

UNIVERSITY OF
CANBERRA

Writing a Report

Session overview

- What is a report?
- What are the differences between essays and reports?
- How do I structure a report?
 - What sections are included?
 - How do I number each section?
 - How do I format a report?
- What kind of language should I use in a report?

What is a report?

The purpose:

- Reports are usually **commissioned** or **requested** by a person or an organisation in order to get information about something
- The report is, therefore, a written presentation in response to that specific request and its purpose

The aim:

- To give a straightforward, clearly-structured account of something, to answer a question and often, to offer solutions to a problem

Comparing reports and essays

Reports

Reports present *facts/information*, the aim being to explain them as clearly as possible

Reports are written for the *person* or *organisation* that requested them

Reports will be *scanned*, which means the most important information needs to be easily accessible, and summarised where appropriate

Reports end with a conclusion *and recommendations* for addressing issues raised in the report

Essays

Essays argue or discuss an issue, incorporating the author's own stance

Essays are written for a lecturer

Essays will be read carefully

Essays end with a conclusion

Structuring a report

Most reports will contain the following sections (in this order):

- Letter of transmittal
- Title page
- Table of contents
- List of figures
- Executive Summary
- Introduction
- Body
- Conclusion
- Recommendations
- Bibliography
- Appendices

Structuring a report

Letter of transmittal

A letter to the person who commissioned the report
“announcing” the completion and delivery of the report

- Include
 - Salutation (e.g. Dear Ms Watson)
 - The purpose of the letter (e.g. here is the marketing report you commissioned)
 - The main findings of the report
 - Mention any important considerations
 - Acknowledge any particular help
 - Thanks

Structuring a report

Title page

The 'cover' of the report, which presents the key details in a professional layout

Include:

- The name of the report (i.e. the topic of the report)
- The organisation that commissioned it
- Your name (and student number)
- The date

Structuring a report

Table of contents

Important for allowing readers to quickly access the information they need

- Show each of the numbered points and sub-points
- Include page numbers for each
- Include a list of figures if necessary
- Include a list of appendices
- Ensure your layout is clear and professional

Structuring a report

Table of contents

1. Introduction
2. Literature Review
 - 2.1 Theories of reward
 - 2.2 Reward in Practice
 - 2.2.1 Example – Company 1
 - 2.2.2 Example – Company 2
3. A review of rewards at UC
 - 3.1 Rewards written into policy
 - 3.2 Other commonly used rewards
4. UC staff response to rewards

Structuring a report

Summary / executive summary / abstract

Some readers will not wish to read the entire report, so the summary / abstract presents the entire report in brief (roughly one page)

Include:

- who requested the report
 - purpose
 - background context
 - brief methodology
 - main findings, and
 - Recommendations
-
- Use paragraphs for an abstract and paragraphs / dot points for an executive summary
 - Make sure the layout is methodical, working through each section of the report clearly

Structuring a report

Introduction

- State who commissioned the report
- Briefly explain the context / problem that triggered the report, giving any necessary background information
- Clearly state the purpose of the report and its scope (i.e. what it **does and does not** cover)
- Mention the types of sources used (i.e. texts, surveys, observation, interviews)

Structuring a report

Body of report

- Literature review (if applicable)
- Research methodology
 - Explain what you did and why, mentioning any possible problems
- Your findings
 - State the facts clearly
 - Include graphs and charts where appropriate and label them
- Discussion
 - Discuss and interpret the findings
 - Can be organised into discrete, relevant sections

Structuring a report

Conclusion

- Sum up your main findings and key points of discussion
- Make sure that you do not bring in any new information
- Be brief and to the point – you should already have reported on everything in sufficient detail

Structuring a report

Recommendations

After 'reporting' on the present state of your particular topic, you need to make recommendations about what should now occur in response to your findings

- These recommendations should evolve from your findings, discussion and conclusions
- Use dot points so each recommendation can be read easily
- This section can be a section that stands alone, **OR**
- This section can be sequenced after each finding and discussion

This report makes the following recommendations:

- That...
- That...
- That...

Structuring a report

Reference List

- Begin on a new page
- Use the style required in your unit

Structuring a report

Appendices

Appendices are the place to include any data too bulky to place in the body of your report

You might include:

- Your survey tool (but not all your responses)
- Any graphs or tables too large for the body

Number each appendix clearly (i.e. Appendix A)

Structuring a report

Formatting

- Make sure your numbering system is clear and accurate
- Use a header and/or footer with the name of the report and page numbers
- Be professional not pretty
 - Ensure your wording and formatting are consistent and meticulous
- Use a clear and formal typeface: Times New Roman or Helvetica are best
- Tables and graphs must have a title and be clearly labelled
- Use plenty of white space

Language in a report

Language should be formal language, but simple and clear

- By and large, sentences should be short, relieved when appropriate by some complex sentences
- Use sub-headings and dot points when appropriate, but also include paragraphs with topic sentences
- Read other reports to get a feel for the language

Book Individual
consultations and
drop-in sessions
online

☎ | 02 6201 2205
✉ | asc@canberra.edu.au
✉ | Building 8, Library
