

SHAPE • EMPHASIS

SHAPE • EMPHASIS EVALUATION

This photo elucidates the element of shape by placing emphasis on the clover that is floating on top of a pool of water, conveying a sense of solitary peace and stillness. As the clover is emphasized to be the only object with colour through editing while the background reflections in the water remain blurred and monotone, it becomes singled out and alone - This creates a sense of loneliness to the viewer. However, the rounded, organic shape of the clover, unbroken water tension, and motionless surface of the water shows stillness in movement and symbolizes peace as everything is left undisturbed, as if frozen in time. Moreover, the orderly pattern created by the bar shapes in the reflection further contributes to creating a sense of peace and order. Therefore, the features and editing in this photograph such as the emphasized rounded clover and minimal water movement produces a sense of solitary calmness, making the viewer feel at peace.
