

Boody competition entry artist statement

"Echidna's Picnic" is a t-shirt design that hopes to encapsulate the comfort and serenity we derive from nature. Inspired by Boody's Australian origins, this design showcases the echidna, a unique Australian animal. While highlighting Australian wildlife, the design aims to celebrate the individuality of each creature, fostering an appreciation for the diverse wonders of our natural world. By focusing on intricate details and capturing the spirit of life, like watching the trees, bugs and flowers. The design invites viewers to pause and appreciate the beauty in the smallest of things. I hope that my t-shirt design creates a greater sense of interconnectedness between humans and the special creatures we share this world with.
