

# CAMPUS ESTATE SAFETY ALERT

22 August 2018

## CONTRACTOR INJURIES & REPORTING

An article in the [Canberra Times](#) recently highlights the negative culture regarding injuries in the construction industry and should be a reminder to everyone to ensure that our contractors and staff are taking their personal health & safety as priority and to be aware of workplace culture around Safety.

***“64% of tradies said that they had been injured in their current job”*** how many of these are reported?

UC are committed to providing a safe and healthy environment for all and reporting [incidents and hazards](#) is an important part of ensuring this. If you or your contractors have sustained an injury, a near miss or identified a hazard not matter how big or small, you must report it immediately to your UC Supervisor and ensure it is reported in the [UC Incident Reporting tool](#). Having a record of all incidents (even if no injury occurred) will allow us to take preventive action and to provide support.
