

Hermit crabs dream - Alex Ashurst

Hermit crabs dream was created for an assignment based on surrealism. The project made us pick random words from a box and draw a piece including all of them however we decided to interpret them. My words were Chess piece, feather, shell, clock and tower. I decided to interpret the shell as a hermit crabs shell and make that the main focal point of my piece while creating a very dream-like environment for it that contained a sense of movement.
