

Bachelor of Software Engineering (560AA.7)

Please note these are the 2021 details for this course

Domestic students

Selection rank 60

Note:

The selection rank is the minimum ATAR plus adjustment factors required for admission to the program in the previous year. This is an indicative guide only as ranks change each year depending on demand.

English language requirements

An IELTS Academic score of 6.0 overall, with no band score below 6.0 (or equivalent).

[View IELTS equivalences](#)

Duration 3.0 years

UAC code 366103

Faculty Faculty of Science and Technology

Discipline Academic Program Area - Technology

Location UC - Canberra, Bruce

Fees 2021: Commonwealth Supported Place
2022: Commonwealth Supported Place

Disclaimer:

Annual fee rates

The fees shown are the annual fee rates for the course. The annual rate is the fee that applies to standard full-time enrolment, which is 24 credit points. The final fee charged is based on the proportion of 24 credit points in which a student enrolls. Students enrolled in a Commonwealth Support Place (CSP) are required to make a contribution towards the cost of their education, which is set by the Commonwealth Government. Information on Commonwealth Supported Places, HECS-HELP and how fees are calculated can be found [here](#).

International students

Academic entry requirements

To study at UC, you'll need to meet our academic entry requirements and any admission requirements specific to your course. Please read your course admission requirements below. To find out whether you meet UC's academic entry requirements, visit our [academic entry requirements page](#).

About this course

Secure yourself a future in software engineering

If the idea of exploring a career working as a highly qualified and in demand software engineer inspires you, then the UC Bachelor of Software Engineering is your key to developing the skills needed to open industry doors and progress naturally into life long career as a software engineer.

This course has been designed to develop and strengthen your communication skills and teach you how to critically analyse and construct systems in order to gain a clear and wholistic understanding of the software engineering spectrum.

As part of your studies you will go on to become proficient in a range of areas including design, coding and software specification which will give you a solid foundation in computer science and give you the necessary skills to be able to develop your own cutting-edge creations.

With the ability to tailor your course to focus on a range of areas, including robotics and AI, computer security, network computing, games development, digital forensics and intelligent systems, this course offers the perfect platform from which to explore and discover the career pathway that best suits your personal and professional objectives.

This course is accredited with the Australian Computer Society and has been designed to impart you with the skills, knowledge, and confidence to work as a qualified IT professional, in whichever area of the industry you choose to launch your career in.

This course offers the chance to specialise in Cloud Computing and Internet of Things, Cybersecurity and System Administration, Data Science

or Robotics and Artificial Intelligence.

Study a Bachelor of Software Engineering at UC and you will:

- discover how to read, interpret, design and write code.
- learn how to analyse and critique complex, large-scale software systems.
- gain high-level awareness of professional ethics, responsibilities, values and standards.
- achieve comprehensive insight into engineering aspects of computer science
- study the current programming languages at an intensive level
- understand the methodology of software systems engineering using analysis and specification methods such as UML, XML, structured and soft systems methodologies
- learn to design and build systems and software using specialist engineering tools
- work within modern development environments that include Windows, Linux, mobile and cloud computing.
- earn a globally recognised degree.

Work Integrated Learning (WIL)

Work-integrated learning (WIL) is an integral component of the UC Bachelor of Software Engineering course as it offers students the opportunity to gain valuable hands-on experience and build professional relationships through real work, or work-like placements.

To help encourage on the job learning, UC works hard to foster close industry connections with professional organisations - and as a result can offer unrivalled access to industry partners with the both the knowledge and resources to provide top level work placement positions and training opportunities.

Previous internments have taken placement at professional organisations such as: Intelledox, Omni Executive, Pursuit Technology, Qirx, Fujitsu Australia, Birdsnest, Agsafe, ThoughtPatterns Consulting, ESKAPEE, HydroAlgorithmics, ALLBIDS, VerveEd.com, Emanate Technology, Xero Australia and the Australian Taxation Office.

In your final year, you will also get to complete a real-world industry capstone project, working in teams producing and implementing a real-world software solution for a local business, government or community organisation.

Career opportunities

The UC Bachelor of Software of Engineering is an industry respected and globally recognised degree. UC's unique connections within the industry also means that students tend to establish strong professional relationships long before they graduate. This often means that students stand out from the competition and have a higher chance of successfully transitioning into any of the following careers:

- Software engineer
- Cloud computing architect
- Software and games developer
- ICT project manager
- ICT security specialist
- Chief Information Officer
- IoT engineer, developer or designer
- Cybersecurity specialist
- Service desk manager
- System administrator
- Cybersecurity operations manager
- Big data engineer

- Big data architect
- Data scientist
- Business intelligence specialist
- Artificial intelligence engineer
- Machine learning engineer
- Robotics specialist.

