

Panel 1 initial sketch:

Panel 2 initial sketch with flip out sketches

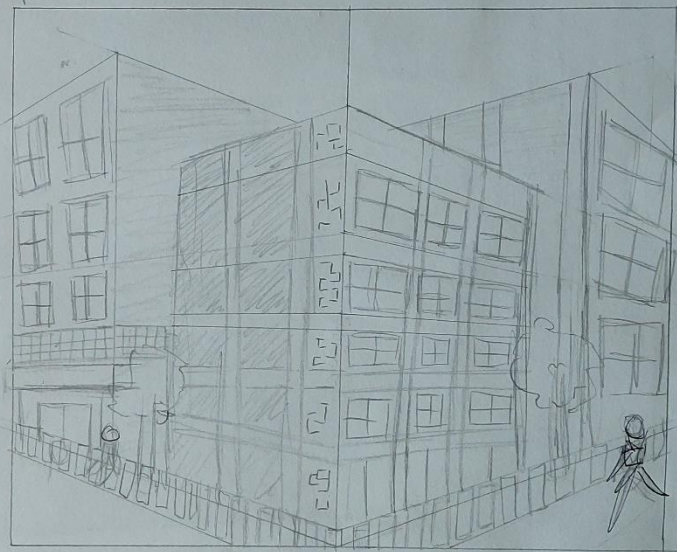

Proposed Panel 3 Sketch- did not have enough time to complete

Final Panel one Sketch to ensure that I understood what each building would look like

here is my final design for panel 1: It is more detailed as it is meant to be the normal before the destruction therefore I wanted to have a cleaner design. I have also now added people however they are not as detailed as they will be in my final artwork. There are very geometric shapes compared to the other panels to

panel 1:  
further create a juxtaposition between panel 1 and 2 & 3. There are also now trees in this panel because I wanted that to represent the loss of life from the trees falling between panel 1 & 2. The people help to show viewers that everyone who was effected by these earthquakes had a normal life before them. I will though in my final artwork make sure all lines are straight to add to this juxtaposition.

Finished piece- Panel 1 (opens in the middle of the middle building)

Finished piece- Panel 2 with flip outs up

Finished piece- Panel 2 with flip outs open
