs to be decided prior to the HECS census dates. Students should not register in the units for which they are seeking status.

A maximum limit on the number of status units to be included in a course is determined by the total number of units in the course. Students wishing confirmation that status units can count towards their course should seek an approved study program from their Dean of Faculty.

Confirmation of the granting of status will be mailed to the student by Student Administration.

Status based on completed studies at the Canberra Institute of Technology is subject to specific agreements between the University and the Institute. See 'Register of Course Articulation' in the University section of this Handbook for further information on the level of status that will be awarded. Students seeking status based on these agreements should still apply for status in the manner described above.

Credit for previous University of Canberra Studies

Units from a complete or an incomplete University of Canberra course are available for credit to another course. Students seeking confirmation that units will count in their new course should seek an approved study program from their Dean of Faculty. Also, students applying for credit must submit to the Student Information Desk a completed "Application for Advanced Standing Form".

Assessment

Assessment for each unit in a student's semester program is based on the student's performance in such written examinations, assignments, classwork, practical or other work as prescribed for the unit by the Faculty. The method of assessment for each unit offered by the University is available from the Faculty concerned at the commencement of semester.

Students should familiarise themselves with the methods of assessment prescribed for each unit they undertake.

Student Progress

If students fail to make satisfactory academic progress in their course, they may be sent a "Faculty warning" or may be asked to "show cause" why they should be allowed to continue in their course. The criteria on which a Faculty Board will decide whether or not a student's academic progress is satisfactory are available from the relevant Faculty Office.

Illness

If a student is hampered by illness or other serious cause during semester, and the formal assessment of their work is adversely affected, they must notify their lecturer(s) and the Registrar as soon as possible. Written notification with supporting evidence, such as a medical certificate, must be received before the scheduled time of the final assessment for the unit. These procedures should be followed if the student wishes to have illness or other cause taken into account in the assessment of their work.

In the event of an illness during an examination session, the student must notify the supervisor-in-charge at the time and submit a supporting medical certificate to the lecturer in charge at the earliest possible opportunity. Generally, if a student sits for the examination, no consideration will be given for illness when the examination is marked.

End-of-Semester Examinations

The timetable of examination sessions for those units having final examinations will be posted on Student Administration's notice boards in the concourse level lobby of Building 2 (B Floor). It is also displayed at the Student Information Desk two weeks before the examination period.

Students with disabilities may be eligible to sit their examinations in other locations. Students requesting permission to sit examinations in alternative locations should contact the Equity Officer - Disabilities in order to complete the necessary documentation after Week 11 of each semester.

Examination script books are the property of the University, and are retained for one semester after examinations are held. The lecturer in charge of a unit is responsible for providing reasonable access for students to their own script books only.

Notification of Results of Assessment

The grading system used for both undergraduate and graduate units at the University is as follows:

```
HD      - High Distinction
DI      - Distinction
CR      - Credit
UP      - Ungraded Pass*
P       - Pass
N       - Fail
```

* grade of pass for units assessed on a Pass/Fail basis only.

The grade P* may be used for some units approved by Academic Board to indicate that, although the student has passed the unit, no enrolment in higher level units in that discipline will be permitted unless the student repeats the unit and a grade of Pass or better is achieved.

Other symbols used in the notification of results are:

```
DX      - Deferred result
KU      - Continuing unit
NAS     - Non-assessment
S       - Status awarded for previous studies
W       - Withdrawn from unit
```

Non-fail grades only will be displayed on the Student Administration notice boards in the concourse level lobby of Building 2 (B Floor) at the end of each semester. This listing will be in student identity number order. A Statement of Results will be posted to each student once the release of results is approved by Faculty Board. Semester results will be posted to the local address at the end of Semester 1 and to the home address at the end of Semester 2. If results are required to be sent to another address, a written request from the student should be lodged with the Student Information Desk before the examination period finishes.

Exclusion from Studies

A student whose progress in a course of study or unit is unsatisfactory may be subject to action taken under the Academic Progress Rules. A recommendation for such action is made by the appropriate Faculty Board. The Faculty Board may direct that letters be sent to students asking them to show cause why they should be permitted to continue with the course of study or a particular unit.

Students who fail to give sufficient reason for their poor performance, or fail to respond to the show cause letter, may be excluded from the course or unit, either with immediate effect or if certain specified conditions are not met.

A student who is excluded from a course is excluded for the period which is indicated on the notice of exclusion. To resume studies the student must submit an Application for Admission form and should include information that they have an improved likelihood of success should they be admitted. Any application for readmission after the period of exclusion has expired will be considered on its merits along with other applications for admission to that course. An applicant who has been excluded from an Australian tertiary institution in the two years prior to the application may not use the results from a Special Tertiary admissions test as the basis for readmission. For further information on applying for admission see the chapter titled Admission in this section of the Handbook.

A student who is excluded from a unit will be advised of the period of exclusion in the notice of exclusion.

Appeals

Students who are dissatisfied with a Fail or P* grade may seek a review of their result.

The Procedure for Review of Unit Results is available from Faculty Offices. The first step is to consult the lecturer-in-charge of the unit on the Monday following the official publication of results.

If the issue is not resolved by discussion with the lecturer, the student may request mediation and if necessary, a formal hearing. Strict timelines apply as set out in the Procedure.

Obligations Statute

Students should be aware that failure to meet a financial obligation to the University may result in the issue of a Certificate under the Obligations Statute.

The issue of such a Certificate means that the University may refuse enrolment or re- enrolment and withhold students' awards or statements that they have completed the academic requirements of the whole or part of their course.

Maximum Period to Complete a Course

Students must complete the academic requirements for their course within a certain maximum period in order to be awarded the degree, diploma or certificate to which their course leads. The maximum period for the completion of a course leading to a bachelor degree is normally ten years. The maximum period for completion of a course leading to a postgraduate award varies. The period is calculated retrospectively in time from the date the student successfully completed every matter so specified in his/her study program.

Any student who wishes to obtain information about the maximum period allowable to complete a course should write to the Registrar.

Transcript of Academic Record

Students may, at any time, request in writing a certified transcript of their academic record. A charge will be made for the preparation of these statements. The current scale of charges can be obtained from the Student Information Desk.

Students who have completed the academic requirements of their course and have had the award conferred, will be eligible to receive one copy of a certified transcript of their academic record free of charge subject to any restrictions under the Obligations Statute or other University legislation. In such cases the transcript will be made available on written request from the student and as soon as possible after the ceremony at which the award is conferred.

Academic transcripts do not contain details of a student's current semester enrolment.

Course Completion

Students expecting to complete the academic requirements of their course at the end of a particular semester should notify Student Administration before Week 8 of that semester by completing the Course Completion form available at the Student Information Desk. Once course completion has been certified by the appropriate Faculty Board, a student ceases to be enrolled unless they have been admitted to a further course of study. See the chapter on Admission in this section of the Handbook.

Students completing a course leading to a graduate award will need to have provided appropriate evidence of their graduate status before they can be admitted to their award.

Students who do not complete the requirements of their course by the end of January 1996 may not be able to have their award conferred at the ceremony in May.

Graduation Ceremonies 1996

The University ceremonies for the conferring of awards will be held on Wednesday 1 May, Thursday 2 May and Friday 3 May 1996. Students who have notified the University by the end of December 1995 that they have completed their course and whose award is duly approved by the Council will be sent an invitation to the appropriate ceremony. The invitation will be sent to the student's last notified home address.

Certificate of Conferral

Graduates whose testamur has been lost or destroyed may request in writing a certificate confirming that they are graduates of the University or its predecessor, the Canberra College of Advanced Education. A charge will be made for the preparation of this certificate.

University of Canberra, AUSTRALIA

HANDBOOK 1996

Fees and Charges

- Higher Education Contribution Scheme (HECS)
  - HECS Up-front Payment Option with Safety Net
  - HECS Deferred Payment Option
  - Exemption Declaration
  - Refunds of HECS Up-front Payment
  - Remission of HECS Debt
- Semester Amenities and Services Fees
- Other Costs
- Financial Assistance

Higher Education Contribution Scheme (HECS)

The Higher Education Contribution Scheme (HECS) was introduced by an Act of Parliament, the *Higher Education Funding Act*, in 1988.

The Act requires students to contribute towards the cost of their higher education.

The current HECS annual fee is $2409 for full-time students; however, the fee will increase in 1996. The increase is normally relative to the increase in the Consumer Price Index (CPI).

A student's HECS Liability is calculated in accordance with his/her semester load (number of credit points) in the semester. (A standard full-time semester load is 12 credit points).

All students who are commencing a course are required to submit a HECS Payment Option form to the University by the end of Orientation Week of their first semester of enrolment (specific dates are published in the Vital Enrolment Information Sheet and The Guide for New Students booklet which are both published by the University).

In completing the HECS Payment Option form, students are required to choose either the HECS Up- front Payment Option with Safety Net, or the Deferred Payment Option. Details are as follows:

HECS Up-front Payment Option with Safety Net

If a student chooses the Up-front option with Safety Net he/she is entitled to a discount of 25 per cent on the liability for the semester. The payment is due by the end of the first week of each semester. A late penalty charge may be imposed if payment is made after the stipulated dates and the student has not chosen the Safety Net. (Refer to Vital Enrolment Information Booklet or The Guide for New Students for dates). If a student chooses the Safety Net, a Tax File Number must be included on the form. The Safety Net gives the University permission to defer the HECS payment on behalf of the student if the Up-front payment is not received by the due date.

Payment of HECS fees may be made at the Cashier's Office, or at the on-campus branch of the Commonwealth Bank.

HECS Deferred Payment Option

If a student chooses the Deferred Payment Option, he/she must supply the University with a Tax File Number (TFN).

Under this option, a student is required to commence HECS repayments via the taxation system after he/she reaches the minimum taxable income, stipulated by the Federal Government, for the repayment of HECS.

Once a HECS Payment Option form has been submitted a student is not required to submit another form unless he/she wishes to

(i) change the current payment option
(ii) change course
(iii) return from deferment/postponement

As required by the *Higher Education Funding Act* 1988, any student wishing to change their HECS Payment Options must submit a new HECS Payment Options form by the HECS Census date of 31 March for Semester 1 and 31 August for Semester 2 and when stipulated by the University. Changes will not be possible, under any circumstances, after the HECS Census date.

A HECS Liability Statement is sent to all students as soon as possible after the HECS Census date. If the student considers that the information on the statement is incorrect, he/she should submit a written appeal to the Registrar clearly stating the reason why the record is incorrect. Appeals must reach the University within 14 days of issue of the original notice.

Exemption Declaration

Students who claim HECS exemption must initially complete a HECS Payment Options form. They must choose the exemption which is applicable to them and must sign the Exemption Declaration section of the form. In addition, students are required to provide documentary evidence to support their claim for exemption.

Students are advised that HECS is an integral part of a student's enrolment. Failure to fulfil all the HECS requirements renders the student's enrolment invalid.

If additional information is required please contact the HECS Officer on (06) 201 2616.

Refunds of HECS Up-front Payment

Consideration for refunds of HECS Up- front payments may be made in special and exceptional circumstances. In such cases an application for remission of Up-front HECS, which can be obtained from Student Administration, together with supporting documentation, must be forwarded to the Registrar no later than 8 June for Semester 1 and 9 November for Semester 2.

Remission of HECS Debt

Students who defer their HECS payment, that is, pay through the Tax system, must apply for remission of debt under "special circumstances" to the Department of Employment, Education and Training (DEET). Applications must reach DEET within three months after the debt was incurred, that is, by 1 July for Semester 1 and by 1 December for Semester 2. Where a student is unable to apply within this three month period because of circumstances beyond his/her control, for example, if a severe medical condition makes him/her incapable of doing so, or if the circumstances only become known after the end of that period of three months, an application may be lodged within fifteen months after the debt was incurred. Applications forms and further information can be obtained by contacting the HECS Officer on (06) 201 2616.

Semester Amenities and Services Fees

While at the University, all students pay a compulsory Amenities and Services Fee each semester as determined by Council. This fee must be paid by the Friday preceding the beginning of the teaching semester, for Semester 1 or by the Friday of week 1 for Semester 2, otherwise students will not be considered to have finalised their enrolment, and will not be able to pay the fee without first gaining approval from the Registrar and then paying a late penalty charge. The Amenities and Services Fee for 1996 is $116.00 per semester.

The University of Canberra's current policy on fee refunds allows for a full refund of the Amenities and Services Fee less a cancellation charge, where enrolment is cancelled in writing and advice received before the HECS Census date for the semester.

Sponsored students (for example those on teaching or similar scholarships) are required to submit each semester documentary evidence (that is, confirmation of their sponsorship by their sponsor) to the University Accounts Office, Building 1. The Austudy Scheme is not considered to be a sponsorship in respect of fees.

Other Costs

Students should note that they may be expected to contribute to the costs associated with undertaking field classes. They may also need to purchase specified items of equipment and/or materials for units that they may be required or elect to undertake as part of their course. Refer to Faculty entries under "Field Classes", "Laboratory Equipment" and "Materials" for further information.

Financial Assistance

For information on bursaries, scholarships and prizes, please refer to "the University" section of this Handbook. For information on financial assistance for needy students please refer to Personal Support Services in"the University" section of this Handbook.

Austudy. Financial assistance is provided under the Austudy scheme for Australian students studying full- time at universities and other approved tertiary institutions.

Austudy is available on a non- competitive basis with no upper age restriction. Assistance is subject to means tests and there are also rules relating to progress in previous tertiary studies.

Students must be formally enrolled in a course approved under the scheme (Masters and PhD courses are not approved) and undertaking at least three- quarters of a normal full- time workload. For students in courses which attract a Higher Education Contribution Scheme (HECS) charge, this means undertaking a student load of 0.375 or more per semester.

Eligible students receive a living allowance paid fortnightly. Assistance may be provided to meet travel expenses of interstate students travelling between their home and Canberra, and students with a dependent spouse may also be paid an additional allowance.

To maintain eligibility, students must notify any changes to their circumstances, including changes in enrolment and their personal income.

New students intending to apply should note that evidence of identity and enrolment must be provided at the time of lodging their application. Students whose entitlement will be based on their parents' income must also provide their parents' Tax Assessment Notices for the appropriate financial year.

All students are required to provide their Tax File Number (TFN) to the Department. Where an allowance is based on parents'/spouse's income, the TFN of the parents/spouse is also required.

Lodgement dates for payment of full benefits are 31 March in the case of full year or Semester 1 students, and 31 July for Semester 2 students.

Application forms and information about these schemes can be obtained from any office of the Commonwealth Employment Service. Completed forms may be lodged at CES Offices.

Enquiries may also be directed to: Canberra Student Assistance Centre, Department of Employment, Education and Training, telephone (06) 274 4099 or (008) 041 042, for NSW residents only. Personal enquiries may be made at the Austudy Office on campus, located in the Union Too Shop. The Hub, between 10.00am and 3.00pm on Tuesdays and Thursdays (during semester).

Abstudy. Financial assistance is also available for Aboriginal and Torres Strait Islander students under the Abstudy scheme. Abstudy provides a number of benefits for eligible students, some free of means tests.

Full details of entitlements and application forms are available from the Ngunnawal Centre for Aboriginal and Torres Strait Islander Education on campus, from the Department of Employment, Education and Training, or from the local Commonwealth Employment Service (CES) Office. For remote communities, intending students should contact their Aboriginal Services Field Officer.

HANDBOOK 1996

Students' Association

All undergraduate students of the University are members of the Students' Association. The membership fee is $21 per semester and is included in the acceptance for Services and Amenities Fee paid at the commencement of each semester. The Association is governed by a committee of eighteen students who are elected annually by the members of the Association.

The Students' Associations function is that of advocacy and representation for its members. It offers assistance, information, advice and support to its members. It's major concern is for the academic and general welfare of its members, and to support this it openly promotes and defends students' rights. The Students' Association encourages and helps students elected to Faculty Boards, Academic Board and Council, as well as any other representative role within the University. It also provides assistance to any student on campus as well as advising University Administration and academic staff.

The SA assists students in academic appeals; academic and welfare advice; information and assistance with Austudy and HECS. In addition the Association offers many services and resources to its members. These include: cheap photocopying; the Food co-op; cheap passport photographs; cheap faxes, emergency interest-free financial loans; a fortnightly student newspaper *Curio*; annual Orientation Diary/Handbook; maps, pamphlets and other information about the University, Canberra, etc; sewing machine and typewriter hire for students; daily local and national newspapers and journals available for reading in the SA Office, and free tea and coffee, and use of a microwave in our kitchen.

It also provides a contact point for many other people around campus. There is also the possibility to contact the Associations own Womens' Officers, Overseas Students' Officer and an Equity Officer. The services provided by the Students' Association are accessed in a number of ways; in person, by phone, and also most importantly through being a student at this university.

Location: Concourse, B Level, Building 1 opposite the Library.

Hours: Monday to Thursday 8.30am to 5.30pm, Friday 8.30am to 4pm.

Telephone: (06) 201 2347

Fax: (06) 251 4248

HANDBOOK 1996

Canberra University Postgraduate Association

The Canberra University Postgraduate Association (CUPA) is constituted under the University Council to serve the academic interests and general welfare of postgraduate students at the University.

All students enrolled in the following courses are members of CUPA: PhD, masters degrees, postgraduate programs, graduate and postgraduate diplomas, graduate certificates and bachelor honours by research degrees. Membership fee is $21 per semester and is included in the services and amenities fee paid at the beginning of each semester.

The Association is governed by a council of postgraduate students, elected annually. CUPA Council includes representatives from all faculties, an international students' representative and students enrolled in both coursework and research degrees. Any postgraduate student may stand for CUPA Council.

CUPA serves its members by directing its activities towards specific postgraduate needs. The Association provides information, including an annual booklet detailing resources and rights of students. It offers assistance with and support for academic appeals and provides referrals and advocacy. CUPA provides a voice for postgraduates on the University's decision making committees including Council, Academic Board, Higher Degrees and Scholarships Committee, Student Services Committee, the Vice-Chancellor's Student Advisory Committee, and the Union Board of Management.

The Association promotes the development of an active postgraduate culture on campus and members participate in faculty projects including research festivals and faculty committees. CUPA organises social functions; and in conjunction with the undergraduate association provides services which include cheap photocopying, discount passport photos, support of campus childcare and the free legal aid clinic.

CUPA is affiliated with the Council of Postgraduate Associations (CAPA), the peak body for postgraduate student associations. CAPA works to safeguard postgraduate student issues at the national level.

The Association welcomes enquiries and suggestions. To discuss any concern or problem with a CUPA council member contact the CUPA office.

Location: Building 1, Level C, Room 72, (above the Refectory)

Telephone: (06) 201 2190

Fax: (06) 201 5348

HANDBOOK 1996

The Convocation

The University has established the Convocation to enable graduates and other persons who have the interests of the University at heart, to maintain contact with the University and its community and to contribute to its advancement. The Convocation is governed by a steering committee chaired by the graduate member of the University Council. The steering committee has representation from graduates of each faculty, from the University and from its predecessor, the CCAE Society.

A Convocation Office has been established at the University to maintain contact with graduates and to keep them informed of developments taking place at the University, and to manage the affairs of the Convocation on a day by day basis.

The Convocation Officer can assist interested groups in organising social, educational and cultural events. Membership of Convocation enables members to have borrowing rights from the University Library.

The Convocation awards an annual prize, the Herbert Burton Medal, to a graduating student chosen on the basis of their outstanding achievement in terms of academic performance in addition to their contribution to either the University community or the wider community. Any member of the University community is eligible to nominate a candidate for this award.

The Convocation presents, annually, a lecture delivered by a well-known Australian. The lecture is open to the public and is directed to stimulating discussion on current issues.

Location: Building 2, Level B, Room 14.

Telephone: (06) 201 2989

Fax: (06) 201 5999

Head of School of Nursing:

Professor Jennifer James

Finance Officer:

Mrs Suzanne Ceeney

Executive Officer:

Mrs Robyne Parolin

General Enquiries:

3B2 (06) 201 2526/2038

The Faculty of Applied Science presently offers undergraduate, graduate and postgraduate courses leading to the awards listed on the previous page. Students should refer to the section of this Handbook entitled Information for Students, in particular those paragraphs covering definition of University terms, admission, enrolment and academic progress. Prospective and newly- enrolled students should also note the knowledge assumed for each course.

Course Advice

Each student will be allocated a course adviser with whom they must consult at the commencement of their studies. As each course is defined by a Determination of Course Particulars, students are required to check with their Course Adviser to ensure that their study program is consistent with these requirements. Course advisers will also give advice on the selection of elective units.

Students should note that some units may have a quota restricting the number of students enrolling; this will be indicated in a unit's description in the Description of Units section at the back of this Handbook. A list of the names of Unit Conveners and Course Advisers is published each semester and is posted on student noticeboards in Buildings 3, 7 and 12.

Field Classes

Compulsory field study is part of many of the units, especially in Resource and Environmental Science, and students will be required to attend excursions for single days, weekends or periods of up to two weeks during breaks between classes. Students must be prepared to pay their own accommodation and food costs, and in some cases contribute to travel costs.

Laboratory Equipment

In some units, students are required to purchase practical class equipment or laboratory coats; details will be given in the first lecture of these units.

Learning Resource Centre (for Nurses)

The Learning Resource Centre in the School of Nursing is designed for nursing students for independent study. Resources available include self-directed learning packages, videos, resources for nursing presentations, topic boxes, and computer assisted learning laboratory.

Science Resource Centre

The Science Resource Centre (Building 3 Room A36) supports first year students in the Faculty of Applied Science by providing:

- optional supplementary small group tutorials emphasising study skills and approaches to learning in the context of particular units;
- feedback to students on their learning through computer based programs;
- an independent study area where students are encouraged to engage in group work; and
- an attractive social meeting place for first year science students.

For more details contact Dr John Dearn (06) 201 2237.

HANDBOOK 1996

Degree of Bachelor of Applied Science (062)

- Interdisciplinary Option (General Studies) Conveners:
- Specialisation areas and Conveners:

A student in this course may choose ***either*** to specialise in a field of study in which the course structure is defined, to enable the best employment opportunities, ***or***, for those students whose needs and interests are not met by one of the specialisations, to undertake the Interdisciplinary option (General Studies) which allows flexibility in the choice of both Applied Science units and units from other Faculties. After successfully completing first year studies, students enrolled in the Interdisciplinary option (General Studies) of the course may apply for transfer into a preferred specialisation or may remain enrolled in the General Studies option.

Interdisciplinary Option (General Studies) Conveners:

Associate Professor Terry Birtles 3D3 (06) 201 2326, Dr Diane Eager 3D36 (06) 201 2569

Specialisation areas and Conveners:

Applied Psychology
Professor Marie Carroll 3B22 (06) 201 2653
Conservation of Cultural Materials
Professor Colin Pearson 7D7 (06) 201 2368
Cultural Heritage Management
Dr Brian Egloff 7D17 (06) 201 2177
For Aboriginal and Torres Strait Islander students - Dr Amar Galla 7D15 (06) 201 2199
Environmental and Analytical Chemistry
Associate Professor Bill Maher 3C34 (06) 201 2531, or Dr Scot Chaston 3D49 (06) 201 2089
Human Biology
Dr Peter Greenham 3D41 (06) 201 2536
Medical Laboratory Science
Dr Peggy Horn 3D5 (06) 201 2243
Nutritional Science
Ms Vicki Deakin 12C18 (06) 201 2567
Resource and Environmental Science
Faculty Office 3B1 (06) 201 5199/2038

Note: There is a quota on the number of students in each of the course specialisations. Before choosing their major area of study, students must consult with the course convener and lecturer in charge of the specialisation. In some cases, enrolment in units is only possible with the permission of the unit convener due to quota restrictions.

HANDBOOK 1996

Interdisciplinary Option (General Studies) Bachelor of Applied Science (062)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Elective Sequence:
- Course Advice:
- Professional Recognition:
- Course Conveners:
- Typical Fulltime Course Structure:
- Applied Earth/Life Sciences
- Physical/Chemical/Materials Sciences
- Human, Social and Heritage Sciences

This program is available within the Bachelor of Applied Science for students whose needs and interests are not met by one of the specialisations offered. It allows great flexibility in choice of both Applied Science units and units from other Faculties.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: Majors in Chemistry (T) and/or Biology (T), English (T) and Mathematics (T); NSW: 2u Chemistry and/or Biology, 2u English and 2u Mathematics.

Course Requirements:

This course requires passes in units totalling a minimum of 72 credit points. Each General Studies program must include:

(a)
no more than 30 credit points at level 1/2 and no less than 18 credit points at level 5/6;

(b)
an Applied Science core of 18 credit points;

(c)
an Applied Science major of at least 24 credit points, including 9 credit points at level 5/6;

(d)
an elective combination which, together with (a) and (b) above, makes a total of at least 72 credit points such that the whole course forms a cohesive group of units appropriate to the needs of the relevant profession.

Elective Sequence:

The elective sequence (with a value of at least 24 credit points, including 9 credit points at level 5/6) may be chosen from elective majors in Applied Science or any other Faculty in the University (refer to Electives section of this Handbook) and is intended to encourage students to design an interdisciplinary course. As an example, students concerned with industrial administration or environmental management may wish to build units of economics, law, accounting and administration into their elective program. Similarly, students seeking careers in science writing or technical translation may select units in communication, professional writing, media studies, modern languages, library and information studies or office management.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies. Students must submit a proposed study program to their course adviser during their first year of study; the study program must contain at least one coherent sequence of units in a field of study offered by the Faculty of Applied Science, and overall coherence for the purposes of professional recognition and employment.

Professional Recognition:

Course advisers will have information for students on the requirements for corporate membership of a range of professional bodies.

Course Conveners:

Associate Professor Terry Birtles 3D3 (06) 201 2326; Dr Diane Eager 3D36 (06) 201 2569

Typical Fulltime Course Structure:

The Applied Science core is chosen from the following three areas.

Applied Earth/Life Sciences

Two units from:
1516 Chemistry 1A
0482 General Physics
0483 Concepts in Biology *or* another biology unit
and one of:
2972 Concepts in Applied Anthropology
0959 Dynamic Earth
3479 Science, Environment and Society, an applied geography unit
3071 Human Physiology and Anatomy 1
and one of:
0575 Mathematics 1
3605 Mathematical Methods 1A
3603 Physical Principles
and one of:
a computing unit, a statistics unit
1809 Data Analysis in Science and
0758 Communication in Science

Physical/Chemical/Materials Sciences

1516 Chemistry 1A
and at least one of:
1517 Chemistry 1B
0482 General Physics
4332 Electronics Engineering 1
3699 Technical Examination Methods
and two of:
1789 Analytical Chemistry
0483 Concepts in Biology
0466 Materials Chemistry
3695 Materials Science 1
and one of:
a computing unit, a statistics unit
1809 Data Analysis in Science
3605 Mathematical Methods 1A *or* another approved mathematics unit
and
0758 Communication in Science

Human, Social and Heritage Sciences

(a)
Three of:
2829 Aboriginal Society and Adaptation (second year unit)
0715 Basic Sociology
2972 Concepts in Applied Anthropology
0483 Concepts in Biology
2832 Cultural Heritage Management
0007 Health Education Studies 1
3071 Human Physiology and Anatomy 1
0427 Introduction to Applied Geography
4309 Psychology 101 : Introductory Psychology 1
3479 Science, Environment and Society
1796 Urban Geography (second year unit)

(b)
either
0953 Social Research Methods
or
1809 Data Analysis in Science
and one of:
a unit in Computing
a unit in Statistics

(c)
0758 Communication in Science (second year unit)

For further details, contact the course convener.

[<---] Return to Handbook contents

University of Canberra, AUSTRALIA

HANDBOOK 1996

Applied Psychology Specialisation - Bachelor of Applied Science (062)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Professional Recognition:
- Non-accredited Major:
- Course Advice:
- Specialisation Convener:
- Typical Full-time Course Structure:

The course in Psychology will provide the basic academic training required for those wishing to qualify as a professional psychologist. A solid grounding is provided in all areas of psychology, including learning, cognition, personality, social, psychopathology, perception, biological bases of behaviour, individual differences, and statistics. Note that with the growing complexity of psychological knowledge, postgraduate study after a three year degree is virtually essential for professional practice.

Psychology majors which are not professionally accredited can also be taken in conjunction with courses such as administration, health sciences, social sciences, design, communication and education. Selected units in psychology may also be combined with other courses.

Course Duration:

3 years full-time or equivalent part-time.

Assumed Knowledge:

ACT: Mathematics (T), NSW: 2u Mathematics.

Course Requirements:

Satisfactory completion of at least 72 credit points of required and elective units.

There are 10 core units in the Psychology course. These are:

4309 Psychology 101 : Introductory Psychology 1
4310 Psychology 102 : Introductory Psychology 2
4311 Psychology 201 : Individual Differences
4312 Psychology 202 : Experimental Psychology
4313 Psychology 203 : Social and Developmental Psychology
4366 Psychology 205 : Learning and Perception
4315 Psychology 301 : Methods and Design in Psychology
4316 Psychology 302 : Psychopathology
4317 Psychology 303 : Organisational Psychology
4318 Psychology 304 : Cognitive Psychology

plus

4120 Applied Statistics 1 (or equivalent)

Psychology 101 and 102 are one-semester units taken in the fist year of the course, 201, 202, 203 and 204 in the second year, and 301, 302, 303 and 304 in the third year. Thus 38 credit points in Psychology and 3 credit points in Statistics forms the core.

Psychology 101 and 102 are prerequisites for 201 and 202. Psychology 202 is a prerequisite for 301, which will be a prerequisite for entry into future postgraduate programs which may be developed.

No fewer than 4 Psychology units (16 credit points) may be taken in the third year.

Students enrolled in other courses may complete the accredited major by taking the 10 core units. This may mean extending your degree by 1 or 2 semesters.

Professional Recognition:

The course has been accredited with the Australian Psychological Society. Graduates from the course may apply for entry into APS-accredited postgraduate courses at this or other universities.

Non-accredited Major:

Students who do not wish to undertake the APS-accredited course, but who seek a non-accredited major or a minor sequence in psychology have available a range of options. A major in Psychology comprises Psychology 101, Psychology 102, and 4 other psychology units. A minor comprises Psychology 101 *and/or* 102 plus 2 other second or third year-level Psychology units. Recommended **majors** in Psychology focus on the areas of Health and Organisational Psychology. The units that form these focus areas are:

Health Psychology major

4309 Psychology 101 : Introductory Psychology 1 *and* 4310 Psychology 102 : Introductory Psychology 2
4314 Psychology 204 : Health Psychology
4311 Psychology 201 : Individual Differences
4316 Psychology 302 : Psychopathology
4318 Psychology 304 : Cognitive Psychology

Organisational Psychology major

4309 Psychology 101 : Introductory Psychology 1 *and*
4310 Psychology 102 : Introductory Psychology 2
4313 Psychology 203 : Social and Developmental Psychology
4312 Psychology 202 : Experimental Psychology
4317 Psychology 303 : Organisational Psychology
4318 Psychology 304 : Cognitive Psychology

Other combinations of units may form a major with the permission of the course convener. Recommended **minors** in psychology focus on the areas of health, organisational and sports psychology. The units that form these focus areas are:

(a)
Health Psychology minor
4309 Psychology 101 : Introductory Psychology 1 *and/or*
4310 Psychology 102 : Introductory Psychology 2
4314 Psychology 204 : Health Psychology
4316 Psychology 302 : Psychopathology

(b)
Organisational Psychology minor
4309 Psychology 101 : Introductory Psychology 1 *and/or*
4310 Psychology 102 : Introductory Psychology 2
4313 Psychology 203 : Social and Developmental Psychology
4317 Psychology 303 : Organisational Psychology

(c)
Sports Psychology minor
4309 Psychology 101 : Introductory Psychology 1 *and/or*
4310 Psychology 102 : Introductory Psychology 2
1715 Measurement and Statistics for Sport
1167 Psychology of Sport

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

Specialisation Convener:

Professor Marie Carrol 3B22 (06) 201 2535/2653

Typical Full-time Course Structure:

Bachelor of Applied Science - Applied Psychology

	Semester 1	Semester 2
YEAR 1	4309 Psychology 101 : Introductory Psychology 1 0594 Applied Statistics 1 (or equivalent) plus two electives	4310 Psychology 102 : Introductory Psychology 2 0594 Applied Statistics 1 (or equivalent) or elective, if undertaken in semester 1 plus two electives
YEAR 2	4312 Psychology 202 : Experimental Psychology 4313 Psychology 203 : Social and Developmental Psychology plus one elective	4311 Psychology 201 : Individual Differences 4366 Psychology 205 : Learning and Perception plus one elective
YEAR 3	4316 Psychology 302 : Psychopathology 4317 Psychology 303 : Organisational Psychology plus one elective	4315 Psychology 301 : Methods and Design in Psychology 4318 Psychology 304 : Cognitive Psychology plus one elective

Two elective units in Psychology are

4314 Psychology 204 : Health Psychology
1167 Psychology of Sport

HANDBOOK 1996

Conservation of Cultural Materials Specialisation Bachelor of Applied Science (062)

- Course Duration:
- Assumed Knowledge:
- Useful Knowledge:
- Course Requirements:
- Course Advice:
- Professional Recognition:
- Specialisation Convener:
- Typical Full-time Course Structure:

This specialisation within the Bachelor of Applied Science Degree graduates specialist qualified conservators. The first year of the course teaches scientific methods and the science of conservation with an emphasis on the technological history of cultural artefacts and what causes their deterioration. The second year of study introduces artefact preservation, conservation philosophy and ethics. Students elect an area of specialisation during this year. The areas of specialisation are

Objects:
: inorganic and organic materials used in the construction of artefacts found in art, archaeology, ethnography, science, history, technology and natural history collections.

Paintings:
: paintings made of traditional and modern materials, including works using a variety of mediums and supports, in various formats.

Paper:
: materials of libraries and archives, and art on paper in galleries and museums and in private collections.

The final year of the course offers advanced theory and a refinement of practical skills in the specialist area.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: Majors in Chemistry (T) and English (T); NSW: 2u Chemistry and 2u English.

Useful Knowledge:

Mathematics (T) or 2u Mathematics is desirable. Experience in art or craft and an understanding of conservation is important.

In addition to applying through the Universities Admission Centre, applicants must send a letter telling us about themselves and their academic background, interests, and reasons for wanting to become a conservator. Send the letter to the Convener, Conservation of Cultural Materials, NCCHSS University of Canberra, PO Box 1, Belconnen, ACT 2616.

Course Requirements:

Satisfactory completion of at least 72 credit points of required and elective units.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

Professional Recognition:

The course is fully recognised by The Australian Institute for Conservation of Cultural Materials.

Specialisation Convener:

Professor Colin Pearson 7D7 (06) 201 2368

Typical Full-time Course Structure:

Bachelor of Applied Science - Conservation of Cultural Materials

	Semester 1	**Semester 2**
YEAR 1	3699 Technical Examination Methods	3693 Heritage Preservation
	3697 Materials Science 3	3696 Materials Science 2
	1516 Chemistry 1A	3695 Materials Science 1
	A Computer unit elective	1517 Chemistry 1B
YEAR 2	3694 Library and Archive Preservation	2691 Heritage Communication
	or 1606 Museology 1	4319 Conservation Practice A
	3689 Conservation Theory	4320 Conservation Practice B
	3698 Materials Science 4	*or* Elective
	1789 Analytical Chemistry	0466 Materials Chemistry
YEAR 3	3690 Heritage Conservation Management	3691 Heritage Conservation Project 1
	3687 Conservation Field Experience	3692 Heritage Conservation Project 2

HANDBOOK 1996

Cultural Heritage Management Specialisation Bachelor of Applied Science (062)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Elective Sequence:
- Course Advice:
- Professional Recognition:
- Specialisation Convener:
- Typical Fulltime Course Structure:

Cultural Heritage Management is the field of practice concerned with the effective identification, conservation, management and interpretation of cultural heritage resources. The term is an umbrella, involving competence in disciplines such as archaeology, history, architecture and anthropology. Students are prepared for jobs in collections management, site management, education and interpretation, in organisations including museums, heritage agencies, national parks and private practice.

The degree course specialising in Cultural Heritage Management introduces students to the technical skills and professional theories of managing cultural heritage items. The course has unique input from the sister course in the Conservation of Cultural Materials (the scientific techniques of materials conservation). All programs are grounded in the professional standards of the heritage industry in Australia, and involve substantial interaction with heritage organisations and practitioners in the ACT.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

Social Sciences to Year 12 level, ACT: English (T), major; NSW: 2u English or equivalent.

Course Requirements:

Satisfactory completion of at least 72 credit points of required and elective units.

Elective Sequence:

The structure of the degree course enables students to take a full elective stream in another discipline that complements cultural heritage skills, such as history, librarianship or environmental management.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

Professional Recognition:

Course advisers will have information for students on the requirements for professional membership of the following bodies - - Museums Australia, International Council on Museums (ICOM), International Council on Monuments and Sites (ICOMOS), Association for Preservation Technology.

Specialisation Convener:

Dr Brian Egloff 7D17 (06) 201 2177; Dr Amar Galla 7C4 (06) 201 2199 for Aboriginal and Torres Strait Islander Students.

Typical Fulltime Course Structure:

Bachelor of Applied Science - Cultural Heritage Management

	Semester 1	**Semester 2**
YEAR 1	3699 Technical Examination Methods	3693 Heritage Preservation
	2972 Concepts in Applied Anthropology	2440 Archaeology of Hunters and Gatherers
	3762 Communication Interface 1	0953 Social Research Methods
	Elective	Elective
YEAR 2	1606 Museology 1	2691 Heritage Communication
	2829 Aboriginal Society and Adaptation	2439 Aboriginal Material Culture
	3572 Cultural Heritage Management	2971 Historical Cultural Landscapes *or* 3039 Architectural Heritage
	Elective	Elective
YEAR 3	3690 Heritage Conservation Management	3662 Professional Practice in CHM
	3665 Multiculturalism: Theory and Practice	3667 Cross Cultural Heritage Management
	2984 Heritage Presentation and Interpretation	1655 Museology 2

Environmental and Analytical Chemistry Specialisation Bachelor of Applied Science (062)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Elective Sequence:
- Course Advice:
- Professional Recognition:
- Specialisation Conveners:
- Typical Fulltime Course Structure:

Students who complete this specialisation will be prepared for careers in a number of areas such as environmental policy and management, scientific laboratories, environmental, clinical, health, industrial, government and academic research; quality and production control in industry; scientific information services (in the Public Service or industrial technical services); agricultural chemicals; marketing and education. The course is particularly suited to secondary level science teaching.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: Majors in Chemistry (T) and/or Biology (T), English (T) and Mathematics (T); NSW: 2u Chemistry and/or Biology, 2u English and 2u Mathematics.

Course Requirements:

Satisfactory completion of at least 72 credit points of required and elective units.

Elective Sequence:

The structure of the course enables students to take a full elective stream in another field of science or other discipline that complements their specialisation, such as Administration, Law, Psychology.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

Professional Recognition:

This course is recognised for Associate Membership of the Royal Australian Chemical Institute.

