

# Bachelor of Medical Radiation Science (Medical Imaging) (319JA.3)

Please note these are the 2023 details for this course

## Domestic students

<b>Selection rank</b>	89
	<b>Note:</b>
	The selection rank is the minimum ATAR plus adjustment factors required for admission to the program in the previous year. This is an indicative guide only as ranks change each year depending on demand.

<b>English language requirements</b>	There are non-standard English language requirements for this course. To be eligible you must have an overall IELTS Academic score (or equivalent) of 7.0, with no band score below 7.0. For alternate/equivalent ways of meeting the English requirements for this course please view the English Proficiency Requirements document on the university website.

## About this course

### Becomes an experienced qualified diagnostic radiographer – fast

If your career goal is to become a qualified diagnostic radiographer, but you're also looking for a competitive edge, then this course will give you the skills, knowledge, and experience to confidently apply for employment both in Australia and overseas – six months ahead of other diagnostic radiographer courses.

This course offers an accelerated four-year degree which completes all training in only 3.5 years allowing you enter the job market earlier and giving UC graduates a definite competitive advantage when it comes to looking for future employment opportunities.

Packed with Work Integrated Learning (WIL) choices, this unique course can include an embedded honours program, allowing you to study the bachelor's degree on its own for three and a half years, or undertake a research project in your third and fourth year to graduate with Honours.

Upon graduation, you'll be eligible for registration from the Medical Radiation Practice Board of Australia (MRPBA) to practice as a Diagnostic Radiographer and can explore career opportunities in general radiography, angiography, mammography, computed tomography (CT), magnetic resonance imaging (MRI) and medical ultrasound.

## Study a Bachelor of Medical Radiation Science (Medical Imaging) at UC and you will:

- gain a high level of ethical and interpersonal skills for interacting with patients from diverse backgrounds and cultures
- learn to effectively function as part of a healthcare team
- acquire and apply clinical reasoning, treatment and evaluation skills to basic and life sciences
- develop skills to undertake all routine diagnostic radiographic procedures
- learn to operate diagnostic radiographic instrumentation to optimise image quality and minimise radiation dose or other potential patient hazards
- develop skills in designing, implementation and management of quality assurance programs for medical imaging applications
- acquire professional attitudes and attributes as a reflective practitioner.

## Work Integrated Learning (WIL)

WIL is a key part of the Bachelor of Medical Radiation Science (Medical Imaging) program and has been created to give students valuable hands-on experience using a broad range of x-ray units within a simulated and controlled lab environment.

This approach builds confidence and has been created to ensure that all UC students are familiar and experience with real-world technology by the time they reach their first clinical placements.

Students will also participate in a variety of placements throughout the course including two five-week clinical placements during the second and third years of your studies and have the chance to take part in longer residences too.

Each placement can occur across several different local and/or national healthcare settings, including regional, rural, large teaching hospitals and private practice placements.

## Career opportunities

A Bachelor of Medical Radiation Science (Medical Imaging) is a globally recognised and respected qualification that will enable to pursue a career in any of the following positions.

- general radiographer
- mammographer
- angiographer
- magnetic resonance imaging (MRI) radiographer
- computed tomography (CT) radiographer

- clinical educator
- clinical researcher
- research manager
- vendor application specialist
- sonographer\*

To gain accreditation in this field\*, further postgraduate study is necessary.

## Course-specific information

The Bachelor of Medical Radiation Science (Medical Imaging) is an approved program of study by the Medical Radiation Practice Board of Australia (MRPBA), and graduates are eligible to apply for registration to practice in Australia as a Diagnostic Radiographer.

Assumed knowledge for entry is the HSC equivalent of Biology, Physics, and Mathematics.

There are non-standard English language requirements for this course. To be eligible, you must have an academic IELTS of 7.0 overall, or equivalent, with no band score below 7.0.

Before undertaking any clinical practice or clinical laboratory experience, you must:

- provide your immunisation history
- apply for a National Police Check
- have qualifications in first aid/CPR.

Eligible students who wish to complete the degree's embedded Honours option must attain a grade point average (GPA) of at least 5.5 in the first two years of the course and obtain approval stating that their supervisor has availability to oversee the project.

