HDR industry internships

Work with us to shape the next
generation of research leaders

UNIVERSITY OF
CANBERRA

About the research internship

Partnering with the University of Canberra (UC) on a research internship gives your organisation the opportunity to collaborate with exceptional doctoral candidates who bring fresh ideas, specialised expertise, and strong research capability.

Our HDR candidates work across a wide range of research areas including education, environment, culture, creativity, technology, government and health, making it easy to find the right match for your organisational goals.

Benefits

For your organisation

Solve real challenges through research-driven insights

Our HDR candidates bring advanced research skills to explore solutions, test ideas, and contribute to meaningful innovation.

Build your future workforce

Engage with highly skilled emerging researchers and strengthen your potential employee pipeline.

Collaborate with leading researchers

Work closely with UC academics and contribute to research that benefits both industry and the broader community.

For our HDR candidates

New insights

Internships enhance research quality by broadening context and deepening candidates' understanding in their area of research.

Practical industry experience

Acquire practical skills, and develop capabilities and expertise within industry.

Professional Networks

Connections with industry support candidates to develop their future career pathways.

Funding and cost considerations

Funded internships are welcomed and greatly valued.

However, financial commitment is not a requirement for you to host a UC research internship. Your contribution comes through providing a meaningful project, a suitable work environment, and staff supervision.

Whether funded or unfunded, your partnership plays a vital role in developing Australia's next generation of research leaders.