Specialisation Conveners:

Associate Professor Bill Maher 3C34 (06) 201 2531 or Dr Scot Chaston 3D49 (06) 201 2089

Typical Fulltime Course Structure:

Bachelor of Applied Science - Environmental and Analytical Chemistry

	Semester 1	**Semester 2**
YEAR 1	1516 Chemistry 1A 0483 Concepts in Biology Physics unit (1/2) eg 0482 General Physics 3479 Science Environment and Society *or* Elective unit	1517 Chemistry 1B 0623 Plants and Animals Mathematics unit (1/2) eg 0575 Mathematics 1 1809 Data Analysis in Science *or* Elective unit

Human Biology Specialisation - Bachelor of Applied Science (062)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Elective Sequence:
- Course Advice:
- Specialisation Convener:
- Typical Fulltime Course Structure:

The Human Biology program is a general science course not specifically vocational (or job oriented) but is intended as a time in which students can develop their own particular interests in subject areas at tertiary level. The course can provide the foundations for possible entry into graduate programs such as medicine, physiotherapy, chiropractic, public health nutrition or science teaching.

Students undertake a range of basic science units in their first year which are followed by more specific human biology units in the second and third years of the course, which are taken with a range of possible elective sequences.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: Majors in Chemistry (T) and/or Biology (T), English (T) and Mathematics(T); NSW: 2u Chemistry and/or Biology, 2u English and 2u Mathematics.

Course Requirements:

Satisfactory completion of at least 72 credit points of required and elective units.

Elective Sequence:

This program is normally done in conjunction with two other major areas of study available at the University. Such areas include administration, biochemistry, biology/chemistry science teaching, health education, nutrition, psychology, resource and environmental science, sociology or sports science.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

Specialisation Convener:

Dr Peter Greenham 3D41 (06) 201 2536

Typical Fulltime Course Structure:

Bachelor of Applied Science - Human Biology

	Semester 1	**Semester 2**

Medical Laboratory Science Specialisation - Bachelor of Applied Science (062)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Course Advice:
- Professional Recognition:
- Specialisation Convener:
- Typical Fulltime Course Structure:

This specialisation prepares graduates for employment in pathology laboratories in hospitals and veterinary clinics. It also forms a sound base in medical and a wide range of biological research laboratories and Government Regulatory laboratories. The course emphasises breadth of expertise so that graduates can take responsibility in smaller regional laboratories, or work as specialists in a metropolitan laboratory. honours degrees in clinical biochemistry and immunology are available for students seeking deeper understanding and possible research careers.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: Majors in Chemistry (T) and/or Biology (T), English (T) and Mathematics(T); NSW: 2u Chemistry and/or Biology, 2u English and 2u Mathematics.

Course Requirements:

Satisfactory completion of at least 72 credit points of required and elective units.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

Professional Recognition:

This course is recognised for graduate membership of the Australian Institute of Medical Scientists.

Specialisation Convener:

Dr Peggy Horn 3D5 (06) 201 2243

Typical Fulltime Course Structure:

	Semester 1	Semester 2
YEAR 1	1516 Chemistry 1A	1517 Chemistry 1B
	3479 Science, Environment and Society	3071 Human Physiology and Anatomy 1
	0483 Concepts in Biology	1809 Data Analysis in Science
	0482 General Physics	Elective/Computing unit*
YEAR 2	0758 Communication in Science	4323 Histology
	1789 Analytical Chemistry	1967 Pathobiology
	2978 Human Physiology and Anatomy 2	0221 Microbiology
	2976 Human Biochemistry (year-long)	2976 Human Biochemistry (cont'd)
YEAR 3	3070 Haematology (year-long)	3070 Haematology (cont'd)
	2985 Medical Microbiology (year-long)	2985 Medical Microbiology (cont'd)
	2986 Clinical Biochemistry (year-long)	2986 Clinical Biochemistry (cont'd)
	0413 Immunology and Serology	Elective#

* In second semester a unit other than computing may be chosen if students have already become proficient in the use of computers.

In Semester 2 of Year 3, any appropriate 3/6 unit may be chosen, especially either 3238 Research Project in Applied Science (3) or 1968 Integrated Studies of Disease. The Research Project unit is strongly recommended for students contemplating doing an honours degree.

Nutritional Science Specialisation - Bachelor of Applied Science (062)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Elective Sequence:
- Course Advice:
- Specialisation Convener:
- Typical Fulltime Course Structure:

This specialisation is specifically designed as a foundation for subsequent graduate courses in dietetics, nutritional science and public health nutrition, but is relevant to those with interests in health education, sports education or the food industry.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: Majors in Chemistry (T) and/or Biology (T), English (T) and Mathematics(T); NSW: 2u Chemistry and/or Biology, 2u English and 2u Mathematics.

Course Requirements:

Satisfactory completion of at least 72 credit points of required and elective units.

Elective Sequence:

The structure of the course enables students to take elective streams either within the faculty or in another faculty to complement their specialisation. These include biomedical sciences, psychology, human biology, sports studies, health education and Aboriginal studies. Students wishing to gain entry into graduate programs in dietetics are encouraged to undertake human biology or biomedical sciences electives.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

Specialisation Convener:

Ms Vicki Deakin 12C18 (06) 201 2567

Typical Fulltime Course Structure:

Bachelor of Applied Science - Nutritional Science

HANDBOOK 1996

Resource and Environmental Science Specialisation - Bachelor of Applied Science (062)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Elective Sequence:
- Course Advice:
- Professional Recognition:
- Specialisation Convener:
- Typical Fulltime Course Structure:

The specialisation in Resource and Environmental Science has been designed to enable students to gain the knowledge, skills and values necessary for them to commence professional careers in resource and environmental science, and resource assessment and management.

The educational approach emphasises the need for appropriate specialist skills and knowledge as well as a broad understanding of science and society. The specialisation is founded on a basic knowledge of biology, chemistry, data analysis, earth science, ecology, physics and soil science. Particular emphasis is placed on problem-solving approaches to learning, quantitative data analysis, communication skills, decision making and environmental policy development, field-based studies, and community links through work experience placement.

After completing the specialisation, students have the opportunity to continue their studies at the honours, masters and doctoral level. The program is concerned with teaching, research and consulting in the fields of earth science, including soil science and conservation, and regolith studies; environmental management and policy development; land evaluation and rehabilitation; environmental chemistry and ecotoxicology (offered every second year); exploration geology and geochemistry; vegetation and wildlife management; parks and heritage conservation; freshwater ecology and water ecology monitoring; geographic information systems and remote sensing; applied ecology; conservation of biodiversity and environmental education.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: Majors in Chemistry (T) and/or Biology (T), English (T) and Mathematics(T); NSW: 2u Chemistry and/or Biology, 2u English and 2u Mathematics.

Course Requirements:

The satisfactory completion of units totalling 72 credit points as follows

YEAR 1
: 24 credit points in a set of 8 required units;

YEAR 2
: 2 required units plus a further 2 units (for which there is some choice) are needed as prerequisites for final year, plus a further 4 unit as electives chosen by the student according to their interests and the mix of complementary subjects that suit their chosen field of interest;

YEAR 3
: 2 required year-long units, plus 2 other year-long units, either with a theme of land and earth resources, or with a theme of vegetation parks, wildlife and water resources, plus 2 further electives.

Elective Sequence:

Students have considerable choice from throughout the University in making their selection of electives, once they have satisfied the prerequisites for final year study. The individual programs which can be constructed within the basic requirements of the specialisation, while sharing much material in common with other students, vary considerably; there are many possibilities for emphasis. Common examples include programs emphasising interdisciplinary studies in Resource and Environmental Science; a biological and resource emphasis; a soil and land management emphasis; or a combination of the basic Resource and Environmental Science specialisation with elements of the Cultural Heritage Management or Environmental Chemistry programs. Lists of the recommended elective units for different emphases are available from your course adviser.

Students are encouraged to take at least 2 electives outside resource and environmental science areas. Lists of the single elective units are provided in the Electives section of this Handbook. These could include areas as diverse as communication, media, economics, law, sociology, psychology.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

Professional Recognition:

Students completing a geology major are eligible to apply for membership of the Australian Institute of Geoscientists; graduates with a Soil Science and Conservation major can belong to the Australian Institute of Agricultural Science. Students with other majors may apply for membership of the Australian Institute of Parks and Recreation.

Specialisation Convener:

Associate Professor Arthur Georges 3C37 (06) 201 2523

Typical Fulltime Course Structure:

Bachelor of Applied Science - Resource and Environmental Science

	Semester 1	Semester 2
YEAR 1	0483 Concepts in Biology 0959 Dynamic Earth 1516 Chemistry 1A 3479 Science, Environment and Society	0623 Plants and Animals 3681 Landscape Processes 1809 Data Analysis in Science 3603 Physical Principles
YEAR 2	3680 Quantitative Methods in Environmental Science 3479 Science, Environment and Society (if not already undertaken in 1st year) Prerequisites for final year thematic units, 6 credit points (see Note below)	3675 Resource Information Systems Electives, 18 credit points
YEAR 3	3673 Resource and Environmental Management (year-long) 3671 Resource Techniques and Project (year-long) A year-long thematic unit: *either* 3672 Land and Earth Resources *or* 3669 Vegetation, Wildlife, Parks and Water Resources 2 Electives	

Note: Students considering their options need to be aware that their choice for final year will influence the prerequisite units they will need to take in Year 2. The two final year thematic units have the following prerequisites:

3672 Land and Earth Resources:
: 3679 Australian Soils plus one of 3676 Catchment Processes; 3682 Earth Materials; 3644 Soil Conservation, Assessment and Management.

3669 Vegetation, Wildlife, Parks and Water Resources:
: 0226 Ecology plus one of 3676 Catchment Processes; 2638 Community Ecology; 3674 Biological Diversity.

Degree of Bachelor of Nursing (067)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Professional Recognition:
- Course Convener:
- Typical Fulltime Course Structure:

This course is designed to prepare students to practise as registered nurses. Clinical practice is undertaken in hospitals and community settings. Only students admitted to this course will be able to undertake those units involving field studies.

Course Duration:

3 and one half years full-time or equivalent part-time

Assumed Knowledge:

ACT: Major in Science (T) or two minors in Science (T) (preferably Chemistry and/or Biology), majors in English (T) and Mathematics (T). NSW: 2 units of science (preferably Chemistry and/or Biology), 2u Mathematics and 2u English.

Course Requirements:

Satisfactory completion of 84 credit points, including 21 credit points from physical/biological sciences, 12 credit points from behavioural sciences and 51 credit points from nursing

Professional Recognition:

The Nurses Board of the ACT grants to graduates of the course registration as nurses, and subsequent registration in other states of Australia can be obtained following ACT registration.

Course Convener:

Mrs Carmel O'Meara 12D9 (06) 201 2084

Typical Fulltime Course Structure:

HANDBOOK 1996

Degree of Bachelor of Applied Science in Nursing Science

Two programs are offered, to cater for applicants with different backgrounds in nursing. These are the Eighteen month degree conversion course and the One year degree conversion course.

Eighteen month degree conversion course (293)

- Course Duration:
- Admission Requirements:
- Bridging Requirements:
- Course Requirements:
- Course Advice:
- Course Convener:
- Typical Fulltime Course Structure:

The eighteen month undergraduate degree conversion nursing course is designed for registered nurses from hospital programs seeking a tertiary level qualification in nursing.

Course Duration:

18 months full-time or equivalent part-time. Students required to undertake bridging studies will usually extend their course by at least one semester of part-time study.

Admission Requirements:

Students enrolling in this course must have completed a basic hospital-based nursing certificate program and be eligible for registration as a nurse in the ACT.

Bridging Requirements:

These will depend on and relate to the student's past academic standards and achievements. The Head of School may require a student to undertake a program of study, the successful completion of which will be a part of the requirements for the course.

Course Requirements:

Satisfactory completion of at least 36 credit points, of which there must be a minimum of 18 credit points at level 3/4 and 18 credit points at level 5/6, from core nursing units and elective units.

Course Advice:

Students are advised to seek course advice from the course convener in the selection of elective units.

Course Convener:

Ms Elizabeth MacKinlay 12D10 (06) 201 2930.

Typical Fulltime Course Structure:

Bachelor of Applied Science in Nursing Science (18 month course)

	Semester 1	**Semester 2**
YEAR 1	4180 Nursing Studies 1 4182 Nursing Studies 3 Two elective units (level 3/4 or 5/6)	4181 Nursing Studies 2 1047 Nursing Studies 4 1685 Health Care and the Law 1049 Nursing Studies 6 : Policy Development and Ethics in Nursing
YEAR 2	3656 Nursing 8 *and* 4183 Special Studies in Nursing *or* Two elective units (level 5/6)	

One year degree conversion course (134)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Convener:
- Typical Fulltime Course Structure:

Course Duration:

1 year full-time or equivalent part-time

Admission Requirements:

Applicants who have completed a three-year diploma course in nursing science at a college of advanced education or university will be admitted to the one year degree conversion course. Applicants must be eligible for registration as a nurse in the ACT.

Course Requirements:

The one year course comprises 5 units (with a total value of at least 24 credit points).

Course Convener:

Ms Sandra Trick 12D11 (06) 201 2564

Typical Fulltime Course Structure:

Bachelor of Applied Science in Nursing Science (1 year course)

Degree of Bachelor of Applied Science in Sports Studies - Sports Coaching (128)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Elective Sequence:
- Course Advice:
- Course Convener:
- Typical Fulltime Course Structure:

The objective of this course is to provide an understanding of the principles, knowledge and skills involved in becoming a competent sports coach. Graduates can expect to find employment in coaching children and adults, developing coaching resources and facilities, and sports development in Commonwealth and State Government departments of sport and recreation.

Course Duration:

3 years full- time or equivalent part- time

Assumed Knowledge:

ACT: Majors in Advanced Mathematics, Biology (T) and English (T). NSW: 3u Mathematics, 2u Biology and 2u English. Some study in Chemistry and/or Physics is useful.

Course Requirements:

The successful completion of 73 credit points, of which a maximum of 30 credit points can be completed at semester level 1/2, and a minimum of 18 credit points must be completed at semester level 5/6. Of these, at least 18 credit points must be obtained from the elective sequence of units.

Elective Sequence:

The elective sequence may consist of units in one of the following areas: sports administration, sports media, communication and media, computing studies, politics, psychology, economics, accounting, law, human biology.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

Course Convener:

Mr Adrian Faccioni 3B32 (06) 201 2936

- Typical Fulltime Course Structure:

Objectives:

The honours course provides intensive training in research for students seeking to pursue an academic or research career in a field of applied science related to the disciplinary focus of the candidate's first degree. It is a research degree in the sense that no more than 25 per cent of the workload comprises coursework and the principal assessment is by thesis examination.

The course is offered for study in one of the following fields: analytical chemistry, applied ecology, clinical biochemistry, conservation of cultural materials, cultural heritage management, earth science, human physiology, immunology, microbial ecology, remote sensing and geographic information systems, soil science and conservation, sports coaching and water science.

Course Duration:

10 months full-time, 20 months part-time.

Admission Requirements:

To qualify for admission, applicants must normally have a bachelor degree from a recognised tertiary institution with a high standard of performance in the candidate's major area of proposed study (normally average of credit or higher at second and third year level), plus the agreement of a staff member to supervise the project.

Applicants with appropriate professional experience and status in a relevant field and sufficient academic qualifications will also be considered.

Places are limited. Not all admissible candidates are offered a place in the honours program, and selection is based principally on merit.

Course Advice:

Students should approach the Faculty Honours Coordinator for general advice, but will be allocated to a supervisor(s) with whom they must consult regularly at the commencement of and during their studies.

Course Requirements:

Satisfactory completion of 24 credit points. Primary assessment (ca.75-80%) is by research thesis.

Specialisations and Conveners:

In all cases, an honours student will undertake their research in association with one of the research centres of the Faculty. Initial enquiries can be directed to:

Associate Professor Arthur Georges, Director, Applied Ecology Research Group, Room 3C37, (06) 201 2523, fax (06) 202 5305, e-mail: director@aerg.canberra.edu.au

Graduate Certificate in Environmental Education (266)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Course Convener:
- Typical Fulltime Course Structure:

For information on the aims and objectives of this course, refer to the description given for the Master of Environmental Education degree (Course No 268).

Course Duration:

1 semester full-time or equivalent part-time

Admission Requirements:

Applicants should possess:

(a)
at least a three-year bachelor degree or the equivalent, including units with some environmental content; and

(b)
appropriate experience in environmental communication either (preferably) of a formal kind (for example field/museum interpretation, school teaching) or of an informal kind (for example with community groups or teaching community courses)

In seeking entry to the course, applicants should have thought about the nature of their possible social/environmental problem for research.

Course Requirements:

Satisfactory completion of: 4 credit points of research units and 8 credit points of coursework units.

Course Advice:

Students requiring course advice should contact the course convener.

Course Convener:

Dr John Harris 3C29 (06) 201 2672/2525

Typical Fulltime Course Structure:

Graduate Certificate in Environmental Education

Semester 1
3819 Systems Thinking in Environmental Contexts PG
3834 Nature of Adult Learning PG
3824 Research Seminar in Environmental Education PG

Graduate Diploma in Applied Psychology (248)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Specialisations:
- Professional Recognition:
- Course Convener:
- Typical Fulltime Course Structure:

The course will involve a research project, core units, and advanced coursework.

Course Duration:

1 year of full-time study or equivalent part-time

Admission Requirements:

To be eligible for the course students must have completed a degree from an institution approved by the Australian Psychological Society. A degree in psychology must comprise at least one third of the study in the area of psychology.

Course Requirements:

The course consists of units totalling 24 credit points, made up of 12 credit points from the specified units, and 12 credit points from the elective units.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of their studies. This will be very important in the selection of elective units.

Specialisations:

The course is offered in the following specialisations

Health Psychology
Sport Psychology
Counselling Psychology
Human Factors Psychology
Organisational Psychology

Professional Recognition:

The course is an accredited fourth year course recognised by the Australian Psychological Society, giving graduates eligibility for Associate membership of the Society.

Course Convener:

Professor Marie Carroll 3B22 (06) 201 2535/2653

Typical Fulltime Course Structure:

HANDBOOK 1996

Graduate Diploma of Applied Science (151)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Specialisations and Conveners:

The course is intended for bachelor degree graduates who wish to extend skills and knowledge in science and technology. Students may enrol in an interdisciplinary course or in a specialisation. Specialisations have been defined in cultural heritage management, nutritional science, public health nutrition and resource management.

Course Duration:

1 year of full-time study, or equivalent part-time

Admission Requirements:

Interdisciplinary option: Completion of a bachelor degree in a science related field from a recognised institution. See also details given for each specialisation.

Course Requirements:

The course consists of 24 credit points, of which at least 12 credit points must be at postgraduate level. The program includes:

(a)
a required postgraduate unit entitled 1807 Research Planning PG (3 credit points)

(b)
9 credit points in Applied Science and/or Information Sciences and Engineering forming a coherent group of units in a field of applied science, and

(c)
either a required unit entitled Research Project in Applied Science PG (undertaken at postgraduate level) or two postgraduate units in Applied Science valued at a minimum of 6 credit points. In the latter case, students should be able to identify previous experience equivalent to Research Project in Applied Science PG.

The remaining credit points should be obtained from units at level 5/6 or G or PG, as approved by the Higher Degrees Committee, taking into account an individual candidate's academic background and the advice of the student's Course Adviser.

The unit Research Project in Applied Science PG may be spread over two semesters or may be undertaken in its entirety in the last semester of study.

Specialisations and Conveners:

Interdisciplinary Option (General Studies):
Associate Professor Terry Birtles 3D3 (06) 201 2326

Cultural Heritage Management:
Dr Linda Young 7D12 (06) 201 2079

Nutritional Science:
Ms Karen Cashel 12C20 (06) 201 2745

Public Health Nutrition:
Ms Karen Cashel 12C20 (06) 201 2745

Resource Management:
Dr David Williams 3C38 (06) 201 2544

[<---] Return to Handbook contents

HANDBOOK 1996

Specialisation in Cultural Heritage Management - Graduate Diploma of Applied Science (151)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Professional Recognition:
- Specialisation Convener:
- Course Structure:

The specialisation in cultural heritage management equips graduates in any appropriate discipline (not necessarily science) with a professional qualification suitable for jobs in collections management, site management, heritage education and interpretation, and in organisations including museums, heritage agencies, national parks and private practice. Typical discipline backgrounds include history, prehistory, archaeology, art history, architecture, landscape architecture and geography, but graduates in such fields as law, management, journalism and marketing are also welcomed into the course.

Course Duration:

1 year full-time or equivalent part-time; the maximum period of study is 4 years.

Admission Requirements:

Applicants must have completed a recognised bachelor degree.

Course Requirements:

Satisfactory completion of 8 Cultural Heritage Management units (24 credit points).

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

Professional Recognition:

Course advisers will have information for students on the requirements for professional membership of the following bodies - Museums Australia, International Council on Museums (ICOM), International Council on Monuments and Sites (ICOMOS), Association for Preservation Technology.

Specialisation Convener:

Ms Linda Young 7D12 (06) 201 2079

Course Structure:

The cultural heritage management program offers choice to satisfy the course requirements from the following:

Semester 1

1807 Research Planning PG
3643 Cultural Heritage Management G*
3670 Heritage Presentation and Interpretation PG*
3668 Museology G1
3690 Heritage Conservation Management
3666 Multiculturalism : Theory and Practice G

Semester 2

3568 Museology PG2
3038 Preventive Conservation PG
3571 Historical Cultural Landscapes G
3641 Architectural Heritage G
3642 Cross Cultural Heritage Management G
3640 Aboriginal Material Culture G

*These are required core units.

HANDBOOK 1996

Specialisation in Nutritional Science - Graduate Diploma of Applied Science (151)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Specialisation Convener:
- Typical Full-time Course Structure:

The specialisation in nutritional science focuses on current knowledge of the science of human nutrition and its relation to health. The physiological changes during the lifespan and associated nutritional needs to optimise health, and the epidemiological and dietary research basis for these are studied. This area of study is suitable to those seeking a professional level of education in nutrition, particularly new graduates or those seeking re-training, and those whose employment overlaps the nutritional area (teachers, food technologists and other food scientists, sport advisers, science communicators, health workers etc), and those who wish to avail themselves of contemporary ideas on human nutrition. It should be noted that this course is not designed to train dietitians.

Students are not required to have previous studies in human nutrition, but are expected to have a background in the biomedical sciences. Bridging units are available, and interested students should contact the specialisation convener.

Students may also apply directly for admission to a two year equivalent full-time masters degree program, or apply upon successful completion of their graduate diploma, in which case a further one year full-time equivalent of approved study is required.

Course Duration:

1 year full-time or equivalent part-time. The maximum period of study is 4 years.

Admission Requirements:

Applicants must have a recognised bachelor degree in science or a related field and human physiology and anatomy, and/or biochemistry studies completed at the second year level.

Course Requirements:

Satisfactory completion of at least 24 credit points, including the specified core content requirements.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during their studies.

Specialisation Convener:

Ms Karen Cashel 12C20 (02) 201 2745

Typical Full-time Course Structure:

Specialisation in Public Health Nutrition - Graduate Diploma of Applied Science (151)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Specialisation Convener:
- Typical Fulltime Course Structure:

The specialisation in public health nutrition focuses on the health promotion and disease prevention aspects of human nutrition. The development of public health approaches, and the epidemiological and dietary research basis for these are studied. This area of study is particularly suitable for those whose employment overlaps the nutritional area (health workers such as medical practitioners, dietitians, pharmacists, nurses, health educators and teachers etc), and those who wish to avail themselves of contemporary ideas on human nutrition. It should be noted that this course is not designed to train dietitians.

Students are not required to have previous studies in human nutrition, but are expected to have a background in the biomedical sciences. Bridging units are available, and interested students should contact the specialisation convener.

Students may also apply directly for admission to a two year equivalent full-time masters program, or apply upon successful completion of their Graduate Diploma in which case a further one year full-time equivalent of approved study is required.

Course Duration:

1 year full-time or equivalent part-time. The maximum period of study is 4 years.

Admission Requirements:

Applicants must have a recognised bachelor degree in science or a related field, human physiology and anatomy, and/or biochemistry studies completed at the second year level, and a minimum of one year of work experience.

Course Requirements:

Satisfactory completion of at least 24 credit points, including the specified core content requirements.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

Specialisation Convener:

HANDBOOK 1996

Specialisation in Resource Management - Graduate Diploma of Applied Science (151)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Professional Recognition:
- Specialisation Convener:
- Course Structure:

The specialisation in resource management provides education and training in resource and environmental management and research. It is intended for those seeking employment in or already doing such work. It is concerned with land and water resources, vegetation and wildlife management, nature conservation and environmental policy. It is designed to improve students' research skills, their ability to analyse resource management issues, policies and decision-making procedures, and their ability to process information and present it.

Course Duration:

1 year full-time or equivalent part-time; the maximum period of study is 4 years.

Admission Requirements:

Applicants must have completed a recognised bachelor degree in science or a related field. Each applicant must also provide a brief study proposal stating the specialised interest they wish to pursue.

Course Requirements:

Satisfactory completion of 24 credit points, of which 12 credit points (4 units) are required core units.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

Professional Recognition:

Course advisers will have information for students on the requirements for corporate membership of a range of professional bodies.

Specialisation Convener:

Dr David Williams 3C38 (06) 201 2544

Course Structure:

Twelve out of 24 credit points must be obtained from the following required core units, each of which is valued at 3 credit points.

Semester 1

0672 Environmental Planning PG
1807 Research Planning PG

Semester 2

2959 Biostatistics PG
0692 Resource Policy Analysis PG

The remaining 12 credit points are obtained from elective units approved by the Dean of the Faculty as forming a coherent study program. Up to 6 credit points may be included from approved final year (level 5/6) undergraduate units.

Students wishing to undertake individualised study modules, are advised to register in one of the following 2 units which are offered in both semesters.

3262 Research Project in Applied Science PG (3 credit points)
3241 Research Project in Applied Science PG (6 credit points)

Student programs may also include postgraduate units from elsewhere in the Faculty of Applied Science or other faculties.

HANDBOOK 1996

Degree of Master of Applied Science (by research) (156)/(by coursework)(305)

- Specialisations and Conveners:

This course is for graduates wishing to extend a field of study through coursework, research or both. Normally an applicant for a specialisation involving a thesis will need to identify a supervisor, develop a research proposal in consultation with the supervisor, and present it with the application.

Under the Master of Applied Science course, topics may be in a range of fields in applied science, including interdisciplinary studies. Specialisations are also defined in conservation of cultural materials, cultural heritage management, and resource management.

Specialisations and Conveners:

Interdisciplinary Option (General Studies):
Associate Professor Terry Birtles 3D3 (06) 201 2326

Conservation of Cultural Materials:
Professor Colin Pearson 7D7 (06) 201 2368

Cultural Heritage Management:
Dr Amar Galla 7C3 (06) 201 2199, Ms Linda Young, 7D12 (06) 201 2079

Resource Management:

HANDBOOK 1996

Interdisciplinary Option (General Studies) - Master of Applied Science (by research) (156)/(by coursework) (305)

- Course Duration:
- Admission Requirements:
- Course Requirements/Structure:
- Course Advice:
- Specialisation Convener:

Students who wish to undertake further study in course topics other than in the specialisations of conservation of cultural materials, cultural heritage management or resource management, for example nutrition, and public health nutrition, will be enrolled in the general science specialisation.

Course Duration:

Minimum of 2 years full-time or equivalent part-time; maximum of 3 years full-time or the equivalent part-time.

Admission Requirements:

Applicants should have completed an undergraduate degree in science or applied science with above average performance. Alternative entry is available to applicants who can demonstrate specialist expertise in science.

Course Requirements/Structure:

Students must obtain a total of 48 credit points, of which 36 must be at postgraduate level, from A or B as follows:

A

by thesis alone

Masters by Research (156)

2619 Applied Science Masters Thesis Type 1M (48 credit points)

or 2000 Applied Science Masters Thesis Type 1M (full) (48 credit points)

B

by coursework and thesis

either

(i)

2620 Applied Science Masters Thesis Type 2M (36 credit points)

or 2001 Applied Science Masters Thesis Type 2M (full) (36 credit points)

and

such other units valued at a minimum of 12 credit points which the Faculty Higher Degree Committee approves as forming a coherent study program.

or

(ii)

Masters by Coursework (305)

2461 Applied Science Masters Thesis Type 3M (24 credit points)

or 2399 Applied Science Masters Thesis Type 3M (full) (24 credit points)

and

such other units valued at a minimum of 24 credit points approved by the Faculty Higher Degree Committee, with at least 12 credit points at postgraduate level.

Course Advice:

Students must consult with their supervisors for course advice at the commencement of, and during, their studies.

Specialisation Convener:

Associate Professor Terry Birtles 3D3 (06) 201 2326.

HANDBOOK 1996

Specialisation in Conservation of Cultural Materials - Master of Applied Science (by research) (156)/(by coursework) (305)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Quota Restrictions:
- Course Advice:
- Professional Recognition:
- Specialisation Convener:

This specialisation within the Degree of Master of Applied Science gives a student the opportunity to do advanced study in cultural materials conservation. The student does postgraduate study in one of the following conservation areas:

Objects:
inorganic and organic materials used in the construction of artefacts found in art, archaeology, ethnography, science, history, technology and natural history collections.

Paintings:
paintings made of traditional and modern materials, including works using a variety of mediums and supports, in various formats.

Paper:
materials of libraries and archives, and art on paper in galleries and museums and in private collections.

Students graduate from the course by passing an examination of their dissertation.

Course Duration:

Minimum of 2 years full-time, or the equivalent part-time; maximum of 3 years full-time or the equivalent part-time.

Admission Requirements:

Applicants should have completed an undergraduate degree in science or applied science with above average performance. Alternative entry is available to applicants who can demonstrate specialist expertise in science.

There are further requirements for admission into the specialisation in Conservation of Cultural Materials within the Master of Applied Science course. Applicants need either

(a)
a suitable undergraduate degree (for example, in archaeology, anthropology, science or fine arts), studies in tertiary chemistry (including organic chemistry) and five years professional experience in cultural materials conservation, or

(b)
a Pass degree in conservation, or equivalent, plus one year of professional practice in cultural materials conservation, or

(c)
a Bachelor of Applied Science (Honours) specialising in conservation of cultural materials, or equivalent.

The course staff will interview applicants before making an offer of place.

Course Requirements:

Students must obtain a total of 48 credit points of which 36 must be at postgraduate level, from A or B as follows:

A
by thesis alone
Masters by Research (156)
2619 Applied Science Masters Thesis Type 1M (48 credit points)
or
2000 Applied Science Masters Thesis Type 1M (full) (48 credit points)

B
by coursework and thesis
either

(i) 2620 Applied Science Masters Thesis Type 2M (36 credit points)
or
2001 Applied Science Masters Thesis Type 2M (full) (36 credit points)
and

such other units valued at a minimum of 12 credit points which the Faculty Higher Degree Committee approves as forming a coherent study program.
or
(ii) *Masters by Coursework (305)*
2461 Applied Science Masters Thesis Type 3M (24 credit points)
or
2399 Applied Science Masters Thesis Type 3M (full) (24 credit points)
and

such other units valued at a minimum of 24 credit points approved by the Faculty Higher Degree Committee, with at least 12 credit points at postgraduate level.

Research topics may include:

(a)
materials testing and evaluation,
(b)
investigation of new conservation methods, or adaptation of existing methods to specific applications,
(c)
applied research into artefact deterioration.

Quota Restrictions:

Each major area of study in this specialisation has a quota of students. Before choosing their major area of study and their research topic, students must consult with the Specialisation Convener and the lecturer in charge of the major.

Course Advice:

Students must consult with their supervisors for course advice at the commencement of, and during, their studies.

Professional Recognition:

Course advisers will have information for students on the requirements for professional membership of the Australian Institute for Conservation of Cultural Materials.

Specialisation Convener:

Professor Colin Pearson 7D7 (06) 201 2368

Specialisation in Cultural Heritage Management - Master of Applied Science (by research) (156)/(by coursework) (305)

- Course Duration:
- Admission Requirements:
- Course Requirements/Structure:
- Course Advice:
- Professional Recognition:
- Specialisation Convener:

The course at this level is designed to meet the needs of graduates who wish to further develop their expertise in aspects of cultural heritage management. Applicants with a postgraduate Diploma in a heritage related field may apply to seek status as part of the masters program. An appropriate topic must be proposed: the research interests of staff presently cover such fields as prehistory, historical archaeology, Aboriginal studies, heritage management, European material culture, museology and multiculturalism.

Course Duration:

Minimum of 2 years full-time or the equivalent part-time; maximum of 3 years full-time or the equivalent part-time.

Admission Requirements:

Applicants should have completed an undergraduate degree in science or applied science. Applicants without significant professional experience in the heritage field are advised to enrol first in the postgraduate diploma program.

Applicants should have

(a)
the Graduate Diploma in Applied Science (Cultural Heritage Management specialisation); or

(b)
a degree or approved equivalent in an appropriate field, plus sufficient professional experience in an appropriate field.

Course Requirements/Structure:

Students must obtain a total of 48 credit points of which 36 must be at postgraduate level, from A or B as follows:

A
by thesis alone
Masters by Research (156)
2619 Applied Science Masters Thesis Type 1M (48 credit points)
or
2000 Applied Science Masters Thesis Type 1M (full) (48 credit points)

B
by coursework and thesis
either

(i) 2620 Applied Science Masters Thesis Type 2M (36 credit points)
or 2001 Applied Science Masters Thesis Type 2M (full) (36 credit points)
and

such other units valued at a minimum of 12 credit points which the Faculty Higher Degree Committee approves as forming a coherent study program.

or
(ii) *Masters by Coursework (305)*
2461 Applied Science Masters Thesis Type 3M (24 credit points)
or
2399 Applied Science Masters Thesis Type 3M (full) (24 credit points)
and

such other units valued at a minimum of 24 credit points approved by the Faculty Higher Degree Committee, with at least 12 credit points at postgraduate level.

Course Advice:

Students must consult with their supervisors for course advice at the commencement of, and during, their studies.

Professional Recognition:

There is no automatic admission to a professional body, but professional bodies relevant are: Museums Australia; International Council on Monuments and Sites (ICOMOS); Association for Preservation Technology; International Council on Museums (ICOM).

Specialisation Convener:

Ms Linda Young 7D12 (06) 201 2079, Dr Amar Galla 7C3 (06) 201 2199

HANDBOOK 1996

Specialisation in Resource Management - Master of Applied Science (by research) (156)/(by coursework) (305)

- Course Duration:
- Admission Requirements:
- Course Requirements/Structure:
- Course Advice:
- Specialisation Convener:

This course is designed to meet the needs of graduates who wish to further develop expertise in aspects of resource management. It is a two-year program, and a major part of the work will be by thesis. The first year may be spent on coursework described under the Graduate Diploma.

Course Duration:

Minimum of 2 years full-time or equivalent part-time; maximum of 3 years full-time or the equivalent part-time.

Admission Requirements:

Applicants should have completed an undergraduate degree in science or applied science with above average performance. Alternative entry is available to applicants who can demonstrate specialist expertise in science.

Applicants should have

(a) the Graduate Diploma in Applied Science; or

(b) an honours degree in science or a relevant professional field; or

(c) a degree or approved equivalent award in an appropriate field, plus sufficient academic or professional experience or status in an appropriate field.

Course Requirements/Structure:

Students must obtain a total of 48 credit points of which 36 must be at postgraduate level, from A or B as follows:

A

by thesis alone

Masters by Research (156)

2619 Applied Science Masters Thesis Type 1M (48 credit points)

or

2000 Applied Science Masters Thesis Type 1M (full) (48 credit points)

B

by coursework and thesis

either

(i) 2620 Applied Science Masters Thesis Type 2M (36 credit points)

or

2001 Applied Science Masters Thesis Type 2M (full) (36 credit points)

and

such other units valued at a minimum of 12 credit points which the Faculty Higher Degree Committee approves as forming a coherent study program.

or

(ii) *Masters by Coursework (305)*

2461 Applied Science Masters Thesis Type 3M (24 credit points)

or

2399 Applied Science Masters Thesis Type 3M (full) (24 credit points)

and

such other units valued at a minimum of 24 credit points approved by the Faculty Higher Degree Committee, with at least 12 credit points at postgraduate level.

Course Advice:

Students must consult with their supervisors for course advice at the commencement of, and during, their studies.

Specialisation Convener:

HANDBOOK 1996

Degree of Master of Applied Science in Sports Studies (by research) (191)
Degree of Master of Arts in Sports Studies (by research) (144)

- Course Duration:
- Admission Requirements:
- Course Requirements/Structure:
- Course Advice:
- Professional Recognition:
- Course Convener:

The masters degrees by research in Sports Studies are designed to provide advanced training in sports science, sports humanities, or sports administration. Specialisation is possible in the sports science area in exercise physiology, biomechanics, or motor learning.

Course Duration:

Minimum of 2 years full-time or the equivalent part-time; maximum of 3 years full-time or the equivalent part-time.

Admission Requirements:

Applicants should possess an approved undergraduate degree. Depending on the desired area of study in the masters programs, appropriate bridging studies may be required.

Course Requirements/Structure:

The program consists of coursework followed by a major thesis to total at least 48 credit points, as set out below

A

at least 12 credit point from 3 of the following 4 units as required in the following courses

(i)

Sports Science
Exercise Physiology, Biomechanics, or Motor Learning
4396 Advanced Concepts in Sports Studies M 4cps
1592 Laboratory Methods in Sports Science
4082 Statistical Principles and Research Design for Sports Studies
or
Elective

(ii)

Sports Administration
4396 Advanced Concepts in Sports Studies M 4cps
4084 Administration of Sport M
4082 Statistical Principles and Research Design for Sport Studies
or
Elective

(iii)

Sports Humanities/Media
4396 Advanced Concepts in Sports Studies M 4cps
4085 Research Resources in Sports Studies
1593 Special Studies in Sports Historiography M
or
Elective

B

A total of 36 credit points from the following unit(s)
4394 Sports Studies Thesis M (36cp) (full)
or
4395 Sports Studies Thesis M (36cp) (part)

Course Advice:

Students must consult with their supervisors for course advice at the commencement of, and during, their studies.

Professional Recognition:

Graduates would also be eligible for membership of professional organisations relevant to sport, including the Australian Council of Health, Physical Education and Recreation (ACHPER), the Australian Sports Medicine Federation (ASMF) and the Australian Society for Sports Administrators (ASSA).

HANDBOOK 1996

Degree of Master of Environmental Education (by coursework) (268)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Convener:
- Typical Fulltime Course Structure:

This masters degree program consists of units which students may embark upon to give successively the prior awards of Graduate Certificate and Graduate Diploma in Environmental Education. The courses are administered by the Faculty of Applied Science.

The primary goal of all three of the Environmental Education courses is to develop in students a critical and enquiring mind in order to understand and communicate the nature of environmental problems, and to develop the skills and perspectives necessary for effective participation/leadership in community-based programs leading to positive social change.

These courses will enable students to integrate effectively the knowledge of education with the knowledge of environmental systems in order to communicate and help alleviate the problems that human beings create in these systems. The courses will draw together knowledge and skills from many different knowledge bases including cultural, economic, ethical, health and philosophy as well as from more predictable sources in education, history and the sciences.

As a result of pursuing these courses it is expected that students will be better able to communicate the nature of environmental problems and to develop the skills and approaches to achieve positive social/environmental change.

The research and coursework units are transdisciplinary in nature and are taught across campus with contributions from all faculties.