Course-specific information

This course is accredited by the Australian Computer Society (ACS) at the Professional level. High-achieving students may be eligible to enroll in Honours in Information Sciences, and there are clear pathways from this course to the Master of Information Sciences (Research) and other postgraduate degrees.

Professional accreditation

This course is accredited by the professional body, the Australian Computer Society, at the Professional level.

Admission requirements

Admission to this course is based on an entrance rank. A rank can be achieved by the following means:

- Year 12 ATAR
- other Australian Qualification
- work experience
- overseas qualification

We also offer a number of entry initiatives that give you the opportunity to gain entry to the University via alternate pathway programs and admissions schemes.

More information is available on our Alternative Entry page: <http://www.canberra.edu.au/future-students/applications/apply-now/alternative-entry>

Assumed knowledge

Basic knowledge and skills in ICT (Information and Communication Technology); Basic numeracy and literacy skills.

Periods course is open for new admissions

| Year | Location | Teaching period | Teaching start date | Domestic | International |
|------|----------------------|-----------------|---------------------|----------|---------------|

Credit arrangements

A credit transfer arrangement is available for this course for the following institutions:

Any International Higher Education Provider

[Any Overseas Qualification equivalent to the Australian Certificate IV \(AQF4\) in IT or related area \(28234\)](#)

Canberra Institute Of Technology

[Certificate IV in Cyber Security \(27096\)](#)

[Certificate IV in Information Technology \(27193\)](#)

[Certificate IV in Information Technology Networking \(27133\)](#)

[Certificate IV in Programming \(27173\)](#)

[Diploma of Information Technology + Cert IV in Information Technology \(27254\)](#)

[Diploma of Information Technology Networking + Cert IV in Information Technology Networking \(27255\)](#)

[Diploma of Software Development + Cert IV in Programming \(27194\)](#)

Chandigarh University

[Bachelor of Computer Applications \(27334\)](#)

Hunan University

[Study in Engineering Program \(24474\)](#)

Melbourne College Of Advanced Studies

[Bachelor Qualifying Program \(BQP\) Business Course \(Completion of one semester's study\) \(26353\)](#)

[Bachelor Qualifying Program \(BQP\) Business Course \(Completion of two semester's study\) \(26013\)](#)

[Bachelor Qualifying Program \(BQP\) Engineering Course \(26213\)](#)

[Bachelor Qualifying Program \(BQP\) Engineering Course \(Completion of 1st Semester\) \(26755\)](#)

[Bachelor Qualifying Program \(BQP\) Science-IT Course \(Completion of 1st Semester\) \(26813\)](#)

[Bachelor Qualifying program \(BQP\) Science-IT Course \(26235\)](#)

Nims College

[Bachelor of Arts in Computer Application at NIMS Tribhuvan University \(24291\)](#)

Other Australian Tafe

[Any Australian Certificate IV \(AQF4\) in IT or IT related area \(28235\)](#)

[Any Australian Diploma \(AQF5\) \(27413\)](#)

University Of Canberra College

Diploma of Information Technology (24472)

Diploma of Information Technology (Extended) (24473)

Course requirements

Bachelor of Software Engineering (560AA) | 72 credit points

Required - Must pass 48 credit points as follows

Core Major in Information Technology and Systems (CM0018) | 24 credit points

Required - Must pass 21 credit points as follows

Introduction to Information Technology (4478) | 3 credit points – Level 1

Database Design (5915) | 3 credit points – Level 1

Professional Practice in IT (7722) | 3 credit points – Level 1

Information & Communication Technology Project (9785) | 6 credit points – Level 3

Technological Innovation and Entrepreneurship (11408) | 3 credit points – Level 2

Systems Analysis and Modelling (11486) | 3 credit points – Level 1

Restricted Choice - Must pass 3 credit points from the following

Information Systems in Organisations (6348) | 3 credit points – Level 1

Introduction to Network Engineering (11485) | 3 credit points – Level 1

Note:

- 1. Students in the BIMT, BIT, BSE or BET courses should choose 11485 Introduction to Network Engineering.
- 2. Students in the BBI course should choose 6348 Information Systems in Organisations.
- 3. Students in the BSE/BBI combined course should do both 11485 Intro to Network Engineering AND 6348 Info Systems in Organisations. The extra cps will count towards the chosen Specialist Major.

