

Statement of workplace support: MACE (Sport)

Note to applicant:

It is essential that a suitable supervisor from your workplace complete this form. Please upload the completed form with your application.

Note to referee

The MACE program is a two or three year applied program aimed to offer education into the management of specific populations in high performance sport and defence. The MACE Program is designed to equip students for senior management positions in high performance sport and defence where the health of the populations is required to achieve success.

This statement is to ensure that the candidate has support from the workplace, to enable their study to include analysis of their workplace processes and a project for workplace improvement during their study of athlete and defence personnel injury prevention and health. This support is necessary for admission of the candidate to the postgraduate MACE Program at the University of Canberra in association with the Australian Institute of Sport.

Please return the completed and signed form to the MACE applicant for submission.

Statement by the workplace supervisor

I support the above-named candidate for entry to the Master of Applied Clinical Epidemiology (Sport). This workplace will provide access to suitable athletes or defence staff within the conduct of normal business, to enable completion of staff and athlete management projects within the study of the MACE (Sport) course.