The units are cooperatively planned and taught. Students are equally expected to learn in small groups and cooperate in both their research and coursework units, but especially in their field research projects.

The arena in which the knowledge is cast, problems posed and tentative solutions proposed will be the community. This is a distinctive feature of these courses.

The potential role of community groups in affecting positive change is given a central part in these courses. Students will work in the community participating and assisting people to make direct and practical responses to environmental issues of mutual concern.

Course Duration:

Minimum of 2 years full-time or equivalent part-time. Maximum of 3 years full-time or equivalent part-time.

Admission Requirements:

Applicants should possess:

(a) at least a three year bachelor degree or the equivalent, including units with some environmental content; and

(b) appropriate experience in environmental communication either (preferably) of a formal kind (for example field/museum interpretation, school teaching) or of an informal kind (for example with community groups or teaching community courses); and

(c) a demonstrated intention to complete a field project thesis of a substantive kind in environmental education.

In seeking entry to the course, applicants should have thought about the nature of their possible social/environmental problem for research.

Course Requirements:

Satisfactory completion of 28 credit points of research units including a thesis and 20 credit points of coursework units.

Course Convener:

Dr John Harris 3C29 (06) 201 2672/2525

Degree of Master of Sports Medicine (by coursework) (280)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Required Units:
- Course Advice:
- Course Director:
- Course Convener:

This course satisfies a demand for those who seek a recognised qualification in sports medicine. It consists of course and clinical work which provide advanced training in aspects of clinical medicine and sports injury management as well as the preparation of a written dissertation on a relevant topic in sports medicine. It is full-fee paying and available only on a full-time basis.

The course, which is administered by this Faculty, is conducted by the Department of Sports Medicine and the Centre for Sports Science and Sports Medicine and is delivered at the Australian Institute of Sport in Canberra.

Course Duration:

One year full-time

Admission Requirements:

The course is available for medical graduates with at least three years' postgraduate clinical experience.

Course Requirements:

48 credit points from 7 required units at postgraduate level.

Required Units:

4169 Clinical Sports Injury Management PG1 (Sports Medicine)
4174 Research Methods PG1 (Sports Medicine)
4172 Scientific Basis of Clinical Sports Medicine PG
4170 Internal Medicine in Sport and Exercise PG (Sports Medicine)
4171 Clinical Sports Injury Management PG2 (Sports Medicine)
4175 Research Methods PG2 (Sports Medicine)
4173 Special Considerations in Sports Medicine PG

Course Advice:

Students must consult with their supervisors for course advice at the commencement of, and during, their studies.

HANDBOOK 1996

Degree of Doctor of Philosophy (232)

- Course Duration:
- Admission Requirements:
- Course Requirements/Structure:
- Course Convener:

The program is designed to provide an opportunity for high calibre graduates to undertake scholarly postgraduate research in a field of study taken from one of the following areas of expertise within the Faculty: cultural heritage sciences, human and biomedical science, resource and environmental science, dependent on the availability of supervisors.

It is strongly recommended that all potential candidates contact the course convener prior to submission of an application.

Successful completion of the program requires candidates to

- conceive, design and carry to completion a piece of original research which, in the opinion of three independent assessors of recognised standing, adds substantially to existing knowledge and understanding of the field of study;
- demonstrate a thorough knowledge of the scientific literature in their field of study and be aware of current or potential areas of contention likely to form the focus of future research in their field;
- develop the skills necessary for communicating the results of their work effectively to other professionals in their field of study;
- demonstrate a high degree of scholarship.

Course Duration:

Minimum of 3 years full-time or the equivalent part-time; maximum of 5 years full-time or part-time equivalent.

Admission Requirements:

Applicants shall have a degree of bachelor with first or upper second class honours awarded by an Australian university or other recognised higher education institution, and provide evidence of research training and aptitude for research.

Course Requirements/Structure:

Satisfactory completion of 72 credit points as follows

4091 Doctoral Thesis in Applied Science D (full-time) or
4090 Doctoral Thesis in Applied Science D (part-time)

Course Convener:

Dr Judith Anson 3D39 (06) 201 2314.

- Head of School of Information, Language and Culture Studies, and Deputy Dean:
- Executive Assistant:
- General Enquiries:
- Yearlong Units
- Field Classes

Dean:

Professor Peter Putnis

Head of School of Communication, Media and Tourism, and Deputy Dean:

Associate Professor John Penhallurick

Head of School of Information, Language and Culture Studies, and Deputy Dean:

Associate Professor Belle Alderman

Executive Assistant:

Mr Derek Gould

General Enquiries:

1C143 (06) 201 2901

The Faculty of Communication offers undergraduate, graduate and postgraduate courses administered by the School of Communication, Media and Tourism, and the School of Information, Language and Culture Studies, as listed on the previous page. Students should refer to the section of this Handbook entitled Information for Students, in particular those paragraphs covering definition of University terms, admission, enrolment and academic progress. Prospective and newly- enrolled students should also note the knowledge assumed for each course.

Yearlong Units

In 1996 the Faculty will continue to offer year-long units. These year-long units will continue to have alternative semester-long units which will be available with the permission of the Dean to students who require semester-long units to complete their course requirements or to overseas students who commence in the middle of the year. Students should consult the Executive Assistant in relation to semester-long units replaced by year-long units. The Faculty is likely to remain with year-long units as a result of the New Academic Program.

Field Classes

Field study or placements may comprise a part or whole of some of the units students are required or elect to take during their course of study. Students will be expected to meet their own transport costs involved in such field classes or placements.

HANDBOOK 1996

Advertising/Marketing Specialisation - Bachelor of Arts in Communication (105)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Electives:
- Course Advice:
- Discipline Convener:
- Typical Fulltime Course Structure:

The Advertising/Marketing specialisation aims to provide students with a thorough understanding of the nature and functions of communication in society, combined with the practical and professional skills and attitudes required for successful and responsible marketing and advertising activities.

Graduates could find employment with any of the three participants in the advertising industry: advertising agencies (in either the creative or the account management side); the media; or advertisers, that is any organisation, public or private, that needs staff with knowledge in advertising and marketing to handle their campaigns. Employment possibilities in market research may also be possible.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: English (T) major; NSW: 2u English

Course Requirements:

Satisfactory completion of 70 credit points (from a minimum of twenty semester units or equivalent year-long units), of which not more than 30 credit points (or the equivalent of 10 semester-long units) may be at semester levels 1/2, as follows

(a) 22 credit points from required Communication core units:

(i) 2 required Foundation units, plus

(ii) 2 year-long Communication units or pairs of units;

(b) not less than 18 or more than 24 credit points from an approved sequence of units forming an Advertising/Marketing major;

(c) six credit points from two required Communication Skills units;

(d) sufficient further elective units to yield a degree total of at least 70 credit points, from at least the equivalent of 20 semester-long units.

Electives:

These may be chosen from any units compatible with the student's vocational objectives and educational interests. When choosing electives, students must ensure that they do not exceed a maximum of 30 credit points at semester levels 1/2. Because of prerequisite constraints, this may require a sequence of three or four semester- length units in one area of study. Details of single electives and elective majors are to be found in the Electives section of this Handbook.

Course Advice:

Students seeking course advice should contact the discipline convener.

Discipline Convener:

Dr Louis Mancuso 1C123 (06) 201 2060 (Semester 1), Ms Mary-Kate Hannay 1C129 (06) 201 2684 (Semester 2)

Typical Fulltime Course Structure:

Journalism Specialisation - Bachelor of Arts in Communication (105)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Electives:
- Course Advice:
- Special Note:
- Professional Recognition:
- Discipline Convener:
- Typical Fulltime Course Structure:

The specialisation in Journalism combines communication studies with thorough instruction in journalistic skills, judgement and responsibilities. Students may choose to concentrate on either print or broadcast journalism.

Graduates could find employment with metropolitan or provincial newspapers, radio or television, or general or specialist magazines. Other employment opportunities exist with club, association, institutional or sports newspapers and magazines. Large organisations, public or private, employ graduates with their degree in information and press office positions or as media liaison officers.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: English (T) major; NSW: 2u English

Course Requirements:

Satisfactory completion of 70 credit points (from a minimum of twenty semester units or equivalent year-long units), of which not more than 30 credit points (or the equivalent of 10 semester-long units) may be at semester levels 1/2, as follows

(a) 14 credit points from required Communication core units:

(i) 2 required Foundation units, plus
(ii) 1 year-long Communication unit or pair of units;

(b) not fewer than 18 or more than 24 credit points from an approved sequence of units forming a Journalism Major;

(c) six credit points from two required Communication Skills unit;

(d) sufficient further Elective units to yield a degree total of at least 70 credit points, from at least the equivalent of 20 semester-long units.

Electives:

These may be chosen from any units compatible with the student's vocational objectives and educational interests. When choosing electives, students must ensure that they do not exceed a maximum of 30 credit points at semester levels 1/2. Because of prerequisite constraints, this may require a sequence of three or four semester-length units in one area of study. Details of single electives and elective majors are to be found in the Electives section of this Handbook.

Course Advice:

Students seeking course advice should contact the discipline convener.

Special Note:

The unit 3736 Introduction to News may be taken as a single unit by students who are not enrolled in the Journalism specialisation.

3736 Introduction to News is compulsory for Journalism specialisation students.

Professional Recognition:

The specialisation in Journalism is accredited with the Media Entertainment and Arts Alliance. Satisfying the requirements of the course qualifies graduates for membership of the Alliance.

Media Specialisation - Bachelor of Arts in Communication (105)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Electives:
- Course Advice:
- Discipline Convener:
- Typical Fulltime Course Structure:

The specialisation in Media is a balanced program of analytical study and practical training. It aims to provide students with knowledge, skills and attitudes which will equip them to find productive work in a constantly changing media industry. The media specialisation focuses on the information production field; the non-fictional form in all its variations, from news and current affairs to corporate and educational video, as well as computer-based interactive media programming.

Commencing in 1996, two new multi-media studies programs will be offered. Within the Media specialisation, Media students will be able to pursue a full major in multi-media authoring and management. Also on offer is a six-unit elective major in multi-media management and authoring which will be available to all students throughout the University. For further information telephone (06) 201 5105.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

HANDBOOK 1996

Organisational Communication Specialisation - Bachelor of Arts in Communication (105)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Electives:
- Course Advice:
- Discipline Convener:
- Typical Fulltime Course Structure:

In this specialisation, students develop an understanding of communication roles and networks in organisations, the links between communication practices and the general well-being and cohesion of an organisation. Skills to be developed include writing, interviewing, negotiation and training and development. Apart from three common semester subjects, students will concentrate on either an organisational psychology or an organisational culture emphasis.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: English (T) major; NSW: 2u English

Course Requirements:

Satisfactory completion of 70 credit points (from a minimum of twenty semester units or equivalent year-long units), of which not more than 30 credit points (or the equivalent of 10 semester-long units) may be at semester levels 1/2, as follows

(a)
22 credit points from required Communication core units

(i)
2 required Foundation units, plus
(ii)
2 year-long Communication units or pairs of units;

(b)
not less than 18 or more than 24 credit points from an approved sequence of units forming an Organisational Communication Major;

(c)
six credit points from two required Communication Skills units;

(d)
sufficient further Elective units to yield a degree total of at least 70 credit points, from at least the equivalent of 20 semester-long units.

Within the Organisational Communication major, students are required to choose *either* a Psychology *or* a Sociology emphasis.

Electives:

These may be chosen from any units compatible with the student's vocational objectives and educational interests. When choosing electives, students must ensure that they do not exceed a maximum of 30 credit points at semester levels 1/2. Because of prerequisite constraints, this may require a sequence of three or four semester-length units in one area of study. Details of single electives and elective majors are to be found in the Electives section of this Handbook.

Course Advice:

Students seeking course advice should contact the discipline convener.

Discipline Convener:

Dr Glen Lewis 9C12 (06) 201 2967

Typical Fulltime Course Structure:

Bachelor of Arts in Communication - Organisational Communication

HANDBOOK 1996

Professional Writing Specialisation - Bachelor of Arts in Communication (105)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Electives:
- Course Advice:
- Discipline Convener:
- Typical Fulltime Course Structure:

The specialisation in Professional Writing is designed for students who wish to prepare themselves for writing careers in fields such as radio and television scriptwriting, freelance fiction and non-fiction, publishing and editing, and writing for young people.

Students accepted into the Professional Writing specialisation are expected to have above-average talent in writing and their status is reviewed at the end of their first semester.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: English (T) major; NSW: 2u English

Course Requirements:

Satisfactory completion of 70 credit points (from a minimum of twenty semester units or equivalent year-long units), of which not more than 30 credit points (or the equivalent of 10 semester-long units) may be at semester levels 1/2, as follows

(a)
22 credit points from required Communication core units:

(i)
2 required Foundation units, plus
(ii)
2 year-long Communication units or pairs of units;

(b)
not less than 18 or more than 24 credit points from an approved sequence of units forming a Professional Writing Major;

(c)
six credit points from two required Communication Skills units;

(d)
sufficient further Elective units to yield a degree total of at least 70 credit points, from at least the equivalent of 20 semester-long units.

Electives:

These may be chosen from any units compatible with the student's vocational objectives and educational interests. When choosing electives, students must ensure that they do not exceed a maximum of 30 credit points at semester levels 1/2. Because of prerequisite constraints, this may require a sequence of three or four semester-length units in one area of study. Details of single electives and elective majors are to be found in the Electives section of this Handbook.

Course Advice:

Students seeking course advice should contact the discipline convener:

Discipline Convener:

Mr Ron Miller 9C2 (06) 201 2651

Typical Fulltime Course Structure:

Bachelor of Arts in Communication - Professional Writing

Scriptwriting emphasis

	Semester 1	**Semester 2**

YEAR 3	Year-long Communication unit# 4025 Publishing Elective*	Year-long Communication unit# (cont'd) 1825 Freelance Writing Project Elective*

**Notes*:

(a)
Professional Writing specialisation students should enrol in the special PW tutorials in the unit 1154 Writing 1 English Expression. Students should aim for an above average mark in 1154 Writing 1 English Expression. Students who do not achieve a satisfactory result should discuss their choice of specialisation with the discipline convener.

(b)
Students with no keyboard skills are advised to take the unit 3762 Communication Interface 1.

(c)
For students intending to pursue non-fiction, units in Cultural History and/or Law and/or Politics are a good choice. For students interested in fiction, Literary Studies units are advisable. Students with a special interest in Scriptwriting are advised to take and an appropriate elective sequence in Media. (Refer to Electives Section of Handbook).

(d)
3433 Writing for Young People and 4184 Technical Writing may be chosen as electives in the Professional Writing specialisation. They may be taken as alternatives to some professional writing units. The permission of the discipline convener of the Professional Writing specialisation should be sought.

#Sixteen credit points are required from the following year-long units or semester-long units

3737 Mass Communication

HANDBOOK 1996

Public Relations Specialisation - Bachelor of Arts in Communication (105)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Electives:
- Course Advice:
- Professional Recognition:
- Discipline Convener:
- Typical Fulltime Course Structure:

This course is designed for students interested in finding employment in public relations consultancies, public relations departments in government, private enterprise and not-for-profit organisations, and in a variety of positions that make use of public relations and communication skills. Several students have established their own companies.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: English (T) major; NSW: 2u English

Course Requirements:

Satisfactory completion of 70 credit points (from a minimum of twenty semester units or equivalent year-long units), of which not more than 30 credit points (or the equivalent of 10 semester-long units) may be at semester levels 1/2, as follows

(a)
22 credit points from required Communication core units:

(i)
2 required Foundation units, plus

(ii)
2 year-long Communication units or pairs of units;

(b)
not less than 18 or more than 24 credit points from an approved sequence of units forming a Public Relations major;

(c)
Six credit points from two required Communication Skills unit;

(d)
sufficient further Elective units to yield a degree total of at least 70 credit points, from at least the equivalent of 20 semester-long units.

Electives:

These may be chosen from any elective units compatible with the student's vocational objectives and educational interests. When choosing electives, students must ensure that they do not exceed a maximum of 30 credit points at semester levels 1/2. Because of prerequisite constraints, this may require a sequence of three or four semester-length units in one area of study. Details of single electives and elective majors are available in the Electives Section of this Handbook.

Course Advice:

Students seeking course advice should contact the discipline convener.

Professional Recognition:

Graduates in Public Relations qualify for membership of the Public Relations Institute of Australia.

Discipline Convener:

HANDBOOK 1996

Degree of Bachelor of Arts (Honours) in Communication (254)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Program Director:
- Typical Fulltime Course Structure:

The honours degree in Communication is a one-year, end-on degree, open to students who have completed the pass BA in Communication at a satisfactory level.

Course Duration:

1 year full-time or equivalent part-time

Admission Requirements:

Admission to the honours degree will normally require at least a credit average in units of the Communication core and also in units in the student's area of specialisation.

Students seen as showing particular promise at the end of their second year of full-time study will be invited to attend the honours degree dissertation seminar during their third year as preparation for research and thesis writing in the honours year.

Students from other universities may apply for entry to the honours degree provided that they have completed either a Bachelor of Arts in Communication degree, or a Bachelor of Arts degree with a major in Communication, with at least a credit average in relevant units.

Students with results at a satisfactory level in the Pass degree may defer applying for entry to the honours degree for up to three years after completing the Pass degree.

Course Requirements:

Satisfactory completion of at least 24 credit points from

(a)
2 required year-long units (each 8 credit points)

(b)
1 required year-long Communication Specialisation from the list below.

Course Advice:

Students seeking course advice should contact the program director.

Program Director:

Dr Christine Slade 9C14 (06) 201 2341

Typical Fulltime Course Structure:

Bachelor of Arts (Honours) in Communication

	Semester 1	Semester 2
YEAR 1	3793 Advanced Communication Theory H (year-long)	3793 Advanced Communication Theory H (cont'd)
	3800 Communication Dissertation H (year-long)	3800 Communication Dissertation H (cont'd)
	Specialisation unit* (year-long)	Specialisation unit* (cont'd)

*Students select one required year-long Communication specialisation from the following:

3794 Advanced Mass Communication H
3795 Advanced Organisational Communication H
3796 Advanced Political Communication H
4465 Creative Communication H
3801 Advanced Screen Studies H
3804 Communication Policy H
3805 International Communication H
4149 Issues in Communication Professions H

Note: Not all specialisations will be available in any one year. Availability will depend on staff resources and student demand. Intending students should consult the program director on availability.

HANDBOOK 1996

Degree of Bachelor of Arts in Information Management (317)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Electives:
- Course Advice:
- Professional Recognition:
- Program Directors:
- Typical Fulltime Course Structure:
- Status Options:

The degree of Bachelor of Arts in Information Management prepares graduates to work as information managers in the world's largest industry - the information industry. The course emphasises the human and technological elements of information management providing both knowledge and skills. It focuses on information management processes, communication and computer applications together with training in one other area. This provides a foundation for keeping abreast of changes in the workplace.

Graduates from the course will find almost immediate employment in information environments including business, education and government.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: English (T) major; NSW: 2u English

Course Requirements:

Satisfactory completion of 72 credit points from a minimum of twenty semester units or equivalent year-long units as follows:

(a) 5 required units forming an Information Management core;

(b) a 7 unit specialisation in *either* Office Management or Library and Information Studies

(c) an elective major of 6 sequential semester units (or equivalent year-long units); and

(d) single elective units to make up a total of 20 units.

Electives:

An elective major of six sequential units must be chosen from a field of study in another discipline. Examples include accounting, advertising, applied science, communication, computing studies, economics, environmental design, geography, history, information and records management, law, library and information studies, marketing, modern languages (Chinese, Japanese or Spanish), psychology, public relations, sociology and tourism. Other sequences are possible. Details of both single electives and approved elective majors are given in the Electives section of this Handbook.

Students should note that the elective major must total at least 20 credit points, and two of the six units must be at level five or higher.

Course Advice:

Students seeking course advice should contact the program director.

Professional Recognition:

Graduates from the Office Management specialisation are eligible for provisional membership of the Australian Society of Accountants if they have completed an accounting major and have also completed the additional required units. Graduates from the Library and Information Studies specialisation are eligible for admission to Associate membership of the Australian Library and Information Association.

Program Directors:

Office Management: Ms Ann Applebee 1C105 (06) 201 2985

Library and Information Studies: Ms Trish Milne 1C114 (06) 201 2053

  - Course Advice:
  - Discipline Convener:
  - Typical Fulltime Course Structure:

The Faculty of Communication concentrates on teaching languages of international significance and of direct relevance to the present and future needs of Australia. Students may complete bachelor degrees in Chinese, Japanese or Spanish.

In the Modern Languages courses, emphasis is placed on the acquisition of practical language skills. After mastering the elementary principles in the first year, students begin to practise reading current journals and newspapers, listening to recordings and watching videos in the target language, reading and translating contemporary political, social and scientific texts and representative literary works. After completing these courses, students should be reasonably competent to use their chosen language as a medium of communication and practical interaction in public service, trade, journalism, language teaching and other fields of activity. Students intending to enrol in a language of which they have some prior knowledge must first consult the discipline convener.

Chinese (043)

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: English (T) major; NSW: 2u English

Course Requirements:

Satisfactory completion of at least 69 credit points from at least 20 required and elective units as follows

(a) a principal major of ten semester-equivalent units (2 semester-long units and 4 year-long units);

(b) an approved sequence of at least six units in another discipline, forming an elective second major. The elective major may be a language other than Chinese;

(c) at least four elective units. These units may include 1839 Special Studies in Modern Languages A and/or 1753 Special Studies in Modern Languages B, 4188 Chinese for Business, 3380 Japanese for Tourism or any other suitable single units, chosen in consultation with the discipline convener.

Electives:

Among suggested elective second majors for students in Modern Languages are administration, advertising/marketing, communication, computing, economics, education, history, journalism, library and information studies, law, linguistic studies, media, politics, professional writing, public relations, office management, tourism and sociology. Refer to the Electives section of this Handbook for details of single electives and elective majors.

Course Advice:

Students seeking course advice should contact the discipline convener.

- Program Director:
- Typical Fulltime Course Structure - Entry Method 1:
- Required Full-time Course Structure: - Entry Method 2:

Assumed Knowledge:

ACT: English (T) major; NSW: 2u English

Admission/Course Duration:

There are two methods of entry to the course. Entry Method One (EM1) follows normal University entry procedures and is for students without an appropriate associate diploma level award. For EM1 students the course normally is three years full-time or the equivalent part-time. Entry Method Two (EM2) is for students possessing an Associate Diploma of Business in Hospitality or Travel from the Canberra Institute of Technology or its equivalent. For EM2 students the course is normally two years full-time or the equivalent part-time.

Course Requirements:

For EM1 students, satisfactory completion of at least 21 units (or equivalent) and at least 72 credit points as follows

(i)

eight required units yielding 40 credit points in total:

three year-long units yielding 22 credit points:
3711 Introduction to Tourism (year-long)
3814 Tourism Marketing (year-long)
3815 Tourism Planning and Development (year-long)

and five semester-long units yielding 18 credit points:
3296 Tourism Computer-Based Systems
3337 Tourism Research
3754 Hospitality Operations
4200 Tourism Economics and Policy
3712 Tourism Industry Project Scheme

(ii)

a sequence of six approved specialist units

(iii)

additional credit points from at least four approved elective units to make a total of at least 72 credit points.

EM2 students are required to take the following program of study

(i)

required units yielding 40 credit points in total:

three year-long units yielding 22 credit points:
3711 Introduction to Tourism
3814 Tourism Marketing
3815 Tourism Planning and Development

and five semester-long units yielding 18 credit points:
3296 Tourism Computer-Based Systems
3337 Tourism Research
3754 Hospitality Operations
4200 Tourism Economics and Policy
3712 Tourism Industry Project Scheme

and

(ii)

additional credit points from approved elective units so as to make a total of at least 8 credit points.

Note: EM2 students must see the program director upon enrolment in order to ensure that credit is granted for previous studies.

Specialist units:

Some of the areas in which specialisation are available include accounting; administration (either general list (management) or public administration related or policy-related); advertising/marketing; Chinese (Chinese 1-6); information systems (computing); Japanese (Japanese 1-6); marketing; office management; organisational communication; public relations/marketing; public relations/advertising; Spanish (Spanish 1-6) and sports management.

Note: As part of the course, language units other than Japanese, Chinese and Spanish may be available at the Australian National University. These include units in French, German, Italian, Korean and Thai and may be taken in lieu of Japanese, Chinese or Spanish subject to the approval of the Dean of Faculty.

Electives:

These may be any approved elective units from any Faculty in the University; refer to the Electives section in this Handbook.

Course Advice:

Students seeking course advice should contact the program director.

Program Director:

Dr Michael Hall 1C112 (06) 201 2465

Typical Fulltime Course Structure:

Graduate Diploma of Arts (164)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Course Convener:
- Typical Fulltime Course Structure:

The Graduate Diploma of Arts in the field of information studies is postgraduate in content as well as time. Postgraduate studies are available in five areas of specialisation: research and archival resources, information and records management, information retrieval, library systems and services, and services for young people. The course is designed for graduates who have a satisfactory level of educational preparation in the theory of library and information studies or in a discipline allied to their proposed area of specialisation, and who have not less than two years of relevant work experience.

This course in information studies is offered in two modes: as a postgraduate qualification with emphasis on continuing professional education, and as a postgraduate qualification with emphasis on applied research, equivalent to the first year of the Master of Arts course.

Course Duration:

The course can be completed in the equivalent of 1 year of full-time study. On a part-time basis, no student may take longer than four years.

Admission Requirements:

The level of attainment required may be met by such qualifications as a graduate diploma in librarianship or a bachelor's degree with a major in librarianship. Qualifications in information science, educational technology, records management, communication, children's literature or other related disciplines may also meet the requirements. In some cases, bridging units may be imposed.

Course Requirements:

Satisfactory completion of three or five units as follows

(a)
two core units
0094 Research Methods PG
2316 Issues in Information Studies PG and

(b)
units to meet requirements for one of two modes:

(i)
Professional Development Mode
Two 3-credit point elective units at graduate level in library and information studies or in other disciplines relevant to the field, the content of which has not been covered by previous coursework, plus the unit 4402 Information Study PG

(ii)
Masters Preliminary Mode
4401 Information Studies Thesis Preparation PG

Within each mode, students will be required to concentrate in one of the following areas of specialisation:

research and archival resources
information and records management
information retrieval
library systems and services
or services for young people

Canberra-based students are also required to take an active part in the Postgraduate Seminar program.

Course Advice:

Before enrolling, students should discuss with the course convener the best means of undertaking the program.

Course Convener:

Dr Peter Clayton 1C110 (06) 201 5431

HANDBOOK 1996

Graduate Diploma in Communication (229)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Program Director:

Course Duration:

1 year full-time or equivalent part-time

Admission Requirements:

At least a bachelor degree in Communication (or with a major in Communication) or a bachelor degree in a cognate area, with at least a credit average.

Special Note: Generally, students intending to pursue postgraduate study in Communication are encouraged to apply for admission to the Masters (203) program. If students decide not to proceed to the thesis year, they may apply to take out the Graduate Diploma in Communication award. For details of the Master of Arts in Communication refer to Course No 230.

Course Requirements:

The requirements of the Graduate Diploma are the same as those for the preparatory year of the masters degree, that is, satisfactory completion of at least 24 credit points from 2 required units and a year-long communication specialisation (8 credit points) as follows

(a)

16 credit points from two year-long required units
3783 Advanced Communication Theory PG
4398 Communication Thesis A PG

(b)

8 credit points from one of the following specialisations
3781 Advanced Communication and Continuing Crises PG
3782 Advanced Communication History PG
3784 Advanced Mass Communication PG
3785 Advanced Organisational Communication
3786 Advanced Political Communication PG
3787 Communication and Development PG
3788 Communication Literature and Culture PG
3789 Communication Policy PG
3791 International Communication PG

Note: Not all specialisations will be available in any one year. Availability will depend on staff resources and student demand. Intending students should consult the program director on availability.

Course Advice:

Students seeking course advice should contact the program director.

Program Director:

HANDBOOK 1996

Graduate Diploma in Library and Information Management (163)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Professional Recognition:
- Program Director:
- Typical Fulltime Course Structure:

The programs of education for library and information studies offered by the University are designed to prepare students for professional careers in librarianship, information retrieval, archives, records management, research and related areas. They lead to awards acceptable to employers, and entry-level courses are accredited by the Australian Library and Information Association.

The program offers an opportunity for specialisation in library systems and services, information retrieval, research and archival resources, services for young people, or information and records management. Field placement in a library or information agency is also available.

Course Duration:

The course may be completed in one year of full-time study commencing in first semester, but students should be aware that it is a demanding course and, if they have family, work or other commitments, they would be well advised to take the course part-time over more than one year. Because of prerequisite structures, students commencing in second semester are unable to complete the course in fewer than three semesters.

Admission Requirements:

The Graduate Diploma in Library and Information Management is an avenue for entry to the profession for students who have completed degree courses in other areas of study. Students who have completed degrees in library and information studies will be admitted only in exceptional circumstances.

Course Requirements:

Satisfactory completion of 8 units as follows:

(a)
5 required units; and

(b)
3 specialist electives as listed below.

Course Advice:

Students seeking course advice should contact the program director.

Professional Recognition:

This course is recognised by the Australian Library and Information Association.

Program Director:

Ms Trish Milne 1C114 (06) 201 2053

Typical Fulltime Course Structure:

Graduate Diploma in Library and Information Management

	Semester 1	Semester 2
YEAR 1	3226 Foundations of Information Organisation G	3569 Cataloguing G
	1684 Foundations of Information Services G	4104 Supervisory Management G*
	Either 1 Specialist Elective+ and 1 Information Technology unit#	*Either* 2 Specialist Electives+
	or 2 Specialist Electives#	*or* 1 Specialist Elective+ and 1 Information Technology unit#

*Students with undergraduate or other formal coursework in similar units may apply for an exemption and take a specialist stream unit or any other approved unit in lieu, and should see the program director of Library and Information Studies for exemption.

+Information Technology units recommended are 3761 Communication Interface G1, 3593 Communication Interface G2 or 0565 Basic Information Systems G.

#Students select three specialist electives from one of the following Specialist Streams

(a)
Information Retrieval
3765 Information Retrieval G
2699 Advanced Information Retrieval G
3780 Information Analysis G
4329 Network Information Sources G
3224 Field Placement G

(b)
Services for Young People
1165 Resources for Young People G
4068 Services and Programs for Young People G
3224 Field Placement G

(c)
Research and Archival Resources G
0195 Resources for Information and Research G
3227 Legal and Government Publications G
3705 Library and Archive Preservation G
3764 Management of Archives G
3224 Field Placement G

(d)
Library Systems and Services
1815 Collections Management G
0195 Resources for Information and Research G
3224 Field Placement G

(e)
Information and Records Management
3484 Information and Records Management G together with two of the following units
3764 Management of Archives G
tba Advanced Information Management G
or 3224 Field Placement G

Students with a particular need or interest may substitute an alternative unit for one of their specialist stream units. In addition to units in other specialist streams, the alternative units may include 3219 Independent Study in Library and Information Studies G, 3223 Special Studies in Library and Information Studies G, 3668 Museology G1, 3915 Women and Organisations G, advanced computing units, and other units relevant to the practice of information work as approved by the program director of Library and Information Studies. Students should seek permission from the program director of Library and Information Studies, who will confirm their choice with a note on their student file.

Part-time Students: Beginning part-time students undertaking one unit per semester should enrol in 1684 Foundations of Information Services G in Semester 1, and 0565 Basic Information Systems G, 3761 Communication Interface G1 or 3593 Communication Interface G2 in Semester 2.

Beginning part-time students undertaking two units per semester should enrol in 1684 Foundations of Information Services G and 3226 Foundations of Information Organisation G in Semester 1.

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Discipline Convener:
- Typical Fulltime Course Structure:

The Graduate Diploma in Office Management course is intended for those who wish to add a specialised qualification to their first degree. It seeks to produce graduates who are able to perform in offices the wide range of managerial tasks which have resulted from the introduction of new office technologies. Graduates from the course are keenly sought, and find rapid employment in the offices of business, government and community organisations.

Course Duration:

1 year full-time or equivalent part-time

Admission Requirements:

Undergraduate degree from an Australian university or college of advanced education, or equivalent.

Course Requirements:

Satisfactory completion of 8 required semester-long units (24 credit points).

Course Advice:

Students seeking course advice should contact the discipline convener.

Discipline Convener:

Ms Ros Byrne 1C109 (06) 201 2211

Typical Fulltime Course Structure:

Graduate Diploma in Office Management

	Semester 1	Semester 2
YEAR 1	4101 Communication for Management G1	3593 Communication Interface G2
	4100 Communication for Management G2	3484 Information and Records Management G
	1721 Accounting G1A*	4104 Supervisory Management G
	3761 Communication Interface G1	3912 Concepts and Elements of Law G*

* These are recommended electives; other units may be taken with the permission of the discipline convener.

Graduate Diploma in Professional Communication (231)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Program Director:

In 1996 only the Professional Writing Specialisation will be offered.

Course Duration:

1 year full-time or equivalent part-time as resources permit.

Admission Requirements:

A first degree, preferably in a communication writing or arts related area. Applicants are advised to include samples of their writing with their application and a covering letter explaining the reason for their interest.

Course Requirements:

Satisfactory completion of at least 24 credit points, as follows

(i)
two required Communication Core units totalling 6 credit points:
2268 Communication G1
2270 Communication G2

(ii)
and six further units, to total at least 18 credit points

Professional Writing

2262 Freelance Writing G1
2264 Freelance Writing G2
2273 Scriptwriting G1
2278 Scriptwriting G2
3507 Publishing G or 3481 Writing for Young People G

and

either 2279 Scriptwriting Project G
or 2267 Freelance Writing Project G

Note: Students in the Professional Writing specialisation may substitute an approved unit in place of 2273 Communication G1 *or* 2270 Communication G2.

Course Advice:

Students seeking course advice should contact the program director.

Program Director:

Mr Ron Miller 1C118 (06) 201 2651

Note:
The specialisations in Advertising/Marketing, Broadcast Journalism, Media and Public Relations are not available in 1996 to newly enrolling students. For details of these specialisations, refer to the 1995 University Handbook.

Degree of Master of Arts in Communication (by research) (230)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Program Director:

This course intake is restricted to first semester, and is postgraduate in content as well as time. The course consists of a preparatory year, involving coursework and thesis prepartion, followed by a thesis year. As noted earlier, students who complete the preparatory year but who choose not to (or are advised not to) go on to the thesis year may apply to take out the Graduate Diploma in Communication.

Course Duration:

2 years full-time or equivalent part-time

Admission Requirements:

At least a bachelor degree in Communication (or with a major in Communication) or a bachelor degree in a cognate area, with at least a credit average.

Course Requirements:

Satisfactory completion of a total of 48 credit points as follows.

In the preparatory year:

At least 24 credit points from 2 required units (8 credit points each) and a year-long communication specialisation (8 credit points) as follows:

(a)

16 credit points from two year-long required units
3783 Advanced Communication Theory PG
4398 Communication Thesis A PG

(b)

8 credit points from one of the following specialisations
3781 Advanced Communication and Continuing Crises PG
3784 Advanced Mass Communication PG
3785 Advanced Organisational Communication PG
3786 Advanced Political Communication PG
3787 Communication and Development PG
3789 Communication Policy PG
4466 Creative Communication PG
3791 International Communication PG

Note: Not all specialisations will be available in any one year. Availability will depend on staff resources and student demand. Intending students should consult the Head of School on availability.

In the thesis year:
24 credit points from the unit 4399 Communication Thesis B M (full-time)/4400 Communication Thesis B M (part-time). Before commencing their thesis, students must present a satisfactory research proposal to the Faculty Higher Degrees Committee.

Intending students should note that there may be some variation to the course requirements shown above. Further information is available from the program director.

Course Advice:

Students seeking course advice should contact the program director.

Program Director:

Communication Specialisation

The areas which potentially offer supervision are:

- Communication and Culture
- Communication History
- Communication Policy
- Communication Theory
- Comparative Communication
- Communication Language and Literature
- Communication and Technology
- Development Communication
- Environmental Communication
- Epistemological Issues in Communication
- Intercultural Communication
- International Communication
- Mass Communication
- Organisational Communication
- Political Communication

Course Duration:

Minimum candidature is three years of full-time study (or two years full-time subject to the granting of status) and a maximum of five years of full-time study.

Admission Requirements:

Entry requirements for the PhD are an honours degree at first class or 2A level, or a masters degree, or a postgraduate diploma with average results of at least credit level. These qualifications must be in Communication or a closely related discipline.

Candidates (particularly those from cognate disciplines) may be required to undertake bridging studies before commencing the PhD thesis. Note that such bridging studies cannot count towards the PhD.

Course Requirements:

The degree is by thesis alone, with enrolment in the unit 4096 Doctoral Thesis in Communication D (full-time), or 4097 Doctoral Thesis in Communication D (part-time). Intending applicants should discuss their proposal in the first instance with Associate Professor G Osborne, telephone (06) 201 2644/2008.

Program Director:

Associate Professor Graeme Osborne 1C145 (06) 201 2644

Information Studies Specialisation

The areas of information studies in which the degree may be pursued are:

- archival resources
- information and records management
- information retrieval
- library systems and services
- resources and services for young people.

Course Duration:

Minimum candidature is three years of full-time study or two years (subject to the granting of status) and a maximum of five years of full-time study.

Admission Requirements:

Entry requirements for the PhD are an honours degree at first class or 2A level, or a masters degree, or a postgraduate diploma with average results of at least credit level. These qualifications must be in Information Studies or a closely related discipline.

Candidates (particularly those from cognate disciplines) may be required to undertake bridging studies before commencing the PhD thesis. Note that such bridging studies cannot count towards the PhD.

Course Requirements:

The degree is by thesis alone, with enrolment in the unit 4096 Doctoral Thesis in Communication D (full-time), or 4097 Doctoral Thesis in Communication D (part-time).

Course Advice:

Intending candidates should contact the course convenor for further information and to discuss their proposal.

Course Convener:

Dr Peter Clayton 1C110 (06) 201 2015.

Tourism and Leisure Studies Specialisation

Areas in which supervision may be offered include:

- Australasian and Pacific Rim tourism and leisure studies
- cultural and heritage tourism
- event management, planning and marketing
- globalisation of leisure and tourism
- historical aspects of tourism and leisure
- media and leisure
- sustainable tourism
- tourism and hospitality management
- tourism and hospitality marketing
- tourism impact analysis
- tourism and leisure planning and policy analysis
- visitor management

Course Duration:

Minimum candidature is three years of full-time study (or two years full-time subject to the granting of status) and a maximum of five years of full-time study. The duration of the course for part-time students will be proportionately longer.

Admission Requirements:

Entry requirements for the PhD are an honours degree at first class or 2A level, or a masters degree, or a postgraduate diploma with average results of at least a credit level. These qualifications must be in tourism or leisure studies or a cognate discipline.

Candidates (particularly those from cognate disciplines) may be required to undertake bridging studies before commencing the PhD thesis. Note that such bridging studies cannot count towards the PhD.

Course Requirements:

The degree is by thesis alone, with enrolment in the unit 4096 Doctoral Thesis in Communication D (full-time) (72 credit points), or 4097 Doctoral Thesis in Communication D (part-time) (72 credit points).

Course Advice:

Intending applicants should discuss their proposal in the first instance with the Tourism Program Director.