Graduating students will be able to gain registration to practice as a diagnostic radiographer, as well as being able to apply for a Statement of Compliance with the Australian Society of Medical Imaging and Radiation Therapy (ASIMRT) and eligible for membership.

## Professional accreditation

This course is accredited with the Australian Health Practitioner Regulation Agency (AHPRA) through the Medical Radiation Practice Accreditation Committee (MRPAC), the accreditation committee of the Medical Radiation Practice Board of Australia (MRPBA). Graduating students will be eligible to apply for registration as a Diagnostic Radiographer with the MRPBA.

# Admission requirements

Admission to this course is based on an entrance rank. A rank can be achieved by the following means:

- Year 12 ATAR
- other Australian Qualification
- work experience

- overseas qualification

We also offer a number of entry initiatives that give you the opportunity to gain entry to the University via alternate pathway programs and admissions schemes.

More information is available on our Alternative Entry page: <http://www.canberra.edu.au/future-students/applications/apply-now/alternative-entry>

Admission to this course is competitive. Applications will be assessed on the basis of academic merit and the number of available places. Domestic applications will open on the 1st September. First offer round applications must be received by 30th November with offers being released mid-December. Applications remain open while vacancies exist for ongoing consideration of offers.

Applications from international students are accepted on an ongoing basis while vacancies exist. Please refer to the key dates (<https://www.canberra.edu.au/future-students/apply-to-uc/key-dates>) for further information.

## Additional admission requirements

Police clearance checks

Immunisation

Current First Aid certificate

## Assumed knowledge

Assumed knowledge for entry is to HSC equivalent of Biology, Physics and Mathematics. Inherent Requirements: Clinical practice and/or clinical laboratories during the medical imaging course require students to: - be involved in encounters where students must physically interact with patients and/or other students coming from a range of ethnic, age, gender and disability backgrounds; - be physically capable to independently lift and move patients and equipment and to wear lead gowns (heavy) for extended periods of time; - be involved in patient encounters where patients may be severely injured or be at the end stage of terminal illnesses; - work in environments which may be highly stressful; - have vision able to visualise detail within medical images; - due to government requirements, wear clothing during clinical placements that does not cover the elbows and forearms; - attend clinical workplaces, for extended periods of time, in interstate, metropolitan, regional and rural areas.

## Periods course is open for new admissions

Year	Location	Teaching period	Teaching start date	Domestic	International
2023	UC - Canberra, Bruce	Semester 1	06 February 2023		
2024	UC - Canberra, Bruce	Semester 1	05 February 2024		

## Credit arrangements

There are currently no formal credit transfer arrangements for entry to this course. Any previous study or work experience will only be considered as part of the application process in accordance with current [course rules and university policy](#). Credit is not permitted towards completion of a graduate certificate.

# Course requirements

Bachelor of Medical Radiation Science (Medical Imaging) (319JA) | 96 credit points

**Restricted Choice - Must select 1 of the following**

[Expand All](#) | [Collapse All](#)

**Professional Stream - 9 credit points as follows**

**Open Electives - 3 credit points from the following**

- Select 3 credit points from anywhere in the University.

