

Bachelor of Medical Science (NPB002.1)

Please note these are the 2024 details for this course

Domestic students

Selection rank	60
	Note: The selection rank is the minimum ATAR plus adjustment factors required for admission to the program in the previous year. This is an indicative guide only as ranks change each year depending on demand.

English language requirements	An IELTS Academic score of 6.0 overall, with no band score below 6.0 (or equivalent). View IELTS equivalences

Full Course

About this course

Understand the science behind the medicine

Gain a foundational understanding of human health and how disease works, to support your future career ambitions. Our Bachelor of Medical Science will provide you with comprehensive knowledge and skills, to understand the interactions between cellular chemical and biological sciences that underpin medical science.

Our new curriculum builds upon science as a core major, enabling you to study key areas like biology, chemistry and professional practice so you can understand our biological systems at the molecular, cellular, organ and whole organism level.

There is a strong emphasis on professional skills, and an integrated group work approach to examining contemporary issues in health and disease in the latter half of the degree.

In addition to the core science major, you'll also complete two specialist majors, the Pathological Basis of Disease and the Genetic Basis of Disease. This will allow you to develop the in-depth skills required to navigate the everchanging and fast-paced medical science industry.

Study a Bachelor of Medical Science at UC and you will

- Understand the function and structure of health and the human body, including our anatomy and physiology.
- Acquire reasoning, technical and communication skills to improve medical science outcomes.
- Develop critical thinking and data analysis skills to solve a range of real-world issues in health and disease from local and global contexts.
- Evaluate current and emerging ethical and cultural issues that arise in medical science.
- Select and apply tools to conduct scientific investigations relevant to medical science, while being transferable to a range of disciplines.
- Demonstrate the ability to collect scientific data individually and collaboratively, within legal, ethical and social frameworks.
- Critically analyse, synthesise and integrate scientific knowledge, literature, data, or arguments for effective communication to a range of audiences.

Work Integrated Learning

Step out of the classroom and into the real-world. Our professional practice units are embedded into this degree and allow you to conduct real life experiments. Work with the latest technologies and clinical practices in a range of laboratories in industry or government settings, or explore our own labs by undertaking research projects with support from UC researchers.

Career opportunities

The UC Bachelor of Medical Science will help you progress into any of the following career pathways:

- Biological Scientist
- Biotechnologist
- Medical Scientist
- Medical Science Officer
- Research Officer
- Scientific Evaluator
- Science Policy Officer

Course specific information

Our Bachelor of Medical Science is perfect for anyone wanting a career in medical science research, or for those with ambition to sit the Graduate Medical School Admissions Test (GAMSAT). Eligible students can then pursue postgraduate Medicine, while having the freedom to explore other career paths or study ambitions.

Professional accreditation

Not applicable.

Admission requirements

Admission to this course is based on an entrance rank. A rank can be achieved by the following means: Year 12 ATAR, other Australian Qualification, work experience, overseas qualification.

Assumed knowledge

Year 12 Biology (T)/Human Biology (T), Chemistry (T) and Mathematical Methods (T) or equivalent.

Periods course is open for new admissions

Year	Location	Teaching period	Teaching start date	Domestic	International
2024	UC - Canberra, Bruce	Semester 1	05 February 2024	✓	✓
2024	UC - Canberra, Bruce	Semester 2	29 July 2024	✓	✓

Credit arrangements

There are currently no formal credit transfer arrangements for entry to this course. Any previous study or work experience will only be considered as part of the application process in accordance with current [course rules and university policy](#). Credit is not permitted towards completion of a graduate certificate.

Course requirements

Bachelor of Medical Science (NPB002) | 72 credit points

Required - Must pass 72 credit points as follows

[Expand All](#) | [Collapse All](#)

Core Major in Science (CM0029) | 24 credit points

Required - Must pass 24 credit points as follows

[Professional Orientation \(Science\) \(11718\) | 3 credit points – Level 1](#)

[Professional Practice 1 \(Science\) \(11719\) | 3 credit points – Level 2](#)

[Professional Practice 2 \(Science\) \(11720\) | 3 credit points – Level 3](#)

Professional Evidence (Science) (11721) | 3 credit points – Level 3

Biological Concepts (11722) | 3 credit points – Level 1

Data Analysis Skills for Science (11723) | 3 credit points – Level 1

Chemical Concepts (11724) | 3 credit points – Level 1

Contextual Physics with Mathematics (11725) | 3 credit points – Level 1

Specialist Major in Medical Science - Pathological Basis of Disease (SM0081) | 24 credit points

Required - Must pass 24 credit points as follows

Systemic Anatomy and Physiology (6529) | 3 credit points – Level 1

Regional Anatomy and Physiology (9808) | 3 credit points – Level 1

Integrated Physiology (11726) | 3 credit points – Level 3

Mechanisms of Disease (11727) | 3 credit points – Level 2

Therapeutic Chemistry (11728) | 3 credit points – Level 2

Excitable Tissue Physiology (11729) | 3 credit points – Level 3

Infectious Diseases (11730) | 3 credit points – Level 3

Genetic, Metabolic and Autoimmune Diseases (11731) | 3 credit points – Level 3

Specialist Major in Medical Science - Genetic Basis of Disease (SM0082) | 24 credit points