The Faculty of Education offers courses leading to the awards indicated on the previous page. Students should refer to the section of this Handbook entitled Information for Students, in particular those paragraphs covering definition of University terms, admission, enrolment and academic progress. Prospective and newly-enrolled students should also note the knowledge assumed for each course.

The major aims of these courses include

· sensitivity to the needs and characteristics of learners;

· awareness of the social context and implications of education;

· understanding of basic problems and issues and awareness of the contributions of the various disciplines towards the solving of these;

· self-awareness, including awareness of the roles of the educator's personal concepts, values and modes of operation in the encouragement of learning;

· knowledge, skills and attitudes sufficient for efficient operation at the stage of an educationalist's career towards which each course is directed;

· desire for continued study and development;

· flexibility, enabling constructive work in given conditions, including the seeking of better solutions.

To foster these aims the programs are interdisciplinary and cross-disciplinary, inviting students to make a personal synthesis of the disciplines involved in the study of education, which is centred in the Faculty of Education and, as appropriate, general studies and supporting studies centred in other Faculties of the University and other affiliated institutions.

Programs are deliberately varied in teaching-learning method, involving large group, small group and individual activities, the use of various media, and a wide variety of field work and assignments. Within the Faculty of Education, evaluation is normally by continuous assessment rather than terminal examination, and students are generally consulted on the assessment procedures to be followed and are involved in continuing processes of evaluation and further development of the courses.

Academic Support Program

Provides individual consultations and small group workshops in language and study skills for all students from non-English speaking backgrounds.

Enquiries: 1C15, telephone (06) 201 2124

Curriculum Resources Centre

Within the Faculty of Education, there is a Curriculum Resources Centre designed specifically for the staff and students of the Faculty to cater for teaching needs, curriculum studies and curriculum development. It has a stock of multimedia material, and facilities for studying, duplicating, craftwork or just borrowing.

Enquiries: 5A22, telephone: (06) 201 2965

Centre for Human Resource Development Studies

This is a specialist centre established in the Faculty of Education to cater for the professional development of national and international human resource practitioners and other professionals who facilitate the development of learning organisations. A brochure is available from the Centre.

Enquiries: 5C70, telephone (06) 201 2920

Field Classes

Many of the units students are required or elect to undertake contain compulsory elements of field experience, and students will be expected to meet their own transport costs to and from placements.

General Studies Units

Students are supplied with a General Studies booklet during their orientation sessions.

General Advice to Teacher Education Students

The University of Canberra is an educational and training institution rather than an employing authority. Students are advised to acquaint themselves with any specific requirements of employing authorities that are additional to academic requirements.

HANDBOOK 1996

Degree of Bachelor of Applied Science in Health Education (025)

- Course Duration:
- Assumed Knowledge:
- Useful Knowledge:
- Course Requirements:
- Electives:
- Course Advice:
- Professional Recognition:
- Course Convener:
- Typical Full-time Course Structure:

This course is designed for those wishing to become educators in health development, health maintenance and community health. This professional preparation is also applicable to other education, health and welfare settings.

The program involves study in the Faculty of Education and in other Faculties of the University and covers four strands: health education studies, bio-enviro-heritage science studies, social science studies, and general studies electives. These studies will involve work alongside students preparing to enter a wide variety of professions.

Course Duration:

3 years full-time or equivalent part-time, maximum period of study 10 years.

Assumed Knowledge:

ACT: English (T) major; NSW: 2u English

Useful Knowledge:

Any social science, such as anthropology, sociology, psychology, and any human, biological or environmental sciences.

Course Requirements:

Satisfactory completion of 24 units (at least 74 credit points) as set out below

(a) 20 required units as follows:

(i) 12 required health education studies units (at least 35 credit points);

(ii) 6 or 4 required biomedical/environmental/heritage science studies units (at least 13 credit points with at least one 3/4 level unit);

(iii) 4 or 6 required social science studies units (at least 14 credit points);

(b) 2 units (at least 6 credit points) with at least one unit at 5/6 level, to construct a six unit major, in the field chosen for either (a) (ii) or (a) (iii) above; and

(c) 2 other elective units to make up at least 74 credit points.

Electives:

The program offers choice in the sequence of units, and choice in general studies elective units. Certain units are required; course advice will list these. This is important for intended professional practice. Students will need to plan well ahead and notify the Faculty of their plans, so that classes to meet expressed needs can be arranged in time.

Course Advice:

Students should seek course advice from their course convener in the selection of units.

Professional Recognition:

The course is recognised as a cross-disciplinary course of study applying to many fields of employment.

Course Convener:

Mr Chris Higgisson, 5B74 (06) 201 2482

Typical Full-time Course Structure:

Bachelor of Applied Science in Health Education

Note: The letters in brackets indicate the paragraphs of the course requirements above.

	Semester 1	Semester 2
YEAR 1	0007 Health Education Studies 1 (a)(i) 0715 Basic Sociology (a)(iii) 2436 Nature of Adult Learning+ (a)(iii) Elective* (a)(ii)	0017 Health Education Studies 2 (a)(i) 3440 Health Education Studies 2P (a)(i) 1868 Human Development: Lifespan+ (a)(iii) Elective* (a)(ii) Elective@ (c)
YEAR 2	0118 Health Education Studies 3 (a)(i) Unspecified Health Studies unit (a)(i) Elective* (a)(ii) Elective# (b)	3439 Health Education Studies 4 (a)(i) 0128 Health Education Studies 5 (a)(i) 3438 Health Education Studies 5P (a)(i) Elective* (a)(ii) Elective@ (c)
YEAR 3	3437 Health Education Studies 6 (a)(i) 3436 Health Education Studies 6P (a)(i) 1619 School Health Promotion+ (a)(iii) Elective# (b)	3435 Health Education Studies 7 (a)(i) 3434 Health Education Studies 7P (a)(i)

+With the permission of the Dean of the Faculty, a student may undertake one or both of the following units in lieu of these units: 1306 Special Study in Health Education 2; 1307 Special Study in Health Education 3, or alternatively, add both to make a 6-unit major rather than a 4-unit sub-major.

*These units, reflecting prerequisite patterns, are to be drawn from one of the fields of cultural heritage, environmental/ecological sciences, environmental/resource sciences, human biology, nutrition, or sports sciences, and may be undertaken in any semester, not necessarily those indicated here. A 4-unit sub-major or 6-unit major may be undertaken.

#These 2 units (at least 6 credit points) with at least one unit at 5/6 level, to construct a six unit major, in the field chosen for either (a) (ii) or (a) (iii) above.

Note: The 2 social science studies units to complete a major in (a) (iii) should be drawn from one of the fields of administration, communication, economics, education, law, media, politics, sociology or women's studies or as approved by the Dean of the Faculty.

@Students undertake 2 other elective units (to make up at least 74 credit points) - 1100 Health, Lifestyle and Education; 1762 Human Sexuality; or other professionally appropriate units drawn from the fields listed in (a) (ii) above, or the social science studies areas listed, or other units approved by the Dean of the Faculty.

University of Canberra, AUSTRALIA

HANDBOOK 1996

Bachelor of Education Courses

Undergraduate teacher education courses are offered by the Faculty in three areas of teaching specialisation:

Early Childhood ages 3 - 8 years

Primary ages 5 - 12 years

Secondary ages 12 - 18 years

The bachelor degree programs involve a balance between education and teaching studies taken within the Faculty of Education, and general studies pursued in other Faculties or other tertiary institutions. The programs aim to integrate educational theory and practice, and the emphasis on field experience will include a school-based semester. The final year program is structured to allow students to develop expertise in areas of special interest.

University of Canberra,
AUSTRALIA

HANDBOOK 1996

Degree of Bachelor of Education Early Childhood (218)Degree of Bachelor of Education Primary (219)

- Course Duration:
- Assumed Knowledge:
- Mathematics Competency Test:
- Course Requirements:
- Elective Sequence and General Studies:
- Field Experience:
- Course Advice:
- Professional Recognition:
- Course Convener:
- Typical Full-time Course Structure:

Course Duration:

4 years full-time or equivalent part-time. Maximum period of study is 10 years.

Assumed Knowledge:

ACT: Majors in Mathematics (T), and English (T); NSW: 2u Mathematics and 2u English. (The NSW State Minister for Education has stated that, from 1995, students wanting to enter the teaching profession will be required to study 2 units of Mathematics and 2 units of English at the HSC level.)

Mathematics Competency Test:

All students admitted to the Early Childhood/Primary Education courses will be required to sit a basic skills competency mathematics test. This test will normally be held during the New Student Enrolment Program. Students who either fail this test in first semester or do not sit for the test must enrol in the elective unit, 3480 Teaching Mathematics: Reflections Directions and Connections, which must be successfully completed before enrolling in the unit, 1847 Studies in Mathematics Education A, unless with permission of the course convener.

Course Requirements:

Satisfactory completion of at least 97 credit points as follows:

(a) 64 credit points of required units (including 2 units in specialised areas in Year 4);

(b) an elective sequential grouping of 6 units (at least 18 credit points), of which at least 1 unit shall be at semester level 5 or higher;

(c) the equivalent of 5 other units (at least 15 credit points) chosen from appropriate general studies units and units in specialised areas, approved by the Dean of Faculty; and

(d) satisfactory completion of the requirements for the Mathematics Competency Test as described above.

Elective Sequence and General Studies:

Units included in the sequential grouping taken under paragraph (b) shall be approved by the Dean of Faculty, acting with the advice of the Dean of Faculty responsible for the units in the elective area of study. Students will be supplied with a general studies booklet during their orientation sessions.

Under paragraph (c) above, at least 3 of the units will be general studies units and will include 0647 Music A and 1097 Art A.

Students wishing to undertake an applied psychology major should undertake an appropriate sequence of units. Students must consult the course convener in the Faculty of Education before undertaking such a major and must also check with the convener of psychology in the Faculty of Applied Science. Students should also be aware that this psychology major has been provisionally accredited with the Australian Psychological Society. An accredited major is also available through the ANU.

There is a requirement to be enrolled in the Bachelor of Education - Early Childhood or Primary courses before undertaking field experience units or corequiste units.

Field Experience:

This course requires extensive field experience in schools. This consists of periods of block practice of at least two weeks duration in the first seven semesters of the course, together with a school-based semester in the third year. Students are advised they will be required to make a full commitment to Semester 5 when no general studies units will be undertaken. In addition, students who find it necessary to have part-time employment (during school hours) are requested to plan for alternative arrangements in this semester.

Education Field Experience 7 is normally undertaken in first semester of Year 4 but may, with the permission of the course convener, be undertaken in Semester 2, Year 4.

Course Advice:

All students must seek the advice of the course convener for approval of their study program.

Professional Recognition:

The Bachelor of Education (Early Childhood and Primary) courses are fully accredited and recognised as teaching qualifications throughout Australia.

Course Convener:

Associate Professor Clem Annice 5B79 (06) 201 2477

Typical Full-time Course Structure:

Bachelor of Education (Early Childhood/Primary)

Note: The letters in brackets indicate the paragraphs of the course requirements above.

HANDBOOK 1996

Degree of Bachelor of Education Secondary (078)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Elective Sequences:
- Field Experience:
- Course Advice:
- Professional Recognition:
- Course Convener:
- Typical Full-time Course Structure:

The teaching specialisations normally on offer are

Computing

English

English/History

English as a Second Language (ESL)

Languages Other than English (LOTE)

Mathematics

Music

Physical Education

Science

Social Sciences

Students wishing to become *music teachers* must successfully complete an audition in performance in their major instrument of study (this may be voice) and pass a test in musicianship skills at the School of Music, Institute of the Arts, Australian National University. The double major in music is undertaken at the School of Music.

Students wishing to become *physical education teachers* must complete a questionnaire in addition to the standard application form. The questionnaire is available from the Faculty and must be returned by the specified date.

Students who wish to become *art teachers* are advised to complete a degree program at the Institute of the Arts ANU, before enrolling in a Graduate Diploma in Education.

Course Duration:

4 years full-time or equivalent part-time, maximum period of study 10 years.

Assumed Knowledge:

ACT: Majors in Mathematics (T) and English (T); NSW: 2u Mathematics and 2u English. (The NSW State Minister for Education has stated that, from 1995, students wanting to enter the teaching profession will be required to study both 2 units of Mathematics and 2 units of English at the HSC level.)

Course Requirements:

Satisfactory completion of at least 90 credit points as follows:

(a) 33 credit points from 7 required units;

(b) a 6-unit sequence, at least 18 credit points, in one area of secondary teaching specialisation, of which at least 2 units shall be at least level 5 or higher;

(c) a 6-unit elective major sequence, at least 18 credit points, in the same area; or in a different area of secondary teaching specialisation as that chosen in paragraph (b), of which at least 2 units shall be at level 5 or higher;

(d) a 4-unit sub-major sequence, at least 12 credit points, in the same or a different area of secondary teaching specialisation as that chosen in paragraph (b), or as chosen in paragraph (c), of which at least 2 units shall be at level 3 or higher; and

(e) 3 elective units, at least 9 credit points, chosen from any appropriate units, as approved by the Dean of Faculty.

Elective Sequences:

Units included in these sequences shall be approved by the Dean of Faculty, acting with the advice of the Dean of Faculty responsible for the units in the chosen area of study.

Field Experience:

The course requires extensive field experience in schools. This consists of a two-week block in the second semester of the second year, and five weeks in each semester of the fourth year.

Course Advice:

Students undertaking the Bachelor of Education (Secondary) course should seek course advice related to individual course structures suited to secondary teaching, since State and Territory requirements impose considerable constraints on both the teaching area and the type and constitution of majors and sub-majors.

Professional Recognition:

The Bachelor of Education (Secondary) course is fully accredited and recognised as a teaching qualification throughout Australia.

Course Convener:

Associate Professor John Nicholas 5B72 (06) 201 2480

Typical Full-time Course Structure:

Bachelor of Education (Secondary)

Note: The letters in brackets indicate the paragraphs of the course requirements above.

	Semester 1	Semester 2

- Professional Recognition:
- Course Convener:

Course Duration:

1 year full-time or equivalent part time; maximum period of study 4 years.

Admission Requirements:

Applicants for these conversion courses must have at least two years of full-time teaching experience or equivalent professional experience and have successfully completed a three-year Diploma of Teaching or its equivalent.

Course Requirements:

Satisfactory completion of at least 25 credit points, (8 units) as follows:

(a) 4 credit points from the required unit 3370 Curriculum Development and Evaluation (or, with approval of the Dean of Faculty, the unit 2789 Special Study in Education 4A)

and at least 21 credit points from:

(b) 6 units in any appropriate area or areas of study, including at least one unit at level 5 or higher, plus

(c) either 1 general studies elective unit or 1 education elective unit.

Depending on units selected, the total credit points for the program may exceed 25.

Electives may be undertaken in areas such as special education*, health studies, computing, TESL, linguistics, literary studies, science, mathematics, languages.

*Upgrading students may specialise in special education completing a package of units from the Graduate Diploma in Special Education course plus the unit 3370 Curriculum Development and Evaluation. This opportunity is appropriate for cadets funded by the NSW Department of School Education to undertake special education training.

Course Advice/Approval:

Units taken must be approved by the Dean of Faculty of Education, acting when necessary with the advice of the Dean of the Faculty responsible for the units in the area or areas of study.

Professional Recognition:

The Bachelor of Education (Early Childhood and Primary) courses are fully accredited and recognised as teaching qualifications throughout Australia.

HANDBOOK 1996

Degree of Bachelor of Education Secondary (200) Conversion

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Elective Sequence:
- Course Structure A
- Course Structure B
- Course Advice/Approval:
- Alternative Course Structure:
- Professional Recognition:
- Course Convener:

Course Duration:

1 year full-time or equivalent part-time; maximum period of study 4 years.

Admission Requirements:

Normally applicants with at least two years of full-time secondary teaching experience or equivalent professional experience and who have successfully completed a three-year Diploma of Secondary Teaching, or its equivalent, qualify for admission to the Secondary undergraduate in-service conversion course. The conversion course may be taken in either of two structures described below.

Course Requirements:

Satisfactory completion of at least 25 credit points from eight units or equivalent (see course structures set out below).

Elective Sequence:

Students are able to choose from a range of unit options to form a coherent, individualised program. The chosen program enables students to build on their knowledge and expertise in their teaching specialisation or to develop expertise in an additional teaching area or to gain knowledge and skills in other educational roles.

Suitable examples of programs may include a sequence of six general studies units (a "major") or a sequence or coherent grouping of units chosen from general studies areas and/or from specialised Education units appropriate for the purposes of this course. Groupings and sequences may include units from areas such as special education, computing studies, educational administration, Aboriginal studies/minority groups, counselling, health studies, applied linguistics, teaching English as a second language, or any other coherant set of units available in other faculties.

Students will utilise the unit 3370 Curriculum Development and Evaluation to apply the experiences and knowledge of their area(s) of specialisation to an educational setting. All students including part-time students will therefore be required to undertake this unit at the end of their course.

Course Structure A

(a) The unit 3370 Curriculum Development and Evaluation (or, with the approval of the Dean of Faculty, the unit 0542 Special Study in Education 4); and

(b) Seven additional units, at least 21 credit points, from six units in any appropriate area or areas of study, including at least two units at level 5 or higher, and either one general studies elective or one education elective unit. (** If a student lacks the prerequisites for specific units in a particular area, then they may be required, at the discretion of the Dean of the Faculty of Education to undertake more than these minimum credit points.)

Course Structure B

(a) Teaching Studies (double unit).

(b) A major of six units or equivalent.

Course Advice/Approval:

Units taken under paragraphs (b) above (both course structures) must be approved by the Dean of the Faculty of Education, acting when necessary with the advice of the Dean of Faculty responsible for the units in the area(s) of study.

Alternative Course Structure:

Students in the undergraduate Secondary conversion course who seek to develop a new field of teaching should complete a major (6 units) of general studies in that field and replace the unit 3370 Curriculum Development and Evaluation with the relevant Teaching Studies unit (Course Structure B).

Professional Recognition:

The BEd (Secondary) Conversion course is fully accredited and recognised as a teaching qualification throughout Australia.

Course Convener:

Associate Professor John Nicholas 5B72 (06) 201 2480

[<---] Return to Handbook contents

University of Canberra, AUSTRALIA

HANDBOOK 1996

Degree of Bachelor of Education in Human Resource Development (291)

- Course Duration:
- Admission Requirements:
- Professional Practice:
- Course Requirements:
- Electives:
- Course Advice:
- Professional Recognition:
- Course Convener:
- Course Structure:

This program provides a professional preparation for human resource development practitioners and adult educators and is designed for those who have a teaching or training role with adults. People who participate in the course include line managers; instructors in the services (both military and civilian); instructors in tertiary institutions; nurse, health and family planning educators; instructors in police academies; and training and staff development personnel in the public service, industry and education. Typically, such people are well qualified and experienced in their discipline area and are seeking a formal educational qualification.

Course Duration:

4 years full-time or equivalent part-time; it is generally undertaken on a part-time basis.

Admission Requirements:

The normal University admission requirements apply, with the additional requirement that applicants need to hold a full-time or part-time teaching/training/managing position in human resource development or Education concurrently with their studies of core units.

Admission is by direct entry, not through UAC.

Professional Practice:

As the course is considered to be in-service, the program has Professional Practice requirements which must be undertaken concurrently with the first two professional development units.

Course Requirements:

Satisfactory completion of at least 29 units (totalling 96 credit points) as follows:

(a) 12 required units in human resource development (45 credit points);

(b) a 6-unit major in a professionally relevant discipline (18 credit points);

(c) an elective sub-major of 12 credit points;

(d) *either* advanced standing, if relevant, of up to 24 credit points, for previous formal study in an academic institution, *or* elective units of 21 credit points;

(e) advanced standing of 13 credit points may be given from 1996 for the CIT Certificates in Tertiary Education and Training/Training and HRD, subject to Academic Board confirmation.

Electives:

The elective studies strand is that set of units usually dealing with, and/or supporting, the discipline in which the student is engaged as an adult educator/HRD practitioner, or may be drawn from any area of the University, including the Faculty of Education.

Course Advice:

For course advice and further information; intending students should contact the course convener or the HRD administrative liaison officer on (06) 201 2470.

Professional Recognition:

Recognised by Canberra Institute of Technology (CIT) as a teaching qualification.

Course Convener:

Ms Barbara Chambers 5C61 (06) 201 5141

Course Structure:

Bachelor of Education in Human Resource Development

The following are required units

Professional Systems Communication

Development Analysis Systems

Stage 1 3524 Skills & Strategies 3533 Analysis of Methods 3276 Introduction to Human

in HRD* in HRD Communication

Stage 2 3522 Strategy Design & 3529 Program Design & 3532 Communication in

Implementation in HRD* Measurement in HRD Organisations

Stage 3 3266 Theory & Principles of 3272 Theory & Principles 3278 Theory & Principles of

Adult Education of Systems Evaluation Group Dynamics

Stage 4 3268 Complex Strategies 3528 Research Methods 3531 Management &

in HRD in HRD Leadership in HRD

* includes 3 hours weekly (or equivalent) totalling 100 hours of Professional Practice while undertaking the professional Development Strand units.

Elective units as under

Elective major chosen from the discipline in which the student from is engaged as an HRD practitioner, or from another approved area

Plus, an elective sub-major chosen from an approved area.

Plus, either advanced standing, if relevant, or further elective units (21 credit points)

Note: Students will need to construct a suitable course plan depending on whether they are enrolled on a part-time or full-time basis.

HANDBOOK 1996

Graduate Certificate in Community Counselling (260)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Applications in Counselling Options:
- Course Advice:
- Course Convener:
- Typical Part-time Course Structure:

The postgraduate courses in community counselling allow students, coming from a variety of disciplines, to build on previous experience, to gain new knowledge and techniques and then to apply their knowledge and these techniques from the perspective of their individual discipline areas. Such disciplines might include education, psychology, sociology, management, religious studies and health and human services.

The programs are designed for professionals wanting counselling skills, for example student welfare at schools, pastoral care, careers co-ordinators, welfare officers, personnel involved in community support schemes, Lifeline and family counsellors, equal opportunity staff, public service personnel where counselling skills are required, and people working with minority groups.

The courses combine theory with a high degree of workshop experiences and emphasis on the development of practical skills in counselling. The Graduate Certificate course (260) comprises the first year of the two years of part-time study involved in the Graduate Diploma course (147). Both courses involve between seven and nine hours of class contact per week each semester.

Course Duration:

1 year part-time

Admission Requirements:

The courses have been specifically designed for community workers who are working in counselling areas, yet may not have a degree with a psychology major.

The minimum admission requirements are as follows:

Either (a) possession of a minimum of an accredited three- or four-year undergraduate degree or an equivalent qualification, with at least two years' approved professional counselling experience and some staff development in the counselling area;

or (b) possession of a minimum of an accredited three- or four-year undergraduate degree or an equivalent qualification, with at least two years' approved professional counselling experience and coursework in the counselling area as part of their undergraduate course.

Applicants should attach to the application form all relevant academic documents (certified copies) and a brief written statement about background and reasons for applying.

Students may be interviewed for personal suitability and appropriateness for the course.

Course Requirements:

Satisfactory completion of 14 credit points of required units.

Applications in Counselling Options:

The purpose of the coursework is for students to be assisted in a problem-solving approach to real life issues. Content will be selected and pursued in depth to arrive at solutions to common situations in work settings. Within the course students may select one optional area for application of theory and practice learned in the core units. Current options may include:

crisis counselling, stress management, bereavement counselling, parent training, counselling young children, human sexuality, hypnotherapy, art therapy, in-depth counselling, body therapy, career counselling, counselling the elderly, counselling women, counselling men, assertion training, behaviour management, family counselling, marriage counselling, counselling minority groups, drug and addiction counselling, offender counselling, pain management, action methods and group work counselling, student counselling and pastoral care, the use of metaphor and myth in counselling.

Course Advice:

Students needing course advice should contact the course convener.

Course Convener:

Dr Sandi Plummer 5B76 (06) 201 2484.

Typical Part-time Course Structure:

HANDBOOK 1996

Graduate Certificate in Education (319)

- Course Duration:
- Admission requirements:
- Course structure and requirements:
- Status:
- Course advice:
- Course Convener:

This course aims to enhance professional knowledge and skills for current or future teaching, administrative and development roles in education-related institutions in government and non-government settings.

Course Duration:

One semester full-time or two semesters part-time

Admission requirements:

The degree of Bachelor of Education or a qualification deemed equivalent by the Admissions Committee, *or* a first degree and a Graduate Diploma in Education or graduate teaching qualification deemed equivalent by the Admissions Committee; *or* qualifications deemed to be equivalent to the above by the Admissions Committee and experience which indicates a strong possibility of success. However, in this case, it should be noted by applicants that the Graduate Certificate in Education is not a recognised teaching qualification.

Preferred applicants will have current professional experience in the area they nominate.

Course structure and requirements:

The course comprises two 6 credit point M level units or equivalents. As such, it can be understood as the first semester of the Master of Education by Coursework or by Research, if taken full-time, or the first year if taken part-time. Flexibility for students is central to the course and the award requirements can be met in a number of ways. For example:

(i) a student could satisfy the requirements for the award by successfully completing

4369 Education Research Project M 2A

and 4370 Education Research Project M 2B

where these 2 units were designed to be taken in sequence in an area of focus.

(ii) a student could satisfy the requirements for the award by successfully completing 2 six credit points M level units in:

Education Administration

or Curriculum Studies

or Special Education

or Health Education

(iii) a student could satisfy the requirements for at least half of the award (6 credit points) by successfully completing a professional development project (for example NPDP) approved by Academic Board and which has been developed in partnership with this University or another university in association with other educational agencies such as ACT Department of Education and Training and the Science Teachers Association

plus one other available six credit point M unit

or 4368 Education Research Project M1

(iv) a student could satisfy the requirements for the award by successfully completing Education Research Project M1 6 credit points where that unit comprises the successful completion of a unit taken at G, PG or M level for 3 or 4 credit points, for example one of:

3834 Nature of Adult Learning PG

1223 Applied Linguistics PG

1904 Materials for Language Teaching PG

3537 Human Resource Development Project G : Adult Education

0793 Discourse Analysis M

1944 Human Sexuality PG

3824 Research Seminar in Environmental Education PG

plus further additional study developed to complement that unit's focus and equivalent to 3 or 2 credit points

plus one other available 6 credit point M unit.

Status:

Students who have completed a professional development project (for example NPDP) which has been developed in partnership with this University or another university in association with other educational agencies and which meets Academic Board's minimum requirements for such projects, may be granted one unit (6 credit points) of status.

Course advice:

For detailed course advice, students should contact the course convener.

Course Convener:

Dr J Ann Hone 5C7 (06) 201 2502/2494.

HANDBOOK 1996

Graduate Certificate in Higher Education (329)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Convener:

The Graduate Certificate in Higher Education provides university teachers with an opportunity to undertake professional development to enhance their teaching effectiveness while also gaining a formal qualification related to teaching in higher education. The course provides a balance of theoretical and practical understandings with participants expected to undertake investigations of their own academic practice and unit or course delivery. There is sufficient flexibility in the course for participants to focus on their own teaching contexts and their own areas of interest.

Expected outcomes for participants include: developing a wider repertoire of approaches to course design, teaching and assessment; developing an understanding of theories and practices associated with teaching and learning in higher education; developing and implementing approaches to monitor and evaluate their own teaching; and, increasing their understanding of current issues in higher education.

This course, offered through the Centre for the Enhancement of Learning, Teaching and Scholarship (CELTS), is available on a fee-paying basis. Arrangements about fees will be made for University of Canberra staff wishing to do the course.

Course Duration:

The course is intended to be taken over a period of one year on a part-time basis.

Admission Requirements:

The normal admission requirement will be a university degree. Because participants will be expected during the course to draw on their own teaching experience and undertake investigations of their teaching practice, it will be essential for them to be concurrently engaged in some form of university teaching.

Course Requirements:

The course consists of three 4 credit point units.

Course Convener:

Associate Professor Sue Johnston 8D26 (06) 201 5176

[<---] Return to Handbook contents

HANDBOOK 1996

Graduate Certificate in Human Resource Development (265)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Professional Recognition:
- Course Convener:
- Typical Full-time Course Structure:

As part of the Commonwealth Government's agenda to restructure the work force, and in the process to improve the nation's productivity, there is to be a national system that describes the competencies and standards for every occupation. From this is to emerge an effective, efficient, responsive and coherent national vocational system that will require a substantial change in the curriculum and, in turn, the acquisition of different competencies by HRD practitioners.

The course has been designed to meet the changed requirements of practitioners as described in the HRD competencies. It recognises the need for practitioners to acquire an understanding of the new approach, to be able to design Competency Based Training to national standards, to conduct Competency Based Training, to write Competency Based Assessments, to integrate on-and off-the-job training, and to conduct Recognition of Prior Learning assessments.

The objectives of the course are:

· to provide training more substantial than the minimum required by the Training Guarantee Act;

· to offer a program that will require one year or less part-time study, depending on the mode of delivery;

· to provide for the HRD competencies as defined so far; and

· to enable practitioners to function fully within the new training framework.

The course is fully articulated with the Graduate Diploma in HRD and beyond.

Special Note: This course is available on a full-fee paying basis only, and places on the course are strictly limited. The cost in 1996 will be approximately $5000 ($6,500 residential).

Course Duration:

One semester full-time or equivalent part-time.

Admission Requirements:

Degree or equivalent, or as approved by the Dean of Faculty. A small percentage of non-degree students with relevant experience may be admitted.

Course Requirements:

The course requires the completion of three graduate level units totalling at least 16 credit points as follows:

(a) Two compulsory core (double) units totalling 13 credit points; and

(b) One elective unit of 3 credit points chosen from the list given below.

Course Advice:

For course advice and further information, students should contact the course convener.

Professional Recognition:

Recognised by the Institute of Value Management Australia.

Course Convener:

Ms Barbara Chambers 5C61 (06) 201 5141

Typical Full-time Course Structure:

Graduate Certificate in Human Resource Development

```
Semester 1   3523 Skills and Strategies in HRD G
             3521 Strategy Design and Implementation in HRD G
             Elective G Unit*
```

*One elective graduate unit to be selected from:

3412 Theory and Principles of System Evaluation G

3527 Research Methods in HRD G

3414 Theory and Principles of Group Dynamics G

3530 Management and Leadership in HRD G

3537 HRD Project G: Adult Education

3525 Research Project in HRD G

or one graduate level unit approved by the convener

or one unit from the electives offered in the Graduate Certificate in Human Resources Management within the Faculty of Management:

3971 Organisational Behaviour G

3925 Elements of HRM G (HRM 1)

3959 Managing Individual and Organisational Change G (HRM 2)

3926 Emerging Issues in HRM G (HRM 3)

3893 Strategic Business Planning G

3942 Introduction to Planning and Policy G

3951 Law of Employment G

In some cases the selection of the elective unit will be constrained by the requirement for students to meet prerequisites.

HANDBOOK 1996

Graduate Diploma in Community Counselling (147)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Applications in Counselling Options:
- Course Advice:
- Typical Part-time Course Structure:

The postgraduate courses in community counselling allow students, coming from a variety of disciplines, to build on previous experience, to gain new knowledge and techniques and then to apply their knowledge and these techniques from the perspective of their individual discipline areas. Such disciplines might include education, psychology, sociology, management, religious studies and health and human services.

The programs are designed for professionals wanting counselling skills, for example student welfare at schools, pastoral care, careers co-ordinators, welfare officers, personnel involved in community support schemes, Lifeline and family counsellors, equal opportunity staff, public service personnel where counselling skills are required, and people working with minority groups.

The courses combine theory with a high degree of workshop experiences and emphasis on the development of practical skills in counselling. The Graduate Certificate course (260) comprises the first year of the two years of part-time study involved in the Graduate Diploma course (147). Both courses involve between seven and nine hours of class contact per week each semester.

Applicants should attach to the application form all relevant academic documents (certified copies) and a brief written statement about background and reasons for applying.

Course Duration:

2 years part-time. The Graduate Certificate in Community Counselling is a subsumable award within the Graduate Diploma in Community Counselling. The Graduate Diploma in Community Counselling involves one year of part-time study following the completion of the Graduate Certificate in Community Counselling.

Admission Requirements:

Students must have satisfactorily completed the requirements of the Graduate Certificate in Community Counselling (260) or its equivalent.

Students may be interviewed for personal suitability and appropriateness for the course.

Course Requirements:

Satisfactory completion of 29 credit points made up of the Graduate Certificate units plus 5 semester units.

Applications in Counselling Options:

The purpose of the coursework is for students to be assisted in a problem-solving approach to real life issues. Content will be selected and pursued in depth to arrive at solutions to common situations in work settings. Within the course students may select two optional areas for application of theory and practice learned in the core units. Current options may include:

crisis counselling, stress management, bereavement counselling, parent training, counselling young children, human sexuality, hypnotherapy, art therapy, in depth counselling, body therapy, career counselling, counselling the elderly, counselling women, counselling men, assertion training, behaviour management, family counselling, marriage counselling, counselling minority groups, drug and addiction counselling, offender counselling, pain management, action methods and group work counselling, student counselling and pastoral care, the use of metaphor and myth in counselling.

Course Advice:

Students needing course advice should contact the course convener.

Course Convener:

Dr Sandi Plummer 5B76 (06) 201 2484

Typical Part-time Course Structure:

HANDBOOK 1996

Graduate Diploma in Education Secondary (220)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Teaching Studies Units Areas of Teaching Specialisation:
- School Practicum Component: Exemptions:
- Course Advice:
- Professional Recognition:
- Course Convener:
- Typical Full-time Course Structure:

Course Duration:

1 year full-time or equivalent part-time. Part-time students should note

(a) the program must normally be completed in two years;

(b) no provision can be made for classes outside those on the normal University timetable;

(c) all units have requirements involving extensive periods of work in schools;

(d) the units Teaching Studies G1 and Teaching Studies G2 require students to be in attendance at their assigned schools practising as teachers for continuous periods of at least five (5) weeks minimum duration;

(e) a preferred part-time sequence of units is available from the Faculty of Education Executive Assistant (5C38).

Admission Requirements:

The entry requirement is a degree from a tertiary institution or equivalent qualification which provides a suitable background for secondary teaching. For this the minimal entry requirement is that of a major or equivalent in the nominated teaching subject areas.

Entry to the course is only possible at the beginning of Semester 1 of the University academic year.

Course Requirements:

Satisfactory completion of seven (7) semester units.

Teaching Studies Units Areas of Teaching Specialisation:

The following subject areas will normally be available for prospective secondary teachers depending on student interest and lecturing staff availability. Students are asked to check the availability of specialisations with the Executive Assistant, Room 5C38, telephone (06) 201 2625.

Agriculture

Art+

Computing

English

English as a Second Language

Health Education

History

Languages Other Than English (LOTE)

Mathematics

Music

Sciences (Biology, Chemistry, Earth Sciences, Physics)

Social Sciences*

*Social Sciences include the following teaching areas: accounting, Australian studies, business studies, economics, legal studies, geography, political science, secretarial studies, social psychology, social studies/social sciences, society and culture (including Asian studies or sociology).

+Students wishing to become secondary art teachers should already possess an undergraduate degree in Art.

School Practicum Component: Exemptions:

Exemptions will normally not be granted from the in-school component of any course unit. This applies especially to the practice-of-teaching components of Teaching Studies G1 and Teaching Studies G2 (namely 1262 Education Field Experience G1 and 1263 Education Field Experience G2).

All students who have learnt English as a second language and who consider their accents or English ability may affect their teaching performance should seek advice from the convener prior to enrolment in the course.

Course Advice:

For further information and course advice, students should contact the course convener.

Professional Recognition:

The Graduate Diploma of Education (Secondary) course is fully accredited and recognised as a teaching qualification throughout Australia.

Course Convener:

Associate Professor John Nicholas 5B72 (06) 201 2480

Typical Full-time Course Structure:

Graduate Diploma in Education (Secondary)

```
         Semester 1                    Semester 2
YEAR 1   Teaching Studies G1^           Teaching Studies G2^
         1527 Education Studies G1     1528 Education Studies G2
         1262 Education Field          1529 Elective in Teaching
         Experience G1                 G*
                                       1263 Education Field
                                       Experience G2
```

^One unit to be chosen each semester from those available.

*The unit 1529 Elective in Teaching G, may be chosen from the options available early in Semester 1. In approved cases one of the three following independent study units may be substituted for the 1529 Elective in Teaching G unit:

0433 Curriculum Design Project G

0432 Research Assignment in Education G

0431 Special Study in Education G

To obtain approval to study one of the independent study units, students are required to have completed at a high level of competence two units of the program. Further, they must submit, in anticipation of fulfilling this first requirement, an acceptable proposal which outlines the area of study and the approach to be used by the mid-semester break of the semester prior to the one in which the study is to be done. Details relating to independent studies are available from the Executive Assistant (Room 5C38). Other University units may, with the permission of the Dean of Faculty, be studied in lieu of the 1529 Elective in Teaching G unit.

Please note that:

Teaching Studies G1 is a prerequisite for Teaching Studies G2;

1527 Education Studies G1 is a prerequisite for 1528 Education Studies G2;

Teaching Studies G1 is a prerequisite for 1529 Elective in Teaching G.

HANDBOOK 1996

Graduate Diploma in Human Resource Development (290)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Professional Recognition:
- Course Convener:
- Typical Part-time Course Structure:

The Graduate Diploma in Human Resource Development is designed for those who are practitioners or intending practitioners in any of the various areas of specialisation in adult education such as managers, trainers and instructors in the Public Service, teachers in technical and further education, personnel in training and development and in human resource development sections in industry. In particular the course is intended to appeal to those currently working in one of these specialist fields who wish to broaden their professional expertise. The course is in-service, practically-based and built around generic concepts of instruction and how adults learn while incorporating a degree of flexibility to cater for differences in organisational or institutional requirements. The course is therefore strictly in-service in nature and applicants will be expected to be employed in adult learning/teaching environments while undertaking their study.

The aim of the course is to assist participants to establish themselves further as professionals in any area of adult education, development and training or in human resource development in industry or in the public sector.

A variety of teaching/learning methods, strategies and processes is implemented during the course and includes lecture/discussion tutorial and workshop sessions, simulation, role-play, case studies and individual student seminar presentations. Other techniques involving self-paced learning, individual learning contracts, and other direct and indirect teaching/learning strategies are utilised and studied.

Course Duration:

As the course is in-service, it is expected that most students will proceed through it on a part-time basis; educationally this is a preferred option. Students proceeding on this basis could complete the course in four or more semesters of part-time study.

Admission Requirements:

The Graduate Diploma in Human Resource Development is available to

(a) candidates who have successfully completed a first degree in an Australian university or its equivalent. Such candidates would need to have actual full-time or part-time employment in adult learning environments, or the prospect of such employment, so that they are able to undertake the professional practice component concurrently with the first two core units, and

(b) members of professions who hold awards which are, in the opinion of the University's Admissions Committee, equivalent to a first degree.

Course Requirements:

The course consists of seven semester-length units. Four compulsory units forming a Professional Development Strand make up the core of the course, with students selecting three further units from a specified list.

Course Advice:

Students seeking course advice should contact the course convener.

Professional Recognition:

Recognised by the Canberra Institute of Technology (CIT) as a teaching qualification.