**Required - Must pass 6 credit points as follows**

Radiographic Imaging Capstone (10032) | 3 credit points – Level 4

Research in Medical Radiation Science (11475) | 3 credit points – Level 2

**Honours Stream - Must pass 9 credit points as follows**

Medical Imaging Project Design H (10017) | 3 credit points – Level H

Medical Imaging Research Project A H (11569) | 0 credit points – Level H

Medical Imaging Research Project B H (11570) | 6 credit points – Level H

**Required - Must pass 87 credit points as follows**

Systemic Anatomy and Physiology (6529) | 3 credit points – Level 1

Indigenous Health: Contemporary Issues (7434) | 3 credit points – Level 2

Regional Anatomy and Physiology (9808) | 3 credit points – Level 1

Introduction to Medical Radiation Science (9848) | 3 credit points – Level 1

Computed Tomography (10013) | 3 credit points – Level 3

Imaging Anatomy (10014) | 3 credit points – Level 2

Imaging Pathology (10015) | 3 credit points – Level 2

Informatics and Image Processing (10016) | 3 credit points – Level 2

MRS Practicum 1 (10020) | 3 credit points – Level 2

MRS Practicum 2 (10021) | 3 credit points – Level 3

MRS Residency 2 (9cp) (10024) | 9 credit points – Level 4

Physical Principles of MRS (10026) | 3 credit points – Level 2

Radiation Biology and Dosimetry (10027) | 3 credit points – Level 2

Radiographic Imaging 1 (10028) | 3 credit points – Level 2

Radiographic Imaging 2 (10029) | 3 credit points – Level 2  
Introduction to Research in the Health Sciences (11398) | 3 credit points – Level 1  
Understanding People and Behaviour (11399) | 3 credit points – Level 1  
Professional Orientation (Health) (11400) | 3 credit points – Level 1  
Data Analysis Skills for Science (11723) | 3 credit points – Level 1  
Contextual Physics with Mathematics (11725) | 3 credit points – Level 1  
Radiographic Imaging Interpretation 1 (11814) | 3 credit points – Level 3  
Specialised Planar Radiographic Imaging (11815) | 3 credit points – Level 3  
MRI and Ultrasound (11816) | 3 credit points – Level 3  
MRS Practicum 3 (11817) | 3 credit points – Level 3  
MRS Residency 1 (6cp) (11818) | 6 credit points – Level 3  
Radiographic Imaging Interpretation 2 (11819) | 3 credit points – Level 3

In addition to course requirements, in order to successfully complete your course you must meet the inherent requirements. Please refer to the [inherent requirements statement](#) applicable to your course

# Course information

## Course duration

This course is an accelerated course and can be completed in seven semesters and winter terms full-time. Maximum eighteen semesters.

This course is only available for full-time enrolment.

## Learning outcomes

Learning outcomes	Related graduate attributes
Integrate and apply, in an ethical and culturally safe manner, diagnostic radiographic procedures and protocols and radiation dose optimisation for safe professional practice; and implement quality assured work health and safety practices.	<p>UC graduates are professional: Employ up-to-date and relevant knowledge and skills; communicate effectively; use creativity, critical thinking, analysis and research skills to solve theoretical and real-world problems; work collaboratively as part of a team, negotiate, and resolve conflict; display initiative and drive, and use their organisational skills to plan and manage their workload; take pride in their professional and personal integrity.</p> <p>UC graduates are global citizens: Think globally about issues in their profession; adopt an informed and balanced approach across professional and international</p>

boundaries; understand issues in their profession from the perspective of other cultures; communicate effectively in diverse cultural and social settings; make creative use of technology in their learning and professional lives; behave ethically and sustainably in their professional and personal lives.

UC graduates are lifelong learners: Reflect on their own practice, updating and adapting their knowledge and skills for continual professional and academic development; be self-aware; adapt to complexity, ambiguity and change by being flexible and keen to engage with new ideas; evaluate and adopt new technology.

UC graduates are able to demonstrate Aboriginal and Torres Strait Islander ways of knowing, being and doing: Use local Indigenous histories and traditional ecological knowledge to develop and augment understanding of their discipline; communicate and engage with Indigenous Australians in ethical and culturally respectful ways; apply their knowledge to working with Indigenous Australians in socially just ways.

Demonstrate and apply high-level knowledge of the sciences, technology and socio-cultural dimensions that underpin the practice of medical imaging.

UC graduates are professional: Employ up-to-date and relevant knowledge and skills; communicate effectively; use creativity, critical thinking, analysis and research skills to solve theoretical and real-world problems; work collaboratively as part of a team, negotiate, and resolve conflict; display initiative and drive, and use their organisational skills to plan and manage their workload; take pride in their professional and personal integrity.

UC graduates are global citizens: Think globally about issues in their profession; adopt an informed and balanced approach across professional and international boundaries; understand issues in their profession from the perspective of other cultures; communicate effectively in diverse cultural and social settings; make creative use of technology in their learning and professional lives; behave ethically and sustainably in their professional and personal lives.

## Awards

Award	Official abbreviation
Bachelor of Medical Radiation Science (Medical Imaging)	B MRS(MI)
Bachelor of Medical Radiation Science (Medical Imaging) (Honours)	B MRS(MI)(Hons)

## Honours

Eligible students who wish to complete honours will enrol in and complete honours units for the embedded 4th Year Honours option.

Entry Requirements:

Attain a GPA of at least 5.5 in the first 2 years of the course and

Obtained supervisor project approval and availability to supervise the Honours project.