Specialist Major in Software Engineering (SM0053) | 24 credit points

Required - Must pass 24 credit points as follows

Software Technology 1 (4483) | 3 credit points – Level 1

Discrete Mathematics (6698) | 3 credit points – Level 1

Software Technology 2 (7170) | 3 credit points – Level 2

Web Design and Programming (7175) | 3 credit points – Level 2

Technology and Engineering Management (9789) | 3 credit points – Level 3

System Software (11489) | 3 credit points – Level 3

Software Systems Architecture (11491) | 3 credit points – Level 3

Mobile Technologies (11492) | 3 credit points – Level 3

Restricted Choice - Must select 1 of the following

Option 1 - Must pass 24 credit points from the following

Specialist Major in Robotics and AI (SM0058) | 24 credit points

Required - Must pass 18 credit points as follows

Soft Computing (7168) | 3 credit points – Level 3

Engineering Mathematics (10087) | 3 credit points – Level 1

Foundations of Robotics (11370) | 3 credit points – Level 2

Computer Vision and Image Analysis (11376) | 3 credit points – Level 3

Advanced Robotics (11479) | 3 credit points – Level 3

Pattern Recognition and Machine Learning (11482) | 3 credit points – Level 3

Restricted Choice - Must pass 6 credit points from the following

Software Technology 2 (7170) | 3 credit points – Level 2

Information Sciences Internship (7899) | 3 credit points – Level 3

Information Sciences Internship (Extended) (10152) | 3 credit points – Level 3

Advances in Information Sciences and Engineering (11480) | 3 credit points – Level 3

Note:

- Restricted Choice units should be chosen to either meet the prerequisites of the units in the Major or to complement Major units for a better learning outcome.

Specialist Major in Cloud Computing and IoT (SM0055) | 24 credit points

Required - Must pass 15 credit points as follows

Contemporary IT & E Issues (9788) | 3 credit points – Level 3

Cloud Computing Architecture (11368) | 3 credit points – Level 3

Foundations of Robotics (11370) | 3 credit points – Level 2

Security and Support in IT (11488) | 3 credit points – Level 1

Internet of Things (11511) | 3 credit points – Level 3

Restricted Choice - Must pass 9 credit points from the following

Information Sciences Internship (7899) | 3 credit points – Level 3

Information Sciences Internship (Extended) (10152) | 3 credit points – Level 3

Law, Innovation and Technologies (11271) | 3 credit points – Level 3

Advances in Information Sciences and Engineering (11480) | 3 credit points – Level 3

Note:

1. Restricted Choice units should be chosen to either meet the prerequisites of the units in the Major or to complement Major units for a better learning outcome.
2. Exclusive to this Major only, students may also choose unit 11271 Law, Innovation & Technologies (offered by Faculty of Business, Government & Law) as one of the Restricted Choices units.

Specialist Major in Cybersecurity and System Administration (SM0056) | 24 credit points

Required - Must pass 15 credit points as follows

Computer and Network Security (8019) | 3 credit points – Level 3

Introduction to Digital Forensics (9074) | 3 credit points – Level 2

Network Architecture (11484) | 3 credit points – Level 3

Security and Support in IT (11488) | 3 credit points – Level 1

System and Network Administration (11514) | 3 credit points – Level 3

Restricted Choice - 9 credit points as follows

Part A - Must pass 3 credit points from the following

Enterprise and Cloud Computing (9281) | 3 credit points – Level 3

Contemporary IT & E Issues (9788) | 3 credit points – Level 3

Part B - Must pass 6 credit points from the following

Information Sciences Internship (7899) | 3 credit points – Level 3

Information Sciences Internship (Extended) (10152) | 3 credit points – Level 3

Advances in Information Sciences and Engineering (11480) | 3 credit points – Level 3

Information Security (11487) | 3 credit points – Level 2

Information Security (11759) | 3 credit points – Level 3

Note:

- 1. Restricted Choice units should be chosen to either meet the prerequisites of the units in the Major or to complement Major units for a better learning outcome.
- 2. Students who have not studied 11487 or 11759 Information Security in other Majors should choose this unit instead of a Restricted Choice unit.
- 3. Effective 1/7/21 the unit code for Information Security has changed from 11478 to 11759.

Specialist Major in Data Science (SM0057) | 24 credit points

Required - Must pass 15 credit points as follows

Introduction to Statistics (6540) | 3 credit points – Level 1

Data Analytics and Business Intelligence (8696) | 3 credit points – Level 3

Introduction to Data Science (11372) | 3 credit points – Level 3

Exploratory Data Analysis and Visualisation (11374) | 3 credit points – Level 3

Pattern Recognition and Machine Learning (11482) | 3 credit points – Level 3

Restricted Choice - Must pass 9 credit points from the following

Information Sciences Internship (7899) | 3 credit points – Level 3

Information Sciences Internship (Extended) (10152) | 3 credit points – Level 3

AR/VR for Data Analysis and Communication (11464) | 3 credit points – Level 3

Advances in Information Sciences and Engineering (11480) | 3 credit points – Level 3

Note:

- Restricted Choice units should be chosen to either meet the prerequisites of the units in the Major or to complement Major units for a better learning outcome.