Course Convener:

Ms Barbara Chambers 5C61 (06) 201 5141

Typical Part-time Course Structure:

Graduate Diploma in Human Resource Development

University of Canberra, AUSTRALIA

HANDBOOK 1996

Graduate Diploma in Special Education (056)

- Specialisations:
- Admission Requirements:
- Course Requirements:
- Practicum Component:
- Course Advice:
- Course Convener:
- Typical Full-time Course Structure:
- Specialisation Units:

The course is designed for graduates who work in special educational settings; for support staff in regular schools (for example resource teachers, counsellors, speech pathologists); and for workers in community services for people with disabilities. Regular classroom teachers who wish to be better able to cater for children with learning and behavioural disabilities in the regular classroom will also find the course useful.

Students should note that the course is also offered in summer and winter "blocks", and when undertaken in this manner, it can be completed in two years. This arrangement is made available mainly for teachers who can attend campus only during school vacations.

Specialisations:

There are four specialisations within the Graduate Diploma in Special Education leading to postgraduate professional qualifications with separate emphases, namely resource support teaching, learning difficulties, developmental disabilities, and behaviour disorders. Students may select units across strands with the permission of the course convener.

Course Duration:

1 year full-time or equivalent part-time; (two years part-time in the summer and winter block format).

Admission Requirements:

The programs are for experienced teachers and other professionals directly involved with the provision of services to children and adults with special needs because of developmental, learning or behavioural disabilities. Applicants should therefore hold at least a three-year award in Education from an accredited tertiary institution; or be graduates in psychology, applied science or other relevant areas and have practical clinical experience in the provision of programs and services to individuals with disabilities.

Students with a Diploma of Teaching wishing to upgrade with a fourth year of study to a Bachelor of Education may specialise in special education by completing a package of the Graduate Diploma in Special Education course units plus the unit 3370 Curriculum Development and Evaluation. This specialisation is also available part-time and in summer and winter block format.

Course Requirements:

There is a core of four required units, common to all specialisations, plus further required and elective units depending on the specialisation selected. Each specialisation of the diploma comprises eight units (3 credit points each) and two professional experience units (2 credit points each).

Practicum Component:

The required professional experience units involve the completion of 100 hours of practicum in school and/or clinical settings for full-time students (some adjustments may be made to this time allocation for part-time students). Each specialisation unit also has practicum requirements to be completed, some of which are integrated within these units.

Course Advice:

Further particulars of the course and unit outlines are available from the Executive Assistant of the Faculty of Education, telephone (06) 201 2625.

Course Convener:

Professor Anthony Shaddock 5C5 (06) 201 5150

HANDBOOK 1996

Degree of Master of Arts in Community Education (Counselling) (by coursework & thesis) (332)

Degree of Master of Arts in Community Education (Human Resource Development) (by coursework & thesis) (332)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Course Conveners:
- Typical Course Structure:

These courses are designed to meet the needs of people who have postgraduate training in a variety of related social science areas, have community experience and who desire further specialised training in the theory and practice of community education.

Therefore the courses aim to provide professionals, working in a variety of community settings, with counselling and adult education skills which will allow them to facilitate problem solving, decision-making, and life-enhancing practices for themselves, other individuals, small groups and organisations. At the end of the program, participants will have expertise in staff development and training through insights of andragogical principles of developing people and researching/implementing other current methods.

Building on the stated aims of the postgraduate diplomas in human resource development and community counselling, specific objectives for the MA Community Education courses include:

· to develop appropriate understanding of research methodology and design including the case study and group experiment and design;

· to develop the ability to analyse data in social, behavioural, health sciences and education research;

· to demonstrate using appropriate methodology and analysis the ability to satisfactorily complete a field study in the area of community education.

Course Duration:

2 years full-time or equivalent part-time

Admission Requirements:

Admission to the Master of Arts in Community Education courses may come from a graduate diploma in a relevant field. The minimum admission requirements are as follows:

Either (a) possession of a minimum of an accredited three or four year undergraduate degree or an equivalent qualification, with at least two years' approved professional counselling experience or some staff development in the community education area;

or (b) possession of a minimum of an accredited three or four year undergraduate degree or an equivalent qualification, with at least two years approved professional counselling/adult education experience and coursework in the counselling/adult education areas as part of their undergraduate course.

Course Requirements:

Satisfactory completion of at least 48 credit points from required units.

Course Advice:

Students seeking course advice should contact the course convener.

Course Conveners:

Counselling: Dr Sandi Plummer 5C76 (06) 201 2484

HRD: Ms Barbara Chambers 5C61 (06) 201 5141

Typical Course Structure:

For Master of Arts in Community Education (Counselling) - Part-time basis only.

Study program follows the same pattern as for the Graduate Diploma in Community Counselling (Course No. 147), followed by research undertaken in the units 4233 Field Study in Counselling AM and 4234 Field Study in Counselling BM.

For Master of Arts in Community Education (Human Resource Development)

Study program follows the same pattern as for the Graduate Diploma in Human Resource Development (Course No. 290), followed by research undertaken in the units 4248 Community Education Thesis M (part-time) *or* 4226 Community Education Thesis M (full-time) (24 credit points each).

- Status for previous studies:
- Course Convener:

The degree of Master of Education is a 48 credit point course for graduates who have some professional experience in education. There are three ways of undertaking the course, and two awards, Master of Education (Coursework) and Master of Education (Research).

Areas of Focus:

Currently the Master of Education has four special areas of focus, namely, curriculum studies, education administration, health education and special eduction. Each area generates a number of coursework units. In addition, the program provides opportunities for further study and/or specialisation in other areas taught within the Faculty, as for example, arts education, mathematics education, science and technology education, second and foreign language studies, language and literacy studies, early childhood education and computers and education.

Course Duration:

Minimum two years full-time or its equivalent in part-time study although in some cases the granting of advanced standing may reduce the minimum duration to not less than one year full-time study or its part-time equivalent.

Maximum: three years full-time or its part-time equivalent.

Admission Requirements:

Applicants should hold:

(a) the degree of Bachelor of Education, or a qualification deemed equivalent by the Admissions Committee; *or*

(b) a first degree and a Graduate Diploma in Education, or a graduate teaching qualification deemed equivalent by the Admissions Committee; *or*

(c) qualifications deemed to be equivalent to the above by the Admissions Committee and experience which indicates a strong possibility of success. However, in this case, it should be noted by applicants that the Master of Education is not a recognised teaching qualification.

Preferred applicants will have current professional experience in the area they nominate.

Conditional admission to the course:

In special circumstances a candidate may be admitted to conditional candidature. Candidates so admitted shall be required to undertake such units or studies as may be determined by Academic Board. Satisfactory completion of such studies may or may not be credited towards the degree.

Status for previous studies:

For the Master of Education by Research (Thesis type 2 pathway) up to 12 credit points of coursework status may be awarded to a student who, prior to enrolment in the Master of Education, has completed at another institution masters level studies which are deemed equivalent in content and standard to units of the Master of Education program.

For the Master of Education by Coursework advanced standing of up to 24 credit points is possible for some candidates depending on prior qualifications and experience. Enquires should be made to the course convener.

Course Convener:

Dr J Ann Hone 5C7 (06) 201 2502

University of Canberra, AUSTRALIA

HANDBOOK 1996

Degree of Master of Education (Research) by Thesis Type 1 or Thesis Type 2 (055)

- Course Requirements:
  - By Thesis Type 1 (thesis alone, 48 credit points)
  - By Thesis Type 2:

Course Requirements:

By Thesis Type 1 (thesis alone, 48 credit points)

Candidature by thesis alone is dependent upon the Master of Education Committee's acceptance of a thesis proposal submitted by the applicant. The applicant will need to have demonstrated to the Committee a capacity for research at an advanced postgraduate level and have an academic record deemed by the Committee to be of sufficient standard to proceed by thesis alone. Applicants who wish to proceed by Thesis Type 1 will be expected to possess an honours bachelor degree or equivalent and must submit with their application a preliminary thesis proposal and evidence that a member of academic staff in the Faculty of Education has agreed to supervisor their research.

Thesis alone students need to enrol in either 0500 Master of Education Thesis Type 1 (part-time) or 2825 Master of Education Thesis Type 1 (full-time) units. The thesis shall comprise advanced study and research embodying an original investigation of a topic falling within one of the fields of study in education for which the Master of Education degree has been accredited. Two supervisors will be appointed on the advice of the Master of Education Committee and confirmed by the University's Higher Degrees and Scholarship Committee.

The supervisors shall report on the progress the student at the end of each semester. The thesis will be examined by two examiners external to the University.

By Thesis Type 2:

During the initial on-campus period of study, the candidate is required

(a) to complete and pass two coursework units of 6 credit points each related to his/her interests and chosen from the specialisations available after consultation with his/her adviser

and

(b) to complete and pass the 12 credit points year long unit Master of Education Thesis Preparation.

During the second part of the student's candidature, the candidate is required to complete a significant piece of work in the form of a thesis (Thesis Type 2 for 24 credit points) which will be assessed by two examiners external to the University. Thesis Type 2 candidates enrol in either 1755 Master of Education Thesis Type 2 (part-time) or 2826 Master of Education Thesis Type 2 (full-time).

In each year of candidature the academic progress of each candidate shall be reviewed. If progress has been unsatisfactory, a candidate may be directed to discontinue his/her course.

Note: It is possible to begin the Master of Education by research in this Thesis Type 2 pathway and, on the attainment of particularly good results in one or two units, apply to be considered for candidature by thesis alone. Candidates should be aware, however, that this could have HECS implications.

HANDBOOK 1996

Degree of Master of Education by Coursework (239)

- Course Requirements:

Course Requirements:

Students are required to complete and pass firstly, six M level units of 6 credit points each and secondly, the 12 credit point unit Professional Study in Education (unit 3441 if taken full-time; unit 3135 if taken part-time). The professional study encourages students to undertake work directly relevant to their professional life and can be a project of an applied nature.

Students select the required six M level units from those available in the list below and after consultation with the Course Convener. Normally, at least two units will be chosen in the student's special area of focus and with the professional study in mind. Students should note that the Education Research Project units provide a means for further study and/or specialisation in other areas taught within the Faculty of Education.

2599 Curriculum Design and Development M

3359 Curriculum Inquiry M

0583 Developments in Special Education M

0642 Education Planning M

2604 Educational Policy and Politics M

4368 Education Research Project M1

4369 Education Research Project M2A

4370 Education Research Project M2B

4292 Education Evaluation M

1530 Health Education M1

1531 Health Education M2

0605 Implementing Change M

0796 Issues in Special Education M

3028 Social Change and Education M

0693 Theory and Process in Education Administration M

Note: In most cases, the Master of Education by Coursework will not be accepted as an appropriate prerequisite for admission to a research based PhD course.

Degree of Master of Education in Counselling (228)#

- Course Duration:
- Course Requirements:
- Professional Recognition:
- Course Convener:
- Course Structure:

This program is being discontinued and will thus be available only for students who have been previously enrolled in the course and who have completed most coursework units.

Course Duration:

Up to a maximum of ten years (part-time) but not less than 4 years (part-time)

Course Requirements:

The course requires 11 units, including two field study units as well as two professional field experience units. The *coursework* is normally completed part-time in two years, as is the *thesis* or field study component in a further two years.

Professional Recognition:

The course is currently registered and accredited with the Australian Psychological Society for associate membership.

Course Convener:

Dr Sandi Plummer 5C76 (06) 201 2484

Course Structure:

3419 Assessment and Interpretation M 1 : Psychometric

HANDBOOK 1996

Degree of Doctor of Philosophy (208)

- Period of Candidature:
- Admission Requirements:
- Course Requirements:
- Enrolment:
- Course Convener:

The degree of Doctor of Philosophy in the field of Education involves candidates in a program of research requiring the presentation of a doctoral thesis which should provide evidence of the candidate's ability to conceive, execute and report on a scholarly piece of research in advanced theory or Students practice.

The objectives of the course are

(a) to promote and provide a means of high levels of education, research and development for those people directly involved in the design, operation and future development of Australian education.

(b) to provide a program of research suitable for teachers, administrators and officers in related fields of education.

Period of Candidature:

The duration of the course for full-time candidates will normally be three years. The duration of the course for part-time students will be proportionately longer. The maximum period of study for the course for a full-time student will be five years, and eight years for a part-time candidate, subject to satisfactory academic progress.

Admission Requirements:

Intending candidates should make application to the Faculty for admission to the course by completing a PhD application form which is available from the Faculty's Executive Assistant (Room 5C38) (06) 201 2625.

Applicants should submit with their application a thesis proposal and an outline of their proposed area of research as explained in the Doctor of Philosophy application form. Prior to selection, applicants should be prepared to attend an interview with the Faculty of Education's Higher Degree Committee, at which they will be expected to further define the nature of the problems they propose to investigate and demonstrate their competence to undertake doctoral research in that field of education.

Course Requirements:

The doctoral thesis should demonstrate that the candidate has academic and technical competence in the field and has done research of an original and independent character. The thesis must add to or modify what was previously known, and present significant original analysis of the subject based upon investigation.

Enrolment:

Candidates must enrol in the unit 1257 Education Doctoral Thesis D (part-time) or 1258 Education Doctoral Thesis D (full).

Course Convener:

Dr J Ann Hone 5C7 (06) 201 2502

Other Courses

- Tertiary Course in Development Education
- Teaching English to Speakers of Other Languages
- Graduate Certificate in TESOL (270)
  - Course Structure:
- Required Units
- and one elective unit chosen from
- Graduate Diploma in TESOL (114)
  - Course Structure:
- Degree of Master of Arts in TESOL (115)
  - Admission requirements:
  - Typical Full-time Course Structure:
- English Language Intensive Courses for Overseas Students (ELICOS)

Tertiary Course in Development Education

The course has been designed for experienced educators from developing countries. Considerable flexibility has been built into the program, which is aimed at developing comparative experience and knowledge in fields relevant to the interests of the participants. For further information, telephone the Faculty's Executive Assistant on (06) 201 2625.

Teaching English to Speakers of Other Languages

The School of TESOL and International Education offers the following courses to full fee paying overseas students. A limited number of Australian Resident students may be accepted into these courses.

Students are advised to consult the Description of Units section of this Handbook for details of the class contact hours, syllabus and any other requirements of the units listed for TESOL courses. They should also check the Unit Availability section of this Handbook or seek further advice from the faculties concerned.

Graduate Certificate in TESOL (270)

A course comprising four selected TESOL units which may be completed in either one semester full-time, or two semesters part-time, or intensively during a summer program.

Course Structure:

Required Units

1871 TESOL Methodology PG (double unit)

or

1231 Teaching and Learning (TESOL) PG *and either*

1869 Issues in Curriculum Design and Evaluation PG *and*

1229 Linguistics PG *or*

1223 Applied Linguistics PG

and one elective unit chosen from

4291 Language Teaching in Action PG

4326 English Language and Culture PG

1905 Technology in Language Teaching PG

1228 Language Culture and Society PG

1904 Materials for Language Teaching PG

Graduate Diploma in TESOL (114)

A full-time, two semester course with a practical focus based on an understanding of language and learning theory.

Course Structure:

Graduate Diploma (TESOL)

Compulsory Units

1229 Linguistics PG

1871 TESOL Methodology PG (double unit)

1233 Writing PG

1223 Applied Linguistics PG

1904 Materials for Language Teaching PG

Two electives chosen from:

4291 Language Teaching in Action PG

4326 English Language and Culture PG

1231 Teaching and Learning (TESOL) PG

1905 Technology in Language Teaching PG

1228 Language, Culture and Society PG

Degree of Master of Arts in TESOL (115)

A full-time, two or four semester course combining practical and theoretical elements and with a field study component which allows participants to study in depth a topic of particular interest to them.

Admission requirements:

Normally, completion of the Graduate Diploma in TESOL, when a Master of Arts in TESOL then consists of a two semester course. Students who do not have a postgraduate diploma in TESOL are required to first complete the postgraduate diploma before proceeding to the Master of Arts in TESOL. In this case the Master of Arts in TESOL requires four semesters of full-time study.

Typical Full-time Course Structure:

Master of Arts (TESOL)

Semester 1

0793 Discourse Analysis M

0784 Language Tests M

0810 Study Project and Report M (year-long)

One elective*

Semester 2

0800 Grammar and Communication TESOL M

0810 Study Project and Report M (year-long)

Two Electives*

*Electives

To be selected from -

1951 Special Studies in Education (TESOL) M

1870 Language Study PG

1224 Aspects of Literary Criticism PG

0807 Language Change M

1231 Teaching and Learning (TESOL)

3835 Language Planning

4291 Language Teaching in Action PG

English Language Intensive Courses for Overseas Students (ELICOS)

These include:

· General English - offered at all levels from beginners to very advanced.

· English for Academic Purposes

· English language preparation for students who intend to further their studies in Australia.

· English for International Relations for those whose work required them to communicate in English in an international context.

· English for Teachers for those who wish to upgrade their English language skills and professional experience.

· English for Specific Purposes for those with special professional requirements including diplomats and government officials.

For further information on courses available in this area, contact the School of TESOL and International Education on (06) 201 2077.

General Information

- Dean:
- Executive Officer:
- General Enquiries:
- Degrees with Honours
- Field work
- Materials
- Professional Recognition

Dean:

Professor Judith Brine

Executive Officer:

Ms Jenny Coggins

General Enquiries:

7A28 (06) 201 5071

The Faculty of Environmental Design presently offers undergraduate, postgraduate and double degree courses leading to the awards listed on the previous page. Students should refer to the section of this Handbook entitled Information for Students, in particular those paragraphs covering definition of University terms, admission, enrolment and academic progress. Prospective and newly-enrolled students should also note the knowledge assumed for each course.

The Faculty aims to provide students with educational opportunities to develop:

- an appreciation of the socio-economic, cultural, environmental and ethical implications of designing and realising contributions to the environment;
- the skills, attitudes and knowledge which are appropriate for entering into and contributing positively to, a design profession;
- the creative and/or managerial talents necessary for conceiving and implementing beneficial change in the environment;
- academic skills associated with research, thinking and communicating at an advanced conceptual level.

The Faculty places great importance on students having more than a narrowly defined degree. Breadth of education is an important basis for having a flexible approach to work and for graduates to understand the role of the professions in Australian society. An opportunity is therefore provided for students to take units in other faculties or other courses in the Faculty of Environmental Design. Students must take a sequence of units either as a major or as two minors.

Degrees with Honours

Degrees with honours are available in the undergraduate courses. Candidates are selected on the basis of meritorious performance over the earlier years of their respective courses.

Field work

Compulsory field work is part of many of the units in all undergraduate courses, and students will be required to attend excursions for single days or weekends or for longer periods during class free periods. Students will be expected to contribute to a substantial proportion of the cost of field work.

Materials

Students will be expected to contribute to the cost of materials for projects.

Professional Recognition

Professional institutes go through a process of recognising courses as providing a suitable basis for entering the profession. The Royal Australian Institute of Architects, the Australian Institute of Quantity Surveyors, the Australian Institute of Building, the Design Institute of Australia and the Australian Institute of Landscape Architects recognise the undergraduate courses in architecture, construction management and economics, industrial design, and landscape architecture respectively.

HANDBOOK 1996

Double Degree of Bachelor of Applied Science in Environmental Design/Bachelor of Architecture (300)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Electives:
- Course Advice:
- Head of Department:
- Typical Full-time Course Structure:

This course is a double-degree course leading to the award of Bachelor of Applied Science in Environmental Design on successful completion of three years of full-time study, and the award of Bachelor of Architecture on successful completion of a further two years of full-time study (refer to the course description for the Bachelor of Architecture degree). Before entering the second component of the double degree course, students must complete a program of practical experience, as approved by the Dean of the Faculty, extending over a total period equivalent to at least two semesters, unless waived by the Dean.

The objectives of the degree of Bachelor of Applied Science in Environmental Design are to provide students with educational opportunities which enable them:

- to understand the importance of the natural and cultural environment and the ways in which design can contribute to its conservation and enhancement;
- to appreciate that an environmental designer needs to be aware of the cultural, social and economic implications of design activities;
- to understand the nature of the contributions which a designer can make aesthetically, socially, environmentally and economically through the design of buildings, structures and environments;
- to gain a tertiary education which equips them to think and communicate at a mature level, and to set down patterns for continuous learning in adult professional life;
- to develop special skills of visualisation, manipulation and depiction of space, form and construction; and
- to acquire theoretical, historical, technical and professional knowledge of the kind that forms the foundation for the discipline and profession of architecture.

Course Duration:

3 years full-time

Assumed Knowledge:

ACT: Advanced Mathematics and English (T) major; NSW: 2u or 3u Mathematics, and 2u English.

Course Requirements:

72 credit points from a minimum of 22 units.

Electives:

18 credit points from elective units which must be approved by the course director.

Course Advice:

Students who need advice about their studies should consult the year coordinator.

Head of Department:

Mr Donald Dunbar 7B29 (06) 201 2579

Typical Full-time Course Structure:

HANDBOOK 1996

Degree of Bachelor of Architecture (300)

- Course Duration:
- Course Requirements:
- Electives:
- Course Advice:
- Professional Recognition:
- Head of Department:
- Typical Full-time Course Structure:

Note: Students must first complete the 3-year degree course of Bachelor of Applied Science in Environmental Design or its equivalent and generally also at least 2 semesters of practical experience.

The objectives of the degree of Bachelor of Architecture are:

- to build on the ethical, aesthetic, technical and environmental knowledge, attitudes and skills which the Bachelor of Applied Science in Environmental Design is intended to provide, and to give students the opportunity to develop them in relation to the profession of architecture;
- to give students an appreciation of the scope of the discipline and the responsibilities of the profession of architecture and to understand the place of architecture in relation to other disciplines and professions; and
- to produce graduates who can confidently enter the profession of architecture knowing that they will have acquired knowledge or skills in some areas which will contribute to improving the cultural environment, society and the architecture profession.

Students whose performance over the early years of the course is of sufficient merit may be invited to enrol in an honours program in the final year. The degree with honours has two further objectives which provide an opportunity for students:

- to demonstrate superior performance in their coursework; and
- to develop academic skills, knowledge and practices to qualify them to proceed with postgraduate study should they wish to do so.

Course Duration:

2 years full-time.

Course Requirements:

Following completion of the requirements of the Bachelor of Applied Science in Environmental Design, students must complete at least 48 credit points from a minimum of 16 units.

Electives:

Students must complete at least 6 credit points from elective units approved by the course director.

Course Advice:

Students who need advice about their studies should consult the year coordinator.

Professional Recognition:

The Royal Australian Institute of Architects recognises the Bachelor of Architecture as providing a suitable basis for entering the profession.

Head of Department:

Mr Donald Dunbar 7B29 (06) 201 2579

Typical Full-time Course Structure:

Bachelor of Architecture (following the completion of the 3 year degree course of Bachelor of Applied Science in Environmental Design.)

	Semester 1	**Semester 2**
YEAR 4	Twelve Months Practical Experience	(Prerequisite for Second Tier Course)
YEAR 5	3614 Architectural Design A 3622 Built Environments, Impact Assessment 3600 Design Professional Practice 4303 Research Methods in Environmental Design *or* Approved Faculty Elective	3613 Architectural Design B 3616 Architectural Technology A 3619 Environmental Control 3612 Design Professional Conduct
YEAR 6	3618 Urban Design 3599 Design Theory and Criticism* 3623 Total Property Management* 4299 Architectural Dissertation *or* 4211 Architectural Specialisation	3615 Architectural Design 3617 Architectural Technology B 3598 Design Theory and History 3611 Design Professional Studies

*Honours students must take the Faculty Honours unit (4157 Honours, Faculty of Environmental Design) and *either* 3599 Design Theory and Criticism *or* 3623 Total Property Management.

HANDBOOK 1996

Degree of Bachelor of Construction Management and Economics (269)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Electives:
- Course Advice:
- Professional Recognition:
- Head of Department:
- Typical Full-time Course Structure:

The objectives of the degree of Bachelor of Construction Management and Economics are:

- to provide the construction industry and public sector organisations with innovative and adaptive professionals who will perform with excellence and in a manner which reflects a high degree of professionalism and ethical behaviour;
- to equip students with the necessary knowledge and skills so as to practise in the broad field of management and economics of the design of the construction process;
- to provide a mind-set for continuously adapting to change;
- to provide a qualitative understanding of the industry and its position relative to the rest of the economy;
- to encourage both undergraduate and postgraduate research;
- to develop an awareness of international management practice, financing, design, and construction methods; and
- to develop an awareness of environmental, social, political and economic issues.

Students whose performance over the first three years of the course is of sufficient merit may be invited to enrol in an honours program in the fourth year. The degree with honours has two further objectives which provide an opportunity for students:

- to demonstrate superior performance in their coursework;
- to develop academic skills, knowledge and practices to qualify them to proceed with postgraduate study should they wish to do so.

Course Duration:

4 years full-time which includes one semester of practical experience.

Assumed Knowledge:

ACT: Advanced Mathematics and English (T) major; NSW: 2u Mathematics and 2u English.

Course Requirements:

Students must complete at least 99 credit points from 29 units.

Electives:

Choice of electives is limited. However, students are required to take a number of units from other faculties, including a sequence of units in economics.

Course Advice:

Students needing advice about their studies should consult the year coordinator.

Professional Recognition:

The Australian Institute of Building and the Australian Institute of Quantity Surveyors recognise the course as providing a suitable basis for entering the respective professions.

Head of Department:

Degree of Bachelor of Graphic Design (302)

- Course Duration:
- Assumed Knowledge:
- Useful Knowledge:
- Course Requirements:
- Electives:
- Course Advice:
- Head of Department:
- Typical Full-time Course Structure:

The aim of the degree of Bachelor of Graphic Design is to prepare graduates to meet the present and future needs of the community as professional graphic designers. The overall objective of the course is to produce a professional, creative, graphic design graduate able to fulfil personal, professional and community objectives.

The course will develop to an advanced level the knowledge, attitudes and technical skills required to enable graduates to enter the profession of graphic design. More specifically it will develop:

- the intellectual and conceptual abilities necessary to make design decisions and recommendations for their implementation;
- creative abilities which give imaginative visual form to messages, events, ideas and values in graphic communication;
- visual communication skills to convey design concepts;
- understanding of the processes which will enable graduates to manage, implement and evaluate graphic design projects;
- understanding of the social and cultural roles of the design professions and in particular graphic design;
- intellectual appreciation of the nature of graphic communication in its diverse visual aspects; and
- awareness and understanding of the evolving technologies and processes of the graphic design profession.

Students whose performance over the first three years of the course is of sufficient merit may be invited to enrol in an honours program in the fourth year.

Course Duration:

4 years full-time

Assumed Knowledge:

ACT: English (T) major; NSW: 2u English

Useful Knowledge:

Although no prior knowledge of art is assumed, it is considered to be a useful subject.

Course Requirements:

Students must complete at least 96 credit points from 29 units.

Electives:

Students may choose up to seven elective units either from other courses in the Faculty or from other faculties in the University.

Course Advice:

Students needing advice about their studies should consult the year coordinator.

HANDBOOK 1996

Degree of Bachelor of Industrial Design (041)

- Course Duration:
- Assumed Knowledge:
- Useful Knowledge:
- Course Requirements:
- Electives:
- Professional Recognition:
- Course Advice:
- Head of Department:
- Typical Full-time Course Structure:

The objectives of the degree of Bachelor of Industrial Design are:

- graduates of the course shall have an understanding of the social, cultural and economic imperatives which form the environment within which they will design;
- they shall have an understanding of the history of the industrial design profession and of the historical background which gave rise to it;
- they shall have a level of creativity, technological expertise and professional ability sufficient to allow them to make an immediate contribution to an employer or to the profession of design;
- they shall have an attitude to learning which will allow flexibility of mind and encourage the maintenance and advancement of expertise;
- they shall have experience of designing in a broad project spectrum, where students have the opportunity to develop personal methodologies which may contribute to the profession; and
- they shall understand the human-centred nature of successful design and shall be aware of the complex nature of the design process.

Students whose performance over the first three years of the course is of sufficient merit may be invited to enrol in an honours program in the fourth year. The degree with honours has two further objectives which provide an opportunity for students:

- to demonstrate superior performance in their coursework; and
- to develop academic skills, knowledge and practices to qualify them to proceed with postgraduate study should they wish to do so.

Course Duration:

4 years full-time

Assumed Knowledge:

ACT: English (T) major; NSW: 2u English.

Useful Knowledge:

Art, design technology and physics are considered to be useful subjects.

Course Requirements:

Students must complete at least 96 credit points from 23 units.

Electives:

Students must choose a sequence of units which must include no more than six credit points at level 1/2 and at least 15 credit points at level 3/4 or higher from other courses in the Faculty or from other faculties in the University.

Professional Recognition:

The Design Institute of Australia recognises the course as providing a suitable basis for entering the profession.

Course Advice:

Students needing advice about their studies should consult the year co-ordinator.

Head of Department:

Mr Don Carson 7C40 (06) 201 2307

Typical Full-time Course Structure:

Bachelor of Industrial Design

	Semester 1	Semester 2

HANDBOOK 1996

Degree of Bachelor of Landscape Architecture (042)

- Course Duration:
- Assumed Knowledge:
- Useful Knowledge:
- Course Requirements:
- Electives:
- Professional Recognition:
- Course Advice:
- Head of Department:
- Typical Full-time Course Structure:

The objectives of the degree of Bachelor of Landscape Architecture are:

- to promote students' awareness of the landscape within its spatial, cultural and ecological frameworks;
- to engender an ethic of stewardship of the landscape within the context of the concept of creative conservation and sustainable systems;
- to develop, through teaching of the design process, a reflective approach to design where creative and analytical aspects are recognised as equal parts of an alternating process;
- by using urban, rural and regional projects which involve divergent value sets, to develop student awareness of the cultural, social, legislative and economic environments in which their design decisions are made;
- to give students an understanding of the technological skills that are necessary for successful design implementation;
- to give students a basis on which to operate, after appropriate experience, as competent professionals who will be capable of improving methodologies used in practice and to be able to adapt to changes in the profession.

Students whose performance over the first three years of the course is of sufficient merit may be invited to enrol in an honours program in the fourth year. The degree with honours has two further objectives which provide an opportunity for students:

- to demonstrate superior performance in their coursework; and
- to develop academic skills, knowledge and practices to qualify them to proceed with postgraduate study should they wish to do so.

Course Duration:

4 years full-time.

Assumed Knowledge:

ACT: 2u English; NSW: 2u English.

Useful Knowledge:

Social sciences, natural sciences and mathematics are considered to be useful subjects.

Course Requirements:

Students must complete at least 96 credit points from 29 units.

Electives:

Students must achieve at least 21 credit points from any 7 elective units including no more than two units at level 1/2 either from other courses in the Faculty or from other faculties in the University. Electives must be approved by the course director.

Professional Recognition:

The Australian Institute of Landscape Architects recognises the course as providing a suitable basis for entering the profession.

Course Advice:

Students needing advice about their studies should consult the year coordinator.

Head of Department:

Associate Professor Kath Wellman 7D34 (06) 201 2575

HANDBOOK 1996

Double Degree of Bachelor of Applied Science in Environmental Design/Bachelor of Laws (281)

- Course Duration:
- Assumed Knowledge:
- Admission Requirements:
- Administrative Arrangements:
- Course Structure:
- Course Advice:
- Professional Recognition:
- Head of Department:
- Typical Full-time Course Structure:

This double degree is offered jointly with the Faculty of Management and seeks to provide a high level professional program of teaching and learning in the areas of environmental design and in law. The Bachelor of Laws component aims to meet the basic educational requirements for admission to legal practice in the Supreme Court of the Australian Capital Territory.

Course Duration:

5 years full-time; maximum period of study 8 years

Assumed Knowledge:

ACT: Advanced Mathematics, English (T) major; NSW: 2u or 3u Mathematics, 2u English.

Admission Requirements:

The entry level for each double degree course is determined in consultation between the Faculty of Environmental Design and the Faculty of Management. Admission to a double degree course will ensure that the student will be permitted to proceed into the Bachelor of Laws component of the course. However, before the final two years (full-time equivalent) of the Bachelor of Laws course can be undertaken, students undertaking a double degree must have satisfied the academic requirements for the first degree in the double degree course.

Administrative Arrangements:

An information booklet on the course structure of the double degree course may be obtained from the School of Law office (6C31).

Students undertaking the double degree course will be able to be awarded the first degree in the double degree course upon completion of the academic requirements for that degree.

Course Structure:

The course structure of the double degree course requires that students admitted to a double degree course must undertake 6 required law units as part of the first degree course in the double degree sequence.

At the completion of the requirements of the Bachelor of Applied Science in Environmental Design (including the 6 required units mentioned above), students will undertake 11 core LLB units (amounting to 44 credit points) and four elective law units (amounting to at least 12 credit points).

Course Advice:

Students are encouraged to seek course advice from the course director if in doubt about their study program.

Professional Recognition:

The accredited Bachelor of Laws program is recognised by the Supreme Court of the Australian Capital Territory for the purpose of admission to legal practice.

Head of Department:

Mr Donald Dunbar 7B29 (06) 201 2579

Typical Full-time Course Structure:

Applied Science in Environmental Design/Bachelor of Laws

HANDBOOK 1996

Graduate Certificate in Strategic Asset Management (318)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Enrolment:

The course is available as a full-fee paying course and is delivered in all states of Australia and overseas on a needs basis. Contact should be made with the National Centre for Value Management, telephone (06) 201 2572 for details of the time and location of the next available course.

The graduate award provides the opportunity for professionals to extend their skills and knowledge in a related area of strategic asset management. These include project management, value management, risk management, asset management, quality management and procurement. The course will draw on the participants' professional expertise and background and will expand their skill base to include the management strategies.

The objectives of the course are to:

- meet the requirement of individuals and organisations for innovative management strategies by providing the necessary underpinning skills and knowledge to apply the strategies.
- promote the sharing of knowledge and expertise through the network of participants
- forge closer links between the University, the individual participants and their organisations by promoting a network of contacts

Course Duration:

The course will generally extend over a period of six months taking into account the four phases of delivery for each of the three units. They are:

Preparation Phase: Pre-course reading and assignment

Intensive Phase: Intensive one-week lectures and tutorials

Follow-up Phase: Assignments and structured exercises

Applications Phase: Application of skills to a significant problem situation in the workplace.

Admission Requirements:

A bachelor degree or another qualification deemed by the University's Admissions Committee to be equivalent is required for admission to the course. In addition, it is required that the participants have four years of appropriate professional experience to gain the maximum benefit from the course.

Course Requirements:

Applicants must be available to attend at least two intensive weeks of instruction and tutorials and by means of a major project, be able to implement newly developed skills in the workplace. They should therefore have the opportunity to apply the management strategy in a realistic environment and be provided with constructive feedback by suitably experienced colleagues. There is also a requirement that a journal be maintained throughout the course to provide a sound basis for reflective learning and so that personal development can be observed.

Enrolment:

The course is offered as a full-fee paying course through the National Centre for Value Management. Expressions of interest should be forwarded in the first instance to the National Centre for Value Management, Faculty of Environmental Design telephone (06) 201 2572, facsimile (06) 201 5329.

HANDBOOK 1996

Degrees of Master (by thesis)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Enrolment:

Architecture (192)

Construction Management and Economics (277)

Environmental Design (158)

Industrial Design (196)

Landscape Architecture (195)

Urban and Regional Planning (110)

These masters degree courses consist of a thesis which shall comprise advanced study and research embodying an original investigation of a topic falling within one or more fields of study for which the masters degree has been accredited. Candidates whose thesis will be in a cross-disciplinary area will enrol in the Master of Environmental Design course. Those whose thesis will be predominantly in one area will enrol in the appropriate degree course. The thesis may take the form of a written report with drawings or other supplementary material.

Candidates may undertake a thesis only in an area where supervision can be provided. Staff research interests currently include: value management; total quality management; economic analysis; building services; architectural appreciation; urban design; urban environment, its history and conservation; urban landscaping and horticulture; conservation theory; bionics; ergonomics; social research and design; contemporary landscapes; landscape history; landscape planning; landscape rehabilitation; historical cultural landscapes; design management; oriental and traditional architecture and design; concrete technology; durability of materials; and thermal behaviour of buildings.

Course Duration:

2 years full-time or equivalent part-time.

Admission Requirements:

Entrance to the masters degree courses is open to graduates in relevant disciplines. Graduates in other disciplines or those who have successfully completed degree courses of three-year duration only, will be required to take bridging units unless they can demonstrate that their work experience has served the same purpose.

Applicants should attach a preliminary research proposal to their applications, under the following headings:

- the aims and objectives of the research;
- the problems/issues to be investigated in the thesis;
- methods to be employed in conducting and organising the research;
- resource implications including substantial equipment needs;
- proposed research timetable, and
- reasons for choosing to undertake your research at the University of Canberra.

Course Requirements:

Students are required to complete a thesis valued at 48 credit points.

Enrolment:

Students enrol in either 1812 Environmental Design Masters Thesis or 2861 Environmental Design Masters Thesis (Full).

[<---] Return to Handbook contents

University of Canberra, AUSTRALIA

HANDBOOK 1996

Degree of Doctor in Environmental Design (320)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Enrolment:
- Course Convener:

This professional doctorate degree in Environmental Design provides the opportunity for advanced study and reflection on practice for professionals of standing in the fields associated with the Faculty of Environmental Design's undergraduate and postgraduate courses. The degree will draw on a candidate's professional experience and expertise and extend them and it will provide the opportunity to bring together in a scholarly submission professional work done over a period of time and to develop it is new directions.

The objectives of the course are

(a) to develop closer links and mutually beneficial associations between the University and senior professionals in fields associated with the Faculty's courses;

(b) to contribute to the development of professional practice in these fields.

Course Duration:

A minimum of 3 years full-time (subject to the granting of status) or its equivalent part-time. The maximum period of study will be 4 years full-time and 8 years part-time subject to satisfactory progress.

Admission Requirements:

A degree of bachelor with honours (or another qualification deemed by the University Admissions Committee to be equivalent) in a relevant course, and at least five years professional practice in a relevant field. As well, a candidate must able to provide evidence of the capacity to undertake specialised study at a doctoral level, and of superior professional performance (creatively and/or intellectually and/or technically) in the chosen field. Candidates wishing to undertake this course should make initial application to the Faculty's Research and Higher Degree Committee for agreement as to the suitability of the project to be carried out.

Course Requirements:

The course consists of a continuation of coursework units (12 credit points) and two professional doctorate project unit (60 credit points) to total at least 72 credit points.

The major project is further developed and should demonstrate that the candidate has extensive design, technical or professional knowledge in the chosen field and has made an original contribution to that field.

Enrolment:

Unless they have been granted status, candidates should enrol first in the coursework units then in the Preliminary Project unit and then in the Professional Project unit.

Course Convener:

Chair of the Faculty Research and Higher Degrees Committee.

[<---] Return to Handbook contents

University of Canberra, AUSTRALIA

HANDBOOK 1996

Degree of Doctor of Philosophy (251)

- Course Duration:
- Admission Requirements:
- Course Structure:
- Enrolment:

The Faculty offers a PhD program in areas of study related to its research centres: cultural heritage conservation studies and environmental philosophy, planning and design.

Course Duration:

3 years full-time or equivalent part time; maximum period of enrolment 5 years or equivalent part-time.