Required - Must pass 24 credit points as follows

Introduction to Data Science (11372) | 3 credit points – Level 3

Foundations of Inheritance, Diversity and Evolution (11732) | 3 credit points – Level 1

Fundamentals of Biochemistry (11733) | 3 credit points – Level 2

Biochemistry and Metabolism (11734) | 3 credit points – Level 2

Bioinformatics (11735) | 3 credit points – Level 2

Genetics and Genomics (11736) | 3 credit points – Level 2

Advanced Genetics and Genomics (11737) | 3 credit points – Level 3

Advances in Research in Health and Medicine (11738) | 3 credit points – Level 3

In addition to course requirements, in order to successfully complete your course you must meet the inherent requirements. Please refer to the [inherent requirements statement](#) applicable to your course

Typical study pattern

UC - Canberra, Bruce

Standard Full Time, Semester 1 Commencing

Year 1

Semester 1

Biological Concepts (11722)

Contextual Physics with Mathematics (11725)

Professional Orientation (Science) (11718)

Regional Anatomy and Physiology (9808)

Semester 2

Chemical Concepts (11724)

Data Analysis Skills for Science (11723)

Foundations of Inheritance, Diversity and Evolution (11732)

Systemic Anatomy and Physiology (6529)

Year 2

Semester 1

Fundamentals of Biochemistry (11733)

Integrated Physiology (11726)

Introduction to Data Science (11372)

Mechanisms of Disease (11727)

Semester 2

Genetics and Genomics (11736)

Course information

Course duration

Standard 3 years full-time or equivalent. Maximum 10 years.

Learning outcomes

Learning outcomes	Related graduate attributes
Develop critical thinking and data analysis skills to solve a range of theoretical and contemporary real-world problems in local and global contexts, recognising the importance of entrepreneurship, innovation and work-integrated learning.	<p>UC graduates are professional: Employ up-to-date and relevant knowledge and skills; communicate effectively; use creativity, critical thinking, analysis and research skills to solve theoretical and real-world problems; work collaboratively as part of a team, negotiate, and resolve conflict; display initiative and drive, and use their organisational skills to plan and manage their workload; and take pride in their professional and personal integrity.</p> <p>UC graduates are global citizens: Think globally about issues in their profession; adopt an informed and balanced approach across professional and</p>

international boundaries; understand issues in their profession from the perspective of other cultures; communicate effectively in diverse cultural and social settings; make creative use of technology in their learning and professional lives; and behave ethically and sustainably in their professional and personal lives.

UC graduates are lifelong learners: Reflect on their own practice, updating and adapting their knowledge and skills for continual professional and academic development; be self-aware; adapt to complexity, ambiguity and change by being flexible and keen to engage with new ideas; and evaluate and adopt new technology.

UC graduates are able to demonstrate Aboriginal and Torres Strait Islander ways of knowing, being and doing: Use local Indigenous histories and traditional ecological knowledge to develop and augment understanding of their discipline; communicate and engage with Indigenous Australians in ethical and culturally respectful ways; and apply their knowledge to working with Indigenous Australians in socially just ways.

Critically analyse, synthesise and integrate scientific knowledge, literature, data, or arguments for effective communication to a range of audiences.

UC graduates are professional: Employ up-to-date and relevant knowledge and skills; communicate effectively; use creativity, critical thinking, analysis and research skills to solve theoretical and real-world problems; work collaboratively as part of a team, negotiate, and resolve conflict; display initiative and drive, and use their organisational skills to plan and manage their workload; and take pride in their professional and personal integrity.

UC graduates are global citizens: Think globally about issues in their profession; adopt an informed and balanced approach across professional and international boundaries; understand issues in their profession from the perspective of other cultures; communicate effectively in diverse cultural and social settings; make creative use of technology in their learning and professional lives; and behave ethically and sustainably in their professional and personal lives.

UC graduates are lifelong learners: Reflect on their own practice, updating and adapting their knowledge and skills for continual professional and academic development; be self-aware; adapt to complexity, ambiguity and change by being flexible and keen to engage with new ideas; and evaluate and adopt new technology.

UC graduates are able to demonstrate Aboriginal and Torres Strait Islander ways of knowing, being and doing: Use local Indigenous histories and traditional ecological knowledge to develop and augment understanding of their discipline; communicate and engage with Indigenous Australians in ethical and culturally respectful ways; and apply their knowledge to working with Indigenous Australians in socially just ways.

Demonstrate the ability to collect scientific data individually or collaboratively, within legal, ethical and social frameworks, with key laboratory, clinical and/or field-based competencies.

UC graduates are professional: Employ up-to-date and relevant knowledge and skills; communicate effectively; use creativity, critical thinking, analysis and research skills to solve theoretical and real-world problems; work collaboratively as part of a team, negotiate, and resolve conflict; display initiative and drive, and use their organisational skills to plan and manage their workload; and take pride in their professional and personal integrity.

UC graduates are global citizens: Think globally about issues in their profession; adopt an informed and balanced approach across professional and international boundaries; understand issues in their profession from the perspective of other cultures; communicate effectively in diverse cultural and social settings; and make creative use of technology in their learning and professional lives.