Option 2 - 24 credit points as follows

- Must pass 24 credit points from anywhere in the University as a breadth major, a breadth minor and/or as individual units.

Individual units may only count towards one major. Only 3 majors can be completed in this course, including core, specialist and breadth majors.

In addition to course requirements, in order to successfully complete your course you may need to meet the inherent requirements. Please refer to the [inherent requirements statement](#) applicable to your course

| Explain and practice ICT profession, including professional ethics, professional expectations, team work skills, communication skills, societal issues, legal issues, and privacy issues etc. | <p>UC graduates are professional: Employ up-to-date and relevant knowledge and skills; communicate effectively; work collaboratively as part of a team, negotiate, and resolve conflict; display initiative and drive, and use their organisational skills to plan and manage their workload; and take pride in their professional and personal integrity.</p> <p>UC graduates are global citizens: Think globally about issues in their profession; understand issues in their profession from the perspective of other cultures; communicate effectively in diverse cultural and social settings; make creative use of technology in their learning and professional lives; and behave ethically and sustainably in their professional and personal lives.</p> <p>UC graduates are lifelong learners: Be self-aware; and adapt to complexity, ambiguity and change by being flexible and keen to engage with new ideas.</p> |

Formulate, appraise, and implement ICT solutions under the context of social and economic constraints, legal and ethical issues, risk and benefit balance, technology availability and stakeholders' acceptance, and the professional standards of the industry etc.

UC graduates are professional: Employ up-to-date and relevant knowledge and skills; communicate effectively; use creativity, critical thinking, analysis and research skills to solve theoretical and real-world problems; display initiative and drive, and use their organisational skills to plan and manage their workload; and take pride in their professional and personal integrity.

UC graduates are global citizens: Think globally about issues in their profession; adopt an informed and balanced approach across professional and international boundaries; understand issues in their profession from the perspective of other cultures; communicate effectively in diverse cultural and social settings; make creative use of technology in their learning and professional lives; and behave ethically and sustainably in their professional and personal lives.

UC graduates are lifelong learners: Reflect on their own practice, updating and adapting their knowledge and skills for continual professional and academic development; be self-aware; adapt to complexity, ambiguity and change by being flexible and keen to engage with new ideas; and evaluate and adopt new technology.

Demonstrate a good command of in-depth ICT Knowledge (information and communication technology) prescribed in ACS CBOK (Australian Computer Society, Core Body of Knowledge), with a focus on Technology Building, ranging from the business side to the technical side of ICT.

UC graduates are professional: Work collaboratively as part of a team, negotiate, and resolve conflict; and take pride in their professional and personal integrity.

Apply a broad and coherent knowledge of computer science and software engineering in diverse contexts and domains using critical thinking and judgment.

UC graduates are professional: Employ up-to-date and relevant knowledge and skills; communicate effectively; use creativity, critical thinking, analysis and research skills to solve theoretical and real-world problems; and display initiative and drive, and use their organisational skills to plan and manage their workload.

UC graduates are global citizens: Think globally about issues in their profession; adopt an informed and balanced approach across professional and international boundaries; make creative use of technology in their learning and professional lives; and behave ethically and sustainably in their professional and personal lives.

UC graduates are lifelong learners: Reflect on their own practice, updating and adapting their knowledge and skills for continual professional and academic development; adapt to complexity, ambiguity and change by being flexible and keen to engage with new ideas; and evaluate and adopt new technology.

Propose, formulate and invent appropriate strategies and contemporary tools to the scoping, analysis, design, construction, verification and operation of software systems.

UC graduates are professional: Employ up-to-date and relevant knowledge and skills; use creativity, critical thinking, analysis and research skills to solve theoretical and real-world problems; work collaboratively as part of a team, negotiate, and resolve conflict; and display initiative and drive, and use their organisational skills to plan and manage their workload.

UC graduates are global citizens: Think globally about issues in their profession; adopt an informed and balanced approach across professional and international boundaries; and make creative use of technology in their learning and professional lives.

UC graduates are lifelong learners: Reflect on their own practice, updating and adapting their knowledge and skills for continual professional and academic development; adapt to complexity, ambiguity and change by being flexible and

keen to engage with new ideas; and evaluate and adopt new technology.