Admission Requirements:

Candidates must hold an honours degree at first class or 2A level, or a qualification deemed by the University's Admissions Committee to be equivalent. The qualification should be in a relevant discipline.

Course Structure:

A candidate will be required to undertake original research resulting in a thesis which makes a significant contribution to understanding, and/or to knowledge and/or its application in an agreed specialised area within the field of studies in environmental design. The work should entail systematic and searching reviews of the relevant literature in order to locate the study in relation to existing work in the field, the development of a clear statement as to the aims and objectives of the study, systematic investigation of the topic and the development of a well articulated theoretical position for undertaking its analysis. All this work should be incorporated into a well-written and well-argued thesis which describes the work done and articulates the findings of the study.

Enrolment:

Students enrol in either 4436 Doctoral Thesis in Environmental Design D (full-time); 4435 Doctoral Thesis in Environmental Design D (part-time).

The Faculty of Information Sciences and Engineering offers the courses listed on the previous page.

Double Degree Programs in Engineering and Applied Science

Double degrees are recommended for students of high ability who wish to enhance their employment prospects or as a preparation for a higher degree. The double degree programs offered by the Faculty provide an opportunity for students to complete a three-year applied science degree offered by this Faculty in combination with a four-year engineering degree. Because of the large amount of overlap, students may complete these two degrees (BE/BAppSc) in a minimum time of five years of full-time study. Within these double degrees the engineering award may be taken with honours.

Double Degree Programs with Law

Two double degree programs are offered by the Faculty jointly with the Faculty of Management. These programs are for students of high ability who aim to make careers in the legal aspects of computing and engineering practice, gaining full professional status in both the legal and the technical fields.

Mathematics Laboratory

The Faculty operates a Mathematics Laboratory to assist students from any Faculty in the University who have inadequate mathematical background for their chosen courses. Tutorial assistance is also available to these students as well as to students enrolled in mathematics and statistics courses.

The Laboratory offers courses of individualised modules of work, diagnostic tests, a range of texts as well as a repository of lecture notes, examination papers and tutorial exercises.

Operation is from February until November. For information about session times enquire at the Reception Desk on Level B of Building 11.

Location: 11C45

Project Units

Some of the units which students are required or elect to take may involve project work and travel, or industrial experience, off campus. In such cases, students are expected to meet their own transport costs.

Work Required

All the computing units place a strong emphasis on practical work. This is intended to be processed on the University's computer systems, and students are required to use the terminals associated with these facilities. Supervised practical work is undertaken during laboratory sessions, while practical projects and assignments are featured throughout the program of study.

University of Canberra, AUSTRALIA

HANDBOOK 1996

Degree of Bachelor of Applied Science in Applied Physics (096)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Electives:
- Course Advice:
- Professional Recognition:
- Course Administrator:
- Typical Full-time Course Structure:

This course is designed for students who wish to become technologists or experimental officers in the field of Applied Physics. Students also may use this program as a bridge to an engineering degree course.

Students may include in their course a number of units from other areas of this Faculty, from other Faculties and from the Australian National University. In particular, students are encouraged to include further units in mathematics, computer technology and applied science. Students are also required to complete a sequence of three management oriented units.

The course consists of a core of required units supported by elective units as shown in the table below, which illustrates a typical study program for full-time students. The brackets following the electives indicate the minimum level at which the elective may be taken.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: Advanced Mathematics Extended, and majors in Physics (T) and English (T); NSW: 3u or 4u Mathematics, 2u Physics and 2u English.

Course Requirements:

The course requires completion of units worth at least 72 credit points in required and elective units as indicated in the typical study program below. The first year units are the same as those which comprise the Faculty's common first year program for its engineering courses. At the end of their first year of study an outstanding student may be able to switch to an engineering course.

Electives:

Electives are chosen from the fields of management studies, mathematics, physics (including units at the Australian National University), electronics and computing.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of each semester and as required during their studies.

Professional Recognition:

This course is recognised by the Australian Institute of Physics.

Course Administrator:

Dr John Rayner 11A17 (06) 201 2413

Typical Full-time Course Structure:

Bachelor of Applied Science in Applied Physics

This study program is intended to be illustrative only, and considerable variation is possible.

HANDBOOK 1996

Degree of Bachelor of Applied Science in Computer Science (123)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Electives:
- Course Advice:
- Professional Recognition:
- Course Administrator:
- Typical Full-time Course Structure:
- Some alternative specialisations:

The course leading to the degree of Bachelor of Applied Science in Computer Science has two equally important aims. The first of these is to provide a high quality formal training in computer science and the fundamental disciplines on which it depends. The second aim is to complement these studies with practical skills in one or more fields of computing technology, sufficient to design and implement computing equipment or systems based on that technology.

Graduates should be immediately productive as employees of original equipment manufacturing (OEM) firms in digital electronics, and firms which assemble small computer systems. Graduates should also be attractive to government departments, either as experimental officers in situations where special-purpose computer systems are required, or as information technology officers in larger and more general installations. Computer system vendors should view graduates as having similar knowledge and skills to those whom they currently recruit for systems and sales support positions.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: Advanced Mathematics Extended, and majors in Physics (T) and English (T); NSW: 3u or 4u Mathematics, 2u Physics and 2u English.

Course Requirements:

Satisfactory completion of a total of at least 72 credit points consisting of required units worth 63 credit points and elective units worth at least 9 credit points.

Electives:

A wide range of choice is provided among units approved for semesters 5 and 6, and useful specialisations are formed at that time by selecting approved combinations of units in the third year of study. The elective unit may be in any field of study.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies. Also, each individual student's combination of units for specialisation must be approved by the course administrator.

Professional Recognition:

This course has been granted Level 1 accreditation by the Australian Computer Society.

Course Administrator:

Associate Professor Brian Stone 11C14 (06) 201 2418.

Typical Full-time Course Structure:

Bachelor of Applied Science in Computer Science

The following typical study program requires students to choose the four specialisation electives just described, plus one other elective unit.

```
         Semester 1                        Semester 2
YEAR 1   4275 Engineering Mathematics 1    4275 Engineering Mathematics 1
           (year-long)                       (cont'd)
         3204 Engineering Physics 1        3204 Engineering Physics 1
           (year-long)                       (cont'd)
         4331 Computer Engineering 1       4331 Computer Engineering 1
           (year-long)                       (cont'd)
         4332 Electronic Engineering 1     4332 Electronic Engineering 1
           (year-long)                       (cont'd)

YEAR 2   4475 Electronic Engineering 2     4475 Electronic Engineering 2
           (year-long)                       (cont'd)
         or 4474 Electronic and            or 4474 Electronic and
           Computer Engineering 2            Computer Engineering 2
           (year-long)                       (cont'd)
         4469 Computer Engineering 2       4469 Computer Engineering 2
           (year-long)                       (cont'd)
         4453 Engineering Mathematics 2    4453 Engineering Mathematics 2
           (year-long)                       (cont'd)
         4476 Engineering Management 2     4476 Engineering Management 2
           (year-long)                       (cont'd)

YEAR 3   2492 Computer Science Project     2492 Computer Science Project
           (year-long)                       (cont'd)
         0236 Computer Architecture        An elective unit*
         Two Specialisation Electives*     Two Specialisation Electives*
```

The course in semesters 1 and 2 is identical with the common first year study program for engineering students, facilitating transfers to engineering courses by eligible student.

Some alternative specialisations:

Computer Graphics

For this specialisation students should select 4474 Electronic and Computer Engineering 2 in Year 2 of their course.

As specialisation electives take:

both
- 0239 Interactive Computer Graphics
- 0496 Data Communications

and two of
- 0243 Languages and Compilers
- 2443 Real-Time Computer Applications
- 1072 Machine Intelligence *or*
- 4201 Object Oriented Software Design

Knowledge-based Technology and Artificial Intelligence

For this specialisation students should select 4474 Electronic and Computer Engineering 2 in Year 2 of their course.

As specialisation electives take:

all of
- 1356 Expert Systems
- 1072 Machine Intelligence
- 0243 Languages and Compilers

and either
- 1073 Theory of Computation *or*
- 1986 Software Engineering 2

Data Base Design

For this specialisation students should select 4474 Electronic and Computer Engineering 2 in Year 2 of their course.

As specialisation electives take:

all of
- 0284 Information Systems 3
- 0267 Data Base Systems
- 0496 Data Communications

and one of
- 1356 Expert Systems
- 4201 Object Oriented Software Design *or*
- 1459 Digital Communications Networks

Computer Communications and/or Computer Electronics

For this specialisation students should select 4475 Electronic Engineering 2 in Year 2 of their course.

As specialisation electives, students take:
- 0496 Data Communications
- 1459 Digital Communications Networks
- 2443 Real-Time Computer Applications

and one of
- 0243 Languages and Compilers
- 4201 Object Oriented Software Design *or*
- an Electronics unit at Level 5/6

Mathematics and Scientific/Engineering Software

A student who was performing well in mathematics could take as specialisation electives:
- 1073 Theory of Computation

and three of
- 0239 Interactive Computer Graphics
- 1072 Machine Intelligence
- 4458 Mathematics 5
- 4459 Mathematics 6 *or*
- 3999 Mathematical Methods 5

For this specialisation it would be advisable to select a mathematics or statistics unit as the other elective, and students should select 4474 Electronic and Computer Engineering 2 in Year 2 of their course.

University of Canberra, AUSTRALIA

HANDBOOK 1996

Degree of Bachelor of Applied Science (Honours) in Computer Science (253)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Typical Full-time Course Structure:
- Course Advice:
- Course Administrator:

The honours course is open to students who have performed well in the third year level of the BAppSc Computer Science as well as similarly qualified applicants from other institutions. Project and coursework will be aligned with research being conducted in the Faculty.

Course Duration:

This course may be completed on a full-time basis in one year, or on a part-time basis in a maximum of two and one half years.

Admission Requirements:

Admission to the honours program is by approval from the Dean of the Faculty of Information Sciences and Engineering, advised by the Faculty Honours Committee and/or other staff as directed by the Dean. A candidate will normally be considered only if he or she has

(a) (for a University of Canberra student who has completed the BAppSc in Computer Science) obtained a Credit or better grade in each of the best four units (other than general electives) taken in the final year of the first degree course; or

(b) (for graduates of other institutions) achieved an equivalent standard in a suitable area of study, normally a course having Level 1 accreditation with the Australian Computer Society.

An additional requirement will normally be

(c) the academic judgement that the applicant can be expected to perform at an honours level in each of the coursework, project, and seminar components of the program.

In exceptional circumstances these requirements may be waived by the Dean.

Course Requirements:

At least 24 credit points, made up as follows

(a) 8 credit points from the unit 3365 Advanced Topics in Computing;

(b) 12 credit points for the unit 3366 Computing Honours Project;

(c) 1 credit point for the unit 3364 Computing Honours Seminar;

(d) The remaining credit points from PG or upper level undergraduate units:

(i) normally in computing or related scientific or technical areas, as specified by a Discipline Head for specialisation in that discipline, or

(ii) subject to the approval of the Dean of the Faculty of Information Sciences and Engineering, in communication or management areas.

Typical Full-time Course Structure:

Bachelor of Applied Science (Honours) in Computer Science

	Semester 1	Semester 2
YEAR1	3365 Advanced Topics in Computing (year-long)	3365 Advanced Topics in Computing (cont'd)
	3366 Computing Honours Project (year-long)	3366 Computing Honours Project (cont'd)
	3364 Computing Honours Seminar (year-long)	3364 Computing Honours Seminar (cont'd)
	Elective unit (or in semester 2)	Elective unit (or in semester 1)

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

Course Administrator:

Associate Professor Brian Stone 11C14 (06) 201 2414

[<---] Return to Handbook contents

University of Canberra, AUSTRALIA

HANDBOOK 1996

Degree of Bachelor of Applied Science in Electronics (097)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Electives:
- Course Advice:
- Course Administrator:
- Typical Full-time Course Structure:

This course is designed for students who wish to become technologists in the field of Electronics. Students also may use this program as a bridge to an engineering degree course.

Students may include in their course a number of units from other areas of this Faculty or, from other Faculties. In particular, students are encouraged to include further units in mathematics, computer technology and applied science. Students are also required to complete a sequence of three management-oriented units.

The course consists of a core of required units supported by elective units as shown in the table below. This illustrates a typical study program for full-time students. The brackets following the electives indicate the minimum level at which the elective may be taken.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: Advanced Mathematics Extended, and majors in Physics (T) and English (T); NSW: 3u or 4u Mathematics, 2u Physics and 2u English.

Course Requirements:

The course requires study of units worth at least 72 credit points in required and elective units. The first two years units are common to those in the Electronics and Communications Engineering and the Computer Engineering courses, enabling students to change between the courses at the end of their second year if they wish.

Electives:

Electives are chosen from the fields of management studies, mathematics, physics, electronics and computing.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

Course Administrator:

Dr John Rayner 11A17 (06) 201 2413

Typical Full-time Course Structure:

Bachelor of Applied Science in Electronics

This study program is intended to be illustrative only, and considerable variation is possible. Also, note that the course has been revised and the program shows the offering for those students commencing first year study in 1996.

	Semester 1	Semester 2

University of Canberra, AUSTRALIA

HANDBOOK 1996

Degree of Bachelor of Applied Science in Mathematics (159)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Electives:
- Course Advice:
- Course Administrator:
- Typical Full-time Course Structure

The principal aim of this degree course is to provide its graduates with a sound education in modern applicable mathematics. The term "applicable" is used to indicate the mathematics that is widely employed in today's society. It is a developing and changing area as new applications emerge. Consequently, graduates from this course would need to have developed strategies for keeping abreast of research and new applications, and have acquired such research skills as are required in industry, commerce or government service.

In common with current practice, "mathematics" is now used to include the fields of operations research and statistics. The course has been designed to be sufficiently flexible to meet likely vocational needs in business, computing, engineering and applied science, and the mathematical needs of those who would wish to follow a career of secondary mathematics teaching in secondary schools and colleges.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: Advanced Mathematics Extended and English (T) major; NSW: 3u or 4u Mathematics and 2u English.

Course Requirements:

The course requires satisfactory completion of units worth at least 72 credit points as follows

(a) 22 credit points from the following required units:

Mathematics units

4274 Mathematics 1/2 (year-long)

4470 Computing Mathematics 1

0297 Mathematics 3

1752 Statistics 1A

one Writing unit from

1154 Writing 1 English Expression

3710 Writing 1 (ESL)

0758 Communication in Science

Computer Programming unit

4483 Software Technology 1

(b) at least 20 credit points from other Mathematics units, including at least 12 credit points at level 5/6. These units should be chosen in consultation with a course adviser or the course administrator. The 12 credit points at level 5/6 are to be chosen from:

4123 Applied Statistics 4

4124 Applied Statistics 5

3999 Mathematical Methods 5

4118 Mathematical Methods 6

4458 Mathematics 5

4459 Mathematics 6

4460 Mathematics 7

4461 Mathematics 8

(c) further credit points from units considered by the Dean to be appropriate for inclusion in the course, which is concerned primarily with mathematics and its applications, to provide a total of:

at least 72 credit points in all

at least 20 credit points at level 5/6 *and*

at most 30 credit points at level 1/2.

(d) some combinations of units are not permitted where they have a common content.

Electives:

The course rules allow considerable scope for the inclusion of 'second majors' (under (c) above) in any discipline area that the University covers, so students can combine their mathematical studies with studies in electronics, economics, ecology or education, to name but four examples.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

Course Administrator:

Dr Peter Brown 11C24 (06) 201 2443

Typical Full-time Course Structure

Bachelor of Applied Science in Mathematics

A full-time student might study the following program over three years. Alternatively, the course might be studied part-time over a longer period.

	Semester 1	Semester 2
YEAR 1	4274 Mathematics 1/2 (year-long) 4470 Computing Mathematics 1 1154 Writing 1 English Expression level 1/2 elective	4274 Mathematics 1/2 (cont'd) 1752 Statistics 1A 4483 Software Technology 1 level 1/2 elective
YEAR 2	4456 Mathematics 3 (year-long) 4457 Mathematics 4 (year-long) level 3/4 mathematics unit level 3/4 elective	4456 Mathematics 3 (cont'd) 4457 Mathematics 4 (cont'd) level 3/4 elective level 3/4 elective
YEAR 3	level 5/6 mathematics unit level 5/6 mathematics unit level 5/6 elective	level 5/6 mathematics unit level 5/6 elective level 3/4 elective

HANDBOOK 1996

Degree of Bachelor of Commerce in Management Sciences (242)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Course Advice:
- Course Administrator:
- Typical Full-time Course Structures:

This course is offered by the School of Mathematics and Statistics, in close cooperation with the Faculty of Management.

The purpose of the Management Sciences course is to provide training in the quantitative disciplines underlying the analysis of rational decision making. The title "management science" is commonly used as a synonym for such subjects as operations research, systems analysis, systems science, quantitative analysis, managerial analysis, decision analysis, or decision science. This course in management sciences views management in its decision making function, attempting to reduce as many decisions as possible to a set of decision rules.

Graduates from the course will have a basic grounding in the areas of accounting, economics, computing, mathematics and statistics, with a study of some of these areas in depth. Equipped with these analytical techniques, graduates will be immediately useful in both public and private organisations in the tasks of data gathering, processing and analysis. They will, with further experience, be able to provide a quantitative view of the decision making process in management, to complement those administrators with a different background. The course is appropriate for students coming straight from secondary school as well as for mature age students, and would ideally be followed by a graduate course in a specific professional area.

The course is based on units taken from four main subject areas, namely

(a) accounting and finance;

(b) economics and marketing;

(c) information systems; and

(d) mathematics, statistics and operations research.

(e) marketing

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: Advanced Mathematics and English (T) major; NSW: 2u or 3u Mathematics and 2u English.

Course Requirements:

Satisfactory completion of 70 credit points of required and elective units.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

University of Canberra, AUSTRALIA

HANDBOOK 1996

Degree of Bachelor of Engineering in Computer Engineering (160)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Honours Degrees in Engineering:
- Course Advice:
- Professional Recognition:
- Course Administrator:
- Typical Full-time Course Structure:
- Industrial Experience:

The computer engineering course permits specialisation in either computer design (hardware) engineering, or in software and information technology engineering. A large fraction of the course is common to both subject areas.

The computer engineering course emphasises the application of scientific principles to the design and construction of complex software systems, digital computer hardware, and computer algorithms embodying knowledge, reasoning and intelligence. It involves considerable practical work.

All engineering students undertake a common first year study program. At the end of the year, students normally elect to continue in one of the two engineering courses, Electronics and Communications Engineering (258) or Computer Engineering (160).

Course Duration:

4 years full-time or equivalent part-time

Assumed Knowledge:

ACT: Advanced Mathematics Extended, and majors in Physics (T) and English (T); NSW: 3u or 4u Mathematics, 2u Physics and 2u English.

Course Requirements:

Satisfactory completion of a total of at least 96 credit points, consisting of required units worth 87 credit points and professional and general electives worth at least 9 credit points.

Honours Degrees in Engineering:

Students enrolled in the four-year engineering degree courses may be admitted to the engineering honours program in the final year of study if their performance at the third year level is deemed to be satisfactory. Details of the required entry standard and honour program can be obtained from the course administrator.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

Professional Recognition:

The course has been granted Level 1 accreditation by the Australian Computer Society, and full recognition by the Institution of Engineers, Australia.

Course Administrator:

Associate Professor Brian Stone 11C14 (06) 201 2418

Elective*
```

*Electives:

Professional and General Electives may be done in different semesters from those shown in the Typical Course Structure, as long as prerequisites are satisfied.

The following units are suitable as Professional Electives (at least two are required)

0267 Data Base Systems

1459 Digital Communications Networks

1356 Expert Systems

0284 Information Systems 3

0239 Interactive Computer Graphics

1072 Machine Intelligence

3993 Mathematics 5

3994 Mathematics 6

4201 Object Oriented Software Design

2443 Real-Time Computer Applications

1458 VLSI Design

General Electives should be in one of the following areas: management, accounting, economics, law communication or graphic communication.

Industrial Experience:

At the end of each of the second and third (full-time) years, students are required to undertake a period of at least seven weeks approved industrial experience. (Part-time arrangements may be approved by the course administrator, but such approval must be obtained in advance). A report will be required and will be assessed as part of the unit 3192 Professional Seminar (Computer Engineering).

University of Canberra, AUSTRALIA

HANDBOOK 1996

Degree of Bachelor of Engineering in Electronics and Communications Engineering (258)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- General Electives:
- Industrial Experience:
- Honours Degrees in Engineering:
- Course Advice:
- Professional Recognition:
- Course Administrator:
- Typical Full-time Course Structure:

The four year course at pass level in Electronics and Communications Engineering provides specialisations in radiowave and lightwave systems, in analog and digital communications and in electronic measurement and control.

All engineering students undertake common first and second year study programs. At the end of the second year, students normally elect to continue in one of the two engineering courses, Electronics and Communications Engineering (258) or Computer Engineering (160).

Course Duration:

4 years full-time or equivalent part-time

Assumed Knowledge:

ACT: Advanced Mathematics Extended, and Physics (T) and English (T) majors; NSW: 3u or 4u Mathematics, 2u Physics and 2u English. Satisfactory completion of an Associate Diploma in Electronics Engineering or an equivalent award from a recognised institution of TAFE is also acceptable.

Course Requirements:

Satisfactory completion of at least 96 credit points of required and elective units.

General Electives:

These should be taken in the areas of accounting, management, economics, law or communication.

Industrial Experience:

Before graduating students must complete a 12-week period of professional industrial experience.

Honours Degrees in Engineering:

Students enrolled in the four-year engineering degree courses may be admitted to the engineering honours program in the final year of study if their performance at the third year level is deemed to be satisfactory. Details of the honours year study programs can be obtained from the course administrator.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

Professional Recognition:

The course has been granted full recognition by the Institution of Engineers, Australia.

Course Administrator:

Dr William Cheung 11C9 (06) 201 2413

Typical Full-time Course Structure:

Bachelor of Engineering in Electronics and Communications Engineering

(This course shares common first and second years with the Bachelor of Engineering in Computer Engineering.)

	Semester 1	Semester 2
YEAR 1	4275 Engineering Mathematics 1 (year-long)	4275 Engineering Mathematics 1 (cont'd)

YEAR 3	4458 Mathematics 5	1464 Analogue and Digital Signals
	1518 Electromagnetic Waves	1680 Control Systems
	1977 Electronics Engineering 3	General Elective*
	1983 Power Systems	Professional Elective*
YEAR 4	2621 Design Studies in Engineering (year-long)	2621 Design Studies in Engineering (cont'd)
	1512 Analogue and Digital Communications	1513 Communication Systems or
	or 1979 Electronic Instrumentation	1980 Instrumentation Systems
	Professional Elective*	Professional Elective*
	General Elective*	General Elective*

*Electives:

Professional and general electives may be taken in different semesters from those shown in the Typical Course Structure as long as prerequisites are satisfied.

Specialisations are provided by means of appropriate selection of electives in the course. The General Elective unit should be in one of the following areas: management, accounting, economics, law or communication. For study as Professional Electives students choose one of the following group (a) units, and three of the group (b) units. Students wanting a *communications* emphasis in their course should include both the units 1513 Communications Systems and 1512 Analogue and Digital Communications. Those wanting an *instrumentation* emphasis should choose both the units 1980 Instrumentation Systems and 1979 Electronic Instrumentation.

(a) 1513 Communication Systems Communications Emphasis

1980 Instrumentation Systems Instrumentation Emphasis

(b) 1512 Analogue and Digital Communications

1978 Electronic Devices and Circuits

1979 Electronic Instrumentation

0496 Data Communications

1459 Digital Communication Networks

1072 Machine Intelligence

3994 Mathematics 6

1778 Operating Systems

2608 Radio and Lightwave Communications

2443 Real-Time Computer Applications

1458 VLSI Design

Other units may be included, with the permission of the Dean.

University of Canberra, AUSTRALIA

HANDBOOK 1996

Degree of Bachelor of Information Technology (322)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Electives:
- Professional Recognition:
- Course Administrator:
- Typical Full-time Course Structure:

The Bachelor of Information Technology course will be offered for the first time in 1996, superseding the previous Bachelor of Arts in Computing Studies course. It is expected that a fourth year honours program will be available for those students completing the course. Students currently enrolled in the Bachelor of Arts in Computing Studies course will be offered entry into this course. Please see the entry for the Bachelor of Arts in Computing Studies course.

The objective of the course is to educate people wishing to become `information' professionals, able to design, implement and maintain computing systems. The primary focus is on software construction. Graduates of the course will have:

. a substantial understanding of, and practical skill in the design and implementation of, the software systems used in organisational information systems, achieved by a concentration on contemporary software engineering practice

. a good understanding of the analysis processes leading to the design and use of information systems

. a foundational understanding of the processes of business analysis of systems.

A feature of the course is that students can include a major sequence of units from a non-computing field or a specialised branch of computing. Thus students can broaden their course with study from either a complementary subject area or from an unrelated area of study. Alternatively, students may choose to do additional study in the areas of computing, mathematics, statistics or physics.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: Advanced Mathematics and English (T) major; NSW: 2u or 3u Mathematics and 2u English.

Course Requirements:

Satisfactory completion of 72 credit points. The course consists of:

. a professional core of required units

. at least two professional electives at third year

. three required support units in first year

. a non-computing elective major or sub-major.

Electives:

Course advisers are available to help students select the elective units to be included in their course. The elective major may be in any area such as computing, or mathematics, or from the offerings of another faculty and will need to be approved by the Dean of Faculty.

Professional Recognition:

Graduates are eligible for level 1 membership of the Australian Computer Society.

Course Administrator:

Dr Terry Webb 11A53 (06) 201 5341

Typical Full-time Course Structure:

Bachelor of Information Technology

	Semester 1	Semester 2
YEAR 1	4478 Introduction to Information Technology	4479 Information Technology 1
	4493 Professional Communication Skills	4483 Software Technology 1

HANDBOOK 1996

Double Degree of Bachelor of Applied Science in Applied Physics/Bachelor of Engineering in Electronics and Communications Engineering (272)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Electives:
- Industrial Experience:
- Course Advice:
- Professional Recognition:
- Course Administrator for this double degree:
- Typical Full-time Course Structure:
- Course Administrators for individual degrees:

The double degree provides an opportunity for students to complete a three-year applied science degree offered by this Faculty in combination with the four-year engineering degree. Because of the large amount of overlap, students may complete these two degrees (BE/BAppSc) in a minimum time of five years. Within the double degree the engineering award may be taken with honours.

Course Duration:

The minimum duration of the course is 5 years while the maximum duration is 10 years.

Assumed Knowledge:

ACT: Advanced Mathematics Extended, and Physics (T) and English (T) majors; NSW: 3u or 4u Mathematics, 2u Physics and 2u English or equivalent qualifications. Satisfactory completion of an Associate Diploma in Electronics Engineering or an equivalent award from a recognised institution of TAFE is also acceptable.

Course Requirements:

The course requirements are basically that the combination of units completed should separately satisfy the requirements for the two awards making up the double degree.

Students are required to complete satisfactorily a total of 120 credit points of which 88 points are for required core units. In addition, at least 9 credit points must be from general electives. Further professional elective units are then chosen to make up the balance of the course requirements depending on the particular area of expertise in which a student wishes to specialise.

Electives:

General electives are to be taken in the areas of accounting, administration, economics, communications, law or related areas, while professional electives reflect the area of specialisation.

Industrial Experience:

Before graduating with the engineering award students must also complete a 12 week period of professional industrial experience.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

Professional Recognition:

This engineering course has full recognition by the Institution of Engineers, Australia. In addition, this applied science course is recognised by the Australian Institute of Physics.

Course Administrator for this double degree:

Dr John Rayner 11A17 (06) 201 2413

Typical Full-time Course Structure:

The normal full-time course structure follows the Electronics and Communications Engineering course (258) for the first 4 years. Students complete the BAppSc in Applied Physics in their fifth year. The relevant course administrators for the individual degrees can be consulted for further details of the units to be taken each semester.

Course Administrators for individual degrees:

Applied Physics: Dr John Rayner 11A17 (06) 201 2413

Electronics and Communications Engineering: Dr William Cheung 11C9 (06) 201 2413.

HANDBOOK 1996

Double Degree of Bachelor of Engineering in Computer Engineering/Bachelor of Laws (288)

- Course Duration:
- Assumed Knowledge:
- Admission Requirements:
- Administrative Arrangements:
- Course Structure:
- Professional Recognition:
- Course Administrator for this double degree

This double degree is offered jointly with the Faculty of Management.

The program is for students of high ability who aim to make careers in the legal aspects of computer engineering, gaining full professional status in both the legal and the technical fields. The program contains the Bachelor of Laws (LLB) course as its second degree-equivalent section.

To enable completion in a minimum of six years, time savings are arranged mainly by taking LLB units as the management and general elective components of the existing BE course. It is important, therefore, to follow closely the study program arranged by the course convener to achieve the minimum time.

An information booklet on the course structure of double degree courses may also be obtained from the School of Law office (6C31).

Course Duration:

6 years full-time; maximum period of study 10 years

Assumed Knowledge:

ACT: Advanced Mathematics Extended, and Physics (T), English (T) majors; NSW: 3u or 4u Mathematics, 2u Physics, 2u English.

Admission Requirements:

The entry level for each double degree course is determined in consultation between the Faculty of Information Sciences and Engineering and the Faculty of Management. Admission to a double degree course will ensure that the student will be permitted to proceed into the Bachelor of Laws component of the course. However, before the final two years (full-time equivalent) of the Bachelor of Laws course can be undertaken, students undertaking a double degree must have satisfied the academic requirements for the first degree in the double degree course.

Administrative Arrangements:

Students undertaking the double degree course will be able to be awarded the first degree in the double degree course upon completion of the academic requirements for that degree.

Course Structure:

The course structure of the double degree course requires that students admitted to a double degree course must undertake 6 required law units as part of the first degree course in the double degree sequence.

At the completion of the requirements of the Bachelor of Engineering in Computer Engineering (including the 6 required law units mentioned above), students will undertake 11 core LLB units (amounting to 44 credit points) and four elective law units (amounting to at least 12 credit points).

Professional Recognition:

The Bachelor of Engineering in Computer Engineering degree has been granted Level 1 accreditation by the Australian Computer Society, and full recognition by the Institution of Engineers, Australia. The Bachelor of Laws has been recognised by the ACT Supreme Court for the purpose of admission.

Course Administrator for this double degree

Associate Professor Brian Stone 11C14 (06) 201 2418

- Limitation on Status:
- Course Advice:
- Course Administrator:
- Typical Full-time Course Structure:

This course caters for people who did not study mathematics in depth in their first degree but who wish to acquire a good working knowledge of mathematics equivalent to a major sequence of study at a university. Graduates may use the graduate diploma to change the focus of their employment or to use mathematics to enhance their existing career.

Course Duration:

1 year full-time or equivalent part-time; however this course is normally undertaken on a part-time basis. Maximum period of study is 4 years.

Admission Requirements:

Students entering the course should have a recognised degree or its equivalent and have the equivalent of one year of tertiary mathematics. Bridging units, not part of the course, are available for those who cannot meet this requirement. Students should also have some familiarity with a computer language and the use of a computer, and with some of the discrete mathematics employed in computing. Introductory units, 4330 Computers and Computing G and 1564 Finite Mathematics G, are available for those who lack this experience, and who wish to better prepare themselves for the course. Intending students with an interest in administration may also find the introductory unit 3889 Quantitative Methods G helpful as preparation for the course.

Course Requirements:

Satisfactory completion of eight units (24 credit points) as follows:

(a) two required core units (6 credit points)

4126 Applied Statistics G1 and

0553 Programming Techniques G1;

(b) at least two elective graduate units (6 credit points) from the following

3995 Mathematics G3

3996 Mathematics G4

4119 Mathematical Methods G3

or other appropriate units approved by the Dean of Faculty;

and

(c) at least 6 credit points in units chosen from Mathematics units at level 5/6 approved by the Dean of Faculty;

(d) if necessary to make a total of 24 credit points, further credit points in units at level G or 5/6 from the fields of Mathematics, Statistics or Computing or such other appropriate field of study, approved by the Dean of Faculty;

(e) the units 1127 General Mathematics G1, 1128 General Mathematics G2, 1564 Finite Mathematics G, and 3889 Quantitative Methods G, may not be included in the course.

Specialisations:

Students may choose to specialise in one of the following areas:

(a) Operations research,

(b) Discrete mathematics including application to computer science,

(c) Applied analysis and numerical analysis,

(d) Mathematics for teaching.

Limitation on Status:

(a) Status may be claimed on the basis of prior completed awards only for the two required units.

(b) Status on the basis of an incomplete course at the same level may be claimed for a maximum of 12 credit points.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

Course Administrator:

Dr Peter Brown 11C48 (06) 201 2443

Typical Full-time Course Structure:

Graduate Diploma in Applicable Mathematics

For a student with previous tertiary level mathematics, statistics and computing experience:

	Semester 1	Semester 2
YEAR 1	4462 Mathematics G3 (year-long)	4462 Mathematics G3 (cont'd)
	4126 Applied Statistics G1	4119 Mathematical Methods G3
	4463 Mathematics G4 (year-long)	4463 Mathematics G4 (cont'd)
	0553 Programming Techniques G1	4459 Mathematics 6
	level G elective	

Many students study this course part-time, by studying two units per semester.

University of Canberra, AUSTRALIA

HANDBOOK 1996

Graduate Diploma in Computing Studies (333)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Status:
- Course Advice:
- Professional Recognition:
- Course Administrator:
- Typical Full-time Course Structure:

This course is designed for people who have not previously studied computing in detail and who want to acquire professional expertise in the computer programming field. Some students use this graduate diploma as the basis for commencing a computing career. Others use the computing expertise to enhance the effectiveness of their work within the professional field of their first degree.

Course Duration:

One year full-time or equivalent part-time. Maximum period of study is 4 years.

Admission Requirements:

Intending students should ordinarily have a degree from a recognised tertiary institution.

Because the course is designed as a "capstone" to a first degree, no person may undertake the Graduate Diploma in Computing Studies if he or she has previously satisfactorily completed the University of Canberra course leading to the degree of Bachelor of Arts in Computing Studies or any other course which, in the opinion of the Dean of Faculty, is equivalent to that undergraduate course (except with the permission of Academic Board).

Course Requirements:

Satisfactory completion of at least 24 credit points in eight semester units. Students without sufficient experience of computing or mathematics will be required to study one or two bridging units prior to admission or at the beginning of their course.

Status:

Credit or status may be granted, on the basis of previous tertiary studies, and may be granted for up to two of the course's required units.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

Professional Recognition:

Graduates are eligible for level 1 membership of the Australian Computer Society.

Course Administrator:

Dr Van Le 11C18 (06) 201 2421

Typical Full-time Course Structure:

Graduate Diploma in Computing Studies

	Semester 1	Semester 2
YEAR 1	3888 Introduction to Database Systems G	0556 Systems Analysis G2
	0555 Systems Analysis G1	1526 Computer Structures G2
	1525 Computer Structures G1	0496 Data Communications
	0553 Programming Techniques G1	0554 Programming Techniques G2
Bridging units		
	1564 Finite Mathematics G	
	4330 Computers and Computing G	

Note:

Units need not necessarily be taken in this order except that, where required, the bridging units must be completed before studying any units other than 0555 Systems Analysis G1 and 3888 Introduction to Database Systems G. Not all units are available in all semesters. Each G2 unit has the relevant G1 unit as prerequisite.

[<---] Return to Handbook contents

University of Canberra, AUSTRALIA

HANDBOOK 1996

Graduate Diploma in Electronics (034)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Course Administrator:
- Typical Part-time Course Structure:

This course is designed to meet the needs of persons who hold recognised degrees or equivalent in fields other than electronics, and who have a need for a knowledge of electronics in their various professions. It is not intended for those who are already qualified in the field, though such persons may be permitted to enrol for individual units of the course if places are available.

Course Duration:

This course is normally completed in two years of part-time study. Full-time study is not recommended.

Admission Requirements:

An adequate knowledge of mathematics will be assumed equivalent to first year tertiary level. Students whose mathematical background is insufficient may be advised or required to undertake bridging units.

Course Requirements:

Satisfactory completion of eight required units.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

Course Administrator:

Dr John Rayner 11A17 (06) 201 2413

Typical Part-time Course Structure:

Graduate Diploma in Electronics

	Semester 1	Semester 2
YEAR 1	1525 Computer Structures G1	0350 Electronic Theory and Practice G
	0750 Digital Systems G	0751 Microcomputers G
YEAR 2	0901 Telecommunications G	0351 Analogue Systems G
	0900 Electronics Project G	1681 Control Systems G

A full-time student will take all the units listed above under Semester 1 in first semester, and all the units listed under Semester 2 in second semester. However, it should be recognised that 0901 Telecommunications G, 0351 Analogue Systems G and 1681 Control Systems G assume a prior knowledge of electronics. Students, therefore, with no background in electronics should not attempt the course on a full-time basis.

University of Canberra, AUSTRALIA

HANDBOOK 1996

Graduate Diploma in Information Sciences (225)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Course Administrator:

This course is postgraduate in content and in time and provides for interdisciplinary studies in statistics, operations research, mathematics, information systems, software engineering, computer technology, artificial intelligence and several engineering related topics including electronics engineering and applied physics.

Course Duration:

1 year full-time or equivalent part-time

Admission Requirements:

For admission to the course, an approved undergraduate major in applied physics, computing, electronics, mathematics, operations research or statistics is required. Alternatively, an approved graduate diploma such as the Graduate Diploma in Computing Studies, the Graduate Diploma in Information Systems, the Graduate Diploma in Electronics, the Graduate Diploma in Applicable Mathematics, the Graduate Diploma in Statistics or an equivalent graduate diploma is required. A pass degree in a field of engineering related to one or more of the majors listed above will also be deemed to meet admission requirements.

Course Requirements:

Satisfactory completion of coursework valued at 24 credit points which will be individually determined, taking into account each student's experience and interests. The postgraduate units will further develop the student's undergraduate study in the field and consist of a series of extension studies and "studies in" units offered by the Faculty. Other units will provide a background to the student's future work or project needs.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and on a regular basis during, their studies.

Course Administrator:

Dr John Rayner 11A17 (06) 201 2413

University of Canberra, AUSTRALIA

HANDBOOK 1996

Graduate Diploma in Information Systems (125)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Status:
- Professional Recognition:
- Course Administrator:
- Typical Full-time Course Structure:

This course covers the application of computing from an information technology management and end-user perspective. It emphasises end-user needs and is ideally suited for practitioners in other fields who wish to obtain an understanding of computing in order to develop proposals for computer use in their organisation.

The course also caters for computer professionals whose primary interest is in the systems analysis and design area. Many such professionals have earlier completed a course with some computing content, for example, in engineering or accounting, and now wish to extend their knowledge to apply computing on a wider commercial basis. The emphasis on information technology/management, systems design and the management of data complements the knowledge gained earlier by such students. Particular examples here are professionals who may become computer auditors or those whose work concerns extensive user liaison and support in the analysis and design of information systems.

Course Duration:

The course may be completed in one year of full-time study or part-time equivalent. Maximum period of study four years.

Admission Requirements:

Students commencing the course must have a bachelor degree and either programming experience or have studied at least a one-semester computing unit or a subject with significant programming content. Students who do not satisfy this requirement will be required to take the unit 0983 Computing G or 4330 Computers and Computing G which may be counted as one of the elective units. Good English reading, writing and verbal communication skills are essential for this course.

Course Requirements:

Satisfactory completion of least 24 credit points obtained from the following:

(a) all five core units:

0565 Basic Information Systems G

3888 Introduction to Database Systems G

0503 Computer Management and Evaluation G

0555 Systems Analysis G1

0556 Systems Analysis G2

(b) one of:

0563 Computer Audit

0267 Data Base Systems

0496 Data Communications

1356 Expert Systems

1071 General Systems Theory

1072 Machine Intelligence

3390 Project Management G

or any other appropriate level 5/6 or G unit, as approved by the Dean of Faculty

(c) one of:

1721 Accounting G1A

3664 Organisational Psychology G

3484 Information and Records Management G

3947 Law in Administration G

3967 Microeconomics G

4126 Applied Statistics G1

3889 Quantitative Methods G

or any other appropriate level 5/6 or G unit, as approved by the Dean of Faculty;

(d) one of:

4330 Computers and Computing G

0553 Programming Techniques G1

or one other unit from paragraphs (b) or (c).

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

Status:

Status may be granted in up to two of the required units on the basis of other work done as part of a complete or incomplete award at the University of Canberra or another tertiary institution.

Status may be granted for additional required and/or elective units on the basis of other tertiary work which has not yet been incorporated into a completed award, except that status will not be granted for more than four units in total.

Status will not be granted for elective units on the basis of other tertiary work which forms part of a completed award, but other tertiary work may be recognised in lieu of prerequisites, where appropriate. Students will be required to choose elective units covering material which they have not previously studied.

Professional Recognition:

Graduates are eligible for Level 2 membership of the Australian Computer Society.

Course Administrator:

Ms Penny Collings 11C51 (06) 201 2153

Typical Full-time Course Structure:

HANDBOOK 1996

Graduate Diploma in Management Sciences (103)

This course is offered by the Faculty of Management, in close cooperation with the School of Mathematics and Statistics. Details of the course are contained in the entry in this Handbook for the Faculty of Management.

Course Administrators:

Faculty of Management: Mr James Hanratty 6C11 (06) 201 2175

School of Mathematics and Statistics: Dr Malcolm Brooks 11C49 (06) 201 2623

[<---] Return to Handbook contents

University of Canberra, AUSTRALIA

HANDBOOK 1996

Graduate Diploma in Statistics (007)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Status:
- Course Administrator:
- Typical Part-time Course Structure:

The Graduate Diploma in Statistics course is for graduates who want to be able to use statistical procedures in the workplace with confidence and understanding but who have not previously studied statistics extensively at the tertiary level. Students who have already covered some of the subject matter in other courses may be exempted from some units.

Course Duration:

The course may be completed in one year of full-time study or part-time equivalent. The course is normally undertaken on a part-time basis. Maximum period of study is four years.

Admission Requirements:

Intending students should have a degree from a recognised tertiary institution.

Course Requirements:

The course requires completion of units worth 24 credit points, as follows:

(a) Required units (12 credit points)

4126 Applied Statistics G1

4127 Applied Statistics G2

4128 Applied Statistics G3

1127 General Mathematics G1

(b) At least 6 credit points in elective units as follows:

4129 Applied Statistics G4

4139 Applied Statistics G5

2852 Management Decision Using Microcomputers G

4131 Econometrics G

(c) The remaining elective units, if any, to be selected from:

3957 Macroeconomics G

3997 Mathematical Methods 3 (Discrete Mathematics)

3998 Mathematical Methods 4 (Operations Research)

3995 Mathematics G3

3996 Mathematics G4

3967 Microeconomics G

0553 Programming Techniques G1

0554 Programming Techniques G2

0263 Simulation Techniques

0555 Systems Analysis G1

0556 Systems Analysis G2

or any other unit at level G or higher except the unit 3889 Quantitative Methods G, as approved by the Dean of Faculty, or any other unit at level 3/6 or 5/6, as approved by the Academic Board on the recommendation of the Dean of Faculty.

Course Advice:

Students will be allocated a course adviser with whom they must consult at the commencement of, and during, their studies.

Status:

Applications for status in up to two of the required units on the basis of other work done at this University or another tertiary institution will be considered. Applicants for status in more than two of these units of the course may be allowed to enrol in the remaining units of the course, but will not be eligible for the award of diploma.

Status for elective units on the basis of other tertiary work which forms part of a completed degree or diploma will not be awarded, but other tertiary work will be recognised in lieu of prerequisites where appropriate. Status will be granted, where appropriate, for other tertiary work which has not yet been incorporated into a complete award, up to a maximum of 12 credit points.

Course Administrator:

University of Canberra, AUSTRALIA

HANDBOOK 1996

Degree of Master of Applied Science in Information and Technological Sciences (by research) (233)Degree of Master of Arts in Information and Technological Sciences (by research) (226)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Course Administrator:

As the focus of this course, students complete a research thesis in any one of the major research fields of the Faculty defined by its three recognised emerging area of research strength in plasma instrumentation, advanced telecommunications and information technology. Studies in this last area include human-computer interactions, artificial intelligence and software engineering, and information dissemination and distribution. Research interests also exist in non-linear analysis and mathematics education.

Course Duration:

2 years full-time (4 years part-time) where the preparatory program is required, otherwise 1 year full-time (2 years part-time).

Admission Requirements:

For admission to the masters course (by research) the admission requirements for the postgraduate diploma must be met at a level (in a relevant field of study) which, in the opinion of the Faculty Higher Degrees Committee, indicates a high likelihood of success in a masters course with a substantial research component. Alternatively, admission and advanced standing of up to 24 credit points may be granted to candidates with one or more of the following backgrounds:

. an appropriate honours degree at 1st or upper 2nd class level

. a four year degree in which the overall performance was above average and the final year's studies were completed at credit level or higher;

. professional experience which demonstrates the potential of the student to undertake a masters course;

. a postgraduate diploma in an appropriate field, such as the Graduate Diploma in Information Sciences or the Graduate Diploma in Technological Sciences, at an overall credit level.

Course Requirements:

The course normally comprises a preparatory program valued at 24 credit points, taken at postgraduate and masters level, and a thesis valued at 24 credit points. The preparatory program enables the student to undertake extension studies to advanced undergraduate units and "Research Studies in" units. The latter two classes of unit are at postgraduate and masters level. The topics studied in the preparatory program will be relevant to the field of study of the thesis unit which forms the second part of the course.

Intending students should note that there may be some variation to the course requirements shown above. Further information is available from the course administrator.

Course Advice:

Students will be allocated primary and secondary supervisors with whom they must consult at the commencement of, and on a regular basis during, their studies.

Course Administrator:

Dr John Rayner 11A17 (06) 201 2413

[<---] Return to Handbook contents

University of Canberra, AUSTRALIA

HANDBOOK 1996

Degree of Master of Engineering (by research) (178)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Course Administrator:

The primary objective of this course is to enable an engineering graduate to pursue in some depth a field of study within the areas of engineering technology and engineering science, defined by the Faculty's recognised emerging areas of research strength, ie plasma instrumentation, advanced telecommunications and information technology. The research study will comprise an original investigation, design or development reported in the form of a dissertation.

Course Duration:

The normal duration of the course is two years full-time study or an equivalent period of part-time study. The maximum period of candidature is six years.

Admission Requirements:

Admission to the Master of Engineering course requires a four-year Bachelor of Engineering or its equivalent from an approved institution. Admission is also dependent upon the Faculty having the supervisors and facilities needed for the student's chosen thesis topic.

Course Requirements:

The course requires 48 credit points at postgraduate and masters level and consists of 24 credit points towards a preparatory program and 24 credit points for a masters degree thesis. Advanced standing of up to 24 credit points towards the preparatory program may be granted to candidates with an honours degree or equivalent performance or substantial industrial experience. For such candidates the course may be completed in a minimum of one year by successful completion of the thesis. The preparatory program consists of a series of masters level extension and "studies in" units offered by the Faculty, although bridging and extension postgraduate studies at the Australian National University and the Australian Defence Force Academy may also be undertaken as part of the course.

Intending students should note that there may be some variation to the course requirements shown above. Further information is available from the course administrator.

Course Advice:

Students will be allocated primary and secondary supervisors with whom they must consult at the commencement of, and on a regular basis during, their studies.

Course Administrator:

Dr John Rayner 11A17 (06) 201 2413

[<---] Return to Handbook contents

University of Canberra,

HANDBOOK 1996

Degree of Master of Information Technology (by coursework) (296)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Status/Exemption:
- Specialisations:
- Course Advice:
- Course Administrator:
- Typical Full-time Course Structure:

This fee paying course offers students the opportunity to study new and emerging areas of advanced information technology. They may also study issues relating to the design, development and management of systems incorporating this technology.

Scope is provided for specialisation in areas of particular interest to those enrolled. Graduates will have a sound theoretical and practical basis for beginning or continuing a professional computing career, or continuing to a doctorate program.

Course Duration:

The course will usually be studied over two years full-time or as part-time study over 4 years. However, students with strong computing qualifications may be able to complete the course in one year. The full two year course is designed to also be suitable for students who are graduates in a field other than computing.

Admission Requirements:

To be admitted to the course applicants should hold an undergraduate degree, with a credit average or better in computing or any other relevant field of study, from an Australian university. Applicants may also be admitted to the course if their work experience, plus previous tertiary studies, are recognised by the University's Academic Board as being equivalent to a three year undergraduate degree from an Australian university, or better.

The course caters for students from a variety of educational and professional backgrounds. Typically, intending students with considerable formal computing qualifications and professional experience may expect to be granted advanced standing for most or all of the foundation studies year (see Course Structure section below). Such qualified students include:

. students continuing from a graduate diploma in an area such as computing studies or information systems;

. students with a four year undergraduate degree, for example in computer engineering, computer science or honours in computing;

. students with a three year degree in computing with relevant professional experience of at least two years and membership of an appropriate professional body (such as ACS, IEAust).

Course Requirements:

The course has two components. The first part, Foundation Studies in Information Technology, represents one year of full-time study, or part-time equivalent, and currently comprises eight units of graduate level study. Students may select those units which are normally included in either the graduate diploma course in Computing Studies, or the graduate diploma course in Information Systems. Alternatively, permission may be sought to study some other combination of units.

Students may be exempted from all or part of the Foundation Studies segment of the masters course if they have previously been awarded suitable recognised qualifications.

The second part of the course, Advanced Studies in Information Technology, represents one year of full-time study, or part-time equivalent and comprises six units of study. Three units are selected to create a specialisation in a field selected by the student, for example: in programming systems; information systems; computer technology, or, a specialisation in any other approved subject area. Other elective units are selected by the student, in consultation with a course adviser, to create a study program which is coherent and balanced.

Students may only commence the Advanced Studies component of the course after they have completed or been given exemption from all parts of the Foundation Studies component.

Status/Exemption:

As indicated previously, students with a strong computing background may be exempted from part or all of the Foundation Studies in the Information Technology section of the course. Students who have already completed some of the units eligible for inclusion in the masters course, or equivalent units from other institutions, may be given status for them in this course or may be required to study other units in their place.

Specialisations:

For the Advanced Studies part of the course, students select three units to construct a specialisation appropriate to their needs. An academic course adviser will assist students to make their selections from the following units, having regard to which of the units will be available in coming semesters:

4348 Artificial Intelligence Techniques M

4349 Client-Server Computing M

4344 Component and System Modelling with VHDL M

4342 Computer Control and Security M

4345 Data Administration for Large Organisations M

4343 Embedded Systems M

4338 Functional Programming M

4341 Fuzzy Logic and Neural Networks M

4352 Graphics Visualisation Techniques M

4340 High Speed Networking M

4336 Human Factors in Information Technology M

4347 Issues in Information Technology Management M

4337 Issues in the Design of Human-Computer Interfaces M

4339 Logic and Formal Methods M

4335 Object-Oriented Analysis and Design M

4351 Project and Quality Management in Information Technology Systems Development M

4350 Standards and Protocols for Information Exchange M

4346 Systems Simulation M

4333 Usability Testing and the Information Systems Design Process M

Course Advice:

Students are recommended to seek advice from the course administrator on academic questions relating to their study program.

Course Administrator:

Dr Jan Newmarch 11C20 (06) 201 2153

HANDBOOK 1996

Degree of Doctor of Philosophy (235)

- Course Duration:
- Admission Requirements:
- Course Structure:
- Course Advice:
- Course Administrator:

The PhD program offered by the Faculty is concentrated in the major research fields of the Faculty defined by its three recognised emerging areas of research strength in plasma instrumentation, advanced telecommunications and information technology. Studies in this last area include human-computer interactions, artificial intelligence and software engineering, and information dissemination and distribution. Research interests also exist in non-linear analysis and mathematics education.

Course Duration:

Normally 3 years full-time or equivalent part-time, maximum period of study is normally 5 years full-time but cannot exceed 8 years.

Admission Requirements:

Admission to candidature may be granted to students holding a bachelor degree with first class honours, a master degree or equivalent qualifications. Applicants may be required to provide evidence of research experience, which may be shown by reference to prior studies, the completion of a higher degree involving research, publications, and/or other relevant evidence.

Course Structure:

There is no coursework component. Students will be required to write a thesis of about 100,000 words. Where the Faculty believes that a student would benefit from undertaking a preparatory course in a specific area, it may recommend that such a course be made a condition of candidature, in addition to the thesis requirement.

Students enrol in the unit 4094 Doctoral Thesis in Information Technology D (full-time) or 4095 Doctoral Thesis in Information Technology D (part-time).

Course Advice:

Students will be allocated primary and secondary supervisors with whom they must consult at the commencement of, and on a regular basis during, their studies.

Course Administrator:

Dr John Rayner 11A17 (06) 201 2413

The Faculty of Management presently offers undergraduate, graduate, postgraduate and double degree courses leading to the awards listed on the previous page. Students should refer to the section of this Handbook entitled Information for Students, in particular those paragraphs covering definition of University terms, admission, enrolment and academic progress. Prospective and newly-enrolled students should also note the knowledge assumed for each course.

It is the aim of the Faculty to develop an interdisciplinary approach to management studies, and all degree courses offered by the Faculty are therefore connected and interlocked in various ways, although, with graduate and postgraduate courses, the special requirements of individuals and professional requirements will also be considered.

Double Degrees with Law

The University of Canberra offers double degree courses in a variety of areas. A number of these double degrees allow students to obtain a Bachelor of Laws degree in conjunction with another degree course.

Electives

Elective majors and/or elective units in accounting, administration, economics, law, marketing, politics and sociology are also taught within the Faculty as part of the Faculty's courses, and as part of courses offered by other Faculties within the University. Refer to the Electives section of this Handbook for information about all of the elective majors offered by the University.

Field Classes

Some of the units students are required or may elect to take may contain compulsory elements of field experience. In such instances students will be expected to meet their own transport costs.

Library Facilities for Doctoral Students

Library facilities in the City of Canberra are excellent. Many of the nation's major research collections are located here, including the National Library and more specialist departmental, university and institutional libraries distributed around Canberra which are accessible through the University of Canberra Library. The University also has excellent electronic research facilities and is committed to providing on-line access to other libraries and databases for research purposes.

Service Units for Graduates

University graduates in economics or commerce with a major in accounting and who did not include company law, auditing and taxation law in their courses and who wish to qualify for membership of the Australian Society of Certified Practising Accountants, may enrol in the units, 4202 Auditing, 0371 Commercial Law 2 and 0372 Commercial Law 3 at this University. This Society will grant status to candidates who pass these units at this University. It should be noted that the unit, 0368 Commercial Law 1 or its equivalent is a prerequisite for both 0371 Commercial Law 2 and 0372 Commercial Law 3.

Australian Centre for Regional and Local Government Studies

The Centre was established in 1973 and conducts a broad range of residential programs which are targeted at professionals and elected members in local government. Courses are also conducted in regional centres in the states and territories as well as in other Pacific countries.

The flagship programs conducted by the Centre are the residential courses for senior managers and elected members. The Centre is currently developing a Graduate Certificate in Regional and Local Government Management which is expected to begin in 1996. In, addition specialist courses in a range of areas covering contemporary issues such as enterprise bargaining, competitive tendering and contracting out, integrated environmental management and managing change are offered on a regular basis.

ACRLGS is supported in part through funds from the Commonwealth Office of Local Government through the provision of scholarships to course participants. The Centre has strong partnerships within local government, and is advised by a committee which includes members from peak bodies such as the Institute of Municipal Management and the Australian Local Government Association.

Professional Development and Short Course Study Program

The Program was established to conduct courses and consultancies based on the management-related areas of study in the Faculty of Management - accounting, banking, finance, economics, law, marketing, politics and sociology. The Program also includes presentation of Summer Schools for international students from this and other tertiary institutions.

PD&SCP staff administer the Graduate Certificate in Management Studies on-campus, and provide the GCMS off-campus to the Department of Employment, Education and Training. This off-campus service is available on a departmental basis.

Drawing on the expertise of the Faculty and affiliated consultants, PD&SCP offers an extensive on-campus program of non-award short courses that provide managers and professionals with a wide range of knowledge, skills and competencies to enhance work practices and career development. The courses are accessed by enrolling in the advertised public program or by specially designed courses delivered as consultancies in-house. For further information, telephone (06) 201 2680 or 201 2977.

University of Canberra, AUSTRALIA

HANDBOOK 1996

Degree of Bachelor of Applied Economics (278)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Electives:
- Course Advice:
- Course Convener:
- Typical Full-time Course Structure:

The course is designed to offer a broadly-based liberal approach to the study of economics. A major feature of the course is the inclusion of studies in associated disciplines such as politics, administration and public policy, sociology, law, and employment relations. Within this framework, the course aims to provide students with the conceptual and analytical skills required for economic decision making in both the public and private sectors.

Course Duration:

3 years full-time or equivalent part-time.

Assumed Knowledge:

ACT: English (T) major; NSW: 2u English. As the course demands some basic quantitative skills it is recommended that students should have achieved a satisfactory grade in Advanced Mathematics in the ACT, or in a 2 unit course in mathematics in the NSW HSC, or equivalent. However, in the absence of this background, students can undertake mathematical studies designed to provide such numeracy skills.

Course Requirements:

Satisfactory completion of 20 units (72 credit points) as follows:

(a) an economics major of 6 semester-equivalent units plus a minimum of 3 additional economics units;

(b) a second major of 6 semester-equivalent units in an associated discipline, preferably administration, politics, sociology, or employment relations;

(c) at least one statistics and one information systems unit to provide basic quantitative skills;

(d) 3 additional units.

Electives:

The 3 elective units in (d) must be taken from one of the preferred disciplines listed in (b) if one of these was not taken as the second major.

Course Advice:

Students are encouraged to attend course advice sessions and to seek further advice from the course convener, especially at the start of their course.

Course Convener:

Ms Heather Prior 6D5 (06) 201 2991

Typical Full-time Course Structure:

Bachelor of Applied Economics

	Semester 1	Semester 2
YEAR 1	0020 Microeconomics 1 (semester-long) or 3519 Economics 1A (year-long)	0034 Macroeconomics 1 (semester-long) or 3519 Economics 1A (cont'd)
	Second Major#	Second Major#
	3539 Business Statistics 1 or 1444 Basic Information Systems	1444 Basic Information Systems or 3539 Business Statistics 1
	Elective	Elective
YEAR 2	4076 Microeconomics 2 (semester-long) or 4213 Economics 2A (year-long)	0035 Macroeconomics 2 (semester-long) or 4213 Economics 2A (cont'd)
	Second Major#	Second Major#
	Economics Elective+	Elective
YEAR 3	0099 International Economics or 4214 Policy Issues in Microeconomics	2397 Macroeconomics 3 or 4215 Policy Issues in Macroeconomics
	Second Major#	Second Major#
	Economics Elective+	Economics Elective+

#Students may elect a second major of 6 units from one of the areas listed:

Stream 1

Administration and Public Policy

Politics

Employment

Sociology

Stream 2

Accounting

Applied Statistics

Information Systems

Law

Marketing

Psychology

Other majors may be allowed with the permission of the course convener.

Note: When a major from Stream 2 is chosen, then a 3-unit sub-major must be chosen from Stream 1. This is regarded as a crucial requirement to ensure a liberal component to the degree. It may occasionally mean that a prerequisite unit for a Stream 2 major has to be incorporated into the major itself.

+Elective Economics Units (at least 3 of the following must be taken):

3639 Financial Institutions and Markets

0892 Development Economics

0052 Environmental and Resource Economics

0099 International Economics (normally taken as a compulsory part of the third year economics major in Stream 2)

0104 Labour Economics

0102 Managerial Economics

1359 Project Evaluation

0498 Marketing

1989 Marketing Management

2429 International Marketing

In addition there are some additional units offered on occasion, subject to demand, such as 0101 Public Finance.

University of Canberra, AUSTRALIA

HANDBOOK 1996

Degree of Bachelor of Arts in Administration (002)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Course Advice:
- Course Convener:
- Typical Full-time Course Structure:

Courses in administration are designed for those who are making, or who plan to make, their careers in administration in either the public or the private sector. The courses offer both conceptual understanding and a practical orientation.

The undergraduate degree course is suitable both for those who have recently completed secondary studies and for those with some work experience. The Bachelor of Arts in Administration is also available as a double degree with Law.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: Majors in Advanced Mathematics and English (T); NSW: 2u or 3u Mathematics and 2u English.

Course Requirements:

The degree structure consists of a minimum of 21 units with a minimum total credit point value of 74 in four specific areas of study as follows:

(a) seven foundation units in computing, statistics, economics (two units), politics and law and one of psychology, or sociology or accounting;

(b) six units forming the core Administration major;

(c) two to four specialised administration units from within the fields of public administration, public policy, human resource management or industrial relations from the list below;

(d) the choice of an elective major comprising six units, from areas such as accounting, communication, computing, economics, education, history, law, marketing, mathematics, modern languages, nursing, office management, politics, psychology, sociology or women's studies.

Course Advice:

Students should consult the booklet *BA in Administration* available from Reception in Building 6. If in doubt concerning the structure of their course, they should consult the course convener.

Course Convener:

Associate Professor Mark Turner 6D9 (06) 201 2735/2904.

Typical Full-time Course Structure:

Bachelor of Arts in Administration (Units need not be taken in this order except where prerequisites apply and unit availability dictates)

	Semester 1	Semester 2
YEAR 1	4207 Introduction to Management An Economics Unit# 3606 Accounting or 4309 Psychology 101 or 0715 Basic Sociology, 1444 Basic Information Systems or 3762 Communication Interface or 3541 Introduction to Computing Studies	3609 Organisational Behaviour An Economics Unit# 0673 Australian Politics 1 4120 Applied Statistics 1 or 3539 Business Statistics 1 or 0953 Social Research Methods
YEAR 2	3610 Planning and Decision Making 2 Electives 0028 Concepts and Elements of Law or 3852 Law 1	3607 Introduction to Public Administration 2 Electives
YEAR 3	4208 Theory of Organisations Elective Specialised Administration Unit+	3636 Selected Managerial Skills Elective Specialised Administration Unit+

#Either 3519 Economics 1A (year-long), or 0034 Macroeconomics 1 and 0020 Microeconomics 1.

+Two to four units may be taken from those listed below to complete the 21 units required.

3432 Human Resource Management 1

3488 Human Resource Management 2

1372 Industrial Relations

3012 Issues in Industrial Relations

3494 Administrative Decentralisation

3497 Comparative Public Administration

3500 Public Policy 2

2438 Australian Welfare State

3498 Government - Business Relations

1485 Women and Organisations

3588 Women, Politics and Public Policy

2431 Organisational Culture

1359 Project Evaluation

or other units in administration or management subject to approval of the Head of the School of Administrative Studies.

[<---] Return to Handbook contents

University of Canberra, AUSTRALIA

HANDBOOK 1996

Degree of Bachelor of Arts in Social Sciences (211)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Course Advice:
- Course Convener:

This course is designed to offer a flexible general educational background for a variety of career directions, resembling in that respect the traditional university 'BA' except for its strong inclusion of strands of study of direct practical and vocational relevance. It is suitable both for recent matriculants and for men and women in jobs, for the latter of whom its flexibility can be used to provide special combinations of skills required for careers already started.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: English (T) major; NSW: 2u English.

Course Requirements:

Satisfactory completion of 21 units (74 credit points) as follows:

(a) Component 1: Core Units(Essential introductory skill and substantive knowledge areas for the social sciences).

0715 Basic Sociology
3541 Introduction to Computing Studies *or*
3762 Communication Interface 1 *or*
the required introductory unit for a sequence in computing
0028 Concepts and Elements of Law
4120 Applied Statistics 1 *or*
0953 Social Research Methods
0034 Macroeconomics 1 *or*
0020 Microeconomics 1*
0675 Politics and Democracy *or*
0673 Australia Politics 1.

*Students taking certain major or minor sequences (eg in Marketing) will be expected to complete a year's study in economics which may take the form either of these two units together or of a terminating year-long unit 3519 Economics 1A. Students who for this reason take 3519 Economics 1A will not be expected to take 0034 Macroeconomics 1 or 0020 Microeconomics 1 as well.

(b) Component 2: Major/Minor Sequences

Students may complete the degree with (i) two major sequences each in different disciplines or (ii) a single major and two minor sequences each in different disciplines or (iii) an extended major sequence in one discipline and a minor sequence in another discipline.

In all cases one major (or the extended major) must be taken in one of the social sciences disciplines economics, law, politics, public policy or sociology.

The remaining major may be taken within one of those same disciplines or in administration or marketing or (subject to availability of enough units) industrial relations and/or human resource management. With the Dean's permission, given according to the appropriateness of the combination for vocational or academic purposes, it may alternatively be taken from any other discipline taught within this University or at another university.

A 'major' is made up of six related units, varying in sequentiality according to the discipline. A 'minor' is made up of four similarly related units. An 'extended major' is made up of ten similarly related units. Where the introductory unit of a major or minor or extended major sequence is included in the component of 'required core units', this means that the completion of those sequences will require respectively five, three or nine additional units.

(c) Component 3: Finalising Units

Students achieving at least a 'Credit' grade point average at the completion of either 4120 Applied Statistics 1 or 0953 Social Research Methods and no less than 9 other units, may (with the approval of the Dean and subject to the chosen topic falling into an area where there is suitable staff expertise for supervision) be permitted to undertake a Social Science Project, which is a research project of 5000 - 8000 words counting as a double unit for eight credit points. The project will be supervised and examined by two staff members with expertise related to the topic chosen for research.

Students who do not undertake the Social Science Project will be expected to complete two additional advanced-level units in either one or two of their major or minor disciplinary sequences.

(d) Component 4: Elective Units

Students whose particular choices of sequences under sets one to three do not make up the degree total of 21 units (and 74 credit points) may choose as electives, any units for whose enrolment they are qualified, taught anywhere within the University or (with permission from the Dean) in another university.

Students are reminded that the final unit count presupposes that normally no more than ten "1/2" or introductory-level units will be permitted to be undertaken in the degree as a whole; that is, not less than eleven must be at advanced level.

Course Advice:

Students are encouraged to seek advice from the course convener in their choice of units.

Course Convener:

Dr Paul Kringas 7C10 (06) 201 2708

[<---] Return to Handbook contents

University of Canberra, AUSTRALIA

HANDBOOK 1996

Degree of Bachelor of Commerce in Accounting (240)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Course Advice:
- Professional Recognition:
- Course Convener:
- Typical Full-time Course Structure:

The course is designed for students who aspire to management positions via financial management, and for those who wish to become professional accountants. The emphasis in the course is on accounting as an information system to enable the accountant to take her/his rightful place on the management team as a decision maker and information manager. The curriculum provides for the development of both professional skills and conceptual understanding and also encourages students to understand accounting within the context of its social environment.

The Bachelor of Commerce in Accounting is also available as a double degree with Law.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: Advanced Mathematics and English (T) major; NSW: 2u or 3u Mathematics and 2u English.

Course Requirements:

Satisfactory completion of at least 22 required and elective units (72 credit points) as follows:

(a) 13 required units;

(b) a 3-unit humanities minor; and

(c) 6 elective units.

Course Advice:

For detailed course advice, students should contact the course convener.

Professional Recognition:

The Australian Society of Certified Practising Accountants (ASCPA). A candidate who plans to obtain both the award of this University and admission to associate membership of the ASCPA must, in addition to the 13 required units given below, pass 0371 Commercial Law 2, 0372 Commercial Law 3 and 4147 Advanced Managerial Accounting. For CPA status, completion of the ASCPA's CPA Program and an experience requirement is also necessary.

The Institute of Chartered Accountants in Australia (ICAA). Direct entry to membership may be gained by the completion of the course followed by the completion of the ICAA's Professional Year of Study. The degree in accounting awarded by the University has been designated an approved tertiary course. Students should note that the Institute requirements include passes in the units 0371 Commercial Law 2, 0372 Commercial Law 3 and 4147 Advanced Managerial Accounting. The practical experience requirement for admission to membership of the ICAA is three years for graduates of this University.

The NSW Public Accountants Registration Board. Graduates in accounting who include 0371 Commercial Law 2 and 0372 Commercial Law 3 in their courses will be exempt from all examinations by the Board.

The Institute of Chartered Secretaries and Administrators. The Council of the Institute is prepared to allow exemption from up to 12 subjects in respect of approved passes.

Course Convener:

Mrs Judy Paterson 6C25 (06) 201 2019

Typical Full-time Course Structure:

Bachelor of Commerce in Accounting

	Semester 1	Semester 2

University of Canberra, AUSTRALIA

HANDBOOK 1996

Degree of Bachelor of Commerce in Banking and Finance (241)

- Course Duration:
