About this course

Never too late to change

If you're looking for an alternative career path that offers long-term career prospects and exponential growth, while also taking advantage of your existing qualifications - then the UC Master of Pharmacy course is the perfect next step.

This 2-year full-time course covers the science, chemical composition and application of medication, how medication impacts the human body; and how to apply scientific theory to the clinical reasoning and evaluation for an individual patient's medication.

This course has been specially designed to help bring you up to speed with the latest industry theories, research and innovations quickly and efficiently; and eventually provide you with the knowledge, skills, and qualifications required to become an officially registered and respected UC Pharmacy graduate.

If you want an internationally recognised career in an ever-expanding industry which offers a positive impact on patients' lives, then sign up for the UC Master of Pharmacy course today.

Complete a Master of Pharmacy at UC and you will:

- explore the theory and practical science of pharmacy
- study within a small and specialised learning environment
- gain the necessary knowledge, exposure, attitudes and clinical decision-making skills required to practice as a pharmacist
- engage through lectures, practical laboratory classes, and clinical placements
- undertake a series of problem-based clinical studies
- develop an understanding of healthcare consumers' needs
- gain direct experience of the regulatory side of pharmacy practice.
- be challenged by leading academics and industry experts
- establish essential professional networks

Work Integrated Learning (WIL)

WIL allows students to work alongside, with, or for professional or government organisations allowing you to gain valuable hands-on experience and build professional relationships before they graduate. This approach ensures that UC students are aware of what is going on in their specialist industries, possess a wide range of professional contacts, and as a result have a higher chance of employment upon graduation.

As part of this course, each student will have the opportunity to participate in multiple 2-week placements that take place over the winter semesters at metropolitan, rural or regional community and hospital pharmacies. Some students choose to do these placements overseas.

Students will also get to participate in half day or full day work placements throughout each of the teaching semesters.

Career opportunities

As the aging population continues to grow globally, the demand for qualified and skilled pharmacists who can also engage with patients across all demographics is expected to increase. UC Master of Pharmacy graduate will enter this market with the benefit of having been trained in a smaller, more personal, learning environment resulting in each student receiving a higher level of mentored education.

What this means is that UC Master of Pharmacy graduates are industry respected and will be more than adequately prepared for a variety of career options in either private or government pharmaceutical organisations.

Alternatively, graduates will also have the option to gain further qualifications by returning to university at a later date to continue their studies.

Course specific information

As part of the degree, students will be required to undertake clinical placements and will need to be able to prove that they are fully vaccinated and able to pass standard police checks to comply with government health and security regulations.

Professional accreditation

Professional accreditation from the Australian Pharmacy Council (APC) is being sought for this course.

Admission requirements

Applicants must meet all of the following criteria:

1. A completed bachelor degree in any discipline with a credit or higher average, and
2. A minimum of one unit (subject) of degree level (or higher) study in five of the following six disciplines - chemistry, biochemistry, microbiology, anatomy, physiology, and pharmacology.

Additional admission requirements

All students are also required to present current immunisation records prior to commencing clinical experience. Acknowledgement of the principles of ethical conduct and patient's privacy within the healthcare setting are sought from the students. Healthcare institutions will require

all students to abide by their guidelines for conduct within their environments.

Periods course is open for new admissions

Year	Location	Teaching period	Teaching start date	Domestic	International
2022	UC - Canberra, Bruce	Semester 1	07 February 2022	✓	✓
2023	UC - Canberra, Bruce	Semester 1	06 February 2023	✓	✓
2024	UC - Canberra, Bruce	Semester 1	05 February 2024	✓	✓

Credit arrangements

There are currently no formal credit transfer arrangements for entry to this course. Any previous study or work experience will only be considered as part of the application process in accordance with current [course rules and university policy](#). Credit is not permitted towards completion of a graduate certificate.

Course requirements

Master of Pharmacy (HLM501) | 48 credit points

Required - Must pass 48 credit points as follows

[Research Planning PG \(6486\)](#) | 3 credit points – Level P

[Clinical Therapeutics 1 G \(9400\)](#) | 3 credit points – Level G

[Clinical Therapeutics 2 PG \(9401\)](#) | 3 credit points – Level P

[Clinical Therapeutics 3 PG \(9402\)](#) | 3 credit points – Level P

[Clinical Therapeutics 4 PG \(9403\)](#) | 3 credit points – Level P

[Pharmacy Practice 1 G \(9405\)](#) | 3 credit points – Level G

[Pharmacy Practice 2 PG \(9406\)](#) | 3 credit points – Level P

[Pharmacy Practice 3 PG \(9407\)](#) | 3 credit points – Level P

[Pharmacy Practice 4 PG \(9408\)](#) | 3 credit points – Level P

[Systems Pharmacology 1 PG \(9410\)](#) | 3 credit points – Level P

[Systems Pharmacology 2 PG \(9411\)](#) | 3 credit points – Level P

[Systems Pharmacology 3 PG \(9412\)](#) | 3 credit points – Level P

[Dispensary Practice G \(11705\)](#) | 3 credit points – Level G

[Pharmaceutical Science G \(11706\)](#) | 3 credit points – Level G

[Pharmacy Practice 5 PG \(11707\)](#) | 3 credit points – Level P

[Research in Quality Use of Medicines PG \(11708\)](#) | 3 credit points – Level P

Research Planning PG: Students who have completed postgraduate level research training may substitute an Open Elective unit at Graduate or Postgraduate Level, as approved by the Course Convener.

In addition to course requirements, in order to successfully complete your course you may need to meet the inherent requirements. Please refer to the [inherent requirements statement](#) applicable to your course