- Assumed Knowledge:
- Course Requirements:
- Elective Sequence:
- Course Advice:
- Professional Recognition:
- Course Convener:
- Typical Full-time Course Structure:

This course meets the needs of those wishing to pursue executive careers in the banking and finance industry. Career opportunities may be found in financial institutions such as trading banks, merchant banks, finance companies, building societies and credit unions, and in positions such as treasurers, bond traders, money market or foreign exchange managers, financial analysts and business executives in non-financial corporations in the private and public sectors.

The course provides an international perspective to capital markets and risk analysis and has been structured around an interdisciplinary major in banking and finance, incorporating substantial input from accounting, economics, law and information systems. The course thus seeks to provide a flexible and balanced mixture of analytical tools and practical skills directly relevant to the needs of the industry and the student.

The Bachelor of Commerce in Banking and Finance is also available as a double degree with Law.

Course Duration:

3 years full-time or equivalent part-time

Assumed Knowledge:

ACT: Major in Advanced Mathematics and English (T); NSW: 2u or 3u Mathematics and 2u English.

Course Requirements:

Satisfactory completion of at least 21 semester-equivalent units as follows:

(a) 54 credit points from 15 required units; and

(b) at least 19 credit points from 6 elective units as approved by the Dean of Faculty.

Elective Sequence:

The elective stream allows students to combine the core studies in accounting, economics, law and information systems with a second major in, say, economics, computing, languages or other approved major, to produce a finely tailored "niche" program.

Course Advice:

Students are encouraged to seek course advice from the course convener in their choice of an elective sequence.

Professional Recognition:

Students who have completed the degree course in Banking and Finance will have satisfied the academic requirements for senior associate status in the Australian Institute of Bankers.

Course Convener:

Mr Graham Rogers 6D16 (06) 201 5043

Typical Full-time Course Structure:

HANDBOOK 1996

Degree of Bachelor of Commerce in Management Sciences (242)

This degree is offered jointly by the Faculty of Management and the Faculty of Information Sciences and Engineering. Particulars of the course are to be found in the Faculty of Information Sciences and Engineering's entry in this Handbook.

[<---] Return to Handbook contents

University of Canberra, AUSTRALIA

HANDBOOK 1996

Degree of Bachelor of Laws (247) (Graduate Bachelor Degree)

- Course Duration:
- Admission Requirements:
- Prescribed Law Major:
- Course Requirements:
- Bachelor of Laws Degree with Honours
- Course Advice:
- Professional Recognition:
- Course Convener:
- Typical Full-time Course Structure:

The University's Bachelor of Laws program will allow graduates in the areas of commerce, economics and management to acquire further specialised legal professional skills. The course has a strong practical and skills orientation, and equips its students with competencies in the basic areas of legal professional practice as well as with more specialised competencies of the kind that would be required to produce well-rounded commercial lawyers. The course is particularly directed to meeting the educational needs of law graduates who intend to practise as commercial lawyers in large law firms, larger accounting firms, in government commercial agencies and in business generally.

Five core legal competencies are the foundation upon which this program is built. They are: basic professional skills; general commercial and common law skills; corporations law skills; revenue law skills; and general legal skills.

The aim is to equip students with strong commercial law skills in a number of key commercial law areas such as contract law, corporations law and taxation law.

Course Duration:

2 years of full-time study undertaken following the completion of an undergraduate degree in commerce or its equivalent. Where students have not undertaken a year of prior studies in the required law units (Law 1 to Law 6), the duration of the graduate course will be at least three years of full-time study.

Admission Requirements:

Entry is limited to graduates who hold a degree in the areas of commerce, economics, management or an equivalent degree (hereinafter referred to collectively as the commerce degree). This commerce degree should normally contain a prescribed law major of at least six units (see below), and candidates for the Bachelor of Laws degree must have completed their undergraduate law major at the credit average level or above.

Where students have not completed the required law major in their undergraduate commerce degree, they will need to complete the prescribed law major at the credit average level before admission to the Bachelor of Laws program will be confirmed. This requirement may be satisfied by undertaking the Graduate Diploma in Legal Studies or through conditional admission to the LLB program, in consultation with the course convener.

Prescribed Law Major:

The prescribed law major which students must have successfully taken in their initial degree, or through the Graduate Diploma in Legal Studies or through conditional admission into the LLB program, comprises the following LLB units:

3852 Law 1: Introduction to Law
3853 Law 2: Contract (LLB)
4135 Law 3: Business Transactions (LLB)
4136 Law 4: Corporations (LLB)
4137 Law 5: Taxation (LLB)
4138 Law 6: Administrative Law (LLB)

Course Requirements:

Satisfactory completion of a total of at least 21 law units and at least 76 credit points as follows

(a)
a 6-unit undergraduate prescribed law major (22 credit points) usually undertaken as part of the first undergraduate degree;

(b)
11 core LLB units (44 credit points) (including 3 year-long units); and

(c)
4 elective law units chosen from available electives (at least 12 credit points).

It should be noted however that completion of unit 3862 Litigation and Dispute Processing (LLB), is required for professional admission purposes.

Bachelor of Laws Degree with Honours

The degree of LLB may be awarded with first or second class honours. To be eligible to undertake studies at honours level, a student must

- achieve at least a credit average in all law units undertaken at the University of Canberra including units in sets (a) (b) and (c) of the LLB course requirements and
- have obtained at least a credit grade for a piece of legal writing of not less than 5000 words in the unit 4357 Legal Theory (LLB) or 3680 Legal Theory G or in the unit 3864 Public Companies (LLB)

Course Advice:

Students need to seek course advice from the course convener in the selection of elective units.

Professional Recognition:

The Bachelor of Laws program is recognised by the Supreme Court of the Australian Capital Territory for the purpose of admission to legal practice.

Course Convener:

Mr Brendan Pentony 6C20 (06) 201 2712

Typical Full-time Course Structure:

Bachelor of Laws

First degree: An undergraduate commerce, accounting, economics or management degree must be completed prior to entry into the Graduate LLB Program. The prerequisite for the degree will usually include the 6-unit prescribed law major listed above.

Graduate Bachelor of Laws

Double Degree of Bachelor of Applied Economics/Bachelor of Laws (301)

- Course Duration:
- Assumed Knowledge:
- Admission Requirements:
- Administrative Arrangements:
- Course Structure:
- Professional Recognition:
- Course Convener:
- Typical Full-time Course Structure:

This program is for students of high ability who seek careers in the important legal aspects of economics, demand for which is highly sought after in the University's catchment area.

To enable completion in a minimum of five years, time savings are arranged mainly by taking LLB units as the second major of the existing Bachelor of Applied Economics course. It is important to follow closely the typical study program shown below to achieve minimum times. An information booklet on the course structure of double degree courses with law may be obtained from the School of Law office (6C31).

Course Duration:

5 years full-time; maximum period of study 8 years.

Assumed Knowledge:

ACT: English (T) major; NSW: 2u English.

Admission Requirements:

Admission to a double degree course will ensure that the student will be permitted to proceed into the Bachelor of Laws component of the course. However, before the final two years (full-time equivalent) of the Bachelor of Laws course can be undertaken, students taking a double degree must have satisfied the academic requirements for the first degree in the double degree course.

Administrative Arrangements:

The Administrative Officer of the School of Law may be consulted in regard to double degree courses offered entirely in the Faculty of Management, or refer to the information booklet on the course structure of double degree courses.

Students undertaking the double degree course will be able to be awarded the first degree in the double degree course upon completion of the academic requirements for that degree.

Course Structure:

The course structure of the double degree course requires that students admitted to a double degree course must undertake six required law units as part of the first degree course in the double degree sequence.

At completion of the Bachelor of Applied Economics (including the six units mentioned above), students will undertake 11 core LLB units (amounting to 44 credit points) and four elective law units (amounting to at least 12 credit points).

Professional Recognition:

The Bachelor of Laws program is recognised by the Supreme Court of the Australian Capital Territory for the purpose of admission to legal practice.

Course Convener:

Mr Don Fleming 6C8 (06) 201 2686

Typical Full-time Course Structure:

Typical Full-time Course Structure:

Bachelor of Arts in Social Sciences/Bachelor of Laws

Because of the flexibility of the Social Sciences degree course, a typical study program is suggested for the first year only. While the six units listed hereunder for first year are the six required units, all these units do not have to be completed before undertaking further studies, except that where advanced units require these basic units as prerequisites to them, they must first have been completed. However, early completion of all these basic units is strongly recommended.

4313 Psychology 203 : Social and Developmental Psychology
4317 Psychology 303 : Organisational Psychology

Administration

4207 Introduction to Management
3609 Organisational Behaviour
3610 Planning and Decision Making

Chinese

4282 Chinese 1 : Language and Culture
0660 Chinese 2
3767 Chinese 3/4

Japanese

4283 Japanese 1 : Language and Culture
0157 Japanese 2
3771 Japanese 3/4

Spanish

4285 Spanish 1 : Language and Culture
0514 Spanish 2
3775 Spanish 3/4

@ Students must complete 6 elective units totalling a minimum of 23 credit points. At least one unit must be chosen from the following:

4353 Advanced Auditing
4148 Advanced Financial Reporting
4147 Advanced Managerial Accounting
tba Accounting Information Systems 2
4204 Portfolio Theory and Management

Students should select single units or sequences of units from the following disciplines: accounting, administration, economics, history, politics, psychology, information systems, computing, finance, marketing, law, sociology, statistics, languages, mathematics, other (as approved by course convener).

+ Exception: Because the third unit in a language minor is a year-long 8 credit point unit, students taking a language for their humanities minor would generally be expected to complete 5 electives totalling a minimum of 19 credit points. See course convener for advice.

**Elective Law Units:

Elective Law Units include the following:

0008 Civil Rights
3846 Conflict of Laws (LLB)
3848 Corporate Crime (LLB)
2617 Employment Discrimination and the Law
0080 Family Law
3491 Insolvency Law
3851 International Business Taxation (LLB)
2613 Labour Law
3861 Legislation (LLB)
3862 Litigation and Dispute Processing (LLB)

Graduate Certificate in Management Studies (263)

- Course Duration:
- Admission Requirements:
- Course Availability:
- Course Requirements:
- Status and Exemptions:
- Course Advice:
- Course Convener:

This course is designed to provide experienced managers without formal training in management with an award course in management studies. This Certificate is a full-fee paying course. While it is an award course which may be taken on campus, arrangements can be made for the whole course or parts of the course to be delivered at off-campus premises for sufficiently large groups of students who are nominated and enrolled by an employer or employers.

The course schedule has been devised to meet the needs of part-time students, and it involves two or sometimes three days each week for attendance at lectures, tutorials, seminars and workshops.

Course Duration:

1 semester full-time or 2 semesters part-time. (The course is designed primarily for part-time study, but full-time study is also possible.)

Admission Requirements:

The course is open to men and women who have successfully completed a first degree program at an Australian university or college of advanced education and who have not less than two years of work experience.

Members of professions who hold awards which are, in the opinion of the Academic Board, equivalent to a first degree, may be admitted to the course. The Academic Board may also admit such other persons who, in the Board's opinion, are able to undertake the course of study with a reasonable likelihood of success.

Course Availability:

Entry is usually in the first semester of each year.

Course Requirements:

Satisfactory completion of at least 16 credit points (4 semester units) as follows

(a) 2 required units totalling 8 credit points; and

(b) 2 elective units totalling 8 credit points.

Required Units:

3943 Introduction to Management G

3929 Financial Management G or 3925 Elements in Human Resource Management G

Elective Units: Any two of the following units

0565 Basic Information Systems G

3912 Concepts and Elements of Law G

3925 Elements in Human Resource Management G

3926 Emerging Issues in HRM G

3929 Financial Management G

3932 Industrial Relations G

3942 Introduction to Planning and Policy G

3947 Law in Administration G

3957 Macroeconomics G

3959 Managing Individual and Organisational Change G

3962 Marketing G

3967 Microeconomics G

3971 Organisational Behaviour G

3975 Project Evaluation G

3893 Strategic Business Planning G

or other units approved by the Faculty.

Status and Exemptions:

Students who qualify may be granted up to two units of status, based on studies in uncompleted graduate awards in Australian tertiary institutions or their equivalent. Students whose previous studies would otherwise have resulted in the granting of status of more than two units, in respect of particular required units in this course, may be exempted from such required units provided that an equal number of substitute units are included in the program. Substitute units should be chosen by the student and the course adviser, and require the approval of the Director of the Graduate Certificate in Management Studies before they constitute part of the approved program.

In selecting substitute units, choice should be made so as to augment the student's knowledge of administratively-related fields. Upper-level undergraduate units may be taken when the student's previous studies satisfy prerequisites, or entry-level units where a new discipline is to be explored. The most appropriate fields are those offered by the Faculty of Management and the Faculty of Information Sciences and Engineering.

Course Advice:

For more detailed course advice, students should contact the course convener.

Course Convener:

Mr John Martin 7C15 (06) 201 2709

HANDBOOK 1996

Graduate Diploma in Administration (053)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Status/Exemption:
- Course Advice:
- Course Convener:
- Typical Full-time Course Structure:
- Typical Part-time Course Structure:
- Electives Units:

This course is designed to help individuals as they progress in their careers, especially public sector careers, to move away from areas of initial specialisation towards those involving managerial and administrative functions. The approach is both conceptual and practical: an important aim is to offer graduates in fields other than administration the opportunity to immerse themselves in recent developments in administration and its associated fields.

The course is intensive, involving a serious commitment of time and intellectual effort. The teaching schedule has been devised to meet the needs of part-time students, and involves attendance at lectures, tutorials, seminars, and workshops, mostly held in the evenings, over two or sometimes three days each week.

It also provides a launching ground for students embarking on the Master of Public Administration (MPA) program. The graduate level units from this diploma serve as the first formal year of study for the masters course. Entry into the masters level will be subject to satisfactory academic progress, that is at least two credit level passes at the graduate diploma level of the program.

Course Duration:

The course is designed primarily for part-time students, who are normally expected to complete in three semesters; however, full-time study is also possible with completion expected in two semesters.

Admission Requirements:

Applicants must have a degree or an award that, in the opinion of the University Academic Board, is the equivalent of a degree conferred by a tertiary institution recognised by the Board. In addition to holding a degree or an equivalent award, candidates should also have not less than two years of relevant work experience prior to admission.

Course Requirements:

Satisfactory completion of at least 24 credit points (6 semester units) as follows

(a) 3 required units totalling 12 credit points; and

(b) 3 elective units totalling 12 credit points.

Status/Exemption:

Students may be granted status/exemption for up to three relevant units based on studies in uncompleted graduate awards in Australian tertiary institutions or their equivalent, but not otherwise. Where students have undertaken equivalent units for completed programs, they should select substitute units from the electives listed above. This is of particular relevance for core units.

Course Advice:

Students are recommended to seek advice from the course convener on academic questions relating to their study program.

Course Convener:

Dr Michael Jones 6D13 (06) 201 2742

Typical Full-time Course Structure:

Graduate Diploma in Applied Economics (090)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Course Convener:
- Typical Part-time Course Structure:

This course seeks to develop the economic analytical skills demanded of today's managers in both the public and private sectors.

Course Duration:

The course is normally completed over three to four semesters of part-time study, although full-time study is also possible.

Admission Requirements:

The course is generally available to applicants holding a bachelor degree or equivalent award from a recognised tertiary institution in a discipline other than economics. It may also be available to persons with an economics degree if such persons took their degree more than ten years ago and wish to refresh and extend their knowledge. Entry may be in either first or second semester, subject to the University's policy on admission.

Course Requirements:

Satisfactory completion of 6 semester units as follows:

(a) 3967 Microeconomics G and 3957 Macroeconomics G; and

(b) four elective units from the list below.

Course Advice:

Students are advised to consult with the course convener if they are in doubt about their study program.

HANDBOOK 1996

Graduate Diploma in Employment Relations (328)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Convener:

The Graduate Diploma in Employment Relations in the fields of Human Resource Management and Industrial Relations will provide students with an overview of the nature of the employment relationship in both its management initiated aspects and those aspects which are subject to regulation and negotiation. The course will also provide opportunities for further study of either the human resource aspects or the industrially regulated aspects of the relationship. Students will be able to choose to specialise in either human resource management or industrial relations after establishing a base of knowledge in both areas. The course will assist in the acquisition of the skills and knowledge required for the management, regulation and negotiation of the relationships between employees and management in the workplace.

Course Duration:

1 year full-time or equivalent part-time.

Admission Requirements:

Applicants should have completed an undergraduate degree in an Australian university or an equivalent qualification in a recognised tertiary institution. It will also be expected that applicants will have completed at least two years work experience in an area of activity related to the program. Applicants with extensive work experience related to the course or who have undertaken formal courses related to the areas covered in the course may also seek entry into the program, subject to the approval of the University's Admissions Committee.

Course Requirements:

The course will consist of six units of 4 credit point each; including

core units for all students

3925 Elements in Human Resource Management G
3932 Industrial Relations G
3951 Law of Employment G *or* 3912 Concepts and Elements in Law G (for students proposing to study additional law units)

For students desiring to deepen their study of human resource management, the following units would be undertaken:

3959 Managing Individual and Organisational Change G
3893 Strategic Business Planning G
Elective

For students wishing to specialise in regulated and negotiated aspects of the employment the following sequence would be followed:

3013 Issues in Industrial Relations G
3946 Labour Law G
3936 Injury and Safety Law G *or* 2618 Employment Discrimination and the Law G

For students wishing to undertake further study in industrial relations without necessarily undertaking additional law units, at least 12 credit points from the following:

3013 Issues in Industrial Relations G
4512 Industrial Relations Skills and Advocacy G
An approved elective

Variations from these patterns of study may be approved by the Faculty Board on the advice of the course convener.

Elective units

3943 Introduction to Management G
3942 Introduction to Planning and Policy G
3971 Organisational Behaviour G
3960 Management and Organisational Analysis G
3013 Issues in Industrial Relations G
3946 Labour Law G
3936 Injury and Safety Law G
2618 Employment Discrimination and the Law G
3893 Strategic Business Planning G
3959 Managing Individual and Organisational Change G
3915 Woman and Organisations G
4206 Women, Politics and Public Policy G
3944 Research Methods G
3527 Research Methods in Human Resource Development G
3977 Public Administration G
3929 Financial Management G

Subject to prerequisites and corequisites the course convener may approve electives not listed above.

Graduate Diploma in Legal Studies (018)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Advice:
- Course Convener:
- Typical Part-time Course Structure: (for students seeking to enter LLB program)
- Typical Part-time Course Structure: (for students pursuing the non-professional diploma program)

The Graduate Diploma in Legal Studies serves two purposes. It provides access to the Graduate Bachelor of Laws degree, admission to which requires a law major of six units. (See admission requirements for the LLB program.) The course may be completed by doing six units Law G1 to Law G6 inclusive.

The diploma also provides a qualification in law for professionals who do not practise law but require legal knowledge and skills. On this basis, it is designed to provide a thorough grounding in some law areas to persons who already hold a degree or equivalent qualification in some discipline other than law. This study of law at tertiary level is, however, recognised as a valuable training for those working or intending to work in both the public and private sectors.

The course aims to develop in graduate students an awareness of the nature and operation of the law and the legal system, and to provide those employed in government, the teaching profession and the private sector with a working understanding of areas of the law of particular vocational relevance.

Course Duration:

1 year full-time or equivalent part-time

Admission Requirements:

The course will be open to applicants holding a bachelor degree or equivalent other than in law from a recognised Australian tertiary institution. Students who hold a law degree from a foreign tertiary institution may also be permitted to undertake this course.

Course Requirements:

The course consists of 6 semester-long units (24 credit points) as follows

(a) 3 required units; and

(b) 3 elective units which may be chosen from any available law units offered in the University. This includes the units 1666 Deviance and Crime and 1372 Industrial Relations.

Course Advice:

Students who have not completed 3912 Concepts and Elements of Law G or its equivalent before being admitted to the course should enrol in it in the first semester of their study. Students are also encouraged to seek course advice from the course convener in the choice of electives.

Course Convener:

Mr Kam Kamarul 6C14 (06) 201 2696

Typical Part-time Course Structure:

Graduate Diploma in Management Sciences (103)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Status/Substitutions:
- Course Advice:
- Course Convener:
- Typical Full-time Course Structure:

The course is offered jointly with the Faculty of Information Sciences and Engineering.

The course is designed to help graduates acquire knowledge and skills in the major areas of management sciences: accounting, administration, computer management, economics and quantitative techniques.

The course is subsumable with the degree of Master of Business Administration. Students wishing to proceed to the MBA should seek advice from the MBA course convener.

Course Duration:

1 year full-time or equivalent part-time

Admission Requirements:

A first degree or equivalent qualification from an approved tertiary institution.

Course Requirements:

Satisfactory completion of at least 24 credit points from six required units.

Status/Substitutions:

Up to three units of status may be allowed for appropriate studies not counted towards another degree. Where students already have an adequate grasp of the subject matter of a unit from previous studies, substitutions must be made from the list of approved elective units.

Course Advice:

Students are encouraged to seek course advice from the course convener so as to ensure that correct substitutions are made.

Course Convener:

Mr James Hanratty 6D11 (06) 201 2175

Typical Full-time Course Structure:

HANDBOOK 1996

Degree of Master of Arts in Administration (049)

- Course Duration:
- Admission Requirements:
- Course Structure:
- Course Advice:
- Course Convener:

This course is designed to provide to postgraduate scholars an opportunity to pursue in advanced level research into organisational, administrative or policy-related matters. Although this award is primarily a degree by thesis, coursework is also required. Guidelines are available to allow students who can demonstrate superior research ability to convert from the Master of Arts in Administration (MAA) enrolment to the Faculty PhD program.

Course Duration:

2 years full-time or equivalent part-time.

Admission Requirements:

The requirements for admission to the Master of Arts in Administration program are

(a) a good first degree;

(b) academic preparation in administration, and related disciplines;

(c) normally, not less than two years of work experience; and

(d) evidence of research capacity.

Course Structure:

Satisfactory completion of 48 credit points. The program for the MAA is arranged in two segments as follows:

Preliminary: An approved program of units taken from the Graduate Diploma of Administration and Master of Public Administration programs to satisfy admission requirements. (Note: a well-prepared student may win exemption from part or all of this requirement. Status may be given for up to 16 credit points subject to the approval of the Masters Courses Committee.)

Core: Unit 3944 Research Methods G (4 credit points) is a compulsory unit for all candidates including those granted status.

Unit 4429 [or 4428 (full)] Administration Thesis M (32 credit points).

The choice of preliminary units will be approved for individual students by the course convener to ensure that they are adequately prepared in administration-related disciplines. Details of these units and the compulsory unit 3944 Research Methods G are provided in the Handbook and in the unit descriptions.

Thesis Requirement: The unit 4429 [or 4428 (full)] Administration Thesis M (32 credit points), requires completion under supervision of a substantial thesis of about 50,000 words in length. The thesis will be based on an investigation into an approved administration topic. The credit point allocation indicates that it is expected the thesis work will require a minimum of two to three semesters of research and writing under appropriate supervision.

Intending students should note that there may be some variation to the course requirements shown above. Further information is available from the course convener.

Course Advice:

Students are encouraged to seek as early as possible the advice of the course convener in the selection of preliminary units. Program approval must be continued at the time of formal application.

Course Convener:

Professor John Halligan 6D1 (06) 201 2725

[<---] Return to Handbook contents

University of Canberra, AUSTRALIA

HANDBOOK 1996

Degree of Master of Business Administration (by coursework) (118)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Status:
- Course Advice:
- Course Convener:
- Typical Full-time Course Structure:
- Typical Part-time Course Structure:

The Master of Business Administration (MBA) course is based on coursework, is practically-oriented and is presented in a range of teaching formats covering lectures, tutorials, seminars and case studies.

The objectives of the course are

- to provide for graduates a professional masters degree level course in business administration;
- to equip graduates with a theoretical and practical education in business administration which will be relevant to both private and public sector employment;
- to meet the needs of full and part-time graduate students from Australia and the Asia-Pacific region who wish to pursue professional graduate studies in management.

The philosophy of teaching at the masters degree level is to develop the basic intellectual and technical capacities needed to be effective top level managers. Students acquire a repertoire of knowledge, attitudes and practical skills in areas such as economics, accounting, finance, marketing, human resource management, business law and labour relations, which enables them to identify and evaluate alternatives and to make and implement business decisions.

Course Duration:

2 years full-time or 3 years part-time

Admission Requirements:

Applicants must have a degree or an award that, in the opinion of the University's Academic Board, is the equivalent of a degree conferred by a tertiary institution recognised by the Board. In addition to holding a degree or an equivalent award, candidates should also have not less than two years full-time or equivalent part-time relevant work experience prior to admission. There is no GMAT requirement.

Course Requirements:

Students must obtain 48 credit points to complete the course. The academic program for students will be determined jointly by the University and the student and will be tailored to the interests and academic background of the student.

In the first full-time year students are required to complete:
24 credit points obtained from six required graduate level units.

In the second full-time year the program requires:
24 credit points obtained from: two required Masters level units; and four units selected from a range of elective Masters level units or two units and a dissertation equivalent in value to two semester units. Students may participate in the Australian Capital Territory Enterprise Workshop Program as an alternative to preparing a dissertation.

Status:

The Faculty will consider granting credit for equivalent MBA units from incompleted courses at other tertiary education institutions.

In the case of units which have been completed in undergraduate courses, Faculty policy is to recognise those which cover areas similar to MBA units but to require that students substitute other units in their MBA so that it will always be the case that 48 credit points are needed to complete the course.

Course Advice:

Students are encouraged to seek course advice from the course convener in the selection of electives.

Course Convener:

Mr James Hanratty 6C11 (06) 201 2175

Degree of Master of Corporate Law (by research) (255)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Conveners:

The course seeks to provide a research-based masters degree in the broad area of corporate law. The degree may be taken with honours.

Course Duration:

The duration of the course will usually be 24 months of full-time study or 48 months of part-time study, where a person holds a three-year bachelor degree. Where a person holds a four-year degree in law or a Graduate Diploma in Legal Studies (or its equivalent), the degree can be completed in one year of full-time study or in two years of part-time study. In these cases, advanced standing may be granted for up to six graduate level units. Extensions of the period of candidature may be available in some cases. In addition, it may be possible to obtain an "intermission" or leave of absence.

Admission Requirements:

Admission to the course is open to graduates in any area. The undergraduate degree, or such other equivalent qualification, must have been completed at the credit average standard or above.

Course Requirements:

Candidates for the award with honours are required to satisfactorily complete a thesis (48 credit points) of about 60,000 words. For the pass option, the degree is completed by a dissertation (32 credit points) and appropriate masters level coursework or equivalent (16 credit points). A maximum of six such masters (M) level units in law may be taken. Where six units are taken, the length of the dissertation will be reduced accordingly.

Intending students should note that there may be some variation to these course requirements. Further information is available from the course convener.

Course Conveners:

Professor Roman Tomasic 6C29 (06) 201 2336 or Dr Tony Deklin 6C6 (06) 201 2688.

HANDBOOK 1996

Degree of Master of Employment Relations (by coursework) (326)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Convener:

The masters degree course in employment relations will provide opportunities for students to undertake advanced study in human resource management and industrial relations. This will be achieved through both coursework and a substantial research dissertation of up to 40,000 words in the area of employment relations.

Course Duration:

1 year full-time or equivalent part-time after completion of graduate level studies in employment relations.

Admission Requirements:

Normally students entering this course will have completed the requirements for the award of a Graduate Diploma in Employment Relations or in Human Resource Management or in Industrial Relations at the University of Canberra. Applicants with equivalent graduate level qualifications in the area of employment relations from the University of Canberra or another tertiary institution may also seek entry into the course.

Course Requirements:

The course will consist of two 4 credit point units and a dissertation of 16 credit points.

Coursework component

4520 Research Methods M

4513 Issues in Workforce Management M

Students may undertake a substitute M level unit in an area related to employment relations with the agreement of the course convener.

Research Dissertation

The principal activity at the M level will be the completion of a substantial research dissertation of up to 40,000 words on a topic approved by the course convener.

Course Convener:

Dr John O'Brien 7C9 (06) 201 2729

HANDBOOK 1996

Degree of Master of Laws (by coursework) (303)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Course Structure:
- Course Conveners:

The course provides a coursework-based masters degree in law.

Course Duration:

The duration of the course will usually be 24 months of full-time study or 48 months of part-time study, where a person holds a Bachelor of Laws degree. Extensions of the period of candidature may be available in some cases. In addition, it may be possible to obtain an "intermission" or leave of absence.

Admission Requirements:

Admission to the course is open to law graduates or the holders of equivalent qualifications. Applicants for the course may be admitted to the program provided that they have completed their undergraduate course, or equivalent, at the credit average standard or above. Bachelor of Laws graduates may be granted advanced standing for up to six graduate (G) level units (or up to 24 credit points).

Course Requirements:

Candidates for the award must obtain 48 credit points of which at least 24 credit points must be from approved graduate level units and up to 24 credit points from masters level units as follows:

(i) Up to 24 credit points from the following Graduate level units:

3894 Administrative Law G

3898 Advanced Administrative Law G

3900 Advanced Corporation Law G

3896 Advanced Revenue Law G

3909 Civil Rights G

3913 Concepts and Elements of Law G

3912 Constitutional Law G

2618 Employment Discrimination and the Law G

3928 Family Law G

3936 Injury and Safety Law G

3940 International Trade Law G

3946 Labour Law G

3949 Law of Business Transactions G

3950 Law of Communications G

3870 Law G1 : Introduction to Law

3871 Law G2 : Contract

3872 Law G3 : Business Transactions

3873 Law G4 : Corporations

3874 Law G5 : Taxation

3875 Law G6 : Administrative Law

3955 Legislative Processes G

3973 Planning and Environmental Law G

3976 Property Law G

3914 Trade Practices Law G

(ii) At least 16 credit points from one or more of the following masters units:

3899 Advanced Administrative Law M

3901 Advanced Corporation Law M

3904 Advanced Taxation Law m

3908 Business Ethics M

3877 Commercial Law M2

3878 Commercial Law M3

3867 Corporate Crime M

3868 Corporate Governance M

3919 Criminology M

3941 International Trade Law M

3948 Law of Business Decisions M

3934 Restrictive Trade Practices M

3920 Securities Regulation M

(iii) Master of Laws Dissertation. An 8 credit point dissertation unit in an approved area.

Course Structure:

Details are available from the course convener.

University of Canberra, AUSTRALIA

HANDBOOK 1996

Degree of Master of Professional Accountancy (by coursework) (311)

- Course Duration:
- Admission Requirements:
- Advanced Standing and Exemptions:
- Course Requirements:
- Course Convener:

The objectives of the course are

- to provide graduate students with an education designed to expand their vocational skills and to equip them for employment as accountants in commerce, government, industry and public practice;
- to provide graduates with the educational preparation required for entry to the professional accounting bodies;
- to provide an educational base which will facilitate career transition from a range of undergraduate specialisations to accounting and management, and
- to develop in graduate students a professional conscience so that they will accept responsibility for contributions to the solution of current and emerging problems in accounting.

Course Duration:

2 years full-time, 4 years part-time.

Admission Requirements:

The course is open to those who hold a bachelor degree, or its equivalent, in a discipline other than accounting, from a recognised tertiary institution. All students who complete the Graduate Diploma in Professional Accounting will be eligible for admission to the masters course.

Advanced Standing and Exemptions:

Where a student has already undertaken an equivalent unit (or other approved body of study) to any of the compulsory units, they should undertake such other relevant masters level units as recommended by the course convener. This provision would apply particularly to a graduate in economics or some other business major who may have studied two years of accountancy and finance at undergraduate level. Such a student may be exempted from Accounting M1 and M2 together with Finance M1; however, they must complete additional units from the group of approved electives so that the total number of units completed at graduate level remains at twelve.

Students who transfer from a partially completed equivalent graduate conversion program offered at another university (either at masters or graduate diploma level) are eligible to apply for advanced standing on the basis of their previous study. Normally such advanced standing will be available for a maximum of five units. No advanced standing will be granted for the unit 4527 Accounting Theory M.

Course Requirements:

Through appropriate choice of electives, the course can satisfy the academic requirements of the two professional accounting bodies.

Required Units:

3879 Accounting M1
3880 Accounting M2
3881 Accounting M3 3882 Accounting M4
3883 Accounting M5
3885 Finance M1
4527 Accounting Theory M
3876 Commercial Law M1
3877 Commercial Law M2

Elective Units:

3878 Commercial Law M3, and Elective M1 (from economics, quantitative methods or another approved subject unit.) and Elective M2 (from economics, quantitative methods or another approved subject unit) depending on student background. (48 credit points from 12 units)

Approved Electives:

4222 Accounting for Planning and Control MBA
3878 Commercial Law M3
3960 Management and Organisational Analysis G
3984 Management Information Systems G
3924 Economics for Managers G
4224 Portfolio Theory and Investment Analysis M
3889 Quantitative Methods G
0553 Programming Techniques G1
4223 Strategic Management M

Course Convener:

Professor Brian Andrew 6C16 (06) 201 2715

University of Canberra, AUSTRALIA

HANDBOOK 1996

Degree of Master of Public Administration (by coursework) (133)

- Course Duration:
- Admission Requirements:
- Course Requirements:
- Status:
- Specialisations:
- Course Convener:
- Typical Full-time Course Structure:
- Typical Part-time Course Structure:

The Master of Public Administration course is based on coursework and is delivered by Faculty staff members, supplemented where necessary by visiting lecturers. The course is presented in a combination of lectures and seminars.

The philosophy of teaching at the masters degree level is to develop the basic intellectual and technical capacities needed to be effective top level managers and executives. Students will acquire a repertoire of knowledge, attitudes and practical skills in areas such as economics, financial management, human resource management, public administration, policy analysis, politics, organisational analysis and industrial relations.

The aim of the course is to provide graduates with knowledge and skills in the major areas of public management. They learn about diverse organisational and policy problems and processes which are applicable to the increasingly complex managerial and political context in which they operate. They confront contemporary issues in managing the public sector, and are expected to be able to interpret and adapt course material to their work-place situations.

The Master of Public Administration course is designed for three types of students:

- Persons already employed by the ACT, State and Commonwealth governments who wish to advance to more senior levels within their services. Managers will be able to develop their capacities while being exposed to broader questions and processes. For policy analysts the course offers both public policy and managerial contexts.
- Persons outside government who are seeking either to enter the public sector or to acquire a fuller understanding of public management and policy.
- Persons from other countries seeking a degree which concentrates on the development of management skills with a focus on comparative and international experience.

A key feature of the course is the wide range of options provided for persons seeking a specialisation.

Course Duration:

2 years full-time or 3 years part-time

Admission Requirements:

Applicants must have a degree or an award that, in the opinion of the University Academic Board, is the equivalent of a degree conferred by a tertiary institution recognised by the Board. In addition to holding a degree or an equivalent award, candidates should also have not less than two years of relevant work experience prior to admission.

Course Requirements:

Students must obtain 48 credit points, over the duration of the course.

In the first full-time (or equivalent part-time) year students are required to complete:
24 credit points obtained from six graduate level units, including three required units. The other units will be chosen in consultation with the Faculty and will be tailored to the interests and academic background of the student.

In the second full-time (or equivalent part-time) year the program requires:
24 credit points obtained from one required masters level unit and either four units selected from a range of elective masters level units, plus a research essay equivalent in value to one semester unit; or three elective masters level units and a dissertation equivalent in value to two semester units.

Status:

The Faculty will consider granting status for equivalent MPA units from courses at other tertiary institutions.

Specialisations:

Specific groups of elective units may be organised into specialisations; examples are given below.

Course Convener:

Dr Alan Jarman 6C23 (06) 201 2722

Typical Full-time Course Structure:

Master of Public Administration

	Semester 1	Semester 2
YEAR 1	3960 Management and Organisational Analysis G Graduate Elective 1 Graduate Elective 2	3977 Public Administration G 3942 Introduction to Planning and Policy G Graduate Elective 3
YEAR 2	3981 Public Sector Management M Masters Elective 1 Masters Elective 2	Masters Elective 3 4210 Administration Research Essay M *and* Masters Elective 4 *or* 4209 Administrative Dissertation M

Typical Part-time Course Structure:

Master of Public Administration

	Semester 1	Semester 2
YEAR 1	3960 Management and Organisational Analysis G Graduate Elective 1	3977 Public Administration G 3942 Introduction to Planning and Policy G
YEAR 2	Graduate Elective 2 Graduate Elective 3	Masters Elective 1 Masters Elective 2
YEAR 3	3981 Public Sector Management M Masters Elective 3	4210 Administration Research Essay M *and* Masters Elective 4 *or* 4209 Administrative Dissertation M

Specific groups of elective units may be organised into specialisation. The following illustrates some of the possibilities.

Development Administration

3922 Development Economics G
3923 Development Management G
3924 Economics for Managers G
3921 Development Administration M
3970 Organisation Design M

HANDBOOK 1996

Degree of Master of Taxation (by coursework) (297)

- Course Duration:
- Admission Requirements:
- Course Structure:
- Course Convener:
- Typical Full-time Course Structure:

This full-fee paying course, provides a professionally oriented specialised masters level course in taxation law and practice. The course seeks to equip students with advanced skills in taxation law and provide them with insights into tax law policy and comparative taxation.

Course Duration:

2 years full-time; maximum period of study 8 years.

Admission Requirements:

Applicants will normally be expected to have completed an appropriate 3 year degree or equivalent from a university. For those who hold a four-year degree or Graduate Diploma in Taxation or equivalent, advanced standing in the course of one year may be granted.

Course Structure:

The course requires students to undertake at least 10 taxation units and a two-unit dissertation unit. This will be adjusted for those granted advanced standing. Elective units can be chosen from up to five elective units available in the Faculty at the present time.

Course Convener:

Mr Michael Dirkis 6C7 (06) 201 2636.

Typical Full-time Course Structure:

HANDBOOK 1996

Degree of Doctor of Business Administration (325)

- Admissions Requirements:
- Advanced Standing:
- Course Structure:
- Academic and Research Structures:
- Course Convener:

The professional doctorate course in business administration seeks to provide opportunities for advanced study and reflection on practice in the professional fields of economics, accountancy, finance and related fields. Such opportunities are to be provided for professionals of standing in a relevant profession who will be able to draw upon their professional experience and expertise and to extend this experience and expertise.

The Doctor of Business Administration course will allow students to develop relevant research skills through a carefully designed program supplemented by a dissertation and relevant choice of electives.

The objectives of the Doctor of Business Administration course are to enable practitioners to extend and build upon their professional experience through:

(a) the development of research, writing and analysis skills which enable students to produce a dissertation which constitutes an original and significant contribution to the relevant literature and/or to professional practice;

(b) coursework undertaken in specific subjects;

(c) the preparation of a substantial dissertation which adds to our existing knowledge and constitutes an in-depth investigation and analysis of a particular professional issue or set of issues; and

(d) bridging the gap between theory and practice by developing closer links between the University and senior professionals in fields associated with business, economics and related disciplines.

Admissions Requirements:

Before a candidate will be admitted to the Doctor of Business Administration program by the University Higher Degrees and Scholarships Committee, the Faculty must be satisfied that it is able to supervise the candidate's proposed dissertation and that the candidate satisfies the following admission requirements:

(a) holds a bachelor degree in a relevant field which is of sufficient quality to gain entry into an honours program;

(b) has five years of professional practice in a relevant area;

(c) provides evidence of capacity for specialised coursework at the doctoral level and relevant professional development; and

(d) provides evidence of superior professional performance both intellectually and technically.

Advanced Standing:

Advanced standing, up to a value of 16 credit points, may be given for coursework units done previously and at the equivalent level of study, but not for the unit 4525 Preliminary Professional Project M.

Course Structure:

The course structure for the professional doctorate is comprised of two parts:

(i) completion of masters level coursework units (24 credit points) equivalent to one year of full-time study. This includes three compulsory units: Research Methodology (4 credit points), Business Research Methods (4 credit points), Preliminary Professional Project (8 credit points) and two electives (8 credit points).

(ii) completion of a dissertation of about 60,000 words comprising the equivalent of two years full-time and amounting to 48 credit points.

Academic and Research Structures:

Supervision of dissertations is undertaken by staff associated with the School of Accounting and Finance and the School of Economics, Banking and Marketing. There are currently two full-time professors who will be able to supervise students, together with a number of staff who hold PhD degrees and have substantial research records. A number of other staff who have substantial research records and professional experience will also be able to contribute to the supervision of Doctor of Business Administration students, either as primary or as secondary supervisors. See also `Library Facilities for Doctoral Students' in the General section of the Faculty's entry.

University of Canberra, AUSTRALIA

HANDBOOK 1996

Degree of Doctor of Legal Science (323)

- Course Duration:
- Admission Requirements:
- Course Convener:
- Course Structure:
- Academic and Research Structures:

The professional doctorate course in legal science seeks to provide opportunities for advanced study and reflection on practice in the professional field of law. Such opportunities are to be provided for professionals of standing in the legal profession who will be able to draw upon their professional experience and expertise and to extend this experience and expertise.

The School of Law has particular teaching and research strengths in the areas of corporate, business and taxation law, although the course will allow students to focus upon a range of areas.

The objectives of the course are to enable legal practitioners to extend and build upon their professional experience through:

- the development of legal research, writing and analysis skills which enable students to produce a dissertation which constitutes an original and significant contribution to legal literature;
- coursework undertaken in specific subjects;
- the preparation of a substantial dissertation which adds to our existing legal knowledge and constitutes an in-depth investigation and analysis of particular legal issue or set of issues; and
- bridging the gap between theory and practice by developing closer links between the University and senior professionals in fields associated with law and related disciplines.

Course Duration:

The minimum period for completion of the degree will usually be three years of full-time study or its part-time equivalent. Maximum period of candidature is 5 years full-time, or equivalent part-time.

Admission Requirements:

Before a candidate will be admitted to the Doctor of Legal Science program by the University Higher Degrees and Scholarships Committee, the Faculty must be satisfied that it is able to supervise the candidate's proposed dissertation and that the candidate satisfies the following admission requirements:

(a) holds a bachelor degree in law or an equivalent qualification;

(b) has five years of professional practice in a legal area;

(c) can provide evidence of capacity for specialised coursework at the doctoral level and relevant professional development; and

(d) can provide evidence of superior legal professional performance both intellectually and technically.

Course Convener:

Professor Eugene Clark 6C18 (06) 201 5287

Course Structure:

The course structure for the professional doctorate in law is comprised of two parts:

(i) completion of the equivalent of six masters level coursework units (24 credit points) equivalent to one year of full-time study. This includes a compulsory year-long unit in 4510 Advanced Legal Research and Writing M (8 credit points). Advanced standing, up to a value of 16 credit points, may be given for units done previously and at the equivalent level of study.

(ii) completion of a dissertation of about 60,000 words comprising the equivalent of two years full-time study and amounting to 48 credit points.

Academic and Research Structures:

Supervision of dissertations is undertaken by staff associated with the School of Law. There are currently two full-time professors of law who will be able to supervise students. The appointment of two adjunct professors of law by the University and an honorary professor of taxation law has further augmented the ability of the School of Law to provide supervision for dissertations. A number of other staff will also be able to contribute to the supervision of professional doctorate students, either as primary or as secondary supervisors. See also `Library Facilities for Doctoral Students' in the General section of the Faculty's entry.

HANDBOOK 1996

Degree of Doctor of Public Administration (324)

- Course Duration:
- Admission Requirements:
- Course Convener:
- Course Structure:
- Academic and Research Structure:

The professional doctorate program in public administration provides opportunities for advanced study and reflection on theory and practice in the professional field of public administration. These opportunities are provided for professionals of standing in public administration who will be able to draw on and extend their professional experience and expertise. The program is a combination of coursework and research dissertation.

Course Duration:

Candidature may be undertaken on a full-time or part-time basis. The maximum period of candidature is five years full-time or its part-time equivalent.

Admission Requirements:

Admission to candidature may be granted to applicants holding a degree of bachelor with honours (or its equivalent) in a relevant professional field and five years professional practice in public administration following a first degree. Candidates should also demonstrate the capacity to undertake specialised study at doctoral level and superior professional performance both intellectually and professionally.

Course Convener:

Professor John Halligan 6D1 (06) 201 2725

Course Structure:

The course structure for the professional doctorate in public administration is comprised of two parts:

(i) six postgraduate (masters level) coursework units equivalent to one year of full-time study and amounting to 24 credit points. These units are of two types: two specially designed compulsory units; four existing masters level units in public administration.

(ii) a dissertation of approximately 60,000 words, equivalent to two years of full-time study and amounting to 48 credit points.

Academic and Research Structure:

The School of Administrative Studies in the Faculty of Management has a long-standing reputation both in Australia and overseas as a centre of research excellence in public administration. The Faculty is also the location of the active and productive Centre for Research in Public Sector Management (CRPSM). Members of the Faculty and CRPSM pursue a range of research and consultancy specialisations and have experience both in Australia and overseas. Canberra also boasts excellent library facilities while its position as the centre for the Commonwealth government is an added advantage for students of public administration. See also `Library Facilities for Doctoral Students' in the General section of the Faculty's entry.

HANDBOOK 1996

Degree of Doctor of Philosophy (244)

- Corporate Law Specialisation
  - Course Duration:
  - Admission Requirements:
  - Course Convener:
  - Course Structure:
  - Academic and Research Structures:
- Public Sector Management Specialisation
  - Course Duration:
  - Admission Requirements:
  - Course Conveners:
  - Course Structure:

The Faculty offers PhD program in the fields of corporate law and public sector management.

Corporate Law Specialisation

The doctoral program in law has a particular focus upon corporate law and related professional problems. Candidates for the degree are required to undertake an original and sustained piece of research which contributes to a particular field of legal knowledge in this broad area.

Course Duration:

Candidature may be undertaken on a full-time or on a part-time basis. The minimum period of candidature is three years of full-time study, or part-time equivalent. The maximum period is five years of full-time study. The course may be completed in two years subject to the granting of status.

Admission Requirements:

Admission to candidature may be granted to students holding a bachelor degree with upper second class or first class honours, a masters degree or equivalent qualifications. The course convener should be consulted in regard to candidates who do not meet these criteria. Before a candidate will be admitted into the program by the University Higher Degrees and Scholarships Committee, the Faculty must be satisfied that it is able to supervise the candidate's proposed thesis and that the candidate has sufficient prior research experience to allow her/him to complete the thesis. Candidates who have been admitted into the program will be required to deliver a work-in-progress seminar during the first year of their candidature before this candidature is confirmed.

Course Convener:

Professor Roman Tomasic 6C29 (06) 201 2336.

Course Structure:

There is no coursework component. Students will be required to write a thesis of about 100,000 words. Where the Faculty believes that a student would benefit from undertaking a course in research methods, it may recommend that such a course be made a condition of candidature, in addition to the thesis requirement. Students enrol in the unit 4098 Doctoral Thesis in Corporate Law D (full-time) or 4099 Doctoral Thesis in Corporate Law D (part-time).

Academic and Research Structures:

Staff in the School of Law are especially interested in the supervision of topics and the area of corporate law having a law reform, comparative legal theory or legal policy dimension. Some limited research support is available to candidates from the National Centre for Corporate Law and Policy Research, located within the Faculty.

Some of the nation's major legal research collections are to be found in Canberra. These include the resources of the National Library and other more specialist departmental, judicial and institutional law libraries distributed around Canberra and accessible through the University of Canberra Library. See also `Library Facilities for Doctoral Students' in the General section of the Faculty's entry.

Public Sector Management Specialisation

This program is designed to promote original research at the doctoral level in the field of public sector management. Doctoral candidates are expected to make a significant contribution to knowledge or understanding and/or the application of knowledge within the field of public sector management.

Course Duration:

The minimum period for completion of the degree will usually be three years of full-time study or its part-time equivalent. Maximum period of candidature is 5 years full-time, or equivalent part-time.

Admission Requirements:

Admission to candidature may be granted to students holding a bachelor degree with first class or upper second class honours, a masters degree or equivalent qualifications. Applicants must be able to provide evidence of research experience, which may be shown by reference to prior studies, the completion of a higher degree involving research, publications, and/or other relevant evidence.

Course Conveners:

Associate Professor Mark Turner 6D9 (06) 201 2735, and Professor John Halligan 6D1 (06) 201 2725

Course Structure:

There is no compulsory coursework component for the doctoral degree although students may be required or recommended to take or monitor certain taught graduate or masters level units if these are appropriate. Students enrol in the unit 4106 Doctoral Thesis in Public Sector Management D (full-time) or 4107 Doctoral Thesis in Public Sector Management D (part-time).

The doctoral degree is awarded entirely on the basis of the doctoral thesis. Current candidates are researching Australian-focused topics which include the development of professional managers, organisational development in mega-departments and local government reform. The School of Administrative Studies and the Centre for Research in Public Sector Management also have strong interests in comparative and development administration, and have doctoral candidates currently researching urbanisation and housing policy in Tanzania, foreign aid policy in Thailand and public sector management in Nauru.
